PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

## SENATE—*Friday, August 25, 1978*

*(Legislative day of Wednesday, August 16, 1978)*

The Senate met at 8:15 a.m., on the expiration of the recess, and was called to order by Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota.

### PRAYER

The Honorable CARL T. CURTIS, a Senator from the State of Nebraska, offered the following prayer:

Our Father, who art in heaven, in whom we live and move and have our being, we thank Thee for Thy guiding hand in the founding of our country, and we humbly pray that Thou will bless and preserve the United States of America. Imbue the citizens of our Republic with patriotism, honesty, and self-reliance. Open our minds to the truth that blessed is the nation whose God is the Lord. Give us vision that we perish not. Make us a nation of uncommon men and women. Forgive our national and personal sins and make us worthy of the liberty and freedom that is ours. Renew in us the faith of our fathers and accept our thanks for our many blessings.

We pray Thy blessing upon the Senate of the United States, the Members, their staffs, and all who labor in this place. May every action taken this day and always, be in accord with Thy holy will. We ask in the name of Thy Son, our Saviour, Jesus Christ. Amen.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., August 25, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable QUENTIN N. BURDICK, a Senator from the State of North Dakota, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mr. BURDICK thereupon assumed the chair as Acting President pro tempore.

### RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

### THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

### SENATOR CURTIS CONGRATULATED

Mr. ROBERT C. BYRD. Mr. President, it always gives me great pride when a Member of our own delivers the prayer before the session begins. CARL CURTIS this morning has performed that high calling. It reminds me of that passage in the Scripture, I think it was Isaiah, who said, "Here am I; send me."

I congratulate the Senator from Nebraska. I congratulate him on his patriotism, his steadfast integrity, and on his unshakable belief in the Creator who rules over the destinies of men and nations. He is a fine Senator.

Mr. CURTIS. Mr. President, I thank the distinguished leader very much.

### EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are a few nominations that are ready for confirmation. I ask unanimous consent, if it meets with the approval of the distinguished acting Republican leader, that the Senate go into executive session to consider the nominations on the calendar, all of which have been cleared, I believe.

Mr. STEVENS. That is correct, Mr. President.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will read the first nomination.

### DEPARTMENT OF STATE

The second assistant legislative clerk read the nomination of Mary S. Olmsted, of Tennessee, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Solomon Islands.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

### INTERNATIONAL ATOMIC ENERGY AGENCY CONFERENCE REPRESENTATIVES

The second assistant legislative clerk read the nomination of Dale D. Myers, of Virginia, to be the representative of the United States of America to the 22d session of the General Conference of the International Atomic Energy Agency.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Gerald C. Smith, of the District of Columbia, and Roger Kirk, of the District of Columbia, to be alternate representatives of the United States of America to the 22d session of the General Conference of the International Atomic Energy Agency.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed.

### U.S. AIR FORCE

The second assistant legislative clerk read the nomination of Maj. Gen. Howard MacLane to be lieutenant general.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

### U.S. NAVY

The second assistant legislative clerk read the nomination of Vice Adm. Harry D. Train II to be admiral.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Adm. Isaac C. Kidd, Jr., to be placed on the retired list in the grade of admiral.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

### DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of Tyree A. Richburg, of Alabama, to be U.S. marshal for the southern district of Alabama.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

## DEPARTMENT OF THE INTERIOR

The second assistant legislative clerk read the nomination of Roger A. Markle, of Utah, to be Director of the Bureau of Mines.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

## DEPARTMENT OF ENERGY

The second assistant legislative clerk read the nomination of Ruth C. Clusen, of Wisconsin, to be an Assistant Secretary of Energy (Environment).

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

## NEW REPORTS

### FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

The second assistant legislative clerk read the nominations of Marian Pearlman Nease, of Maryland; Frank F. Jestrab, of North Dakota; A. E. Lawson, of Pennsylvania; Richard V. Backley, of Virginia, and Jerome R. Waldie, of Maryland, to be members of the Federal Mine Safety and Health Review Commission.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed.

## NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE ARMY AND NAVY

The second assistant legislative clerk proceeded to read sundry nominations in the Army and in the Navy placed on the Secretary's desk.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

(All nominations confirmed today are printed at the end of the Senate proceedings.)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move en bloc to reconsider the vote by which the various nominees were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make that motion.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominees.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## TAX CONVENTION WITH THE REPUBLIC OF KOREA

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that it be in order at any time to order the yeas and nays on the tax convention with the Republic of Korea.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that when the legislative business is completed today, the Senate proceed with a vote on the tax convention with the Republic of Korea.

Mr. STEVENS. Reserving the right to object, Mr. President, I had been of the understanding that last evening, the Senator from West Virginia, the distinguished majority leader, indicated that would be called up the week of the 11th. Was I mistaken?

Mr. ROBERT C. BYRD. I did not understand it was to be the week of the 11th. I understood it was to be at a time when the Senator from Alaska is here. If he prefers that it be the week of the 11th, that will be agreeable to me.

Mr. STEVENS. I make that request. I shall not be able to return until the 11th.

Mr. ROBERT C. BYRD. All right. The Senator will not be able to do it today?

Mr. STEVENS. It may be possible to do it later today.

Mr. ROBERT C. BYRD. All right, then, we will leave that in abeyance.

Does the Senator from South Dakota need any additional time over and above his 15 minutes?

Mr. McGOVERN. I think not.

Mr. ROBERT C. BYRD. If he does, Mr. President, I ask unanimous consent that my remaining time may be allotted to him.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McGOVERN. I thank the distinguished majority leader.

Mr. STEVENS. Mr. President, I yield to the majority leader part of the minority leader's time.

## CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Orders numbered 1054 and 1055.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## BROADER ELIGIBILITY FOR THE JUNIOR RESERVE OFFICERS' TRAINING CORPS PROGRAM

The bill (H.R. 7161) to amend title 10, United States Code, to allow nationals, as well as citizens, of the United States to participate in the Junior Reserve Officers' Training Corps program, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. I move to reconsider the vote and to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1135), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

H.R. 7161 is designed to permit nationals of the United States, as well as citizens, to participate in the Junior Reserve Officers' Training Corps program.

The bill will have the effect of permitting a Junior Reserve Officers' Training Corps program to be established in American Samoa.

BACKGROUND

The Junior Reserve Officers Training Corps was established to provide a vehicle for developing informed and responsible citizens, to help form habits of self-discipline in the student participants, and to provide information on the basic elements and requirements of national security. One of the requirements established for Junior ROTC at the time of its enactment (Public Law 88–647, October 13, 1964) was that student participants must be citizens of the United States. That provision, found in section 2031 (b) (1) of title 10, United States Code, has effectively prevented the establishment of a Junior ROTC program in American Samoa, since its residents are not U.S. citizens but U.S. nationals under relevant immigration and nationality statutes.

The House-passed bill, H.R. 7161, would simply broaden the coverage of the Junior ROTC program to both nationals and citizens, making it possible for a unit to be established in American Samoa. The report of the House Committee on Armed Services noted the desire of American Samoans to establish such a program, and the inequity in the present statutory language. The House report also cited the consistent and significant contributions made by residents of American Samoa to the defense of the United States since it became a U.S. territory in 1900.

The committee fully endorses the change proposed in H.R. 7161 A similar Senate bill, S. 1607, would accomplish the same statutory change.

## U.S.S. "WYOMING"

The bill (H.R. 8471) to authorize the Governor of the State of Wyoming to exhibit the nameplate, ship's bell, and silver service of the U.S.S. *Wyoming* without restriction as to the place of such exhibition, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. I move to reconsider the vote and lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1136) explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The legislation authorizes the Governor of the State of Wyoming to exhibit the nameplate, ship's bell, and silver service of the U.S.S. *Wyoming* without restriction as to the place of such exhibition.

BACKGROUND

Existing law, Public Law 397, 79th Congress, 60 Stat. 234, provides for exhibition of the nameplate, the ship's bell, and the silver service of the U.S.S. *Wyoming* at the University of Wyoming. The State government now desires to display the silver service at the Wyoming State Museum.

Senators Wallop and Hansen had introduced S. 1908 to convey title of these items to the Governor of Wyoming and to provide for display of the silver service at the Wyoming State Museum. H.R. 8471 provides the State of Wyoming with some flexibility for display of these items with title remaining with the Department of the Navy. Senators Wallop and Hansen wrote the committee requesting that H.R. 8471, as passed by the House, be favorably reported.

## ORDER OF BUSINESS

Mr. STEVENS. Mr. President, there is no request for time on our side. If the Senator from South Dakota needs extra time, we will be happy to yield him our time.

Mr. McGOVERN. I appreciate that.

## SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from South Dakota (Mr. McGOVERN) is recognized for not to exceed 15 minutes.

## A QUESTION OF CONSCIENCE AND CIVILIZATION

Mr. McGOVERN. Mr. President, a generation ago the world stood silently on the sidelines while Hitler systematically exterminated 6 million of our fellow humans. When the full horror of this genocide finally struck the conscience of humanity, we vowed "Never again." Never again would we remain silent in the face of such barbarism. There was, of course, a special horror about Hitler's diabolical plot to exterminate an entire people identified by a common religious heritage. The crime of Hitler stands alone in its terrifying dimensions.

But, however different in concept and execution, a massive slaughter is once again taking place in our time. For the past 3 years in beautiful, ancient Cambodia, a band of murderous thugs has been systematically killing their fellow citizens. Two million Cambodians are said to have been destroyed. But the world turns its face and stills its voice and dulls its conscience. Nothing is done.

The United Nations, charged with the maintenance or restoration of international peace and security, does nothing. Our own Government, while proclaiming its concern for human rights, is seemingly ineffective in confronting the issues of life and death in Cambodia. Cambodia's chief ally, China, seems to be doing nothing to contain the slaughter; indeed, it provides arms and support to the Cambodian regime.

We have rightfully deplored the mistrial of two dissident citizens of the Soviet Union, but where is our voice in international councils about the 2 million people who may have died in Cambodia? Do we turn away because of the bitter mistakes we made for so long in Vietnam, which helped to unleash the savagery of Cambodia? Do we turn away, because Cambodia is small and weak? Do we turn away, because Cambodians are orientals far from our shores?

Mr. President, it is well known that I hate needless and ill-conceived military ventures. That is why I opposed our military intervention against Ho Chi Minh's popularly based revolution for independence in Vietnam.

But to hate a needless and foolish intervention that served no good purpose does not give us the excuse to do nothing in the face of mass murder in another time and place and under vastly differing circumstances. Cambodia challenges the conscience and decency of the world. It cries out for a carefully conceived response from the international community to end the slaughter.

I call upon our Government to pursue this matter at the Security Council of the United Nations. Will we wait until 6 million Cambodians have died before we recognize that another holocaust is unfolding in our time? Or will we proceed under chapter VII of the U.N. Charter to challenge the conscience and civil instincts of the world community in taking collective action to halt the slaughter of the innocents?

Cambodia puts the question of human rights before humanity in its starkest form. If we fail at least to ask the questions, and to seek the answers, and to consider what action is appropriate for the United Nations, then let us dip the standard of human rights and confess the impotence of the world community to respond to the world's most flagrant evil.

Frequently, during my long years of opposition to our interference in the Vietnamese struggle for independence, I quoted Edmund Burke's words:

A conscienctious man would be cautious how he dealt in blood.

But I have never forgotten that there are times when interference is necessary to stop needless bloodletting. That is why as a young man I volunteered with millions of others to halt the blood purge of Adolf Hitler. That is why I believe the nations of the world must counsel together on what steps are most appropriate to end the blood purge in Cambodia. That is why I authored legislation that was approved by the Senate and House conferees on this year's State Department authorization bill in which "Congress urges the President to move aggressively to support multilateral action by the United Nations and other international organizations, and to encourage bilateral action by countries having more extensive relations with Cambodia and Uganda, to bring about a lessening of such brutal and inhumane practices."

At the very least, let us put Cambodia on the agenda for debate at the next meeting of the United Nations Security Council.

Mr. President, since I made reference to the tragedy in Cambodia several days ago, in a hearing before a subcommittee of the Committee on Foreign Relations, there have been considerable comments about the queries that I have raised. The Department of State briefing officer, on August 22 of this week, was queried at some length about the issues which I had raised. I ask unanimous consent that appropriate excerpts from the news briefing of the Department of State of August 22 be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPT, NEWS BRIEFING, DEPARTMENT OF STATE

Q. Tom, would you like to comment on Senator McGovern's proposal for a multinational peacekeeping force in Cambodia?

A. Yes. The United States does not intend to initiate an effort to resolve the terrible human rights situation in Kampuchea by military force, nor are we aware of any international support for a plan to affect the situation in Kampuchea through the use of military force.

The United States' position on Cambodia is clear. The President has described the Kampuchean Government as the worst violator of human rights in the world, and the United States Government recognizes that the extent of human rights abuses in Kampuchea makes the situation there a special case. Although the United States has no means of direct influence in Phnom Penh, we will continue to do everything in our power through consultations with other governments, through efforts at the United Nations, and in other international fora, to focus international attention on the inhuman situation in Kampuchea—this in order to seek an end to the monstrous human rights violations there.

Q. Tom, you said the United States does not intend to initiate an effort. Would you join one?

A. That's a hypothetical situation. As I say, we know of no support in the international community for resolving that situation by military force. It's an entirely hypothetical question.

Q. Tom, when you say, "this in order to seek an end to the monstrous human rights violations there," how do you propose to seek an end?

A. I think as I noted, we don't have relations with Kampuchea; therefore, we don't have a way of talking directly through normal diplomatic channels. But we are in consultation with other governments about this situation. We are active in the United Nations. I might add that the Subcommittee on Minorities, the United Nations Human Rights Commission will begin a scheduled meeting this coming Monday on this situation in Kampuchea.

Q. Which subcommittee is that, Tom?

A. It is the Subcommittee on Minorities of the U.N. Human Rights Commission.

Q. Well, my question goes to—so you're consulting with other governments about what?

A. About the human rights situation in Cambodia. We're trying to focus international attention on the situation there, and I think there have been a variety of govern-

ments which have talked with the Cambodians about what has been occurring inside Kampuchea.

Q. I think there's considerable international attention focused on it. What are you going to do once you have the international attention focussed on it?

A. We are hopeful that this will help to bring about an end to the human rights abuses which have been occurring inside Cambodia. But what we are not considering is a unilateral military action by the United States to resolve the situation.

Q. No one suggested unilateral military action. Senator McGovern's proposal, as I recall it, was that through the Security Council at the U.N. some kind of international military action be taken. Why does the United States oppose that?

A. Let me reiterate what I said before, which was, that we are not aware of any support in the international community for resolving this terrible situation by the use of military force.

Now as to what we would do if there was such support, that is a hypothetical situation, which simply does not exist now.

Q. What about economic sanctions, Tom? Would the United States favor the imposition of global economic sanctions against the regime in Kampuchea?

A. I don't have anything to offer you on that question at the moment.

Q. On the question of not being aware of any international efforts to resolve this by force, it is a fact that Vietnam is engaged in combat with Kampuchea and is supported by the Soviet Union; and indeed the President's National Security Advisor remarked a few months ago that he regarded this as a proxy war. Would you care to enter that mine field and tell us whether you feel that is not or is an international effort?

A. I'm not sure I would care to enter that mine field. When I said we are not aware of any international support, I think I was talking about a very broad-based collection of many, many nations around the world. Obviously, I have seen reports of the fighting in Cambodia, and along that border. I have nothing to say about that.

Q. Have we talked to the Chinese about this, and maybe they could use whatever influence they have with Phnom Penh on that?

A. I'm not in a position to answer that question.

Q. If I may follow that, when you say you know of no international support for military efforts, do you know this because you have discussed such an idea with various governments?

A. I am not aware of how we came to the knowledge which would allow us to make this statement.

Q. When you say that you can't answer that question on China, does that come under the heading of private diplomatic conversations?

A. Yes, but I am not necessarily meaning to confirm that that subject matter has arisen.

Q. When you talk about discussing it with nations that have contacts with the government in Phnom Penh, you're only talking about two or three to begin with, and only one that has any real influence, and that's China.

A. I'm sorry, I'm not going to be in a position to go into our diplomatic conversations.

Q. It's on the record already, Tom.

A. Well, I'll have to dig it out then.

Q. When you say the U.S. does not intend to initiate efforts to resolve this terrible human rights situation by military force, do you intend or would you be willing to initiate efforts to resolve it using some other kind of pressure, such as economic, or trying to isolate Cambodia?

A. Let me take the question as to whether consideration is being given to economic means.

Q. Also, arms embargo against Cambodia.

A. I'm not aware that we're shipping any arms to Cambodia.

Q. No, no. I'm talking about initiating a global arms embargo against Cambodia.

Q. Sure. What we're trying to find out is, are you going to do anything beyond saying that they're naughty for what they're doing?

A. Well, I'm simply not going to accept that kind of characterization of policy. We do not have diplomatic relations with Cambodia. We have, in a whole variety of ways, through the U.N. and other international fora, tried to focus international attention on this problem; what we regard as a problem, and what many people around the world regard as a problem. But, I will be glad to take those two specific questions.

Q. The point, I think, is that although Dick phrased it in a humorous fashion, U.S. policy does appear to be somewhat empty, rhetorical and nothing else. What, if anything, has the United States done beyond rhetorical flourishes, beyond encouraging others to make rhetorical flourishes, to do anything about what is going on inside Cambodia?

A. Look, I think Hodding has said up here on many occasions, it just doesn't work that way any more that every time we say something, everybody falls in line. We have limited means of talking directly with the Cambodians. We have limited, if not so, economic relations with Cambodia.

Q. The thrust of my question is what, if anything—you have all kinds of means to marshal international support for non-military programs; and the impression that I get, or the inference that I draw, is that the United States has done absolutely nothing beyond the rhetorical.

Now, if I'm incorrect in that assumption, I wish you would set the record straight.

A. I have promised to take the question on the question of economic sanctions and on the question of an internationally agreed to arms embargo.

Q. Or anything else. If you would just broaden the question to that. Anything beyond words?

A. I will try to get a more complete answer as to what we are presently doing with regard to the situation in Cambodia. I have taken the question as to what future options may be under consideration. Now, Ted, as usual I want to warn you away from any certainty of getting an answer to what we might be considering doing in the future. But I will try.

Q. I've been here long enough not to have any great expectations.

A. Well, I haven't been here very long, but that's one expectation I'm—

Q. Is any effort being made to establish relations with Cambodia since they've made some overtures in the last few weeks?

A. I have nothing to offer on that question.

Q. Does the United States want diplomatic relations with Cambodia?

A. I don't think I have anything to say about that matter.

Q. I'm just curious, you know. There are a number of countries which have been making diplomatic overtures, and it's becoming increasingly unclear whether the President is adhering to his policy of wanting relations with all countries.

A. There may have been some guidance about that recently. Let me try to dig it out and see what it says.

Q. On a somewhat related matter, the Congressmen who were visiting Hanoi apparently have received a very cordial reception which indicates from the stories the Vietnamese are quite eager to have some greater development of relations with the United States. Does the U.S. have any date now to meet with the Vietnamese, or any plan to respond to the various private and public overtures which they have made to the United States?

A. To answer your specific question, there has been no date set for a meeting with the Vietnamese. We agreed at the last time that we met with them, that we would meet with them at some future time; and that is still our intention, but no date has been set. I have nothing new to offer you on the state of U.S.-Vietnamese relations.

Mr. McGOVERN. Mr. President, there have also been numerous editorials written, commenting, in the last few days, on questions I have raised relative to the possibility of some international response to the situation in Cambodia. Some of those editorials have been critical, some have been generally supportive of the concerns that I expressed.

Two of the critical editorials would include an editorial in the August 23 issue of the Washington Star entitled "Senator McGovern On Cambodia," and an editorial in the Wall Street Journal of the same day entitled "McGovern The Hawk." Then there was a generally supportive editorial in the Boston Globe of August 23 entitled "McGovern and Indochina—Again."

I ask unanimous consent that these representative editorials of the pro and con response to the concerns I have raised also be printed in the RECORD at this point.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows.

[From the Washington Star, Aug. 23, 1978]

SENATOR McGOVERN ON CAMBODIA

Senator McGovern is undoubtedly right when he says people are likely to misunderstand his latest remarks on Cambodia. To some it will indeed seem that the Democratic leader who was so strong against U.S. military intervention designed to forestall a communist tyranny in Vietnam now looks with enthusiasm at the idea of military intervention to overthrow communist tyranny in Vietnam's next-door neighbor.

However, Senator McGovern has made it clear that he doesn't mean American troops when he suggests that somebody ought to do something about the Cambodian government killing more than a third of the country's population. What the senator was actually suggesting was that the U.N. consider on a philosophic level where international responsibility begins and ends in cases of genocide. After the Holocaust in which Hitler killed six million Jews, we did say it shouldn't happen again, didn't we? But the most Senator McGovern was urging was the appropriateness of multilateral action, perhaps by some of the smaller countries near Cambodia, to soften the inhumane policies of Cambodia's rulers if not to replace them.

Lest any eyebrows should still be up, it is possible to clarify the clarifications and see an internal consistency in the senator's reasoning. The first thing to remomber is his belief that the state of, shall we say, civil liberties in Cambodia is our fault. It's part of "the legacy of Vietnam." Had American bombing not torn the country apart, it would never have fallen into the hands of murderous fanatics.

Presumably the senator's theory is that except for American influence, Cambodia might have been controlled by the kind of "popularly supported revolution" that is now rearranging things in Vietnam. If boatloads of refugees fleeing Cambodia can be found floating side by side with boatloads of refu-

gees fleeing Vietnam, that's a coincidence. Naturally there would be former lackeys of the Americans who would try to get out of doing their share in building the new Vietnam.

The senator's faith in the Hanoi regime is central to his thinking about the rest of Southeast Asia. Since Hanoi has been engaged in a bitter border war with the Cambodians, it is easier for Senator McGovern to notice Cambodian imperfections. The senator has said nothing about a liberation aspect to the fighting, and neither have the Vietnamese; to most outsiders, the war appears to be a matter of simple power rivalries, sharpened by historic tribal hatreds of the sort that cause wars among capitalist countries. But to have Cambodians fighting Vietnamese makes people of the McGovern point of view readier to wax indignant about human rights in Cambodia.

For all the momentary embarrassments of a seeming about-face on a Southeast Asian question, Senator McGovern's outrage over the Cambodian severities makes sense on other grounds too. What better proof that George McGovern, champion of the idea that civic well-being and international altruism prevail in Cuba, is no uncritical admirer of Marxist regimes? His readiness to see fiendishness in Phnom Penh—and Solzhenitsyn himself couldn't have been more outspoken about it—just shows how well Senator McGovern knows the difference between repressive totalitarian communists and popularly supported people's democracies that may have to slap a wrist once in a while.

We hope this clears up any misunderstandings about Senator McGovern's consistency as a thinker in the foreign policy area. And we are glad he noticed what's been going on in Cambodia.

---

[From the Wall Street Journal, Aug. 23, 1978]

MCGOVERN THE HAWK

Sen. George McGovern said something Monday that will almost surely find a place in future history books on American foreign policy. Sen. McGovern, you will scarcely forget, was one of the public figures who insisted most stridently that this country had to get out of our immoral war in Indochina. As of Monday, the Senator thinks that we ought to consider getting back in.

The occasion was a Senate Foreign Relations subcommittee hearing on developments in Indochina since the U.S. withdrew from the place in 1975. In the course of its inquiries the subcommittee has been getting the latest news and estimates of the slaughter in Cambodia, whose present Communist rulers have starved, worked, shot, beaten and hacked to death upwards of a million of the country's citizens out of a total population of some eight million. Sen. McGovern judged that the Communists' achievements made the Nazis' extermination program against the Jews "look very tame" by comparison.

Then the Senator asked, "Do we sit on the sidelines and watch a population slaughtered, or do we marshal military force and put an end to it?" He further commented that "we ought not to dismiss out of hand" the possibility of action by the international community. He made clear that he wasn't proposing unilateral U.S. involvement; what would be appropriate was a military operation mounted by the UN. He knew there was little realistic hope of the UN's following his suggestion. But he said, "One would think the international community would at least condemn the situation and move to stop what appears like genocide."

There is a truly mind-boggling quality to a statement like this. Nearly 20 years ago, American liberals came to power in this country exhorting us to take a more vigorous and expansive view of our role as leader of the free world. They came complete with a theory of counterinsurgency, "winning the hearts and minds of the people." When the then-existing government of South Vietnam failed to fully adopt this prescription, they blithely arranged its overthrow. Upon discovering the price of the commitment thereby sealed, they set about toppling the American President, who inherited the aftermath of the coup. Not content when American troops were finally withdrawn, they set about slashing, on the grounds that the South Vietnamese government was "immoral," the aid funds it needed to maintain any pro-Western presence in Indochina. Now, having finished the task of destroying that presence, they are shocked and dismayed by the news of the grim and brutal world that resulted.

One of the few good things to come out of the sordid end of our Indochina campaign was a period of relative silence from the people who took us through all its painful contortions. They should have the grace to maintain their quiet for at least a while longer.

---

[From the Boston Globe, Aug. 23, 1978]

MCGOVERN AND INDOCHINA—AGAIN

Sen. George McGovern has the often discomforting knack of raising tough questions—on Vietnam, on busing, on CIA credibility. Monday, he did it again by suggesting the possibility of sending an international military force into Cambodia to topple the monstrous regime there. The ironic effect of his suggestion may have been to give comfort to his habitual conservative critics while disquieting his liberal allies. Yet, the truth is that no one can take comfort from what he said, for he has focused critical attention on maybe the most heinous script being played out on the world stage.

No one knows exactly what is happening inside Cambodia, but, from reports of the half-million or more refugees that have fled the Khmer Rouge regime in the last three years, no one doubts that it is diabolical. While a half million have fled, untold thousands—amounting, by some estimates, to one-seventh of Cambodia's population—have been killed. Millions more have been relocated from urban centers to the rural countryside where they have been impressed in slave-like conditions as agricultural laborers. McGovern said the situation "is the most extreme I've heard of . . . Based on the percentage of the population that appears to have died, this makes Hitler's operation look tame."

There are many who, in assessing the situation, will want to look backward. Those who opposed our withdrawal from Vietnam will be quick to say that they had always warned McGovern and others in the antiwar movement of the "bloodbath" that would ensue. Yet, of course, the "bloodbath" they warned against was to have occurred in Vietnam—and it has not. McGovern himself took the opposite tack—suggesting that the United States was responsible for the destruction of Cambodia, the triumph of the Khmer Rouge and the resulting massacre. Yet, of course, despite the substantially greater damage the United States inflicted in Vietnam, no comparable horror has befallen that country.

What has happened in Cambodia is not susceptible to any grand theorizing. The government has fallen into the hands of a small group of young and fanatical outlaws who renounce most contact with the outside world and who apparently set out to impose their ideal society by destroying a civilization. While they have set out to annihilate the past, it is not yet clear that they have begun to build any kind of a future. It is not clear what they control or how they control it; it is not certain that a successful "judo chop" at the Cambodian government—one State Department officer's description of what Vietnam failed to achieve last year—would really change much.

The State Department officer, Douglas Pike, suggested that only a village-by-village occupation could work, that its prospects were doubtful and that such an attempt would mean "stepping deeper into the swamp."

Maybe China, the one major country with some reasonable relations with Cambodia, can bring increased pressure to bear. Certainly as China moves to take a more active role in the international community, it must demonstrate a maximum effort to curtail activity in Cambodia that is offensive to all organized society. And as McGovern and Sen. Robert Dole suggested Monday, international efforts to pressure Cambodia—through the UN—ought to be attempted.

By most assessments, however, neither approach is likely to bring success. And as civilized society in Cambodia continues to disintegrate, a world community that once declared "never again" will have to wrestle continuously with its conscience.

---

## THE CAMBODIAN HOLOCAUST

Mr. DOLE. Mr. President, I want to commend the Senator from South Dakota for bringing this issue to the attention of the Senate once again, for the Cambodia holocaust has not yet received the full public attention that it deserves.

One thing about Senator MCGOVERN'S statement of last week is that it did focus attention on what has been a very serious problem, and continues to be a very serious problem.

The U.S. Congress can perform a valuable humanitarian service in devoting appropriate time and efforts to the plight of the unfortunate people of Cambodia.

### A MATTER OF PUBLIC AWARENESS

The wanton murder and destruction of the Khmer (K'mere) people and their culture has proceeded unhindered for 3 years now. Can a Nation such as ours, which has raised its voice against violations of human rights in other parts of the world, which struggled to overcome the excesses of the Nazis in the Second World War, which clamors for adherence to basic norms of human rights and dignity, really claim to be sincere without expressing outrage at this martyrdom of an entire people?

With our help, the world must be made aware of the brutality of the Communist Cambodian regime. Public opinion must be motivated and mobilized against the government of "Democratic Kampuchea." In this way, popular support can be generated for the kind of international pressure that is not only warranted in this situation, but which is demanded by all principles of human justice.

### AN ACTIVE FEW

So far, a relatively few individuals in this country have devoted their efforts to directing public attention to the Cambodian genocide. These have included certain journalists, such as columnist Jack Anderson, certain organizations, such as the International Rescue Committee, directed by Mr. Leo Cherne, and private

individuals, such as Mr. Chhang Song, the former minister of information of the Republic of Cambodia.

The Senator from Kansas joined these efforts last November in proposing Senate Resolution 323, which condemns the atrocities in Cambodia, and which calls upon the President to take effective measures to register the concern of the American people and to cooperate with other nations in an effort to bring these human rights violations to an end.

More recently, on July 31, I sponsored an amendment to direct our representative to the International Monetary Fund to oppose financial assistance for the Cambodian regime. The amendment was approved by the Senate after a tabling motion was defeated, 30 to 57. The action reflects, I think, a reticence by this body to shore up the Communist Cambodian Government with international financial aid.

NEED FOR DIRECT PRESSURE

What we need to do now is to deny the Communist regime the economic and diplomatic support it needs to survive. This could be more effectively achieved by using our contacts with those few countries which do have diplomatic relations with the Cambodian Government—and I have the People's Republic of China in mind—to pressure the Kampuchean Government to moderate its policies. It should be incumbent on the administration to utilize its increasing ties and contacts with the PRC to influence them to cooperate in condemning this criminal situation and pressing for its end. No regime can survive for long in total isolation. Few nations maintain contacts with the Cambodian regime, and we should make every effort to utilize the leverage that exists.

PRACTICAL LIMITS TO CONDEMNATION

Public condemnations and resolutions of denunciation are necessary as an initial step. But there are practical limits to their effectiveness. Ultimately, they must be accompanied by more substantive steps. For the sake of the Cambodian people, substantive steps are needed now. On August 3, the Senator from Kansas proposed an amendment to the State-Justice-Commerce Department appropriations bill, urging the Attorney General to use his parole authority to allow the emigration of 15,000 Cambodian refugees, mostly from that refugee camps, to the United States.

REFUGEES A VALUABLE TESTIMONY

The terrible nature of the "restructuring" of Cambodian society has been emphasized by the stream of refugees, fleeing at great personal risk: Those who have "voted with their feet" by escaping into neighboring Thailand. The escape from Cambodia to the relative safety of these camps in Thailand involves great risks across terrain so difficult, so thoroughly mined and patroled, that it is remarkable that anyone would attempt it, let alone succeed. And yet each month an average of some 50 Cambodians make their way through to one of the four camps in Thailand. Only through the testimony of these courageous people has the world been alerted to the actual extent of this targedy. By allowing the immigration of these people to the United States, we can help relieve the pressure on refugee camps in Thailand, and insure that additional Cambodian refugees can be accomodated by that country in the months ahead.

CAMBODIAN REFUGEE PROBLEM

By now there are about 15,000 Cambodians concentrated in four refugee camps in Thailand. Their outlook for resettlement in that country is dim. The Thais have been more than generous and merciful in accepting these people, but their burden is not getting any lighter. On the contrary, they are also hosts to those fleeing from Vietnam and Laos, and the heavy stream of refugees from all three Communist nations is not abating. The great majority of those Cambodians now in Thailand have been there for nearly the entire 3 years since the calamity began—those who escaped at the outset when they had the chance. In Thailand, they are considered a transient burden. The situation of these people is grave. Their camps are close to the Cambodian border, where they are in danger of reprisals from the Communists. The living standards are minimal. The Thais cannot be expected to completely shoulder the cost of maintaining a higher standard of living for these people when they have obligations to their own people. This has had its strains—last November, Thailand declared that all further refugees would be considered illegal immigrants and subject to forcible repatriation, even at the risk of death in the country from which they came.

OBSTACLES FACING CAMBODIAN REFUGEES

Our Government has taken steps to help. In June, the Attorney General announced a special immigration program for 25,000 Indochinese refugees. But, ironically, those who have left the worst hell of all among the Indochinese countries—the Cambodians—are those who will be helped the least by the new parole program. This is simply because permission to come to the United States is granted in priority order: First, to those who have close family relationships in the United States; and second, to those refugees who were directly employed by the U.S. Government in the past. Few Cambodians qualify for either of these criteria. And those two categories alone fill virtually all of the parole numbers authorized by the new program. Under present immigration laws, then, few Cambodians stand a chance to escape this unfortunate situation. As these categories stand, they face great obstacles.

PAROLE AMENDMENT

With this in mind, I feel that it is not only appropriate, but most urgent, that some action be taken to relieve the Cambodian refugees as a special group: They have been singled out for extraordinary brutality by the government of their country; they have little hope of qualifying for emigration to the United States under present laws; and their need is most pressing. By allowing their immigration, we can give a sign that the United States still stands behind its commitment to support those peoples of the world who are victims of oppression and tryanny, as we have in the past.

A SIGN OF CONCERN AND COMMITMENT

In this manner, we give those Camlief, and demonstrate to the world that we are concerned about the fate of those people, about the situation in Cambodia, bodians now in Thailand immediate reand that we are willing to take on our responsibility, as the leader of the free world, in attempting to alleviate this tragedy.

IMMIGRATION ONLY AN INITIAL STEP

Mr. President, this humanitarian parole, which I sincerely hope the Attorney General heeds, is only an initial step toward a comprehensive mobilization of opinion and action against this great international crime. It is my hope, that the conscience of the world will be stirred enough by the terrible excesses of the Cambodian Communists to prompt a more active approach toward alleviating the plight of these innocent people This is a test for the conscience of the United States and for the free world as humanitarians and defenders of international freedom.

Mr. President, let me again commend the distinguished Senator from South Dakota. Though I may not totally agree with his statement of last week, or inquiry of last week, which is really what it was, it is an indication that there is more and more attention being focused by Members of Congress on what I consider to be a very grave problem. Certainly Senator McGOVERN is a leader in Congress, one who spoke out strongly about the war in Vietnam and one who has now become very active in some of the tragic aftermaths of that conflict.

So knowing the distinguished Senator from South Dakota, I know he will persist, and I am pleased that he has taken his position and demonstrated his interest and his concern. I trust that it continues.

---

## MR. JOSEPH L. RAUH, JR.

Mr. McGOVERN. Mr. President, on another matter, one of the most distinguished, long-time voices of American liberalism is Mr. Joseph L. Rauh, Jr., the Washington attorney. It has been my privilege to know Mr. Rauh as a friend during all of the years I have been here in Washington since the days I arrived as a new Member of the House of Representatives in 1956.

I have always found him to be one of the most intellectually honest and compassionate men in our national life.

In the August 19 issue of the Washington Post, Mr. Rauh has written a stimulating article entitled "Who Says Liberalism Is Dead?"

At a time when that question is being raised pro and con in all parts of the country, I think it would be interesting to the Members of the Congress to read Mr. Rauh's words. So I ask unanimous consent that his article of August 19 be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 19, 1978]

WHO SAYS LIBERALISM IS DEAD?

(By Joseph L. Rauh, Jr.)

Every time the conventional wisdom gets practically unanimous in Washington—"Truman is done" (1947–48), "Johnson can't be toppled" (1968), "Muskie is a shoo-in" (1972)—things are fairly sure to turn out quite the opposite. So it doesn't take much courage to attack the present conventional wisdom that liberalism is dead or at least dying.

Actually, the most significant vital signs point the other way—that liberalism is quite alive and well:

While columnists and editorial writers prate about failings of New Deal and Great Society social programs, the public demands one of the biggest social programs of them all, national health insurance, and the present political struggle is not over whether there should be such a program but over the time period necessary to phase it into the economy.

With all the cannonading for tax reduction and spending restrictions, the attack never focuses on any particular New Deal or Great Society program. The Proposition 13 and the Kemp-Roth backers don't level their fire at particular programs to be curtailed or repealed, but rely for support on Pavlovian antipathy to the very real unfairness of the present tax system. Despite all the demagoguery calling for a rollback of big government, the "welfare state" social programs are so deeply imbedded in the system that no one seriously proposes their curtailment or demise.

On the civil-liberties front, even so hateful a group as the Nazis was given full First Amendment protection for the recent march in Chicago, and the bill for a revised criminal code, supported by most of the Senate's most distinguished liberals, is being held up in the House not because it is too liberal but because leading members of the House feel it doesn't do enough to rectify existing law with anti-civil-liberties aspects.

On the civil-rights front, the Supreme Court, often a bellwether of the public mood, used its *Bakke* decision not only to validate race-conscious preferences for education, employment, etc., but to announce that goals and timetables and even quotas are within constitutional sanction where there are legislative, judicial, executive or administrative findings of past discriminaton to back them up.

The Moynihan-Meany-Jackson hardliners have, thus far at least, had only minimal success in their attempts to reopen the cold war and this despite considerable Soviet provocation.

Many large labor unions are coalescing with liberal groups more closely than they have for years.

The nation's conservative party, the Republicans, have made little if any progress in broadening their ranks.

Every poll shows Sen. Edward Kennedy (D-Mass.), who has a near-perfect voting record over the years on the Americans for Democratic Action and other liberal scorecards, far and away the No. 1 choice of Democrats for 1980.

Of course, a number of problems for liberals do inhere in the current political situation. For example, many of today's issues are incremental ones extending or improving upon the more fundamental economic reforms of Franklin Roosevelt or civil-rights reforms of Lyndon Johnson and thus far less easy to dramatize than earlier more fundamental changes. Then, too, 45 years of social change in the interest of a more egalitarian society was bound to produce a certain amount of the tired "we-have-done-enough for *them*" syndrome and the self-interested "we have to be with the winner this time" syndrome.

And, finally, the hardest time for liberals is when there is a middle-of-the-road Democrat in the White House. It is easy to work in support of a liberal Democratic president. It is not too hard to work in opposition to a conservative Republican president. But a non-ideological middle-of-the-road Democrat in the White House creates a sort of no-man's land with maximum uncertainty as to who is doing what to whom.

But whether the next surge of liberal successes comes from a left-turn in the White House (Truman made his big shift leftward as the 1948 election neared), or from the fine young liberals in the administration banding together to demand more vigorous action, or from the deep belief of the American people in the role of government as the builder of an ever-fairer society, conservatives are clucking much too soon.

## ORDER OF BUSINESS

Mr. McGOVERN. Mr. President, I have nothing further to add to the discussion at this time. I know that other Senators who have been deeply concerned about this issue, including the Senator from Kansas, Mr. DOLE, and the Senator from New Jersey, Mr. CASE, will also be speaking out today and I welcome their contributions and their leadership.

I yield back the remainder of my time.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Kansas (Mr. DOLE) is to be recognized for not to exceed 15 minutes.

Mr. STEVENS. Mr. President, has the Senator from South Dakota used the time I yielded to him?

The ACTING PRESIDENT pro tempore. No, he did not.

Mr. STEVENS. Mr. President, I ask unanimous consent that the quorum call be charged to that time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Mississippi (Mr. STENNIS) is recognized for and is in control of 60 minutes.

## VETO OF THE MILITARY AUTHORIZATION BILL

Mr. STENNIS. Mr. President, I am delighted to have some time this morning to discuss a very important matter, my main purpose being to get into the official record some thoughts I have and an analysis I have made of the President's veto message with reference to the military authorization bill.

I emphasize that this discussion is for the benefit of the Senate, the press, and the public—even the President, himself—and is not any kind of attack on what the President has done with reference to vetoing the bill.

I have no feeling of resentment. Naturally, I was disappointed, because the committee had worked on it all year. But the President has to perform his constitutional duties, as I told him the morning a few of us were at the White House, at his invitation, when he told us the veto would come.

I attribute nothing except good faith to the President and to Secretary Brown, who also is involved in the matter. But I will spare no language in pointing out what I shall call errors of fact or mistakes of fact that were made in presenting this matter to the President and in getting up the facts to present to Mr. Brown.

I have asked our Senate Armed Services Committee staff, assisted in some degree by the staff of the Appropriations Subcommittee on the Department of Defense, to go very carefully into the facts I am going to mention and to be certain that they have probed deeply and have obtained the real facts. They have assured me that they have done this. I know them personally, and I know their competence, and I know how they approach matters. I adopt the figures and everything else as mine for this speech.

I emphasize again that I am talking about mistakes of fact or errors of information or errors of fact on the part of the President and Mr. Brown, the Secretary of Defense, rather than any kind of wrongdoing or willfulness or anything else.

Mr. President, the Senator from New Hampshire (Mr. MCINTYRE), who is a very important and essential part of our work in the Armed Services Committee, handles the research and development section of the bill. About $12 billion annually is now going into that field. The members of that subcommittee perform a valuable task. He will be here, and I will yield some time to him.

Mr. President, I will take these matters up one group at a time.

Mr. Carter's veto message says:

> The bill I am returning does not spend wisely. Instead, it actually would lead to less defense capability than I have requested. It does this by eliminating funds for high priority defense requirements and adding funds for purposes which do not meet our defense needs. Most notably, it would take nearly $2 billion from the total and set it aside for purchase of a nuclear powered aircraft carrier.

Mr. President, I note here that the issue with President Carter is not so much a carrier. He said later that he would approve a large carrier, and said later that it would come up in the fiscal 1980 budget. So, really, he approves of the large carrier, but it is just a variance of 1 year, the only difference being the type of power that is used in the carrier. That is a very significant fact in this matter.

We have to go back into this matter—either override the veto or rewrite a bill, if we can. That is a big "if."

I refer now to the statement about spending the money, eliminating funds for high priority defense. The eliminated funds for high priority requirements are identified in the veto message as follows: $800 million of the required $1 billion increase for Army weapons and equipment; $200 million for Air Force weapons and equipment; $500 million of the requested $1 billion increase for readiness funds; $500 million for research and development.

Now I will take them up. First, of course, we developed these facts months and months after the President's budget was finished. We have capable men who examine and cross-examine knowledgeable people about the various line items, as to whether the need has slipped, whether there is a change of facts, what the capability is of the manufacturer, and so forth.

Congress then, of course, has to make some changes, and uses their judgment, as was done in this bill.

In all this process to which I have referred, here is the source of the money that allowed us to add the nuclear carrier. This is the way it came about: $910 million of these reductions that President Carter talked about resulted from the slipping of a Trident submarine into fiscal year 1980 because of construction delays. There is no doubt about that fact. All agreed, including the company that makes it.

A savings result of $600 million from the Presidential decision to hold the fiscal year 1979 military and civilian pay raises to 5.5 percent, plus the usual absorption by DOD of some pay raise costs. That is an item that was worked out, and I commend the President very highly with reference to that saving, which is justified without releasing anything else.

A reduction of $200 million in military construction projects that were deferred or financed differently.

Mr. President, members of the committee learn a good deal about these military construction projects over the years. I was chairman of that subcommittee for some 10 years, and I have not forgotten some of the fundamentals I learned there. We go after it, frankly.

And if there is any fat in there or anything that has delayed construction or may not be built, and they want to use the money for something else, we take it out, and that is what happened here. It added up to a $200 million reduction in military construction projects that were deferred or financed differently.

And these happened in the ordinary course of getting into these bills. There is a $120 million reduction in research and development programs and a $100 million reduction in nuclear weapons programs, and as I recall it was not in dispute about that reduction in this field of nuclear weapons which runs into billions of dollars, and $300 million reduction in procurement not reclamaed, not reclamaed by the Department of Defense. Listen at that now. Matters that we took out that were not even reclamaed. They did not come back and ask for reconsideration of $300 million.

I will have to move on. The items not challenged by the Department of Defense included $127 million for the XM–1 tank program that DOD had agreed was overfunded.

The second item is $113 million for A–4 aircraft. According to their testimony this item could be taken out.

Twenty-three million dollars for DDG–2 conversions based upon DOD modification of the program. Here is where they found a way to save some money on a modification program, and we took that money out.

Twenty-seven million dollars for MK–46 torpedoes, based upon lower unit costs, lower unit costs, Mr. President. Think of that. They actually found something in the bill where they could get it for less, and we took that money out.

Now, going to another item, impact on weapons and equipment for the Army. The President's veto message says:

> I requested a $1 billion increase to strengthen our ground forces, particularly our NATO-oriented forces, by providing more helicopters, combat vehicles and ammunition for our front-line forces. Adding the nuclear-powered aircraft carrier means eliminating $800 million of that increase.

Mr. President, here are the facts: The vetoed bill provides $3.24 billion for Army procurement. This was a $621 million or 24-percent increase over fiscal year 1978 Army procurement.

Regarding the specific areas that are mentioned in the veto message, the following actions were taken:

The vetoed bill eliminated eight helicopters costing $45 million from the President's request. These helicopters were for forces in Korea and were older models. Deferral of this expenditure will not affect NATO initiatives and will permit procurement of newer model helicopters in the future.

If anyone knows what we are going to do about this Korea situation, knows for certain about the Korean removal they know a lot more than I do. But there is a matter totally unrelated to this Army procurement for NATO. Still it is stuck in here by someone as one of the reasons.

Combat vehicles: As mentioned previously, the XM–1 tank program was cut by $127 million. DOD agreed that this cut was appropriate based upon the program status.

However, the vetoed bill funded several additional initiatives for NATO-oriented combat vehicles that were beyond the President's request. For instance, $34 million for modification of an additional 160 M60A1 tanks to the improved M60A3 configuration.

We have men on the committee that know something about these tanks, and this was gone into with the Army $39 million for development, with West Germany, of the 120 millimeter tank gun; and $39 million to begin production of the infantry fighting vehicle. In other words, we said on that infantry fighting vehicle, "Don't put it off until next year; start now, start production now."

Funding for Army ammunition is not included in H.R. 10929, the vetoed bill. It is not even in it. There is no authorization that has to be made for ammunition.

In the House appropriations bill, $349 million was cut from the budget request for Army ammunition.

This shows that those who got the facts up jumped from one bill to the other.

The DOD had not requested restoration of $73 million of this cut mainly because funds requested for fiscal year 1979 could not be spent during that year. The Senate Appropriations Committee has been considering a cut of Army ammunition by $324 million, or $25 million less than the House cut. So there is an area here that certainly requires a careful look and a decision. We are getting into it when the lightning struck on this veto. But Chairman MAGNUSON just suspended the whole thing.

In summary, the President's initiatives for Army ground forces have been supported by Congress and in some cases exceeded by the vetoed bill: Other than the cuts in helicopter and XM–1 tank programs, only an additional $16 million was cut from the budget request for the Army procurement of $3.43 billion. Think of that. That was such an overwhelming approval. While DOD and Congress disagree on about $250 to $275 million in ammunition cuts, the Appropriations Committees believe that the requested expenditures are unwarranted.

I refer that to the Appropriations Committee because what was done by the House Appropriations Committee is mixed all up in this veto message all the way through.

Impact on weapons and equipment for the Air Force: President Carter in his veto message said:

> I requested more funds for airlift, electronic warfare equipment and electronically guided ordnance. Adding the nuclear-powered aircraft carrier means eliminating $200 million of this increase.

Mr. President, with all deference, that is a mistaken statement of fact. It had nothing to do with the carrier, and I have a detailed explanation of that item here. It is very involved.

It goes into the discussion about the civil reserve, air fleet modifications, and so forth.

The facts show that the money was not materially reduced for the airlift, electronic equipment, and so forth.

The Senator from New Hampshire (Mr. MCINTYRE) may have some special remarks on that, and I will move along because of time.

While some reordering of priorities occurred in Air Force weapons and equipment, the President's funding level has been sustained. In addition, there is a substantial increase in aircraft procurement provided by H.R. 10929.

Now, Mr. President, again with reference to the President's responsibility, he said in the veto message:

I requested an increase of $1 billion for items which are not glamorous, but which provide the immediate fighting capability of our forces—funds (requiring appropriation but not prior authorization) for repairs of weapons, spare parts for vehicles and aircraft, ship overhauls, training of personnel, communications, and logistical support to move equipment to where it is needed. Adding the nuclear-powered aircraft carrier means eliminating half of that increase in fighting capability—some $500 million.

Now, Mr. President, as a matter of fact, here we went into great detail on some of the proposed reductions by the executive branch for training and restored, put back in, some of that money. But before addressing the impact of congressional action, it should be noted that the budget requested, the President's budget requested, a decrease in training manpower of 6,800 Army military personnel and 1,300 civilians, and 10,500 Navy military personnel and 800 civilians. This would result in a reduction in training courses, the number of people who would be trained, and the number of instructors.

The budget requested a manpower decrease of 35,600 in the Naval Reserve.

The budget contained no provisions to address the declining strength of the Reserves, and other items here, Mr. President.

Now, this is something that the committees of Congress went into a few years ago. An amendment was passed making civilian and military personnel—an authorization requirement. Always theretofore the Appropriations Committee only had looked into these matters. They did the best job they could. in the rush of things. The committee members of the Armed Services Committee have delved into this. I appointed the Senator from Georgia (Mr. NUNN) as chairman of a subcommittee there, and other able members on that subcommittee, and they charged the breastworks and have led the fight for some of these reductions over a period of years. But this year—and I say this with all deference—there hsa been more urging of reductions from the Senate than there has the House, and we settle these matters in conference, sometimes after a great deal of effort, but this year even those of us who had been insistent on these personnel considerations thought that the budget went too far with reference to training personnel in particular. We restored more than the budget asked for in the authorization bill, the bill that has been vetoed.

If we had gone by the President's request, it would not have required as much money. So I tell you there is no basis for this talk about every time we turn around we did something to make room for a carrier. It is just not correct, they are not true facts, and here is an illustration of the way the committee was going down the line trying to work these matters out on a basis of what was sound and what was better, and let the totals fall where they would, with two exceptions: I think every man on our committee who wrote this vetoed bill did not want to go beyond—any appreciable amount anyway—the President's request, the executive budget. I think every man wanted to come within the legislative budget, our budget, the Muskie-Bellmon committee budget. I know I did not, and I was going to do all I could to keep from doing that, not only on the ground that we must not just throw money in because we want to, but because that committee stopped us here on the floor of the Senate once after we came back from conference because we had not been conscious enough of their ceiling. That committee has come a long way, and I commend them for it.

So we have an eye on those two things regardless of whatever else we did, and we came in with bills, put the essentials in as we saw them, without running over.

Now, I have a detailed analysis here of the President's statement with reference to these $1 billion items which I will enumerate in detail. It is here for the press to see if they wish, for the people, the membership, the people-at-large, anyone to see, that this is an attempt to bring in the hard facts upon which our bill is based, upon which the President's veto message—not to his blame really, but he got some of the wrong facts.

The budget requested a decrease of civilians for aircraft maintenance in the Navy and Air Force and a corresponding decrease in the operational readiness rates of Navy and Air Force aircraft. In the Air Force, one out of every eight civilian reductions was in the maintenance area. Testimony by Assistant Secretary White revealed that, "Reductions in maintenance were made in the very final changes in the budget because of financial constraints."

Testimony by Deputy Secretary Duncan indicated that "tight overall fiscal constraints" were the cause of the overall decline in readiness rates from those that were achieved in fiscal year 1978 primarily through increases in readiness funding by the Congress.

Discussion of congressional actions on readiness items is facilitated by addressing H.R. 10929 and the appropriations bills separately. H.R. 1099 gives readiness a shot in the arm:

Made increases in Army and Navy military manpower for training programs above the President's requests;

Increased Naval Reserve manpower by 35,600 to provide help in Navy base operations;

Provided $25 million to increase Selected Reserve strengths;

Provides for an increase of 1,000 civilians for aircraft maintenance in the Navy and 400 civilians for aircraft maintenance in the Air Force to correct the decline in operational readiness rates presented as a part of the President's budget;

Funded all but $10 million of a budget request of $2,058 million for spare parts; and

Funded all but $31 million of a budget request of $2,825 million for weapons modifications.

Regarding the appropriations bill the President requested $37.4 billion for operations and maintenance. The House appropriations bill funded all of this amount except for $37.7 million or a cut of about one-tenth of one percent. One substantial improvement for readiness included in the bill was the addition of $170 million to readiness-related depot maintenance funding. Moreover, the current DOD request for operations and maintenance, identified in the reclama to this House bill, is for $48.8 million less than the amount that would be appropriated by the House bill. The Senate Appropriations Committee is considering a smaller cut from the President's request—$22.9 million—than was made in the House and has planned to add $145 million for readiness-related depot maintenance.

The House Appropriations bill has made and the Senate Appropriations Committee is considering an accounting change that may have lead to some confusion and apparently is the source of the veto message charge of a $500 million cut in readiness funds. The accounting changes within operations and maintenance being considered is to create a new $500 million fund to accommodate increased costs that occur as a result of fluctuations in the value of the dollar overseas. The House made and the Senate Appropriations Committee is considering a reduction of about $500 million in funds requested for inflation to offset the creation of this new fund. The basic fact is that there is a need within the O. & M. account to offset the reduced buying power of the dollar in the future. The creation of this fund provides an orderly process for doing so rather than forcing absorption of these cuts in important O. & M. programs at a later date. This action is merely a transfer from one inflation account to another.

The statement in the veto message that $500 million has been cut from readiness items is unfounded. In fact, as in the past, the Congress has again augmented the budget request in several areas to improve readiness.

Mr. President, as I indicated before, the time allotted here this morning was going to be used in part by the Senator from New Hampshire. I ask unanimous consent that I may yield now to the Senator from New Hampshire 15 minutes of the allotted time.

The PRESIDING OFFICER (Mr. MORGAN). Without objection, the Senator from New Hampshire is recognized.

Mr. STENNIS. First, let me just say this, Mr. President: I want to say it strongly for the record. This man went out into the wilderness a few years ago at my request and urging. Somebody had challenged me on the floor about 10 years ago when I was handling a bill—I was not chairman of the subcommittee, but I was handling it—and I was challenged to explain the $7 or $8 billion worth of research and development money, and I could not do it. So I made up my mind then to handle it better and persuaded the Senator from New Hampshire to handle it, and he has done an amazing job. No one knows how many nights, days, months he works on these bills, and I have never seen him come out with a set of facts that failed to stand up. I might not always agree with him. He is

no chiseler either on this money. He is concerned, and I want to thank him publicly again for the marvelous work he does year after year, and I hope he gets some satisfaction out of it. He deserves the satisfaction and the credit, great credit.

Mr. McINTYRE. Mr. President, I thank the distinguished and able chairman of our committee. I am grateful to him not only for the leadership that he gives to us but, of course, for the longstanding ability that he has manifested in this important field of national security.

Mr. President, like many of those who serve on the Armed Services Committees of the House of Representatives and the Senate, I was generally stunned and taken aback when the President announced his decision to veto the authorization bill for this fiscal year, 1979.

Part of the rationale given for the veto of the Department of Defense Appropriation Authorization Act of 1979 is that the bill penalizes research and development programs in order to fund a nuclear-powered aircraft carrier. In his veto message to the Congress, the President stated:

* * * to sustain our position of excellence in a world of weapons increasingly dependent on technology, I requested a three percent real growth in defense research and development. Adding the nuclear powered aircraft carrier leads to an actual reduction in research and development.

Careful examination of the research and development portion of the bill, however, does not bear this out.

For fiscal year 1978 Congress appropriated $11.4 billion for research and development. For fiscal year 1979 the Department of Defense requested $12.47 billion, and the bill in question authorized $12.25 billion. This is an increase of $840 million over that appropriated for research and development in fiscal year 1978, a total increase of about 8 percent. The real growth rate that would result depends on the actual rate of inflation, but at a minimum this bill provides between 1 and 2 percent real growth.

In deciding to veto this bill the President looked beyond the authorization bill, projecting the impact into the Department of Defense appropriations bill. Therefore, to understand the entire issue we must look at the appropriations bill. The Defense approriations bill is not yet completed but if the final R. & D. total is midway between the House and Senate versions, the real funds available for R. & D. will be about the same as last year. It is highly unlikely that there will be an actual reduction, and there could be as much as 1 percent real growth. So I must conclude that the President was misinformed when he stated that adding a nuclear carrier leads to a reduction from last year's level for research and development.

The changes, both reductions and additions, made in the research and development program were made on the merits of each issue. They were not made to reach some arbitrary total or to provide funds for some pet project. I would have preferred to authorize more for research and development, and, in fact, the Senate version of the bill added $87 million to the President's request. The House version of the bill reduced the President's request by $635 million. The final figure was a reduction of $209 million. However, each item was thoroughly reviewed and debate on the merits of that program, not to reach a preset total. To suggest that no cuts should be made in the budget request implies two questionable assertions. First, that the budget submitted by the Department of Defense has no soft spots and can stand up to the closest scrutiny. Second, that Congress is not entitled to its own view on the priority and importance among 800 separate programs. I cannot believe that the President feels this to be the case.

The net reduction of $209 million in our authorization bill results from program reduction totaling $611 million and program additions totaling $402 million. It is important to note that the Department of Defense did not challenge $130 million of the reduction or $143 million of the additions. Let me cite some of the other program reductions to illustrate that, indeed, there are soft spots in the budget request, and that Congress has exercised its responsibility in searching out these soft spots. First is the question of continuing research for the B–1 bomber. $105 million was requested by the Department of Defense to continue research and development on the B–1, a plane that will not go into production.

The bill provides $55 million to complete construction of a fourth aircraft and to continue testing of those components such as engines and electronic countermeasure systems which may have application to future aircraft. This resulted in a reduction of $50 million from the DOD request.

A second area of significant reductions was in terminally guided submunitions. This is an exciting, new area of technology which shows promise for improving the ability of our forces to attack large tank concentrations. However, this new area of technology has fallen prey to normal bureaucratic competition. Funds were requested in eight separate programs spread out among the Army, Air Force, and Defense Advanced Research Projects Agency (referred to as DARPA). Unfortunately, many of the programs were only vaguely defined, and were, at best, attempts to get a foot in the door in the competition to be the leader in this new area.

The authorization bill reduced the funding for these programs by $35 million and the conferees had strong words urging DOD to gain control of these programs, and to limit interservice competition. This is an area where, time and time again, we see examples of their interservice rivalry.

Another major area of reduction was in Navy V/STOL aircraft. $75 million was requested by the administration to continue research and development of Navy V/STOL aircraft by the testimony presented. But the Department of Defense has not yet defined the missions of V/STOL aircraft. That is, should these planes be used for air defense interceptors, attack aircraft, or antisubmarine warfare and so forth. Recent events indicate that the Navy is rethinking the entire plan for V/STOL aircraft. They are going back and looking at it all over again, their interim plan for the short takeoff and landing aircraft.

The bill provides $23.5 million to continue development of basic V/STOL technology. This is a reduction of over $50 million, but is entirely appropriate since there is such uncertainty as to where the Navy is going on V/STOL.

Another area of reduction was in what has become known as the "studies and analysis" area. Both Houses of Congress expressed concern over the proliferation of studies, particularly those which seem to only result in the need for more studies and which are used as an excuse for slowing the development and fielding of new systems. Funds were asked for two programs, one in the Air Force and one in the Navy, to have contractors study what studies were needed. Both of these programs were eliminated. In another case, one Navy program manager had commissioned a study with the sole purpose of proving his program was needed. The authorization bill reduced money available for studies by $35 million from the $228 million requested.

These four areas represent reductions of about $175 million. Other examples could be cited to show that, indeed, the Department of Defense request needed careful scrubbing. However, I think these four areas make my point very well.

Let me now turn to some of the additions that were made to the budget request. These resulted from a different viewpoint as to the proper priority of certain programs. Clearly, Congress has not only the right, but the responsibility to speak with regard to how our Armed Forces are equipped.

This does not mean that the Armed Services Committee has understanding and knowledge of defense issues superior to that of the leaders of the Department of Defense. I would estimate that 90 percent of the time we accept the judgments and decisions of the military experts. But commonsense, sharpened by years of reviewing defense budgets leads us to ask that certain areas, either over looked by the Pentagon, or lost in interservice rivalry, be explored. This does not mean we have the time or knowledge to examine each type of rifle or backpack. But we do have a responsibility to speak on the key policy questions that will determine our future security.

One of the most significant initiatives included in this bill coincides with what appears to be a basic concern of the administration, that is building a Navy of highly capable ships, but in adequate numbers to cover the vast areas of possible conflict. To do this will require new concepts of ship design and construction. The budget submitted by the administration was particularly weak in this area. The program developed by Congress in the authorization bill includes the following initiatives in this area.

Three million dollars for design studies for a lower cost SSBN–X to complement the very large and very expensive Trident submarine.

That is the nuclear ballistic submarine to complement the very large and very

expensive Trident submarine. The Trident submarines were estimated initially to cost about $750 million and are now running about $1.4 billion.

Constraints on development of a new attack submarine until it can be demonstrated that the R. & D. programs for submarines will reverse the cost-growth trend in attack submarines.

Eighty million dollars for the surface effect ship. A ship that could travel at 80 knots and be a great submarine hunter.

Twenty-five million dollars for the design of a new light carrier.

Seven million dollars to explore new modularity ship-design concepts that would facilitate mounting of weapons aboard ships.

One million dollars to explore a new ship design called SWATH which has potential to be a highly stable aircraft platform.

SWATH refers to small waterborne area twin hull, which has the potential to be a highly stable aircraft platform.

These initiatives will give the President a wide range of options to accomplish our common goal of an affordable, effective Navy.

The sum of $87.4 million was added for the AV–8B program, a Marine Corps V/STOL fighter. In this case, the Congress was saying that in their judgment the Marine Corps should move ahead with the development of an improved V/STOL aircraft, as opposed to buying the 20-year-old A–4M aircraft. In the case of the Marine Corps, a mission and role for the V/STOL aircraft has been clearly defined, and it would seem to be a regression in our force development to buy old aircraft when there are advantages in moving ahead in this new area.

Ten million dollars was added to this bill to begin design studies for a theater mobile ballistic missile as a complement to some of our existing forces, and as a way to counter Soviet activity in the short-range ballistic missile area. Again, Congress is saying this is an area that was neglected in the budget submission, but one of critical importance.

These examples illustrate the nature of the additions made by Congress. They are not done frivolously or with parochial constituent interest in mind. They are done because of a deep concern for the future combat capability of our forces.

Careful review and scrutiny of the Department of Defense research and development program has been done each year and will continue to be done regardless of what happens to the other parts of the budget. To judge whether the R. & D. budget is adequate solely on its total is not responsible. The important question is what that budget will do for this country. The R. & D. program authorized by this bill is strong in all of the important areas including technology base, strategic programs, and general purpose forces.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. STENNIS. Mr. President, I yield an additional 5 minutes to the Senator.

Mr. McINTYRE. It provides nearly $2 billion for sustaining and strengthening our technology base. This is an increase of 11 percent over last year.

In the strategy area this bill provides for a number of opinions that will give the weapons for preserving the strategic balance in the years ahead. These include: $158 million for advanced ICBM technology; $55 million to continue development and testing of those parts of the B–1 which may have application to future manned bombers; $20.6 million for the cruise missile carrier; $237 million for the air-launched cruise missile; $152 million for the sea-launched cruise missile; $3 million to consider another submarine to complement the Trident; $5 million to do initial studies of the Trident II missile; and $20 million to do initial design studies of a mobile theater nuclear ballistic missile.

I am satisfied that this bill provides not only the options but the hardware development to give the President the weapons he needs to sustain the strength and effectiveness of our strategic forces.

The bill also provides for a dazzling array of systems for our conventional forces. These include: $35.6 million for the 120 mm tank gun, a cooperative development program with West Germany; $78 million to continue development of the XM–1 tank; $228 million for the Patriot air defense system; $22 million for the Roland air defense system which starts production in 1979; $177 million for the advanced attack helicopter, the helicopter that will fly off our ships and hunt the submarines with new electronic devices that the world has never before seen; $95 million for the LAMPS Mark III ASW helicopter; and $498 million for the F–18 fighter.

Mr. President, I cite this list of programs to illustrate we are not standing still. We are improving our forces. We hear so much, I hear so much, of the growing Russian threat—and I do not belittle it—that I think it needs to be pointed out from time to time that we are not standing idly by. This bill will continue our commitment to a strong defense.

In summary, Mr. President, it is incorrect to state that the reductions made in the research and development program will cause an actual reduction from last year's program. I would have preferred to authorize more for R. & D. and indeed the Senate bill provided $87 million more than requested by the President. However, the House bill reduced R. & D. by $635 million.

In the conference, through the leadership of our distinguished chairman of the committee, we were able to restore all the $209 million.

We got the House to come up almost $400 million from where they had been when we entered the conference.

This reduction would still provide for 1 percent real growth.

The appropriations bill will reduce the R. & D. program some more but I do not think it will fall below the real value of last year's program.

Further, Mr. President, it is totally incorrect to state that these reductions were made to fund a nuclear powered carrier. These reductions were made as a result of careful review of many programs. I know in this regard I speak for my colleagues on the Research and Development Subcommittee Senators CULVER, ANDERSON, BARTLETT, and GOLDWATER.

Even with those conflicting views, we were able to bring to the full committee a unanimous subcommittee report.

As I said, in that report to the full committee, we had advocated $87 million more than the President requested in his defense budget. I am proud of that record by the Research and Development Subcommittee and we shall continue to call them as we see them, regardless of the outcome of the veto.

I thank my chairman for yielding to me in order that I might vent my feelings on this issue.

Mr. STENNIS. I thank the Senator very much, indeed. He has done more than express his feelings; he has stated facts here for the record.

Mr. President, if there is any doubt about these facts that the Senator from New Hampshire has given, I challenge the press to look into them enough to know, and if they can find any basis for challenging our committee or the statements of the Senator from New Hampshire, bring them out. That is the way we have worked on this matter. He knows what he is talking about and his figures are correct.

After all is said and done, Mr. President, there is reduction here or there, some, but in the end, as the Senator said, there is far more in here, considerably more, at least, than there was in this category last year. It is an increase and not a decrease. I am certain that, in the field of technology, there are no reductions, or virtually none, unless it is just something where a lagging program lost a lot of time; but in the field of pure research or technology research and all of those items that are really scientific research, there are additions rather than reductions.

Some of the big money in this $12 billion plus comes from development, and that includes prototypes. That is big money. There is where you have slippages, there is where there can be some reduction. But if we had this confined to research and technological advancement, items of that nature, there would be nothing said about reductions for R. & D.

Here is another thing that we are up against: There is a lot of sentiment at the Pentagon—and the reason I know this is they came to me soon after I appointed this subcommittee and Senator McINTYRE got into it, saying that our committee ought to look upon the R. & D. recommendations as sacred ground and not intervene and not look at what is behind the scenes; in other words, not examine them, just give them a blank check. Well, we could not do that. That is why we created this subcommittee and that is why we required authorization.

In the old days, there was no authorization required. The Appropriations Committee just made the best guess they could, a lick and a promise, and then went. But this has gotten down to a minute examination, here, as Senator McINTYRE has gone on.

Mr. President, one other word: The idea that was put out was that there was a great effort or connivance, or whatever you want to call it, to make room here for a carrier, something glamorous, at the expense of these other programs. They made the President think that that was it. That is what his veto message sums up.

Mr. President, we have many conflicting elements—the competing contractors. The plane manufacturers, and the shipbuilders and the missile makers and all of that group, that is all piled up on our doorstep. We had the old B–1 fight, remnants of it, coming in on us this year from every direction, fragments of that fight still flying around.

Every Senator is on the spot, to a degree, about things that go on in his own State—I mean either military programs or the lack of them. So we have to adjust for all those matters.

All of these organizations and appropriations finally find their way through the respective committees, House and Senate, and they finally find their way to the floor and are passed on, out in the open, and voted on in the same way. Then that bill or those bills go to a conference. There the fur flies, sure enough.

My point is that it is impossible to have any kind of scheme to eliminate a whole lot of things in order to make room for something. It just does not happen that way. Then, when, finally, the matter is agreed on in conference, it comes back to each House and is subject to debate on the final version.

When we finished this bill that had been vetoed, I went to the press gallery and stated all the main points—to the press, to the public, to the membership, to everyone. Then the matter lay here about a week. Then we took up the conference report when it came over and there had been not a single protest filed with us about that conference report. The committee heard nothing. They were not all just happy, but they were not displeased. They knew the problems of legislation. The press covered it to a degree so the public was informed.

And when we brought that conference report on this vetoed bill back here a week after all this exposure, there was not a single murmur from a single Senator, although notice was given that it was coming, that we were going to take it up. The leadership on each side notified through the telephones and so forth. Not one single murmur.

That does not mean every Senator was for everything that was in it, but it meant the legislative processes had been completed and we had a bill that I thought was the best balanced bill that we had gotten out in several years in this new regime.

Just a word here about the carrier. I have already said as far as the President is concerned, he is not opposed to a carrier. He said he would approve one next year, a big one. It is just a question of what method of power that is debatable itself. The veto based upon a deletion of these other items.

But back to the ships. For 3 consecutive years at least, we have had a madhouse, to a degree, in our committee about ships because there was no forward-looking plan upon which the Navy was agreed with the administrations—I say plural—the retiring one and the incoming one. And we got recommendations here, there, and yonder. I said one time, we had four navies in our committee room going around in different ways. Once we had one from former Senator Taft, who had been on the committee and worked on it. But anyway, we had all those claims that were piling up and required money. Nobody was doing anything about getting those out. Our committee met that issue about putting money in every year, authorizations and appropriations, too, because I thought that was part of the roadblock.

This bill that has been vetoed is the first bill that put in some line items that relate to the new Navy—I mean meaningful line items. They were not large amounts of money, but it was the beginning of thought with reference to a V/STOL-type plane for use on a new-type carrier and a new so-called smaller carrier, each one of those items—the new-type carrier and the plane that goes with it—being 12 or 14 years in advance. That is a surprise to me; it is to everybody. But it is a fact.

So we are talking about a navy, something to fill in here in the interim. But so far as legislation is concerned, this vetoed bill goes further, I think, than anything with reference to the possible new-type navy than any executive recommendation we have had from any source, either the past administration or the present one.

I have no fight with anyone. I have no hard feelings with anyone—not anyone—about this. But I am determined that we get the facts out.

I challenge the press now to look at this evaluation, look at it any way, and if it is not substantially correct, let us know. We want only the facts as they really are.

In spite of all that has been said and done, the veto message convinces me that the President did not have all the facts before him when he had that message prepared. I know he did not write all of it. My Lord, he does as great a volume of work as any President that ever came along. He should have a lot of help. I am not imputing any bad motives or anything like that. But this is serious business.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. I thank the Chair very much and I thank the Senator from New Hampshire again.

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have a little time left under the leader's time and I seek to utilize that at this time.

The PRESIDING OFFICER. The Senator shall proceed.

## POSSIBLE TREATMENT OF A STRATEGIC ARMS PACT AS AN AGREEMENT RATHER THAN AS A TREATY

Mr. ROBERT C. BYRD. Mr. President, questions have been raised about the possible treatment of a strategic arms pact with the Soviet Union as an "agreement" rather than as a treaty.

There should be no question. If an arms limitation pact is successfully negotiated with the Soviet Union, I strongly urge that the basic document should be submitted to the Senate in the form of a treaty.

Because of my very strong feelings on this matter, and because I have been hearing speculation to the effect that such a pact might be submitted to both Houses as an agreement, rather than as a treaty, I wrote to President Carter on August 15, urging that such a pact be submitted as a treaty and not as an executive agreement.

As set forth in my letter to President Carter, I believe there are compelling constitutional grounds for insisting that the document take the form of a treaty.

An international pact as significant to the security interests of the United States must receive full status as a treaty. It is of such consequence that it must merit the confidence of the American people and it must merit the confidence of the Senate.

The administration should not resort to an end run around the Senate.

Now, I have had no definite information that this is about to happen, but I have heard it a number of times.

Because of that, I wrote to the President on August 15 to express my concerns. A pact as important as this must be sound in every respect and be able to withstand the constitutional test of advice and consent.

As I told President Carter in my letter, I am hopeful that a good—and I underline the word "good," I stress the word "good," I emphasize the word "good"—SALT treaty—fully protective of our interests and those of our NATO allies—can be negotiated. This is a matter of primordial importance. However, such an arms limitation pact has to be submitted to the Senate in the appropriate form—as a treaty. The Senate will insist that it have the opportunity to exercise its constitutional prerogative.

I want to read my letter to the President.

I have not received a reply to this hour.

OFFICE OF THE MAJORITY LEADER,
*Washington, D.C., August 15, 1978.*

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: I understand that consideration is being given to the submission of a strategic arms pact with the Soviet Union—if and when one is successfully negotiated—to the House and Senate for their joint action. This course of action would involve treating the pact as an "agreement" rather than a treaty.

With great respect for your prerogatives as Chief Executive, I must strongly urge you not to take this course. In the field of foreign affairs the roles of the Executive and the Congress are restricted by the principles of the Constitution. The limitations, indeed the requirements of Article II, Section 2, with regard to the treaty-making power cannot be lightly waived. As set forth unambiguously in that section, the United States may become a party to a treaty only through the action of the President, by and with the advice and consent of two-thirds of the Senate.

An international pact which is so significant to the security interests of the United

States must, I believe, receive full status as a treaty which meets the full and only Constitutional definition of a treaty: one which is submitted to the Senate and must obtain a "super majority" in that body before it may be ratified by the Executive. As discussed at the Constitutional Convention and in the Federalist Papers, Article II, Section 2 was intended to impart a "peculiar propriety" to the union of the Executive and the Senate in the treaty area. It is incumbent upon both the Senate and the Executive to maintain this special relationship. If such an arms limitation pact is successfully negotiated, I strongly believe that the basic document should be submitted to the Senate in the form of a treaty.

A strategic arms pact with the Soviet Union is of such consequence that it must merit the confidence of the American people and broad support within the Senate.

I hope that a good SALT treaty, fully protective of our security interests and those of our allies, can be negotiated. I believe this to be a matter of highest importance. We want to do all in our power to reduce the threat of nuclear conflict. However, such a pact must be sound in every respect and able to withstand the Constitutional test of advice and consent.

Sincerely,

ROBERT C. BYRD,
*Majority Leader.*

So, Mr. President, I reiterate that I have heard, on several occasions, reports that there might be an attempt to avoid proceeding through the treaty process, which is clearly set forth in the Constitution, in the event a SALT pact is agreed upon by the administration.

I want again to urge that that approach not be utilized. I want to again urge that the matter be put at rest, as a matter of fact.

If the administration is not considering that approach, then I think it should say so, because if such a pact cannot stand the scrutiny and the careful and thorough study that is normally given to a treaty by the U.S. Senate, then there are serious questions in my mind as to whether or not such an agreement would be fully protective of the interests of the United States and our NATO allies.

So I urge, with all the sincerity I can muster, that such an approach not be utilized. If such a pact can stand the test, if the pact is in the protective interests of the United States and our NATO allies, then two-thirds of the Senate can be convinced, if the case is there and the case is made properly.

However, if there is any doubt that such a pact would stand that kind of scrutiny, then, in my judgment, the American people will not have faith and trust in that pact. If they observe what appears to be an attempt to make an end run, around the due constitutional process which provides that treaties have to be made by and with the advice and consent of the Senate, then the American people are going to be pretty dubious, and so am I, and so are a lot of Senators, in my judgment—pretty dubious about what is in that pact and why such an approach is being taken.

I hope that the reports are not well founded. I hope the administration will put them to rest, because I can say this—and I think I can say it with modest sincerity: If that is the approach that is going to be taken, then the administration is in for a very tough time.

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The Senator has 5 minutes.

Mr. ROBERT C. BYRD. I yield to the Senator from Illinois.

Mr. STEVENSON. I thank the distinguished majority leader.

## ADDITIONAL COPIES OF REPORT AND HEARINGS ON THE KOREAN INFLUENCE INQUIRY—SENATE CONCURRENT RESOLUTION 105

Mr. STEVENSON. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 105) authorizing the printing of additional copies of the final report and of volume II of the executive session hearings on the Korean influence inquiry.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. STEVENSON. Mr. President, this has been cleared on both sides and with the chairman and the ranking minority member of the Rules Committee, as well as the Ethics Committee and the minority leader.

Mr. President, this resolution would authorize printing, for the use of the Senate Select Committee on Ethics, 5,000 additional copies of its final report to the Senate on the Korean influence inquiry.

I know of no objection to the resolution, and I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to, as follows:

S. CON. RES. 105

*Resolved by the Senate (the House of Representatives concurring)*, That there be printed for the use of the Senate Select Committee on Ethics five thousand additional copies of its final report to the Senate, and two thousand additional copies of volume II of its executive session hearings, on the Korean influence inquiry.

## SPECIAL ORDER

Mr. ROBERT C. BYRD. Mr. President, I yield whatever time I have remaining to the Senator from Kansas.

The PRESIDING OFFICER. Under the previous order, the Senator from Kansas (Mr. DOLE) is recognized for not to exceed 15 minutes, plus the time yielded by the majority leader.

## SALT TREATY

Mr. DOLE. Mr. President, I share the views just expressed by the distinguished majority leader with reference to SALT.

When we stop to consider that the American people, in a recent survey by, I believe, the New York Times and CBS—a rather significant survey—indicated that for the first time they believe the Soviets are ahead of us militarily, then I think we want to focus very carefully on what could be, as the distinguished majority leader said, an end run around the Senate of the United States.

As one of those Senators who would like very much to support a good SALT agreement, I would find it very difficult if an effort were made to present it to us in some way other than a treaty. As a treaty, we could discuss it fully and it would require a two-thirds vote.

On the basis of that report, I hope the administration will follow the usual procedure; because, as the distinguished majority leader has indicated, there might be significant difficulty otherwise.

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time I will consume now not be charged against the Senator from Kansas.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TIME LIMITATION AGREEMENT—S. 2266

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as Calendar No. 1026, S. 2266, the bankruptcy bill, is called up and made the pending business before the Senate, there be a time agreement as follows:

One hour on the bill, to be divided equally between Mr. DECONCINI and Mr. WALLOP; 30 minutes on any amendment; 15 minutes on any debatable motion, appeal, or point of order, if such is submitted to the Senate; with the exception that there be no time limit on any amendment dealing with railroads; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement is as follows:

*Ordered*, That when the Senate proceeds to the consideration of S. 2266 (Order No. 1026), a bill to establish a uniform law on the subject of bankruptcies, debate on any amendment (except any amendment dealing with railroads, on which there shall be no time limitation) shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 15 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

*Ordered further*, That on the question of final passage of the said bill, debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the Senator from Arizona (Mr. DECONCINI) and the Senator from Wyoming (Mr. WALLOP): *Provided*, That the said Senators, or either of them, may,

from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

## COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978

Mr. ROBERT C. BYRD. Mr. President, under the order previously entered I ask that the Chair lay before the Senate Calendar Order No. 821, the CETA bill.

The PRESIDING OFFICER (Mr. LEAHY). The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2570) to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes.

The Senate resumed consideration of S. 2570.

Mr. ROBERT C. BYRD. Mr. President, I yield myself 1 minute from Mr. NELSON'S time.

## FEDERAL EMPLOYEES PART-TIME CAREER EMPLOYMENT ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1037.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 518) to provide increased employment opportunity by executive agencies of the U.S. Government for persons unable to work standard working hours, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Governmental Affairs with an amendment to strike all after the enacting clause and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Employees Part-Time Career Employment Act of 1978".

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) many individuals in our society possess great productive potential which goes unused because they cannot meet the requirements of a standard workweek; and

(2) part-time permanent employment—

(A) provides older individuals with a gradual transition into retirement;

(B) provides employment opportunities to handicapped individuals or others who require a reduced workweek;

(C) provides parents opportunities to balance family responsibilities with the need for additional income;

(D) benefits students who must finance their own education or vocational training;

(E) benefits the Government, as an employer, by increasing productivity and job satisfaction, while lowering turnover rates and absenteeism, offering management more flexibility in meeting work requirements, and filling shortages in various occupations; and

(F) benefits society by offering a needed alternative for those individuals who require or prefer shorter hours (despite the reduced income), thus increasing jobs available to reduce unemployment while retaining the skills of individuals who have training and experience.

(b) The purpose of this Act is to provide increased part-time career employment opportunities throughout the Federal Government.

PART-TIME CAREER EMPLOYMENT PROGRAM

SEC. 3. (a) Chapter 33 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter VIII—PART-TIME CAREER EMPLOYMENT OPPORTUNITIES

"§ 3391. Definitions

"For the purpose of this subchapter—

"(1) 'agency' means—

"(A) an Executive agency;

"(B) a military department;

"(C) an agency in the judicial branch;

"(D) the Library of Congress;

"(E) the Botanic Garden; and

"(F) the Office of the Architect of the Capitol; but does not include—

"(i) a Government controlled corporation;

"(ii) the Tennessee Valley Authority;

"(iii) the Alaska Railroad;

"(iv) the Virgin Island Corporation;

"(v) the Panama Canal Company;

"(vi) the Federal Bureau of Investigation, Department of Justice;

"(vii) the Central Intelligence Agency; and

"(viii) the National Security Agency, Department of Defense; and

"(2) 'part-time career employment' means part-time employment of 10, 20, or 30 hours a week under a schedule consisting of an equal or varied number of hours per day, whether in a position which would be part-time without regard to this section or one established to allow job-sharing or comparable arrangements, but does not include employment on a temporary or intermittent basis.

"§ 3392. Establishment of part-time career employment programs

"(a)(1) In order to promote part-time career employment opportunities in all grade levels, the head of each agency, by regulation, shall establish and maintain a program for part-time career employment within such agency. Such regulations shall provide for—

"(A) the review of positions which, after such positions become vacant, may be filled on a part-time career employment basis (including the establishment of criteria to be used in identifying such positions);

"(B) procedures and criteria to be used in connection with establishing or converting positions for part-time career employment, subject to the limitations of section 3393 of this title;

"(C) annual goals for establishing or converting positions for part-time career employment, and a timetable setting forth interim and final deadlines for achieving such goals;

"(D) a continuing review and evaluation of the part-time career employment program established under such regulations; and

"(E) procedures for notifying the public of vacant part-time positions in such agency, utilizing facilities and funds otherwise available to such agency for the dissemination of information.

"(2) The head of each agency shall provide for communication between, and coordination of the activities of, the individuals within such agency whose responsibilities relate to the part-time career employment program established within that agency.

"(3) Regulations established under paragraph (1) of this subsection may provide for such exceptions as may be necessary to carry out the mission of the agency.

"(b)(1) The Civil Service Commission, by regulation, shall establish and maintain a program under which it shall, on the request of an agency, advise and assist such agency in the establishment and maintenance of its part-time career employment program under this subchapter.

"(2) The Commission shall conduct a research and demonstration program with respect to part-time career employment within the Federal Government. In particular, such program shall be directed to—

"(A) determining the extent to which part-time career employment may be used in filling positions which have not traditionally been open for such employment on any extensive basis, such as supervisory, managerial, and professional positions;

"(B) determining the extent to which job-sharing arrangements may be established for various occupations and positions; and

"(C) evaluating attitudes, benefits, costs, efficiency, and productivity associated with part-time career employment, as well as its various sociological effects as a mode of employment.

"§ 3393. Limitations

"(a) An agency shall not abolish any position occupied by an employee in order to make the duties of such position available to be performed on a part-time career employment basis.

"(b) Any person who is employed on a full-time basis in an agency shall not be required to accept part-time employment as a condition of continued employment.

"§ 3394. Personnel ceilings

"In administering any personnel ceiling applicable to an agency (or unit therein), an employee employed by such agency on a part-time career employment basis shall be counted as a fraction which is determined by dividing 40 hours into the average number of hours of such employee's regularly scheduled workweek.

"§ 3395. Nonapplicability

"(a) If, on the date of enactment of this subchapter, there is in effect respect to positions within an agency a collective-bargaining agreement which establishes the number of hours of employment a week, then this subchapter shall not apply to those positions.

"(b) This subchapter shall not require part-time career employment in positions the rate of basic pay for which is fixed at a rate equal to or greater than the minimum rate fixed for GS–16 of the General Schedule.

"§ 3396. Regulations

"Before any regulation is prescribed under this subchapter, a copy of the proposed regulation shall be published in the Federal Register and an opportunity provided to interested parties to present written comment and, where practicable, oral comment. Initial regulations shall be prescribed not later than 180 days after the date of the enactment of this subchapter.

"§ 3397. Reports

"(a) Each agency shall prepare and transmit on a biannual basis a report to the Civil Service Commission on its activities under this subchapter, including—

"(1) details on such agency's progress in meeting part-time career employment goals established under section 3392 of this title; and

"(2) an explanation of any impediments experienced by such agency in meeting such goals or in otherwise carrying out the provisions of this subchapter, together with a statement of the measures taken to overcome such impediments.

"(b) The Commission shall include in its annual report under section 1308 of this title a statement of its activities under this subchapter, and a description and evaluation of the activities of agencies in carrying out the provisions of this subchapter.

"§ 3398. Employee organization representation

"If an employee organization has been accorded exclusive recognition with respect to a unit within an agency, then the employee organization shall be entitled to represent

all employees within that unit employed on a part-time career employment basis.".

(b) Subpart B of the table of chapters of part III of the analysis of chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3385 the following:

"Subchapter VII—PART-TIME CAREER EMPLOYMENT OPPORTUNITIES

"Sec.
"3391. Definitions.
"3392. Establishment of part-time career employment programs.
"3393. Limitations.
"3394. Personnel ceilings.
"3395. Nonapplicability.
"3396. Regulations.
"3397. Reports.
"3398. Employee organization representation.".

SEC. 4. (a) Section 8347(g) of title 5, United States Code, is amended by adding at the end thereof the following: "However, the Commission may not exclude any employee who occupies a position on a part-time career employment basis (as defined in section 3391(2) of this title).".

(b) Section 8716(b) of such title 5 is amended—

(1) by striking out of the second sentence "or part-time";

(2) by striking out "or" at the end of clause (1);

(3) by striking out the period at the end of clause (2) and inserting in lieu thereof "; or"; and

(4) by adding at the end thereof the following:

"(3) an employee who is occupying a position on a part-time career employment basis (as defined in section 3391(2) of this title).".

(c)(1) Section 8913(b) of such title 5 is amended—

(A) by striking out "or" at the end of clause (1);

(B) by striking out the period at the end of clause (2) and inserting in lieu thereof "; or "; and

(C) by adding at the end thereof the following:

"(3) an employee who is occupying a position on a part-time career employment basis (as defined in section 3391(2) of this title).".

(2)(A) Section 8906(b) of such title 5 is amended—

(i) by striking out "paragraph (2)" in paragraph (1) and inserting in lieu thereof "paragraphs (2) and (3)"; and

(ii) by adding at the end thereof the following new paragraph:

"(3) In the case of an employee who is occupying a position on a part-time career employment basis (as defined in section 3391 (2) of this title), the biweekly Government contribution shall be equal to the percentage which bears the same ratio to the percentage determined under this subsection (without regard to this paragraph) as the average number of hours of such employee's regularly scheduled workweek bears to the average number of hours in the regularly scheduled workweek of an employee serving in a comparable position on a full-time career basis (as determined under regulations prescribed by the Commission)".

(B) The amendments made by subparagraph (A) shall not apply with respect to any employee serving in a position on a part-time career employment basis on the date of the enactment of this Act for such period as the employee continues to serve without a break in service in that or any other position on such part-time basis.

SEC. 5. Each report prepared by an agency under section 3397(a) of title 5, United States Code (as added by this Act), shall, to the extent practicable, indicate the extent to which part-time career employment opportunities have been extended by such agency during the period covered by such report to each group referred to in subparagraphs (A), (B), (C), and (D) of section 2(a)(2) of this Act.

UP AMENDMENT NO. 1779

Mr. ROBERT C. BYRD. Mr. President, I send to the desk two amendments and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes unprinted amendment numbered 1779.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12 line 1, strike "10, 20 or 30," and insert in lieu thereof, "16 to 32."

On page 15, line 4, after the word "workweek." insert the following additional language: "This section shall become effective on October 1, 1979."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1116), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

I. PURPOSE OF LEGISLATION

The purpose of S. 518 is to encourage the use of part-time career employment in the Federal government by requiring each agency to establish a program to provide for increased part-time career employment opportunities.

II. SUMMARY OF LEGISLATION

S. 518, the Federal Employment Part-Time Career Employment Act:

(1) Requires the creation of a part-time career employment program in every Federal agency to promote the creation of part-time job opportunities at all civil service grade levels up to grade 16 (GS–16). By using the term "part-time career employment," the legislation makes clear the intent to encourage permanent part-time work, rather then temporary or intermittent employment. The number of part-time work opportunities created would be established by an annual goal set at the discretion of each agency. The program would entail the review of positions as they become open to ascertain whether they are appropriate for conversion to part-time slots; and procedures and criteria for establishing or converting such positions.

(2) Requires the Civil Service Commission to provide technical assistance and to advise and assist agencies in the establishment and maintenance of their part-time career employment program.

(3) Requires the Civil Service Commission to conduct a research and demonstration program with respect to part-time career opportunities in the Federal Government.

(4) Provides that an agency shall not abolish any position occupied by an employee in order to make the duties of that position available to be performed on a part-time basis. The legislation also provides that no full-time employee can be coerced into taking a part-time position as a condition of continued employment.

(5) Changes the current method for determining personnel ceilings in each agency by requiring the counting of employees on the basis of the fractional part of the 40-hour week actually worked.

(6) Prorates fringe benefits for part-time employees, including Government contribution to employee health insurance, on the basis of hours worked. Those employees currently working for the government on a permanent part-time basis would continue to receive benefits in accordance with current law and regulations.

III. LEGISLATIVE HISTORY

S. 518 was introduced on January 31, 1977, by Senator Nelson. Similar legislation had passed the Senate in the previous Congress, but was not considered by the House of Representatives. On March 13, 1978, however, the House did approve part-time legislation, H.R. 10126, by a vote of 294–84.

On June 29, 1978, the committee held hearings on S. 518 and H.R. 10126, as well as S. 517 and H.R. 7814, legislation dealing with flexible work hours in the Federal Government. At that time, the committee received testimony from Senator Gaylord Nelson; Representative Yvonne Brathwaite Burke; Representative Patricia Schroeder; Ersa Poston, U.S. Civil Service Commissioner, representing the administration's viewpoint; J. Gene Randolph, Executive Director of the National Federation of Federal Employees; Dr. Carol Greenwald, Commissioner of Banks, State of Massachusetts; Lynne Revo Cohen, director of Part-time Employment for the Women's Lobby, Inc.; and Dr. Fred Best of the National Commission for Manpower Policy. The committee has also received and benefited from a large number of written statements and letters concerning the need for legislation like S. 518.

On July 24, 1978, the committee considered S. 518 and unanimously adopted an amendment in the nature of a substitute. The bill approved by the committee differs from the bill as introduced in the following ways. The substitute:

(1) Deletes the requirement that agencies make available 2 percent of all their positions for permanent part-time workers every year for five years until at least a 10-percent level is attained.

(2) Changes the definition for part-time career employment from anything less than 40 hours per week to employment of 10, 20, or 30 hours per week.

(3) Allows agencies to prorate health benefits to employees based on the number of hours worked, eliminating the argument that the bill would increase the costs incurred by Government.

(4) Requires the Civil Service Commission to conduct a research and demonstration program to evaluate and assess the impact of part-time career opportunities in the Federal Government.

Overall, S. 518, as reported by the committee, mirrors H.R. 10126, the House-passed legislation, except for the definition of part-time career employment and the handling of fringe benefits.

IV. NEED FOR LEGISLATION

1. THE CURRENT SITUATION

In the past few years, there has been an increasing demand on the part of many Americans for productive, challenging em-

ployment which can be performed on a regular basis, working substantially less than a 40-hour week. The committee believes that S. 518 would represent a significant first legislative step in response to this interest in part-time work. Moreover, the committee believes such a step is overdue and that the Federal Government bears a particular responsibility to act in this area.

Approximately 17 percent[1] of those employed in the private sector in the United States are working on a part-time basis. These part-time jobs are generally clustered at the low end of the employment spectrum. For instance, a Labor Department report notes that the average hourly wage for women working part-time is $2.87, 98 cents below the wage of full-time women workers. As Lynne Cohen testified to the committee, "part of the difference is due to lower pay within the same occupations; part is due to part-time workers being in occupations that have lower wages for everyone."

Any simple profile of the present situation in the private sphere tends to mask significant progress which has taken place in recent years. An article in the June 1978 issue of Changing Times magazine reported:

Not everyone wants or can manage a full-time job. But until recent years, your chances of getting someone to hire you on a part-time basis were pretty limited. You could work for a retail store or a fast-food place, maybe be on call with a temporary help agency, sometimes get a regular arrangement with a bank or other company that needed to smooth out the work flows peculiar to its operation.

Today the picture is much bigger and better. Companies and government agencies are discovering the advantages of hiring part-time workers. There is a push to make part-time work a permanent fixture of payrolls.

The Federal Government has lagged far behind the private sphere in providing and improving part-time employment opportunities of any type. In 1977, only 2.3 percent of the Federal work force were permanent part-time employees. Moreover, 89 percent of the part-time federal jobs are in the lower grade levels, primarily in the clerical, food and medical services.

This record is particularly disappointing because the issue of increasing part-time employment opportunities in the Federal Government is not new. Fifteen years ago the President's Commission on the Status of Women recommended that the Federal Government establish a permanent structure for part-time job opportunities in Federal agencies. Since that time, the Civil Service Commission has reiterated that position in its booklet, "A Point of View."

The Department of Labor has also endorsed increased part-time employment opportunities. A 1975 GAO study cited major benefits for the Federal Government which would be derived from the increased use of part-time employees. In 1975 also, the Senate passed legislation sponsored by Senator Tunney, which would have mandated each agency in the Federal Government to fill 2 percent of its positions for each of the next 5 years with part-time employees. Despite this string of reports and initiatives, the number of people employed part-time in the Federal Government remains very low.

As Senator Nelson, sponsor of S. 518, has stated:

The Federal Government is the Nation's largest employer, but certainly not the most innovating one. The enactment of part-time legislation would authorize the Federal Government to undertake some very significant initiatives to enhance its position as a model employer—one which public and private employers could look to for leadership.

Most studies indicate that the failure to provide decent part-time employment opportunities reflects adherence by employers to certain preconceptions about part-time workers. Traditionally, those interested in working less than full-time have been stereotyped as unreliable and uncommitted. As Dr. Carol Greenwald, an economist and Commissioner of Banking in Massachusetts testified to the committee:

Firms have resisted part-time employment for a variety of philosophical and administrative reasons. Philosophically, they have viewed part-time work as not legitimate, legitimacy being defined as what men do. One can't be serious about a job if one wants to work part-time. . . . Management ignores the fact that what is considered full-time is not an immutable fact of nature, and that there have been more changes in what is full-time working during this century than there had been in the previous thousand years.

The same point was made by Professor William B. Werther in a March 1976 article entitled, "Mini-Shifts: An Alternative to Overtime," where he wrote that most managers do not regard part-timers as mature, dependable workers because they associate the concept of part-time work with young and inexperienced transient workers.

The committee believes that this stereotype is seriously misleading. It certainly confuses the concepts of temporary or intermittent work on one hand with part-time permanent employment on the other. Even a cursory review of the individuals and groups who stand to benefit most from S. 518 shows that there are many good reasons why people would want to work less than 40 hours a week, at least during some period of their lives. The Committee believes that permitting, even encouraging, individuals to work part-time when they want to further vitally important social policies.

[1] 17 percent is the figure most commonly cited. Depending on the definition of part-time work used, certain studies put the figure as high as 22 percent. See Stanley D. Nollen and Virginia H. Martin, "Alternative Work Schedules Part 2: Permanent Part-Time Employment," AMACOM, a Division of American Management Associates 1978.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1066, H.R. 10126.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill by title.

The legislative clerk read as follows:

H.R. 10126, a bill to amend title 5, United States Code, to establish a program to increase part-time career employment within the civil service, reported without amendment.

The Senate proceeded to consider the bill.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all after the enacting clause be stricken and the language of Senate bill S. 518, as amended, be inserted in lieu thereof; that the bill proceed to third reading; that it be passed; and that the motion to reconsider laid on the table and that S. 518 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill, as amended, is passed, and the motion to lay on the table the motion to reconsider is agreed to.

Mr. ROBERT C. BYRD. And S. 518 is indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are three additional measures that have been cleared with the minority side. I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1004, Calendar Order No. 1052, ond Calendar Order No. 1072.

The PRESIDING OFFICER. Without objection, it is so ordered.

## DISCONTINUANCE OF ANNUITY PAYMENTS FOR EMPLOYMENT OF A JUSTICE OR JUDGE

The Senate proceeded to consider the bill (H.R. 4320) to amend chapter 83 of title 5, United States Code, to discontinue civil service annuity payments for periods of employment as a justice or judge of the United States, and for other purposes, which had been reported from the Committee on Governmental Affairs with amendments as follows:

On page 3, line 12, after "3." insert "(a)";

On page 4, beginning with line 6, insert the following:

(b) Notwithstanding the provisions of section 8339(k) (2) of title 5, United States Code, an annuitant—

(1) who was unmarried at the time of retiring under subchapter III of chapter 83 of such title,

(2) who married after retiring during the period beginning on January 9, 1971, and ending on the day before the date one year before the date of the enactment of this Act, and

(3) who certifies to the Civil Service Commission that he was unable to file a timely election under such provision of law by reason of his faiure to receive notification of his right to file such an election,

may irrevocably elect, in a signed writing received in the Commission within one year after the effective date of this section, a reduction in his current annuity in accordance with the provisions of section 8339(j) of title 5, United States Code, but only if at the time of such election he deposits an amount equal to the amount by which, if he had filed an election on the last day on which he could timely file under such section 8339(k)(2), his annuity would have been reduced during the period beginning on the first day his annuity would have been reduced if he had so filed and ending on the day before a reduction is to take effect under this subsection. The reduction in annuity resulting from an election filed under this subsection is effective the first day of the month after the election is received in the Commission.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1082), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF AMENDMENTS

The amendments permit an unmarried annuitant, who married between January 8, 1971, and the day before the date 1 year before the date of the enactment of this legislation, 1 additional year in which to elect a reduced annuity to provide a survivor benefit, provided such annuitant deposits an amount equal to the amount by which his annuity would have been reduced if he had made a timely election for a reduced annuity under the provisions of section 8339(k), title 5, United States Code.

PURPOSE

The primary purpose of H.R. 4320, as amended, is to authorize the discontinuance of civil service annuity payments to former

civil service employees who, on or after the effective date of this legislation, are appointed as justices or judges of the United States. Annuity payments would be resumed upon resignation or retirement from regular active service as such a justice or judge.

The bill, as amended, would also reopen for 1 year an opportunity provided under Public Law 91–658 for annuitants who had been unmarried at the time of retirement, but who had married prior to that law's enactment on January 8, 1971, to elect within 1 year following such date of enactment a reduced annuity with a survivor annuity payable to a spouse.

In addition, the bill, as amended, permits unmarried annuitants, who married between January 8, 1971, and 1 year prior to the date of enactment, an additional year to elect a reduced annuity to provide a survivor benefit, provided such annuitant pays into the civil service retirement fund the amount which would have been deducted had an election been made at the time of marriage.

COMMITTEE ACTION

H.R. 4320 was the subject of hearings by the Subcommittee on Civil Service and General Services on May 17, 1978. Statements in support of the legislation were received from Hon. Gladys Spellman, Representative of Maryland, and Mr. Thomas Tinsley, Director, Bureau of Retirement, Insurance and Occupational Health, U.S. Civil Service Commission.

Thereafter, the subcommittee on July 12, 1978, recommended favorable action by the full committee on the bill, as amended.

BACKGROUND

As a general policy, annuitants under the civil service retirement system who are reemployed in the Federal Government are not entitled to receive both the annuity and the full salary during the period of reemployment. This policy is established under two provisions of law.

The first provision (5 U.S. Code 8344(a)) applies to most annuitants, other than retired Members of Congress, who are reemployed in Federal positions, and requires that an amount equal to the annuity allocable to the period of actual employment shall be deducted from the pay.

The second provision (5 U.S. Code 8344(d)) applies only to a retired Member of Congress receiving an annuity who is reemployed in an appointive or elective Federal position and requires that the annuity payments be discontinued during the reemployment and resumed in the same amount upon termination of the employment.

However, an annuitant, other than a retired Member of Congress, who is appointed as a justice or judge of the United States is not subject, under existing law, to any reduction, either in his civil service annuity or in his judicial pay. There is no specific provision of law authorizing the discontinuance of the annuity of such a justice or judge, such as there is under 5 U.S. Code 8344(d) in the case of a retired Member of Congress. The provisions of section 8344(a) authorizing an amount equal to the annuity to be deducted from the pay cannot be applied to the pay of a justice or judge, since article III of the Constitution prohibits the salary of a justice or judge from being diminished during his continuance in office.

The provisions of section 1, the bill, as amended, will place a restriction on the payment of civil service annuities to retirees from civil service positions who are appointed as justices or judges on or after the effective date of the Act. This restriction is identical to the one which now applies to retired Members of Congress—that is, upon reemployment as a justice or judge, the annuity payments will be discontinued during such employment and resumed in the same amount upon resignation or retirement from regular active service as such a justice or judge. The discontinuance of the annuity during such employment will have no effect whatever on any survivor rights that otherwise may be available.

Upon further study of this issue, the committee finds that much confusion and some controversy exists due to the differing interpretations and the administrative decisions based on the interpretations which have been handed down.

Since the pay of a justice or judge could not be reduced due to the constitutional prohibition, the Commission, until recently, took the alternative action of suspending payment of their annuities in order to avoid the dual payment of retirement annuity and salary. This action was based, in part, on a 1966 General Accounting Office decision (45 Comp. Gen. 383) concerning retirement benefits in the case of a judge who, on the basis of service in the executive branch, had established entitlement to a civil service annuity prior to his appointment as a judge. The Administrative Office of the U.S. Courts requested a decision as to whether he was entitled to receive the salary of his judicial office without reduction on account of the civil service annuity he was receiving. The Comptroller General held that, while the judge was entitled to full salary because of the constitutional prohibition against diminishing the compensation of a judge, the payment of his annuity was not authorized while he was in regular active service as a district judge.

In 1973, a judge of the Court of Claims appealed to the Civil Service Commission's Board of Appeals and Review the decision of the Commission's Bureau of Retirement, Insurance, and Occupational Health that he could not receive a civil service annuity during his tenure as a judge of the Court of Claims. In his appeal the judge stated his disagreement with the prior decision, as not being grounded in law. After the Board of Appeals and Review sustained the Bureau's decision on the basis of the GAO decision, the GAO decided to review its position on the issue. As a result, the General Accounting Office wrote to the General Counsel of the Civil Service Commission on August 29, 1974, expressing the view that GAO should not have considered the question of eligibility for a civil service annuity and that the 1966 decision was incorrect.

In 1975, the General Counsel of the Civil Service Commission and the Acting Assistant Attorney General reviewed this question and concluded that the suspension of the annuities of other than former Members of Congress was without authority of law.

In the absence of legal authority to suspend the judges' annuities, the Civil Service Commission concluded, in January 1976, that it could no longer continue the administrative practice of suspending their annuities, except in the case of retired Members of Congress. Also, any other judges who become entitled to annuity while serving as judges, and who apply for such annuity, will be entitled to receive payment thereof.

This decision is applicable only in those cases where the annuity is based on prior service in the civil service of the Government. Payment of annuity is still barred, however, to retired Members of Congress who are serving as justices or judges. Under the provisions of section 8344(d) of title 5, United States Code, the payment of annuity to Member annuitants is discontinued during reemployment and resumed in the same amount on termination of the reemployment.

The committee finds that there are 481 active justices and judges and 174 retired justices and judges who are receiving continuation of pay under 28 U.S.C. 371. At least 90 of these individuals have more than 5 years of prior civil service and a possible claim to at least a deferred annuity at age 62. The amount of annuity payable, though, will vary with each individual case. Back annuity totaling more than $200,000 is being paid to four judges whose annuities had actually been suspended under the prior practice. Eleven more judges have a vested title to deferred annuity which will be paid upon application for it. At least 70 judges have a vested title to deferred annuity based on more than 5 years of creditable service before they became judges, but they technically voided their annuity title by taking a refund upon being appointed a judge. To the extent that they relied on advice that payment of annuity to which they might become entitled at age 62 would be suspended during their active service as a judge, the refunds might be held as erroneous, but it is at best very questionable as to whether the Commission has any legal authority to permit them to make a redeposit and reestablish title to deferred annuity. Section 2 of the bill will give the right to redeposit.

Another provision of the bill (section 3), unrelated to the payment of civil service annuities to judges, would reopen for 1 year an opportunity given in 1971 by Public Law 91–658 for annuitants who had been unmarried at the time of retirement, but who had married prior to the law's enactment on January 8, 1971, to elect within 1 year after the law's enactment, a reduced annuity with a survivor annuity payable to their spouses. The new opportunity for such annuitants to elect a reduced annuity with survivor annuity payable to their spouses would be limited to annuitants who certify to the Civil Service Commission that they were unable to file a timely election under the 1971 law by reason of their failure to receive notification of their right to file such an election.

In addition, H.R. 4320, as amended, will permit a second group of unmarried annuitants, who married between January 8, 1971, and 1 year prior to the enactment of this legislation, 1 additional year in which to elect a reduced annuity to provide a survivor benefit, provided such annuitant deposits into the Civil Service Retirement Fund an amount equal to that which would have been deducted had a timely election been made under the provisions of Public Law 91–658.

Under the provisions of the new subsection (g) of section 8344, as added by the first section of the bill, a former employee or a former Member who becomes employed as a justice or judge of the United States, as defined by 28 U.S.C. 451, may apply for and be paid, in accordance with 5 U.S.C. 8342(a), the amount by which his lump-sum credit exceeds the total annuity paid to him, notwithstanding the time limitation on filing such an application presently contained in section 8342(a) of title 5.

Mr. STEVENS. Mr. President. Under existing law, U.S. justices and judges who are retired Federal employees are permitted to receive both full salary and annuity during periods of reemployment. I wish to support H.R. 4320 which, if enacted would place Federal justices and judges under the same provisions of existing law as relating to the reemployment of all other Federal employees.

In addition, there are judges who are appointed to the bench and who erroneously assume they are no longer entitled to retirement benefits. They void their rights to an annuity by taking a refund from their retirement contributions. H.R. 4320 gives them 1 year to redeposit the refund with interest and reestablish their right to the annuity.

The bill also covers annuitants who were unmarried at the time of retirement but married before the "second

spouse law" was enacted—January 1971. It grants them 1 additional year to elect a reduction in annuities to cover their spouse if they can show they failed to receive notification of the change in law.

Finally, anyone married after January 8, 1971, but 1 year prior to this bill's enactment, also has 1 year to elect a reduction. The requirement is that he redeposits the amount of the annuity he received over and above the reduced amount he should have received if he had made the timely reduction. In addition to the benefits which H.R. 4320 would have for those concerned, it is estimated that enactment of the bill will result in a reduction in Federal expenditures.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## PAPAGO INDIAN LANDS

The bill (H.R. 8397) to provide that a certain tract of land in Pinal County, Ariz., held in trust by the United States for the Papago Indian Tribe, be declared a part of the Papago Indian Reservation, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1133), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of this legislation is to formally declare that a 20-acre tract of land, now held by the United States in trust for the Papago Tribe of Arizona, is part of the Papago Indian Reservation.

BACKGROUND

The 20-acre tract of land, which the Papago people call Florence Village, is located approximately 30 miles from the main Papago Reservation. It lies adjacent to the city limits of Florence, Ariz. Papago tribal members originally settled the general area in the late 1800's, while pursuing agricultural employment there.

Sometime in 1917, the present site of Florence Village was occupied, and there are now some 40 people living there. Title to the tract was conveyed by the non-Indian owners to the United States by gift deed for the benefit of the Papago Tribe on December 30, 1974. The Secretary of the Interior then took the land into trust for the tribe, pursuant to the provisions of the act of June 18, 1934, chapter 576, section 5 (48 Stat. 985; 25 U.S.C. 465).

Prior to 1974, the Florence Villagers occupied the tract with the verbal consent of the owners, and paid annual taxes on the land. The residents are members of the Papago Tribe.

Although the tract is now Papago trust land, the Secretary of the Interior is statutorily precluded from administratively declaring the land to be formally a part of the Papago Indian Reservation. Section 4 of the act of March 3, 1927 (55 Stat. 1347; 25 U.S.C. 398d) prohibits the changing of any boundary of an Executive order Indian reservation except by act of Congress. Additionally, section 2 of the act of May 25, 1919 (40 Stat. 570; 25 U.S.C. 211) proscribes the creation of, or addition to, any Indian reservation within either New Mexico or Arizona except by act of Congress.

Thus, H.R. 8397 must be enacted to effectively annex this 20-acre tract of land as a part of the Papago Indian Reservation.

NEED

Denials or delays in the delivery of Federal program services have been experienced, due to Florence Village's nonreservation status. Assistance in the areas of housing improvement and development of sanitary facilities are vitally needed. Tribal jurisdiction over the tract may be questioned without formal reservation status. Enactment of H.R. 8397 will provide access to programs and services to resolve many of these problems.

## NATIONAL PORT WEEK

The joint resolution (H.J. Res. 773) authorizing and requesting the President of the United States to issue a proclamation designating the 7 calendar days beginning September 17, 1978, as "National Port Week," was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## PASCUA YAQUI INDIANS OF ARIZONA—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I submit a report of the committee of conference on S. 1633 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1633) to provide for the extension of certain Federal benefits, services, and assistance to the Pascua Yaqui Indians of Arizona, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of July 11, 1978.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I yield the floor.

## COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978

The Senate continued with the consideration of S. 2570.

The PRESIDING OFFICER. Who yields time? Does the Senator from Wisconsin seek recognition? If neither side yields time, time runs equally against both sides.

Mr. NELSON addressed the Chair.

The PRESIDING OFFICER. At the present time the parliamentary situation is that time is running equally against both sides. If the Senator from Wisconsin seeks recognition, time is running against him.

Mr. NELSON. Time is running against time on the bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. NELSON. Equally divided.

The PRESIDING OFFICER. Does the Senator seek recognition?

Mr. NELSON. Yes, Mr. President. I have some additional material which is entitled "Further Analysis S. 2570" which goes into much greater detail than the material put into the RECORD prior to this. I ask unanimous consent that this analysis of S. 2570 be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

FURTHER ANALYSIS OF S. 2570—STATEMENT OF PURPOSE

The CETA statement of purpose is amended to stress the goals of increased earned income for the program's participants and program coordination under the Act with other related programs such as economic development, community development, vocational education, vocational rehabilitation, and social service programs.

TITLE I—ADMINISTRATIVE PROVISIONS

*Summary*

Title I authorizes the administrative and general provisions applicable to all programs. Among such provisions are those governing the designation of prime sponsors; Secretary's authority; program planning; grievance procedures; planning councils; authorizations of appropriations; conditions applicable to employment, wages, and labor standards; reports; program discrimination, and program abuses.

*Authorizations of appropriations*

An authorization of appropriations of such sums as may be necessary is provided for four years (fiscal year 1979 through fiscal year 1982) for Title I (Administrative Provisions), II (Comprehensive Employment and Training Services), III (Special Federal Responsibilities), IV–B (Job Corps), IV–C (Summer Youth Program), and VI (Public Service Employment Program).

An authorization of appropriations of $3 million for fiscal year 1979 and such sums as may be necessary for the three succeed-

ing fiscal years is provided for Title V (National Commission for Employment and Training Policy).

An authorization of appropriations of $400 million for fiscal year 1979 and such sums as may be necessary for fiscal year 1980 is provided for Title VII (Private Sector Opportunities for the Economically Disadvantaged).

An authorization of appropriations of such sums as may be necessary for fiscal years 1979 and 1980 is provided for Titles VIII and IV, Parts A and D, (Youth Employment and Demonstration Projects Act and Young Adult Conservation Corp).

Titles VII and IV, Parts A and D are authorized for only two years because they are demonstration programs.

Up to 20 percent of the funds appropriated for the Act (exclusive of funds appropriated for Titles II–D and VI) is authorized for Title III programs and activities.

Between $3 million and $5 million of Title III funds annually are set aside for purposes of the National Occupational Information Coordinating Committee.

*Prime sponsor designation*

The current system for designating prime sponsors is retained by the bill reported by the Senate Human Resources Committee. However, S. 2570 further provides that a prime sponsor which has performed effectively in the past, and has been determined by the Secretary to have the capability for continued effective performance in the future, shall be designated a prime sponsor regardless of whether its population declines below 100,000 persons.

To promote local participation in CETA programs, a provision has been added which directs State prime sponsors to allow subareas to assist in the planning and delivery of services in their subareas. However, this provision is not intended to designate such subareas as program agents.

The Secretary is authorized to act as the prime sponsor for all employment programs which would normally be run by a prime sponsor when no prime sponsor applies to serve an area or when employment services are discontinued as a result of action by the Secretary on a complaint or in disapproving a prime sponsor's plan. This provision expands the Secretary's current authority to administer only existing Title I programs in such circumstances and assures that participants will not be denied services in such cases.

*Comprehensive employment and training plan*

The CETA grant system directs a prime sponsor to submit a comprehensive employment and training plan. It consists of a comprehensive employment and training agreement and an annual employment and training plan. The comprehensive employment and training agreement serves as the long-term charter governing the operation of a prime sponsor's program. The annual employment and training plan describes a prime sponsor's proposed activities and contains other program information for the fiscal year for which the prime sponsor is seeking CETA funds.

The annual employment and training plan includes modifications of the comprehensive employment and training agreement resulting from changed labor market conditions or other factors; a description of the eligible population identified by age, race, sex, and national origin, and the proposed activities and the services to be provided to these persons; the prime sponsor's performance and placement goals and the relationship of such goals to the Secretary's performance standards; proposed efforts to involve the private sector in CETA programs; and the prime sponsor's budget for the program year.

*Outreach and placement procedures*

Included in the information which prime sponsors submit in the comprehensive employment and training agreement is a description of the methods which they use to identify and place participants in programs.

The Committee report states that prime sponsors should employ a variety of outreach services to notify all segments of the community about the availability of CETA opportunities. The Committee bill requires prime sponsors to use objective placement procedure which are free of bias or stereotyped attitudes.

Intensive outreach programs and objective placement procedures are necessary to assure that various groups of unemployed persons are served equitably.

The Subcommittee on Employment, Poverty, and Migratory Labor received testimony at the CETA hearings that women and older American have not been served in certain CETA programs proportionate to their representation in the eligible population. Their underrepresentation has been particularly significant in the high wage public service employment programs.

CHARACTERISTIC OF CETA PARTICIPANTS PERCENT DISTRIBUTION

| | Title I | Title II | Title VI |
|---|---|---|---|
| Fiscal year 1977: | | | |
| Male | 51.5 | 60.0 | 64.1 |
| Female | 48.5 | 40.0 | 35.9 |
| Age: | | | |
| Under 22 | 51.7 | 20.3 | 20.3 |
| 22 to 44 | 40.8 | 64.2 | 64.9 |
| 45 to 54 | 4.3 | 9.6 | 9.2 |
| 55 and over | 3.1 | 5.9 | 5.6 |
| First half of fiscal year 1978: | | | |
| Male | 48.9 | 55.7 | 62.7 |
| Female | 51.1 | 44.3 | 37.3 |
| Age: | | | |
| Under 22 | 49.9 | 20.3 | 20.4 |
| 22 to 44 | 42.4 | 64.9 | 65.6 |
| 45 to 54 | 4.4 | 9.3 | 8.6 |
| 55 and over | 3.3 | 5.6 | 5.4 |

Although reliable statistics indicating the wage rates of older Americans in CETA programs are not available, survey statistics submitted by the Department of Labor indicate that women, regardless of their academic qualifications, on an average receive lower wages than men performing public service employment.

FISCAL YEAR 1977 CETA PSE ENROLLEES BY EDUCATION AT ENTRY, SEX, AND BEGINNING WAGE (ESTIMATES BASED ON CLMS DATA)

| Beginning hourly wage | 12 yr (less than high school) | | | High school degree or equivalent | | | 12 yr (more than high school) | | |

| $5.01 | 1,185 | ---------- | 1,185 | 3,383 | 331 | 3,714 | 5,852 | 5,379 | 11,231 |
| Percent | 2 | ---------- | 2 | 4 | 1 | 3 | 8 | 10 | 9 |
| NA | 3,862 | 1,984 | 5,845 | 4,555 | 2,457 | 7,011 | 4,953 | 3,649 | 8,601 |
| Percent | | | | | | | | | |
| Average | 3.24 | 2.76 | 3.12 | 3.64 | 3.11 | 3.42 | 4.12 | 3.75 | 3.96 |
| Median [1] | 3.08 | 2.66 | 2.93 | 3.50 | 3.00 | 3.31 | 3.97 | 3.47 | 3.81 |

[1] The lower limit of the $2.76 interval was set at $2.30.

The foregoing statistics may be the result of a number of factors including de jure and de facto discrimination practices in the development and administration of CETA programs.

The hiring and employment practices of prime sponsors may also reflect popular myths concerning women and older workers. Among such myths is the belief that these groups as a whole are interested in or capable of performing only a limited range of work; that they universally lack the stamina to perform labor intensive jobs; and that they do not need higher paying jobs or skilled training opportunities because they are temporary or secondary wage earners.

As women enter the labor market in record numbers, frequently as primary wage earners, and as they branch into fields traditionally occupied by men, myths concerning the female worker are slowly disappearing.

Likewise, the increasing longevity of Americans, coupled with the need of many older

citizens to work beyond the normal retirement period in order to sustain their basic needs, is reshaping public opinion concerning the older worker.

The Subcommittee received testimony that certain laws and directives establishing job referral and placement priorities for veterans limits the ability of prime sponsors to serve other groups. For example, many prime sponsors use the Employment Service as a primary or sole source of CETA job referrals. The Employment Service is directed by law to list certain job orders for Vietnam-era veterans prior to making them available to the general public. Women and older Americans are at a disadvantage in applying for positions which are listed in this manner, since only a small percentage of these persons are Vietnam-era veterans.

The testimony indicated that a Departmental policy which directs prime sponsors to award Vietnam-era veterans 35 percent of public service employment positions has a detrimental effect upon the prime sponsor's ability to assist other eligible groups. Moreover, many prime sponsors are unable to meet this goal because there is an insufficient number of eligible veterans in their jurisdictions. For these reasons and because the unemployment rate for Vietnam-era veterans ages 20–34 has been lower than the national unemployment rate for men the same age throughout the entire year, the Committee bill prohibits the establishment of national or local hiring goals for veterans.

*Civil rights enforcement*

The Department of Justice recently completed a review of the Department of Labor's civil rights enforcement practices. The Chairman of the Senate Human Resources Subcommittee on Employment, Poverty and Migratory Labor wrote the Attorney General concerning this review. In response the Department of Justice Civil Rights Division made several observations concerning Labor's civil rights enforcement practices.

If a prime sponsor is determined to have been maintaining discriminatory employment practices or otherwise failing to serve equitably the eligible CETA population, CETA provides that a prime sponsorship may be terminated after an opportunity is provided for a hearing. Though Justice stated that between July 1, 1974, and September 30, 1977, the Department of Labor reported 283 findings of noncompliance with Title VI of the Civil Rights Act, none of these findings have resulted in an administrative hearing being brought against the recipient of funds who was in noncompliance.

The Department of Justice stated that the Department of Labor does not uniformly apply standards for investigating and evaluating compliance with civil rights laws. Different standards prevail in the various regional offices.

Justice noted that Labor does not have a uniform system for monitoring the number, type, and status of cases, but rather occasionally conducts *ad hoc* reviews of regional civil rights programs. All regional offices are required to maintain Title VI complaint logs which are routinely forwarded to Labor. However, since Title VI is only applicable to discrimination on the basis of race, color, and national origin, these are the only types of complaints which are logged. Thus, complaints on the ground of discrimination on the basis of age, sex, handicap, religion, or political belief are not discovered by Labor except during a regional monitoring visit.

No overall statistics are available which provide information on the number of unresolved findings of noncompliance, their current status or age. Though the Attorney General may take action against a recipient of CETA funds upon notification by the Secretary of Labor that the recipient is in noncompliance with nondiscrimination provisions, Labor has never filed a Report of Noncompliance with Justice.

The Justice Department letter stated that there are an inadequate number of equal opportunity staff in the Department of Labor's regional offices. Though current CETA regulations require that Labor initiate a prompt investigation regarding discrimination complaints, a regional survey by Justice indicates that an average of 42.9 percent of such cases between October 1, 1976, and March 31, 1978, were back-logged in excess of 180 days.

The Committee bill modifies CETA's nondiscrimination provisions and enhances a complainant's ability to pursue civil rights remedies.

S. 2570 expands the grounds for filing a nondiscrimination complaint to include discrimination on the basis of handicap, political affiliation, religious belief, or age.

To assure that discrimination and other complaints are swiftly and appropriately resolved, the Committee bill requires recipients of CETA financial assistance to maintain both a formal and informal grievance procedure, and establishes a time frame for the processing of such complaints.

The current law provides that a prime sponsorship may be revoked upon a finding that the prime sponsor is maintaining a pattern or practice of discrimination or otherwise has failed to make employment services available equitably among significant segments of the eligible population. The Committee bill further provides that a ground for the termination of financial assistance is the failure to provide participants with employment opportunities at a level of skill and renumeration that are commensurate with their capabilities and not based upon stereotyped attitudes.

Appropriate Administrative action also is necessary to protect adequately civil rights under CETA. Labor should take appropriate action with respect to the problems identified during Justice's review. Further, the Secretary of Labor should individually monitor prime sponsors who fail to serve equitably significant segments of the eligible population, both with respect to the number of persons served from such groups and the nature of the employment service provided to them. When a prime sponsor fails to correct inequities, the Secretary should take appropriate remedial action.

*Service to those most in need*

S. 2570 requires prime sponsors to specify services for those who are experiencing severe hardship in obtaining employment, including those who lack credentials and need remedial skill development. The Committee is concerned that persons who lack academic credentials or skill training are not receiving appropriate consideration for employment services by prime sponsors.

Approximately 75 percent of all public service employment participants in fiscal year 1977 held high school diplomas and many of them held advanced degrees. The Secretary of Labor should establish procedures to assure that CETA positions are available to persons who would be unemployed absent such opportunities.

The failure to target CETA programs on persons who face the greatest employment barriers will continue the public criticism that the Congress has wasted taxpayers' money by creating federally assisted jobs for persons . . .

EDUCATIONAL ATTAINMENT OF CETA PARTICIPANTS FISCAL YEAR 1977

| | Title I | Title II | Title VI |
|---|---|---|---|
| Education: | | | |
| 8 grades or less | 10.0 | 7.3 | 8.2 |
| 9 to 11 | 39.8 | 15.2 | 18.9 |
| 12 and over | 50.2 | 77.5 | 72.8 |
| Education: | | | |
| 8 grades or less | 9.4 | 6.0 | 8.0 |
| 9 to 11 | 39.7 | 14.1 | 19.5 |
| 12 and over | 51.0 | 79.9 | 72.5 |

A survey of CETA participants in public service employment programs shows the following level of educational attainment beyond grade 12.

| | *In percent* |
|---|---|
| 13–15 years of education | 23.5 |
| 16 years of education | 10.6 |
| More than 16 years | 5.5 |

*Prime sponsor plan*

S. 2570 modifies the review process pertaining to the approval of a prime sponsor's annual plan. The Committee bill provides that the prime sponsor is to transmit the plan to the local planning council, the private industry council, the State employment and training council, appropriate units of general local government, and labor organizations. It must make the plan available to the State of legislature, general public appropriate community-based organizations, and educational agencies. These groups are allowed at least thirty days to review and comment upon the plan.

The prime sponsor is to consider the comments and recommendations made by all of these groups and is to pay special consideration to the remarks of the local planning council. The final decision with respect to plan modification, prior to its submission to the Secretary, lies with a prime sponsor. However, if the Secretary directs a prime sponsor to modify its plan as a result of the Secretary's review of the recommendations made by the Governor, the State employment and training council, or the prime sponsor planning council, the prime sponsor must explain its reasons for rejecting such recommendations.

The Committee bill provides that each prime sponsor must maintain a readily accessible and complete copy of the comprehensive employment and training plan for review by the public. This is intended to assure full public disclosure of the prime sponsors programs.

The expanded review process provided under the Committee bill will assure that a prime sponsor's plan has the benefit of the comments of the whole community.

*Complaints and sanctions*

The Committee bill modifies the current complaints and sanctions provisions. All recipients must establish formal and informal grievance procedures, including provisions for hearings. Time frames are established for handling complaints. At the prime sponsor level, an aggrieved party may seek an informal or formal determination of a complaint. The Secretary is charged with requiring prime sponsors to establish a formal process which requires that, when a hearing is requested, a determination on the merits be made within 60 days. A party who wishes to appeal to the Secretary either the formal or informal decision of the prime sponsor has the right to a due process hearing and a determination on the merits of the case within 120 days after exhausting the prime sponsor's grievance procedure.

The grounds for revoking a prime sponsorship have been expanded to include failing to materially expend funds within a reasonable time, failing to give due consideration to persons in areas of chronic and concentrated unemployment and failing to provide recipients with employment and training at levels of skill that are commensurate with their capabilities and not based upon stereotyped attitudes.

*Prime sponsor planning council*

The Committee bill modifies provisions governing the prime sponsor planning councils with respect to the membership of the council, its functions, and its staff.

The chairman of a prime sponsor planning council is to be a public member and the council membership must be representative of significant segments of the eligible population. The Committee believes that by requiring the council to be composed of men and women who represent various ethnic,

racial and age groups, the employment needs of the total community served will be considered in the council deliberations.

The council is to meet at least 6 times a year in meetings which are open and accessible to the public, and is to have a full-time staff which is funded by the prime sponsor. A full-time staff will assist the council to carry forth its responsibilities and will help to avoid conflicts of interest which otherwise might arise were the staff both to serve the council and perform services for the prime sponsor.

*State employment and training council*

The Committee bill makes similar modifications of provisions pertaining to the State employment and training council. The State council is required to have a public member as chairman, to meet at least 6 times a year in meetings which are open and accessible to the public, and to have a full-time staff.

Additionally, the membership of the council is changed to increase the coordination of employment activities within the State and to assure broad community consideration of employment policies. Under the new provisions, representatives of labor, business, and agricultural employers and workers comprise one-fourth of the membership of the council; community representatives one-fourth; representatives of local governments, including prime sponsors, comprise at least one-fourth; and representatives of service deliverers, including representatives of State agencies which have a direct interest in employment and human resource policies, comprise no more than one-fourth.

PART B—GENERAL PROVISIONS

*Special consideration for community based organizations*

The Committee bill provides that the Secretary is to give special consideration to community based organizations which have demonstrated effectiveness in the delivery of employment programs. There are certain community based organizations which, though recent arrivals in the manpower field, have expertise in delivering other services to the poverty community. Where such expertise is established, it is expected that such agencies also will be given careful consideration as deliverers of manpower services, particularly in programs intended to assist economically disadvantaged persons.

*Reporting requirements*

S. 2570 modifies the provisions of the current CETA law with respect to the reports which the Secretary of Labor is directed to provide to the Congress. These changes were prompted by what the Committee perceives to be a lack of basic program data essential for reviewing program effectiveness, including cost effectiveness, and determining whether specific programs are meeting the purposes and objectives of the Act.

For instance, though certain termination data is available, it is impossible to determine what happened to the participant. "Positive termination", for example, is a term used by the Department of Labor to describe a variety of termination situations. It may mean that a participant upon leaving a particular program entered the military, returned to school, or simply transferred to another CETA program.

S. 2570 directs the Secretary to provide pre-enrollment and post-enrollment follow-up data including information on various employees' retention rates in unsubsidized jobs and whether workers experience an increase or decrease in earnings after receiving CETA services. Such information should help to identify the kinds of employment services which assist program participants to successfully transition from CETA programs to unsubsidized employment.

Prime sponsors who have adequate labor information systems will not find this change in reporting burdensome. The Secretary should make technical assistance available to prime sponsors to develop or improve existing information systems. As noted by the National Commission for Manpower Policy, "such a system would contribute to the development of better performance standards; it would help prime sponsors improve the management of their programs; and it would provide the Department of Labor and the Congress with the information they need to maintain effective oversight of CETA."

A recent publication of the Department of Labor, Employment and Training Administration, recommends as a first priority for the successful management of an on-the-job training program the establishment of an adequate information system. The Committee bill provides for expanded on-the-job training opportunities. Thus, the availability of adequate labor information systems also would assist program management.

The establishment of management information systems would make essential data readily accessible and at the same time reduce the paperwork and reporting burden of prime sponsors.

TITLE II—COMPREHENSIVE EMPLOYMENT AND TRAINING SERVICES

*Summary*

Title II provides a program of comprehensive employment services for primarily structurally unemployed persons. Major modifications of the program from the current CETA law include targeting services on economically disadvantaged persons, participant employability assessment, special provisions relating to services for youth and older workers, mandatory training and supportive services provisions, and the addition of an upgrading and retraining program, as well as a public service employment program.

PART A—FINANCIAL ASSISTANCE PROVISIONS

*Allocation formula*

For Parts B and C, the Committee bill retains the current allocation formula in Title I, except that 85 percent rather than 80 percent of the funds appropriated for these programs is allocated by formula. The formula provides: of the amount available for distribution by formula, 50 percent is allocated to each State on the basis of the State's manpower allotment for the preceding fiscal year compared to the sums received by all States for these activities in that year; 37½ percent is allocated to States on the basis of the relative number of unemployed persons residing within the State compared to the number in all States; and 12½ percent is allocated to each State on the basis of the relative number of adults in low-income families residing within the State compared to the total number in all States. Not less than $2 million is to be set aside for distribution to the United States Trust territories, Guam, the Virgin Islands, American Samoa, and the Northern Marianas.

Of the remaining amount, 5 percent is available for vocational education assistance; 1 percent is available for operation of the State employment and training councils; 1 percent is available for States to establish linkages between prime sponsors and educational agencies providing training programs; 4 percent is available for the Governors' coordination and special services responsibilities under section 105; and the remainder of funds is available for discretionary distribution by the Secretary of Labor.

PART B—SERVICES FOR THE ECONOMICALLY DISADVANTAGED

Part B of Title II authorizes services for economically disadvantaged persons who are unemployed, underemployed, or in school youths. Supported work programs, part-time, flexitime and other alternative working arrangements, client outreach, classroom education, institutional skill training, on-the-job training, work experience, supportive services, and a variety of other activities are authorized.

PART C—UPGRADING AND RETRAINING

Part C authorizes occupational upgrading and retraining programs. These programs assist persons, regardless of their income, to be upgraded in their current employment, or retrained if they have received a bona fide notice of layoff, and are unlikely to find a similar job in that locale.

If either upgrading or retraining programs involve jobs covered by collective bargaining agreements, the programs must have the concurrence of labor organizations representing the employees in those jobs.

Since these activities are the only Title II programs which are not targeted on economically disadvantaged persons, the Committee has limited the authorization of appropriations for these programs to 5 percent of those funds allocated under Part A.

PART D—PUBLIC SERVICE EMPLOYMENT OPPORTUNITIES FOR THE ECONOMICALLY DISADVANTAGED

Part D provides for a public service employment program. However, comprehensive employment and training services authorized under Part B are permissible activities.

*Eligibility*

As with services authorized by Part B, program participation is limited to persons who are economically disadvantaged. Additionally, persons seeking services under this part must have been unemployed for 12 or more weeks.

*Wages*

Wages are limited to $10,000 per year adjusted upward on the basis of a wage adjustment index issued by the Secretary, but in no case may wages be increased by more than 20 percent. Prime sponsors are not permitted to supplement wages. Thus, in the highest wage areas, the maximum wage a person would receive is $12,000.

*Length of program participation*

Persons may hold Title II public service jobs for 78 weeks within a five year period, though no more than 28 weeks prior to October 1, 1978, shall be counted as part of the 78 weeks. Program participation may be extended for 6 months in areas of high unemployment as determined by the regulations of the Secretary.

*Authorization of appropriations*

An authorization of appropriations of such sums as may be necessary for fiscal years 1979 and the succeeding three fiscal years is provided. In order to assure that there is a large public service employment program for the structurally unemployed, the Committee bill provides that no funds may be made available for Title VI until a minimum of three billion dollars is first made available for Title II, Part D.

*Training and supportive services*

The Committee bill requires all Title II public service employment under it to be accompanied by appropriate training and supportive services. Individuals who lack job skills or prior employment experience will be able to participate in CETA programs more successfully if such programs are accompanied by training and supportive services. To assure that adequate funds are made available for these purposes, not less than 90 percent of the funds allocated for Part D are to be expended for wages, employment benefits, training, and supportive services. The remaining funds may be used for administrative and other allowable costs.

*Allocation formula*

The Committee bill provides that 85 percent of the funds available for Part D are to be distributed by formula. Not less than 2 percent is to be allocated to Native American entities. The remaining amount is available to the Secretary for his discretionary distribution to prime sponsors and Native American entities.

Of the amount distributed by formula, funds are allocated to prime sponsors in the following manner: one-third on the basis of the relative number of unemployed persons who reside in areas within the jurisdiction of each applicant as compared to the number of unemployed persons who reside in all such areas in all States; one-third on the basis of the relative excess number of unemployed persons (the number in excess of 4½ percent) who reside in areas within the jurisdiction of the applicant as compared to the excess number of unemployed persons who reside within the jurisdiction of all prime sponsors; and one-third to prime sponsors on the basis of the number of unemployed persons residing in areas of substantial unemployment (areas with an unemployment rate equal to or in excess of 6½ percent) within the jurisdiction of the prime sponsor compared to the number of unemployed persons residing in all areas of substantial unemployment.

SPECIAL FEDERAL RESPONSIBILITIES

*Summary*

Title III directs the Secretary to provide special programs for workers who are in need of supplementary services beyond the scope of Title II programs, including programs for Native Americans and migrant and seasonal farmworkers. The Secretary of Labor is also authorized to conduct programs of research, training, and evaluation.

PART A—SPECIAL NATIONAL PROGRAMS AND ACTIVITIES

*National programs*

The Committee bill modifies provisions relating to special national programs and activities so as to define more precisely the ways in which national program resources may be used. The Secretary is authorized to carry out programs which meet the employment-related needs of persons who face particular disadvantages in specific and general labor markets or occupations; programs which are most appropriately administered at the national level; programs which foster linkages with private sector employers; programs which eliminate or reduce critical skill shortages; and programs which serve those who become unemployed as a result of a large-scale loss of jobs in a locality. The Secretary is authorized to provide continued support for programs of demonstrated effectiveness. Additionally, the Secretary is directed to establish programs for displaced homemakers, offenders, persons of limited English-language proficiency, older workers, single parents, and the handicapped.

*Displaced homemakers*

In September, 1977, the Subcommittee on Employment, Poverty, and Migratory Labor held 2 days of hearings concerning displaced homemakers. A displaced homemaker is an individual who is frequently in their middle or older years, who has been absent from the labor force or working in the home for a substantial number of years, and who becomes "displaced" from his family role as a result of such occurrences as the death of a spouse, a divorce, or the disability of the primary wage earner.

The Committee agreed that the severity of the employment barriers faced by this group merits special attention through a program administered nationally by the Secretary. The authorization provides that the Secretary shall make funds available to conduct employment and training programs through multi-purpose projects or otherwise. Such programs may offer a full array of employment services including appropriate supportive services.

The original displaced homemaker amendment offered a set-aside of Title III funds for the establishment of a displaced homemaker program. The Committee, in lieu of a set-aside, agreed to accept a commitment made by the Department of Labor's Assistant Secretary for Employment and Training, Ernest Green, during full Committee consideration of the legislation that the Department would make available at least $5 million in fiscal year 1979 for funding displaced homemaker programs.

The Department also agreed to establish a special task force on displaced homemakers to coordinate the Deapartment's efforts in this area. The task force is to be composed of representatives of the Women's Bureau and the Employment and Training Administration.

*Native American Programs*

The Committe bill retains the provisions of the current CETA law with respect to Native American employment programs. However, the Committe bill increases the authorization of appropriations for Native American programs from an amount equal to not less than 4 percent of the title II funds which are distributed by formula under Part A, to an equivalent of 4½ percent of such funds. This action was taken because amendments to CETA in 1976 added native Hawaiians to the definition of "Native Americans". Additional funds are required to serve this enlarged group of Native Americans.

*Migrant and seasonal farmworkers programs*

The Committe bill retains the provisions of the current CETA law with respect to migrant and seasonal farmworkers programs. The Office of National Programs remains responsible for the administration of the program in recognition of the interestate nature of migrant and seasonal employment.

S. 2570 continues the current authorization of appropriations for this program, which is an amount equal to not less than 5 percent of the Title II funds which are distributed by formula under Part A.

*Job search and relocation*

The Committee bill adds a provision which authorizes the Secretary of Labor to carry out job search and relocation activities through agreements with States, State agencies, and prime sponsors. Under the provisions, job search assistance may be provided to economically disadvantaged, unemployed and underemployed persons, and relocation loans and grants may be provided to involuntarily unemployed individuals who have bona fide offers of employment.

PART B—RESEARCH, TRAINING, AND EVALUATION

*Research and demonstration projects*

The Secretary's research and demonstration authority in the areas of supported work, job sharing and other flexible employment arrangements, and welfare demonstration projects has been expanded. The Committee bill also authorizes a voucher demonstration project and an incentive program for prime sponsors who transition a significant number of Title II participants into unsubsidized employment.

*Welfare demonstration projects*

The purpose of the welfare demonstration projects is to test and analyze various employment programs as alternatives to public assistance for employable persons.

Welfare demonstration projects will provide information relevant to the successful implementation of an employment approach to meeting the income maintenance needs of low-income persons. This information will be useful regardless of whether or not Congress passes a comprehensive welfare reform package in the near future. All of the major welfare reform alternatives being considered by the Congress contain sizable programs of employment and training assistance to low-income families. The demonstrations will be conducted so that it will be possible to generalize the findings to a variety of different employment approaches.

Program participation will be voluntary. In a household headed by two adults, only one person may participate in the program at any given time. The decision of which person that will be is left to the choice of the family unit. In order to increase the opportunities of program participants to obtain unsubsidized employment, appropriate training and supportive services will be made available to all participants.

*Evaluations and incentive grants*

The bill authorizes an incentive grants program for prime sponsors who have conducted effective Title II programs. Grants are awarded based upon special evaluations which are to consider, among other things, the costs and difficulties encountered in assisting structurally unemployed persons. The Committee believes that prime sponsors who conduct successful programs should be rewarded for optimizing their resources without compromising client services. Such awards may also encourage other prime sponsors to develop innovative methods for assisting the transition of structurally unemployed persons to unsubsidized employment.

The Secretary is directed to establish in fiscal year 1979 a special voucher project to demonstrate the efficacy of providing vouchers to economically disadvantaged persons who are unemployed or underemployed. These vouchers entitle private employers to provide employment and/or training to such individuals in amounts equal to the value of the voucher, pursuant to the regulations of the Secretary.

The Committee agreed that the Secretary shall consider the following principles when developing regulations for this project:

1. Eligibility of participants is to be limited to persons who are unemployed, or underemployed, and disadvantaged.

2. Vouchers shall be issued by prime sponsors to enhance the employability of individual. Vouchers shall be worth up to $1.00 per hour of paid work by the participant to offset the lower productivity of eligible individuals. Factors to be considered in determining the value of the vouchers shall include, but not be limited to, participant employability, local wage rates and labor market conditions.

3. Vouchers shall be portable between employers, not committing the employer or employee to continue the work arrangement other than by mutual agreement, and shall be valid for up to eighteen months, as determined by the Secretary.

4. Procedures shall be established to insure that currently employed individuals are not displaced by voucher-eligible employees.

5. Voucher eligible employees shall be paid at a rate not less than the higher of the Federal on State minimum wage or the rate paid by that employer to other individuals performing the same or similar work.

6. In choosing prime sponsors to participate in this project, the Secretary shall select sites in such a manner as to insure an appropriate mix of rural and urban areas, of different concentrations of eligible participants, of different regions and labor markets and of different categories of price sponsors.

7. Participating prime sponsors shall integrate vouchers into their comprehensive services, and utilize a significant proportion of available vouchers for individuals completing training programs, so as to direct voucher recipients toward jobs with meaningful advancement opportunities.

The Secretary is instructed to prepare and submit a report to the Congress evaluating the effectiveness of this demonstration project. The Secretary's report shall include an evaluation of the project's effectiveness in increasing the employability and earnings of eligible groups, the willingness of private sector employers to participate, the desirability and skill level of jobs obtained by

participants, the displacement of regular employees as a result of the voucher program, the administrative feasibility of the program and any other factors deemed important by the Secretary.

TITLE IV—YOUTH PROGRAMS

The Committee bill places all youth programs in Title IV. Part A of Title IV consists of three programs enacted last year under the Youth Employment Demonstration Projects (YEDPA)—Youth Incentive Entitlement Pilot Projects, Youth Community Conservation and Improvement Projects, and Youth Employment and Training Programs. Part B authorizes the Job Corps; Part C authorizes the Summer Youth Program; and, Part D authorizes the fourth program which was enacted as part of the YEDPA—Young Adult Conservation Corps.

YEDPA was passed by the Congress last year. The Committee believes that these programs should be reexamined after they have had time to become fully operational and their impact has been analyzed. Thus, the Committee makes only minimal changes in these programs and authorizes them only through fiscal year 1980.

The Youth Employment and Training Programs is amended to authorize a demonstration program to test the efficacy of providing incentives to private industry to establish additional employment opportunities for youth. The Secretary is directed to provide a subsidy of up to $2,500 per worker to employers to hire economically disadvantaged youth. The Secretary is authorized to establish a maximum of ten such demonstration programs in urban and rural areas with high youth unemployment.

TITLE V—NATIONAL COMMISSION FOR EMPLOYMENT AND TRAINING POLICY

The current CETA law, Title V, provides for a national commission to examine national employment policies and to advise the Secretary of Labor concerning such policies.

The Committee bill modifies Title V. The membership of the Commission is increased from 17 to 27 persons. The Secretary of Housing and Urban Development, the Chairman of the Equal Employment Opportunity Commission, the Director of the Community Services Administration, the Director of the ACTION agency and an additional six public members are added to the Commission's membership. The name of the Commission is changed from the National Commission for Manpower Policy to the National Commission for Employment and Training Policy. The advisory role of the Commission is amended so that it is responsible for advising the President and the Congress on national employment and training issues.

The Commission currently is funded from a variety of sources, including the Department of Labor, other Federal agencies and private foundations. The Committee bill provides the Commission with an authorization of appropriation of three million dollars for fiscal year 1979 and such sums as may be necessary for the three succeeding fiscal years.

TITLE VI—PUBLIC SERVICE EMPLOYMENT PROGRAM

*Summary*

The purpose of Title VI in both the current CETA law and S. 2570 is to provide transitional public service employment jobs, to persons who are countercyclically unemployed. However, S. 2570 substantially modifies the eligibility, wage, and project provisions.

*Eligibility*

S. 2570 provides that eligibility for Title VI services is limited to an individual who has been unemployed for 45 days or more and whose family income over the preceeding 3 months, which when annualized, does not exceed 85% of the lower living standard income level as compiled by the Bureau of Labor Statistics.

Under the provisions of the 1976 CETA amendments, all Title VI public service employment positions funded in addition to those positions existing on June 30, 1976, are to be filled by persons who meet strict eligibility criteria, and these jobholders also are to be employed in 12 month projects. Generally, persons are qualified for these positions if their previous annual family income is no more than 70 percent of the BLS lower living standard budget and if they have been unemployed for at least 15 weeks, exhausted unemployment insurance, compensation benefits, or if they are receiving AFDC. One-half of the vacancies below the June 30, 1976, sustainment level created by attrition also are required to be filled by persons who meet the strict eligibility criteria set forth above.

The remaining 50% of the jobs below the June 30, 1976, sustainment level, however, can be filled by persons without regard to income eligibility requirements so long as they have been unemployed for a brief period of time—15 days in areas having at least 7% unemployment rate, or 30 days in an area with an unemployment rate of less than 7%.

S. 2570 would eliminate these "sustainment jobs" provisions from the CETA law. This means that all positions which become available either by attrition or by new program dollars would have to meet the targeted eligibility criteria of the new Title VI program.

*Length of program participation*

Program participation is limited to one year within a five year period, though it may be extended for a period of no more than 6 months in areas of high unemployment. Under current law, a person may participate in CETA programs for an undefined period.

*Projects*

Current law provides that funds expended for Title VI sustainment positions may be used for both activities of an unlimited duration and projects which are twelve months in length. Testimony received by the Committee indicates that projects tend to reduce the rate of fiscal substitution. Thus, the Committee bill provides that all public service employment under Title VI is to be only in projects. The projects are to be of limited duration, but may be extended beyond twelve months upon review by the prime sponsor at least once a year, in accordance with regulations issued by the Secretary. The Committee intends that the Secretary, in extending such projects, assure that they are not merely increments of existing municipal services, but rather that they involve work which the prime sponsor would not finance in the absence of federal assistance.

*Wages*

S. 2570 amends the current law by restricting the total wages which may be paid to a Title VI jobholder. As in current law, a maximum federal wage base of $10,000 is provided. S. 2570 provides that this federal base may be adjusted upward to $12,000 on the basis of a wage index. Thus, high wage areas will have a higher federal wage base than low wage areas. Supplementation of the Federal wage base by local resources is limited under the Committee bill to a maximum amount equivalent to 10 percent of a prime sponsor's Title VI allocation, no individual may have his federal base salary supplemented by more than 20 percent. Thus, in the highest wage areas, the maximum wage a Title VI participant may receive is $14,400.

*Allocation formula*

The Committee bill retains the same allocation formula as the one currently used to distribute Title VI funds except that 85 percent rather than 90 percent of the funds available are to be distributed by formula.

S. 2570 provides that not less than 85 percent of the amount available for Title VI is to be allocated to prime sponsors in accordance with the following formula: 50 percent is allocated on the basis of the relative number of unemployed persons who reside in areas within the jurisdiction of each prime sponsor compared to the number of unemployed persons who reside in all such areas in all states; 25 percent is allocated on basis of the number of unemployed persons residing in areas of substantial unemployment (areas with an unemployment rate equal to or in excess of 6½ percent) within the jurisdiction of the prime sponsor compared to the number of unemployed persons residing in all areas of substantial unemployment; and 25 percent is allocated on the basis of the relative excess number of unemployed persons (the number of unemployed persons in excess of 4½ percent) who reside within the jurisdiction of the prime sponsor compared to the total excess number of unemployed persons who reside within the jurisdictions of all eligible prime sponsors.

The Secretary must reserve an amount of not less than 2 percent of the sums available for Title VI for Native American entities. The Secretary may use the remaining amount in his discretion to assist prime sponsors and Native American entities.

*Training and supportive services*

S. 2570 provides that not less than 10 percent of the funds allocated to prime sponsors for public service employment under Title VI shall be used to provide training and employability counseling and other services. Under current law, 85 percent of Title VI allocations may be used only for wages and fringe benefits for employees. The remaining 15 percent may be used for allowable costs, including administration, equipment, supplies, and materials. There is no specific allowance for training funds, although prime sponsors are authorized to use available funds from the 15 percent allowance for training. Under the Committee bill, not less than 80 percent is to be used for wages and fringe benefits, not less than 10 percent for training and other services for participants, and the remainder for administrative costs.

Training and employability services under Title VI are necessary because due to the new limitations on program participation, many participants who will be required to leave the program on September 1, 1979, will be ill-equipped to undertake employment in the private sector. Many Title VI employees have been drawn over the past year from the ranks of the long-term unemployed and from low-income households pursuant to eligibility standards enacted by the Congress in October 1976. These participants have been afforded work, but many have been provided with little or no training. Lack of funds for this purpose, combined with the urgency with which Title VI employment projects were established, account for the lack of training. For these reasons, the Committee believes it is important that funds be made available in Title VI specifically for training and employability counseling and services.

In order to assure that a maximum of the allocation is expended for client services, the Secretary should assure that the administrative fee retained by prime sponsors upon subcontracting with a program agent is the actual costs incurred in administering the program.

*Verification of eligibility*

Public service employment programs have demonstrated an ability to rapidly expand. Under President Carter's economic stimulus package the number of public service positions more than doubled to over 750,000 in a little more than one year. Notwithstanding such rapid expansion, few serious problems were encountered. However, it does appear that in the rush to fill these positions, par-

ticipant eligibility verification was lax. Based upon a recent survey by the Comptroller General, the General Accounting Office reported that approximately 10 percent of all public service employment participants in the programs surveyed were ineligible. Though this situation may have been difficult to avoid as a result of the rapid build-up of the public service jobs programs, the Committee considers the high percentage of ineligible CETA participants to be a serious problem. The Committee urges the Department of Labor to develop a method of verifying participant eligibility statements. Every CETA position obtained by an ineligible person eliminates a position for someone who may not otherwise have the opportunity to be employed, but for federally assisted employment programs.

TITLE VII—PRIVATE SECTOR OPPORTUNITIES FOR THE ECONOMICALLY DISADVANTAGED

Title VII authorizes prime sponsors to establish private industry councils. The purpose of the councils is to involve the private sector and labor in the development and implementation of CETA programs, so as to increase private sector training and job placements for economically disadvantaged workers.

*Council responsibilities*

The councils will assist prime sponsors to develop and implement employment programs in private businesses and industries. Programs primarily will consist of on-the-job training with private employers. The councils are authorized to undertake a variety of other activities, such as developing linkages between educational institutions and employment programs, and disseminating information to private employers to encourage their participation in CETA programs.

The councils will serve as the focal point for the business perspective on CETA matters. They should both advise the prime sponsor of the viewpoint of private enterprise and translate to fellow members of the business community the advantages of working closely with the CETA program. It is the committee's intent that funds available under Title VII be used for additional innovative sector progams and that prime sponsors will continue without reduction their existing sector efforts under other parts of CETA. Also, the committee recognizes the existence of many community-based organizations and other service deliverers who are currently engaged in successful private sector programs with the prime sponsor and it expects that the prime sponsor will closely coordinate the activities of all these deliverers with the councils to ensure an expansion in service levels, to avoid competition, and to take advantage of the effectiveness of current deliverers of services.

*Council membership*

It is the responsibility of the prime sponsor to appoint the members of the private industry council and to designate a chairman. Business, including small and minority business, and labor are to be represented on the Council. Though a majority of the Council's membership must be business representatives, the prime sponsor may also appoint representatives of community-based organizations, educational agencies and institutions, and client groups. In order to provide substantial cross-fertilization between the local prime sponsor planning council and the private industry council, the chairman, or a designee of the chairman, of the prime sponsor planning council is to serve as an ex officio, nonvoting member of the private industry council, and the chairman, or a designee of the chairman of the private industry council is to serve that same capacity on the local planning council.

Business representation on the council may consist of an existing organization, or a newly formed organization and members of the prime sponsor planning council. However, representation of a variety of business organizations on the council is preferable in order to encourage the involvement of a wide spectrum of the business community in CETA programs.

*Integration of the private industry council and the local planning council*

The private industry councils will assist prime sponsors in relating the planning and operation of the prime sponsor's other programs and activities to the private sector. Recognizing that there is a CETA planning council in each area and that the prime sponsor itself is ultimately responsible for all CETA operations, it is the committee's intent to assure the integration of the private industry council with existing CETA functions.

In addition to the respective chairman of the local planning council and the private industry council serving as ex-officio members on one another's councils, both councils are required to provide copies of one another's plan to each other for comment. These recommendations are to be considered by each respective body in developing its programs. The legislation provides that the comments of the prime sponsor planning council must have been satisfactorily considered prior to submission of the private industry plan to the Secretary.

*Prime sponsor authority*

While the private industry council is under the authority of the prime sponsor, the council is to have major responsibility for the development of Title VII programs. However, the role of the prime sponsor is imminent as the Secretary may not authorize any program which does not have the approval of the prime sponsor. If part of the plan fails as a result of the prime sponsor's refusal to approve a particular program, the Secretary is to finance the remainder of the plan.

*Financial assistance provisions*

Ninety-five percent of the funds available for title VII are to be allocated on an equitable basis among participating prime sponsors taking into account the factors used to distribute funds for Title II, Parts A, B and C. Of the remaining available amount, the Secretary is to provide financial assistance to prime sponsors who join together to establish a single private industry council to Native American prime sponsors who operate programs on the reservation.

*Miscellaneous provisions*

The general and administrative provisions of title II are applicable to title VII.

Mr. NELSON. Mr. President, I ask unanimous consent that Steve Paradise and Mike Forcey have the privilege of the floor during the course of the consideration of the pending legislation and the rollcall votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I have some technical amendments, if the Senator from Kansas does not mind.

Mr. DOLE. Go ahead.

UP AMENDMENT NO. 1780

(Purpose: To strengthen the provisions relating to the Commission for Employment Policy

Mr. NELSON. Mr. President, I send to the desk an unprinted amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes certain technical corrections as unprinted amendment numbered 1780.

The amendment is as follows:

On page 363, beginning with line 12, strike out through line 19 on page 368 and insert in lieu thereof the following:

"TITLE V—NATIONAL COMMISSION FOR EMPLOYMENT POLICY

"STATEMENT OF PURPOSE

"SEC. 501. The purpose of this title is to establish a National Commission for Employment Policy which will have the responsibility for examining broad issues of development, coordination and administration of employment and training programs, and for advising the President and the Congress on national employment and training issues.

"COMMISSION ESTABLISHED

"SEC. 502. (a) There is established a National Commission for Employment Policy (formerly known as the National Commission for Manpower Policy and hereinafter referred to as the 'commission'). The Commission shall be composed of 15 members selected as follows:

"(1) The Secretary of Labor, the Secretary of Health, Education, and Welfare, the Administrator of Veterans' Affairs, the Chairman of the Equal Employment Opportunity Commission, the Director of the Community Services Administration;

"(2) A representative of the National Advisory Council on Vocational Education established under section 162 of the Vocational Education Act of 1963; and

"(3) Nine members broadly representative of labor, industry, commerce, education (including vocational and technical education), veterans, State and local elective officials, community based organizations, individuals served by employment and training programs and of the general public, appointed by the President.

"(b) The term of office of each member of the Commission appointed under clause (3) of subsection (a) shall be 3 years except that—

"(1) any member appointed to fill a vacancy shall serve for the remainder of the term for which his predecessor was appointed, and

"(2) the members first taking office shall serve as designated by the President, four for terms of two years, and five for terms of three years.

"(c) (1) The Chairman shall be selected by the President from among members appointed pursuant to clause (3) of subsection (a).

"(2) The Commission shall meet not fewer than 3 times a year at the call of the Chairman.

"(3) A majority of the members of the Commission shall constitute a quorum, but a lesser number may conduct hearings. Any recommendation may be passed only by a majority of the members present. Any vacancy in the Commission shall not affect its powers but shall be filled in the same manner in which the original appointment was made.

"(d) There shall be an Executive Director of the Commission who shall be appointed by the President.

"FUNCTIONS OF THE COMMISSION

"SEC. 503. The Commission shall—

"(1) identify the employment goals and needs of the nation, and assess the extent

to which employment and training, vocational education, institutional training, vocational rehabilitation, economic opportunity programs, public assistance policies, employment-related tax policies, labor exchange policies, and other policies and programs under this Act and related Acts represent a consistent, integrated, and coordinated approach to meeting such needs and achieving such goals;

"(2) develop and make appropriate recommendations (including recommendations responsive to requests made by the Committee on Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives), and develop innovative approaches, designed to meet the needs and goals described in clause (1);

"(3) examine and evaluate the effectiveness of any federally assisted employment and training programs (including programs assisted under this Act), with particular reference to the contributions of such programs to the achievement of objectives sought by the recommendations made under clause (2) of this section;

"(4) examine and evaluate major Federal programs which are intended to, or potentially could, contribute to achieving major objectives of existing employment and training and related legislation or those objectives set forth in the recommendations of the Commission. Particular attention shall be given to the programs which are designed, or could be designed, to develop information and knowledge about employment and training problems through research and demonstration projects or to train personnel in fields (such as occupational counseling, guidance, and placement) which are vital to the success of employment and training programs;

"(5)(i) identify, after consultation with the National Advisory Council on Vocational Education, the employment and training and vocational education needs of the Nation and assess the extent to which employment and training, vocational education, vocational rehabilitation, and other programs assisted under this and related Acts represent a consistent, integrated, and coordinated approach to meeting such needs; and (ii) comment, at least once annually, on the reports of the National Advisory Council on Vocational Education which comments shall be included in one of the reports submitted by the National Commission pursuant to this title and in one of the reports submitted by the National Advisory Council on Vocational Education pursuant to section 162 of the Vocational Education Act of 1963; and

"(6) evaluate and continue to study and make recommendations to the Congress on the impact of energy shortages and new energy developments upon employment and training needs and include the findings and recommendations with respect thereto in the reports required by section 505;

"(7) study and make recommendations on how, through policies and actions in the public and private sectors, the Nation can attain and maintain full employment, with special emphasis on the employment difficulties faced by the segments of the labor force that experience differentially high rates of unemployment;

"(8) identify and assess the goals and needs of the Nation with respect to economic growth and work improvements, including but not limited to conditions of employment, organizational effectiveness and efficiency, alternative working arrangements, and technological changes;

"(9) examine and evaluate the relationships between employment and training programs assisted under this Act with programs under parts A and C of title IV of the Social Security Act and related public assistance programs under the Social Security Act; and

"(10)(i) examine and evaluate the eligibility standards set forth in titles II and VI of the Comprehensive Employment and Training Act of 1973, as amended, to determine their impact on single heads of households (especially women and older Americans); and (ii) submit a report, no later than July 1, 1979, to Congress, for appropriate referral, on the Commission's findings together with any proposed changes in the Comprehensive Employment and Training Act of 1973, as amended, concerning the eligibility standards for such single heads of households.

"ADMINISTRATIVE PROVISIONS

"SEC. 504. (a) Subject to such rules and regulations as may be adopted by the Commission, the Chairman is authorized to—

"(1) prescribe such rules and regulations as may be necessary;

"(2) appoint and fix the compensation of such staff personnel as the Chairman deems necessary, and without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and the general schedule pay rates, appoint not to exceed 3 additional professional personnel;

"(3) procure the services of experts and consultants in accordance with section 3109 of title 5, United States Code;

"(4) accept voluntary and uncompensated services of professional personnel, consultants, and experts, notwithstanding any other provision of law;

"(5) accept in the name of the United States and employ or dispose of gifts or bequests to carry out the functions of the Commission under this title;

"(6) enter into contracts and make such other arrangements and modifications, as may be necessary;

"(7) conduct such studies, hearings, research activities, demonstration projects, and other similar activities as the Commission deems necessary to enable the Commission to carry out its functions under this title;

"(8) use the services, personnel, facilities, and information of any department, agency, and instrumentality of the executive branch of the Government and the services, personnel, facilities, and information of State and local public agencies and private research agencies, with the consent of such agencies, with or without reimbursement therefor; and

"(9) make advances, progress, and other payments necessary under this Act without regard to the provisions of section 3648 of the revised statutes as amended (31 U.S.C. 529).

"(b) Upon request made by the Chairman of the Commission, each department, agency, and instrumentality of the executive branch of the Government is authorized and directed to make its services, personnel, facilities, and information (including computer-time, estimates, and statistics) available to the greatest practicable extent to the Commission in the performance of its functions under this Act.

"REPORTS

"SEC. 505. The Commission shall make at least annually a report of its findings and recommendations to the President and the Congress. The annual report required by the previous sentence shall be transmitted to the President and to the Congress not later than February 1 in the year succeeding the fiscal year for which the report is being made. The Commission may make such interim reports or recommendations to the Congress, the President, Secretary of Labor, or to the heads of other Federal departments and agencies, and in such form, as it may deem desirable.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 506. There are authorized to be appropriated $3,000,000 for the fiscal year 1979 and such sums as may be necessary for the three succeeding fiscal years, for the purpose of carrying out this title."

On page 384, line 6, insert "(1)" after "(a)".

On page 384, between lines 13 and 14, insert the following:

(2) The National Commission for Manpower Policy in existence on the day before the date of enactment of this Act shall continue in existence until the National Commission for Employment Policy is appointed pursuant to title V of the Comprehensive Employment and Training Act (as amended by section 2 of this Act).

On page 181, in the table of contents, strike out title V and items 501 through 505 and insert in lieu thereof the following:

"TITLE V—NATIONAL COMMISSION FOR EMPLOYMENT POLICY

"SEC. 501. Statement of purpose.
"SEC. 502. Commission established.
"SEC. 503. Functions of the Commission.
"SEC. 504. Administrative provisions.
"SEC. 505. Reports.
"SEC. 506. Authorization of appropriations.

Mr. NELSON. Mr. President, today Senators JAVITS, BELLMON, DOMENICI, and I are offering an amendment to establish an independent Commission on Employment Policy. This Commission would replace the present advisory body responsible for examining and evaluating this Nation's employment and training programs and policies, the National Commission for Manpower Policy.

This amendment would reconstitute the present Commission and establish it as an independent Commission. The Commission is renamed the Commission for Employment Policy. The number of members on the Commission is decreased, and its functions are modified.

Under this amendment, the following Federal members would serve on the Commission: the Secretary of Labor, the Secretary of Health, Education, and Welfare, the Administrator of the Veterans' Affairs, the Chairman of the Equal Employment Opportunity Commission, and the Director of the Community Services Administration.

As in current law, the President is to appoint the public members and to designate the Chairman of the Commission from among the public appointees.

The purpose of the Commission is amended to provide that the Commission is to serve as an advisory body not only to the President, as under current law, but to the Congress as well.

The functions of the Commission would include an assessment of the extent to which public assistance policies, labor exchange policies, and related employment tax policies meet the employment goals and needs of the Nation. The Commission is directed to examine ways of achieving full employment, as well as to examine employment policies with respect to economic growth and work improvements. The Commission is directed to undertake a study of the relationship between public assistance programs (including those programs established under the Social Security Act) and employment policies and to study and report to Con-

gress on the impact of eligibility criteria under titles II and VI of the Comprehensive Employment and Training Act of 1973, as amended, on single heads of households, especially women and older Americans.

The amendment modifies current law concerning Commission appointments and vacancies, meetings and voting procedures, rules and regulations, appointment and compensation of staff, the acceptance of gifts, contractual rights, and technical assistance.

The Commission is authorized for a period of 4 years. An authorization of appropriations of $3 million for the fiscal year 1979 is provided and such sums as may be necessary for the 3 succeeding fiscal years.

Mr. President, the National Commission for Manpower Policy was enacted as part of the Comprehensive Employment and Training Act (CETA) in 1973. The Commission now has the responsibility to advise the Secretary of Labor on employment policies, and it has submitted an annual report and other reports to the President and the Congress.

The Commission's studies and reports have been very useful. Its reports are timely and nationally cited as authoritative sources on employment issues. However, the Commission's present dependency on Federal agencies for the bulk of their resources creates uncertainty because of the ad hoc nature of this funding arrangement, and it has severely limited the Commission's ability to pursue independently its objectives or to develop a long range agenda.

This amendment would reconstitute the Commission and establish it as an independent Commission with an authorization of appropriations of $3 million for fiscal year 1979 and such sums as may be necessary for the 3 succeeding fiscal years. The amendment also requires that other Federal agencies provide appropriate technical assistance in furtherance of the Commission's work.

During fiscal year 1978, the Commission's budget is estimated at $2.6 million. The majority of the Commission's funds now are provided by the Department of Labor. However, with the exception of a basic operating budget provided by Labor to support the Commission's staff and the regular meetings of the Commission, the Commission must solicit further funds from the Labor Department and other Federal agencies and the public to support the balance of its responsibilities. This means that resources to undertake special studies and reports, conferences, and other basic administrative and technical support activities are, at best, very uncertain.

Mr. President, last year the Congress directed the Commission to report on the implementation of public service employment programs under CETA. This year the Commission delivered to the Congress, in time for its deliberations on the reauthorization of CETA, a three-volume report on public service employment job creation.

The Commission is now studying the problem of youth unemployment and the role of the private sector in federally assisted employment programs.

This amendment would direct the Commission to examine a number of employment programs and related policies which will be of particular interest to the Congress next year. The amendment would direct the Commission to examine labor exchange programs, employment related tax policies, full employment policies, economic growth and work improvements, the relationship between public assistance programs and Federal employment programs, and the eligibility criteria for single heads of households under titles II and VI of CETA.

This amendment will provide the Commission with a more stable source of funding. It will no longer be dependent on the good will and concurrence of Federal agencies to support its objectives. A stable source of revenue is essential both to maintain the independent advisory nature of the Commission and to provide the Commission with sufficient lead time in which to formulate major undertakings. It will also assure that the work of the Commission is not interrupted due to an unexpected cut back in funding.

Mr. President, we have agreed on this amendment with the ranking Republican member of the Subcommittee on Employment, Poverty, and Migratory Labor (Mr. JAVITS), as well as Senators BELLMON and DOMENICI. I think it is noncontroversial. Would the Senator from New York wish to comment?

Mr. President, I do not believe there is any controversy on this legislation, and I am prepared to yield back the remainder of my time and let the Senator from New York proceed.

Mr. JAVITS. Mr. President, I ask unanimous consent that the following staff people may have access to the floor during consideration of this measure: Diane Kamino for the committee, Chip Waggoner and Sally Crossman for Senator STEVENS, and Jeff Boothe for Senator MARK O. HATFIELD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. I thank the Chair.

Mr. President, I regret very much that I was not here as soon as Senator NELSON started, but my problem was that we had a meeting of the Human Resources Committee to report out some bills, and my presence there was essential.

Mr. President, I have already made my opening statement on this bill, which is contained in the RECORD of August 22. I believe the bill is now truly in balance.

The staff, I think, is entitled to enormous commendation for the degree to which an effort has been made to adjust different aspects of the bill to the views of our colleagues insofar as it could humanly be done. Much ingenuity has been demonstrated in that regard respecting every aspect of the bill, including the authorization, which comes, of course, under our scrutiny altogether at this time.

I would like, because it is so critically important at this point by way of supplementing my own statement, to ask unanimous consent to have printed in the RECORD as a part of this debate an extraordinary summary of a study made by the Department of Labor, which has ascertained the postprogram experience for those who were in the CETA program and who terminated their work under the program.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[U.S. Department of Labor, Employment and Training Administration]

SUMMARY OF HIGHLIGHTS OF CONTINUOUS LONGITUDINAL MANPOWER SURVEY (CLMS) FOLLOWUP REPORT NO. 1, POST-PROGRAM EXPERIENCE AND PRE-POST COMPARISONS FOR TERMINEES WHO ENTERED CETA IN JANUARY-JUNE 1975

This is the first CLMS followup report. From interviews conducted about 18 months after entry, it presents data on how CETA participants have fared after leaving CETA and how their postprogram employment and earnings compare to their preprogram levels.

The data are on participants who entered CETA in January to June 1975, were enrolled in Titles I, II, or VI adult-oriented programs (class training, on-the-job training, adult work experience, and public service employment), and had been terminated by the time of followup interviews about 18 months after entry.

The report focuses on an estimated 320,000 such terminees (about two-thirds of all the January-June 1975 entrants) who had been out of the program at least 3 months and, for longer-term data, a subgroup of 193,000 who had been out for at least a year. All terminees are included, whatever the reasons for termination, so the data cover early dropouts as well as "completers."

Caution: This is the pilot CLMS followup effort. It is on participants enrolled in CETA's first year, is limited to early postprogram experience (3 months to a year), and does not include postprogram data on those still in the program 18 months after entry. For these and other reasons, it should be regarded only as a first general indication of how CETA participants make out after termination.

The key findings in brief are:

CETA participants had more employment and earnings after the program than before.

The improvement was accomplished despite more difficult economic conditions in the postprogram period which may have restrained the gain. (The national unemployment rate in the preprogram period was a bit over 5 percent, while in the postprogram period it averaged around 8 percent.)

Postprogram employment and earnings improved gradually over time. They were higher a year after termination from the program than in the first months after leaving the program.

The overall gain masks major differences between participants who had stable employment backgrounds and participants who had histories of limited employment.

Those with relatively good employment and earnings the year before entering CETA had a good level after the programs too, although it did not quite get back up to the preprogram level. Because they did not gain their prior level, they pulled down the all-terminee average gain.

Those with little employment and earnings before enrolling in CETA had a modest average level after the program, but that modest level was a very considerable gain over their low preprogram record. They therefore had much greater gains than the average for all terminees.

Over four-fifths of terminees gave a position rating to the CETA programs: 59 percent said they were "satisfied" with it, and 22 percent more said they were "very satisfied."

The following pages present highlight findings in a bit more detail.

Employment Experience: (1) Three months after leaving the CETA program, 58 percent of the terminees were employed. Some 25 percent were unemployed at that time and 17 percent were out of the labor force (primarily in school or another training program, in an

institution, or not seeking work because of family responsibilities, ill health, or other reasons).

This was much better than their status shortly (1 month) before they entered the program: Over twice as many were employed, unemployment was down by half, and the not-in-the-labor-force percentage was down by a third. The specific data, for the 320,000 terminees out at least 3 months, are:

| Point in time | Labor force status (percent) | | |
|---|---|---|---|
| | Employed | Unemployed | Not in labor force |
| 3 mo after termination | 58 | 25 | 17 |
| 1 mo before entry | 26 | 49 | 25 |
| Change: 1 mo before to 3 mo after | +32 | −24 | −8 |

(2) A sizable improvement over status shortly before entry was to be expected, however, for the group had a rather low employment level then (which was the basis for their being enrolled in CETA). There would likely have been improvement over the low level even if there were no program, although it is uncertain how quickly or how much in the absence of the program.

If we look further back before entry to the program to find a "more normal" prior period for them, and select 12 months before entry as a "before" measure, we find that 3-months-after record still is better, but only slightly: The proportion employed is up a bit, but unemployment is up too, as the main change was a decline in the number out of the labor force. The specific data for the 320,000 terminees are:

| Point in time | Labor force status (percent) | | |
|---|---|---|---|
| | Employed | Unemployed | Not in labor force |
| 3 mo after termination | 58 | 25 | 17 |
| 12 mo before entry | 51 | 21 | 28 |
| Change: 12 mo before to 3 mo after | +7 | +4 | −11 |

(3) It must be recognized that these before and after records were under different economic conditions. The 12-months-before of this group occurred in January to June 1974, when the national unemployment rate averaged 5.1 percent. The 3-months-after point occurred between Spring 1975 and late 1976, a period when national unemployment averaged 8.1 percent (low of 7.4 and high of 9.1%). The postprogram experience was clearly in a more difficult economic period which may have restrained the extent of postprogram improvement.

(4) Did postprogram employment at 3 months after hold steady, deteriorate or improve over time? The indication from data on those out at least a year is that there was gradual improvement during the first postprogram year: 54 percent were employed 1 month after termination, 57 percent after 3 months, and 62 percent at the 12-month-after point. (The group out of the program at least a year had been in the program an average of only 3 months and so are made up heavily of early dropouts or those in relatively brief programs.) The trend data on this group of 193,000 early terminees out at least a year are:

| Time point after termination | Labor Force Status (percent) | | |
|---|---|---|---|
| | Employed | Unemployed | Not in labor force |
| 1 mo | 54 | 28 | 18 |
| 3 mo | 57 | 25 | 18 |
| 6 mo | 57 | 24 | 18 |
| 9 mo | 60 | 21 | 19 |
| 12 mo | 62 | 22 | 16 |

(5) The overall data for all the terminees obscure major differences among subgroups. The most marked differences are related to prior employment history, as summarized below. (Differences by demographic characteristics and by program activity are also presented in this report.)

To compare the pre/post experience of those with good vs. poor pre-entry employment records, the terminees out at least 3 months were classified into 4 groups according to their predominant labor force status in the year before they entered CETA.

(a) Predominantly employed. These were the people employed 90% or more of the preprogram year. This subgroup, who can be characterized roughly as "cyclically unemployed" enrollees, made up 15% of the terminee group.

(b) Predominantly unemployed. These were persons with severe unemployment records, unemployed 50% or more of the pre-entry year. These "structurally unemployed" were 25% of the total terminees.

(c) Predominantly not in the labor force. These were primarily in school or not seeking work for 50% or more of the preprogram year. This subgroup, basically entrants or reentrants to the labor force, were 24% of the total group.

(d) Other were persons with a more mixed record who did not fit in any of the 3 preceding mutually exclusive categories. They generally had some extensive unemployment but not for as much as 50% of the year. They accounted for 36% of the terminee group.

The attached Table 1 shows the labor force status of each of these subgroups 3 months after termination compared to 12 months before entry to CETA. The subgroup predominantly employed the year before entry did relatively well after leaving the program: 67 percent were employed 3 months after termination. But because they also had a very high-pre-entry level (97 percent were employed 12 months before program entry), and some did not recover from the difficulties that led them to enter CETA, the subgroup as a whole fell far short of recovering to its high 12 months-before level.

Those who were predominantly unemployed the year before entry had a "modest" postprogram employment level: 50 percent employed 3 months after termination (vs. 67 percent for those who had a predominantly employed history). But because their pre-entry employment level had been quite low (31 percent employed 12 months before entry), their modest postprogram level of 50 percent employed represented a very substantial gain.

Those who were predominantly not in the labor force the year before entry to CETA also had a modest postprogram employment level (46 percent employed 3 months after termination) which was substantially higher than the level 12 months before entry (15 percent). But they also had sizable flow into unemployment and a substantial return to not-in-the-labor-force status, as many who sought to enter or reenter employment were apparently unable to do so quickly.

Finally, for the "other" group, which had a more mixed history the year before entry, the postprogram employment level was relatively high (67 percent employed 3 months after termination), but their level at 12 months before entry was also fairly high (70 percent employed) so this subgroup did not quite recover fully to its 12-months preprogram level.

In sum, the breakdown by prior employment history indicates that (a) the subgroups with better employment records before the program also had better records after the program, but did not get back up to the employment levels they had a year before entry, while (b) the subgroups who had limited employment the year before entry did not attain a high employment level after the program, but that level was a considerable gain over their preprogram level.

Earnings Experience: The findings on earnings before and after the program basically parallel the findings on employment status. Again, the extent of change depends in part on which pre-entry period is used to represent the before-program level.

(1) Earnings in the first quarter after leaving the program were up sharply over earnings in the quarter before entry to the program. The average annual earnings rate of all the terminees in the first 3 months after termination ($4,080, including those with no earnings) was $2,310 or 130% more than the same group's annual earnings rate ($1,770) in the 3 months before entry to the program.

(2) Since the earnings rate in the quarter just before entry was depressed by the fact that most enrollees had little or no earnings in that period, comparisons have been made with earlier periods too. Compared to earnings the full year before entry ($2,790), the annual earnings rate in the first quarter after termination was $1,290 or 46% higher. Compared to the earnings rate in the 4th quarter (months 10 to 12) before entry ($3,340), the first postprogram quarter's earnings rate was $740 or 22% higher.

(3) These overall data mask major differences among groups with different pre-entry employment histories. For the four classifications of predominant pre-entry experience cited earlier, the attached Table 2 presents annualized earnings for both the first quarter before entry and the fourth quarter before entry, compared to earnings in the first quarter after termination.

The table shows that the average rise in annualized earnings for all terminees of 130%, from the first quarter before to the first quarter after, was a product of three quite separate patterns: One subgroup roughly got back to its earlier level, another improved by 125%, and the other two improved over 500%. Specifically:

(a) Those predominantly employed the year before entry had the highest postprogram earnings, but did not recover their high pre-entry earnings level. Their earnings the first quarter after termination were 8% less than in the first quarter before entry.

(b) Those predominantly unemployed or not in the labor force the year before entry had lower postprogram earnings than the group who had been predominantly employed the year before, but their lower level still was a huge improvement over their very much lower pre-entry earnings. They earned roughly 500% more in the first quarter after termination than in the first quarter before program entry.

(c) The "other" group, with a mixed employment record the year before entry, gained about as much in dollar terms as the predominantly unemployed and not-in-the-labor force groups, but because their pre-entry earnings had been higher than those other groups, their percentage increase was of course smaller, about 125%.

If annualized earnings for the first quarter after termination are compared to an earlier pre-entry period, the fourth quarter before entry, the average change for all terminees was a 22% increase ($740 gain in annual earnings). Within this average, there was a much greater gain for those who had been predominantly unemployed in the preprogram year ($1,610 or 85%) or predominantly not in the labor force (increase of $2,300 or 258%). On the other hand, those who had been predominantly employed had lower earnings after the program than a year earlier ($1,100 or 19% less), because some did not recover to their former levels and pulled down the group's postprogram average. This was true too of the "other" group, whose average annual earnings in the first quarter after termination were less ($290 or 6%) than in their fourth quarter before program entry.

(4) Looking at each program activity separately, the largest pre-to-post earnings gains were experienced by terminees from public service employment and on-the-job training programs, with classroom training lagging behind a bit, and those in adult work experience programs experiencing the least change. The attached Table 3 presents the data for each activity. (These data do not enable appropriate comparison of the relative effectiveness of each activity, because there is considerable variation in who is served in each activity and for other reasons). Future CLMS reports will attempt to develop better bases for comparing the different activities.

Satisfaction with CETA: Terminees were asked about their "satisfaction" with the CETA program. Although this is a soft measure of program performance, it is noteworthy that 81% gave positive responses: 22% said they were "very satisfied" and 59% selected "satisfied" as their answer. Of the remaining 19% who gave negative responses, 13% said they were "dissatisfied" with their CETA experience, while only 6% chose "very dissatisfied" as their response.

There was a slight difference between activities: 77% rated classroom training as satisfactory, while on-the-job training, work experience, and public service employment were each rated satisfactory by 83%.

Other Data: The report presents detailed additional data on (1) in-program experience, including occupation of training or employment, wages and earnings while enrolled, length of stay, and proportions receiving ancillary manpower or supportive service in addition to their principal activity, and (2) variations in program outcome by selected demographic characteristics.

TABLE 1.—PREPOST CHANGES IN LABOR FORCE STATUS FOR CETA TERMINEES[1] BY PREDOMINANT LABOR FORCE STATUS IN PREPROGRAM YEAR

| Predominant status in year before entry and points in time | Labor force status (percent) | | |
|---|---|---|---|
| | Employed | Unemployed | Not in labor force |
| All terminees:[1] | | | |
| 3 mo after termination | 58 | 25 | 17 |
| 12 mo before termination | 51 | 21 | 28 |
| Change: 12 mo before to 3 mo after | +7 | +4 | −11 |
| Predominantly employed: | | | |
| 3 mo after termination | 67 | 20 | 13 |
| 12 mo before entry | 97 | 2 | 1 |
| Change: 12 mo before to 3 mo after | −30 | +18 | +12 |
| Predominantly unemployed: | | | |
| 3 mo after termination | 50 | 35 | 15 |

Mr. JAVITS. The report focuses on some 320,000 such terminees, as they are called, about two-thirds of whom were entrants into the program in the period January to June 1975, and who had been out of the program for about 3 months when this survey was taken.

The committee findings in the survey are as follows: The CETA participants had more employment and earnings after having been through the program than before, notwithstanding that the economic conditions were more difficult in the postprogram period, as that was very much within the 1975 recession period. The postprogram employment and earnings for these terminees improved gradually over time. They were hired, for example, a year after termination of the program and in the several months after leaving the program. The overall gain was, of course, to be judged in the light of the fact that some of these people had stable employment backgrounds and others had very unstable employment backgrounds. Obviously, those who had stable employment backgrounds did better. But nonetheless, the overall result demonstrates that CETA training is effective; and it is interesting that more than 80 percent of these terminees gave a high rating to the CETA program, with 59 percent saying they were satisfied with it and 22 percent more, that is, over and above the 59 percent, saying that they were very satisfied.

The employment experience indicated the rather extraordinary development that those who went through the program had about half the rate of unemployment of those who had not gone through the program.

I think, now that they have had the program for a time, that these are extremely important overall vindications of the position which our committee and Senator NELSON and I have taken, that this is an extremely worthwhile activity. I believe, Mr. President, for that reason, the report should be submitted as a part of the record to the Senate.

Mr. President, I make the further unanimous-consent request that Karen Steidl of Senator YOUNG's staff have the privilege of the floor during the debate on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I join Senator NELSON, who has done an extraordinary job of guidance and leadership in this program, in yielding back the time on this amendment.

Mr. NELSON. Mr. President, all time has been yielded back, I understand.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment (UP No. 1780).

The amendment was agreed to.

Mr. NELSON. Mr. President, I join Senator JAVITS in commending the staff of the minority on the committee and the staff of the majority—Scott K. Ginsburg, the staff director and counsel of the subcommittee, and Joan Hunziker—as well as the members of staffs of other committee members, who have spent an enormous amount of time in helping to design and work out a very comprehensive, significant, and important amendment to the CETA legislation. CETA legislation was introduced on February 23, 1978; it has had careful hearings and extensive drafting and redrafting. The cooperation of staffs and members of the committee, along with administration has resulted in a superb job and they are to be commended for it.

Mr. JAVITS. Will the Senator yield?

Mr. NELSON. I yield.

Mr. JAVITS. I think it would really be noninclusive if we did not add Jim O'Connell, of the minority staff.

Mr. NELSON. By all means.

UP AMENDMENT NO. 1781

Mr. NELSON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 1781.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 224 line 14 insert "(1)" after "(c)" and between lines 24 and 25, insert the following: "(2) The Secretary shall facilitate the initiation and extension of projects for work on the weatherization of housing in public service employment programs carried out by prime sponsors under this Act. The Secretary shall, in coordination with other appropriate agencies, provide technical assistance and otherwise encourage prime sponsors, serving areas where such projects would significantly contribute to energy savings, to develop and continue weatherization projects as part of their public service employment programs"

Mr. NELSON. Mr. President, this amendment will instruct the Secretary of Labor to facilitate the initiation and extension of public service employment projects for work on the weatherization of housing. The amendment further provides that the Secretary shall provide technical assistance and otherwise encourage prime sponsors to develop and continue weatherization projects as part of their public service employment programs.

This amendment is necessary because many weatherization projects, especially in the Midwest and Northeast, have been terminated by prime sponsors because of the 1-year project requirement under current law. The weatherization of low-income homes is a national priority, and is also one of the most successful and productive activities undertaken by prime sponsors.

The inclusion of this amendment in the CETA legislation will assure that weatherization activities are given appropriate attention by prime sponsors.

Mr. President, I think this is a sound amendment and noncontroversial. I am prepared to yield back the remainder of my time.

Mr. JAVITS. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1782

Mr. NELSON. Mr. President, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 1782.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 225, line 25, strike "and the succeeding fiscal year" and insert in lieu thereof "and until such time as the Secretary determines that current population survey data is available for use on a satisfactory basis for such areas and for the remaining areas of each state,".

Mr. NELSON. Mr. President, this amendment would provide that the so-called "hold-harmless" vision for those standard metropolitan statistical areas (SMSA's) and central cities where current population survey (CPS) data had been used to determine annual employment data prior to January 1, 1978, which had been included in the committee bill, be effective through fiscal year 1979 and until such time as CPS survey data becomes available on a satisfactory basis.

The Department of Labor requested the inclusion of this amendment. It is intended to assure that once CPS data becomes available for the impacted SMSA's and central cities, the "hold harmless" provisions will be terminated. The Department of Labor now believes that such CPS data will be available in 1980 or 1981 on a quarterly basis. However, reliable quarterly data requires some expansion of the CPS interviews, which will only be undertaken if we are resolved to solve the problem that led to the inclusion of the "hold-harmless" provision. The "hold-harmless" provision will remain in effect until such CPS expansion can be implemented, and this provision will help insure that the expansion of CPS data begins as soon as possible.

Mr. President, I believe this amendment is noncontroversial. I yield back the remainder of my time.

Mr. JAVITS. I yield back my time, Mr. President.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1783

(Purpose: To require publication of substantial changes in the method of calculating unemployment)

Mr. NELSON. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON), for himself and Mr. HUDDLESTON, proposes an unprinted amendment numbered 1783.

Mr. NELSON. Mr. President, I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 225, between lines 18 and 19, insert the following:

"(e)(1) The Secretary, through the Bureau of Labor Statistics, shall publish in the Federal Register any substantial change in the method of calculating unemployment for the purpose of allocating any funds under this Act or any other Act of Congress at least 6 months prior to the effective date of the use of the changed method.

On page 225, line 19, strike out "(e)(1)" and insert in lieu thereof "(2)".

Mr. NELSON. Mr. President, this amendment would require the Secretary of Labor to publish in the Federal Register any substantial change in the method of calculating unemployment for the purpose of allocating funds under the Comprehensive Employment and Training Act of 1973, as amended, or under any other act of Congress at least 6 months prior to the effective date of the use of the changed method.

Mr. President, unemployment statistics play a prominent role in the allocation of Federal dollars to State and local areas because unemployment statistics are used in many Federal programs' allocation formulas. Whenever the method by which the unemployment rate is calculated is changed, it can have a dramatic impact on the distribution of Federal dollars throughout the country.

Last January, for example, new procedures were initiated by the Bureau of Labor Statistics (BLS) for estimating unemployment and labor statistics. These changes were undertaken to improve the accuracy of labor market statistics, statistics which are used to allocate CETA funding, antirecession assistance, and many other forms of Federal assistance to State and local governments. This new BLS methodology, however, resulted in a substantial decline in unemployment rates in some of the 28 standard metropolitan statistical areas and 9 central cities whose unemployment rates were calculated in a different manner as a result of the BLS methodological change. The decline in unemployment rates in many of these areas did not occur as a result of any economic changes in the area, but is instead a result of the change in the methodology used to calculate unemployment rates.

Without debating the merits of whether the methodological changes were appropriate, in my judgment, the January 1978 methodological changes were undertaken without adequate notice to Congress and to those areas which were to be affected by the changes.

That is why I am offering this amendment today. It will give at least 6 months of public notice in the Federal Register prior to any substantial change being implemented in the method by which unemployment rates in State and local areas are calculated. This wait and see provision will give Congress and the public the necessary time to examine proposed methodological changes in calculating unemployment rates and to study the impact these changes will have upon State and local areas.

I am prepared to yield back the remainder of my time.

Mr. BENTSEN. Will the manager of the bill yield for a request?

Mr. NELSON. Yes.

Mr. BENTSEN. I would like to be added as a cosponsor to the amendment.

Mr. NELSON. Mr. President, I ask unanimous consent that the Senator from Texas (Mr. BENTSEN) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is all time yielded back?

Mr. JAVITS. Yes.

Mr. NELSON. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1784

(Purpose: Technical and conforming changes)

Mr. NELSON. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 1784.

Mr. NELSON. Mr. President, I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 180, in the table of contents, section 451, insert "the" immediately after "of".

On page 180, in the table of contents, section 461, strike "development" and insert in lieu thereof "developmental".

On page 184, line 9, insert "Act" immediately after "Training".

On page 184, line 12, insert a comma after "in".

On page 184, line 13, insert a comma after "for".

On page 185, line 6, insert "a" immediately after "as" and strike "sponsors" and insert in lieu thereof "sponsor".

On page 187, line 22, strike "elevate" and insert in lieu thereof "evaluate".

On page 189, line 17, strike "insure" and insert in lieu thereof "assure".

On page 189, insert a comma at the end of line 18.

On page 192, line 4, strike "employment" and insert in lieu thereof "employment".

On page 197, line 18, strike "ensure" and insert in lieu thereof "assure".

On page 197, lines 18 and 19, strike "shall make" and insert in lieu thereof "makes".

On page 199, line 25, strike the comma after "Act".

On page 200, line 5, insert "to enforce such order" immediately after "necessary".

On page 200, line 25, insert "or investigation" immediately after "proceeding".

On page 201, strike line 1 and "or investigation," on line 2.

On page 206, line 2, insert "of" immediately after "and".

On page 207, line 7, strike "with" and insert in lieu thereof "with".

On page 207, line 17, insert "and" immediately after "employment".

On page 208, line 8, strike "agency" each time it appears and insert in lieu thereof "agencies".

On page 211, line 1, strike "such".

On page 213, line 4, strike "every" and insert in lieu thereof "each".

On page 214, line 16, strike "this Act" and insert in lieu thereof "the Comprehensive Employment and Training Act Amendments of 1978".

On page 216, line 11, insert "opportunities" immediately after "training".

On page 217, line 7, strike "this Act" and insert in lieu thereof "the Comprehensive Employment and Training Act Amendments of 1978".

On page 217, section 121(aa) is amended to read as follows:

"Prime sponsors shall provide, where such employment opportunities already exist or

where there is a reasonable expectation of a near-term expansion of such employment opportunities, appropriate employment and training opportunities in the development, conservation and use of solar, hydro-electric, and other alternative energy technologies, especially those clean, safe, renewable resources which may assist communities in resolving energy demand problems, thereby reducing their reliance on conventional nonrenewable fuels. For purposes of this subsection "solar energy technologies" shall refer to "solar energy sources" as defined in section 3 of the Solar Energy Research, Development and Demonstration Act of 1974.".

On page 219, line 11, insert "opportunities" after "training".

On page 221, line 9, strike "under this Act".

On page 233, line 3, strike out "and" and insert in lieu thereof "or".

On page 235, line 21, strike "a" and insert in lieu thereof "an annualized".

On page 235, line 25, insert "as" immediately after "level".

On page 236, strike line 10 and insert in lieu thereof:

"V of the Older Americans Act of 1965, as amended, or a handi-".

On page 238, line 22, strike "means".

On page 239, line 4, strike "cerificate" and insert in lieu thereof "certificate".

On page 242, line 14, insert a comma after "facilities" and strike "and".

On page 242, line 22, strike "needed" and insert in lieu thereof "needing".

On page 243, line 7, insert "employment" immediately after "service".

On page 244, line 13, strike "c" and insert in lieu thereof "a".

On page 250, line 9, strike semicolon.

On page 252, line 3, strike "manpower" and insert in lieu thereof "employment and training".

On page 252, line 12, strike "funds" and insert in lieu thereof "amounts available for parts A, B, and C of this title".

On page 252, line 23, insert at the beginning of the sentence " 'under".

On page 253, line 1, strike "1978)." and insert in lieu thereof "1978)'".

On page 257, line 23, strike "either".

On page 257, line 24, insert "youth" before the period.

On page 262, line 7, insert "at rates" immediately after "not" and insert "that" immediately after "than".

On page 264, line 6, strike "9" and insert in lieu thereof "90".

On page 265, line 7, strike "applicant" and insert in lieu thereof "prime sponsor".

On page 265, line 13, strike "applicant" and insert in lieu thereof "a prime sponsor".

On page 265, line 20, strike "an applicant" and insert in lieu thereof "a prime sponsor".

On page 266, lines 8 and 9, delete the parentheses.

On page 266, line 12, insert "available under this part shall be".

On page 267, line 15, insert before the period a comma and "except as provided in section 122(j)(4)(B)".

On page 270, line 8, strike "obtain" and insert in lieu thereof "retain".

On page 270, strike line 12.

On page 272, line 8, insert "other" immediately after "with".

On page 279, insert at the begining of line 2 "testing the".

On page 279, line 13, strike "the".

On page 279, line 25, strike "support" and insert in lieu thereof "supportive".

On page 280, line 14, insert "and" immediately after the semicolon.

On page 280, line 18, strike "f" and insert in lieu thereof "e".

On page 283, line 3, insert "and" immediately after "activities,".

On page 283, line 4, insert "conducted" immediately after "projects".

On page 287, lines 21 and 22, strike "efficiency" and insert in lieu thereof "efficacy".

On page 292, line 23, strike "project" and insert in lieu thereof "projects".

On page 312, line 18, strike "the" the second time it appears and insert in lieu thereof "this".

On page 326, line 1, strike "such as".

On page 326, line 3, insert "such as" immediately after "displacement".

On page 327, line 1, strike "presonnel" and insert in lieu thereof "personnel".

On page 327, line 17, strike "conpul ory" and insert in lieu thereof "compulsory".

On page 329, line 5, strike "CONSELING" and insert in lieu thereof "COUNSELING".

On page 331, between lines 6 and 7, add the following subsection:

"(1) has attained age fourteen but not attained age twenty-two at the time of enrollment;".

On page 331, line 7 is amended to read as follows:

"(2) is economically disadvantaged or is a member of a family which is economically disadvantaged who requires additional education, training, or".

On page 331, line 13, strike "2" and insert in lieu thereof "3".

On page 331, line 19, strike "3" and insert in lieu thereof "4".

On page 331, line 24, strike "4" and insert in lieu thereof "5".

On page 337, line 23, strike "ther" and insert in lieu thereof "their".

On page 339, line 19, strike "advistory" and insert in lieu thereof "advisory".

On page 339, line 22, strike "Secretary" and insert in lieu thereof "Secretary".

On page 344, line 14, strike "disicipline" and insert in lieu thereof "discipline".

On page 352, following line 25, insert the language which appears on page 372, lines 1 through 25, inclusive, and on page 373, line 1 through 21, inclusive.

On page 360, strike "subsection" and insert in lieu thereof "section 493".

On page 370, line 13, insert "(1)" after "(b)".

On page 372, strike lines 1 through 25, inclusive.

On page 373, strike lines 1 through 21, inclusive.

On page 375, line 2, insert "annualized" immediately after "whose".

On page 375, line 7, insert "(1)" immediately after "122".

On page 375, line 13, strike "Wages to".

On page 375, line 14, insert "wages" immediately after "paid".

On page 382, line 25, strike "employeee" and insert in lieu thereof "employee".

On page 387, line 9, insert a comma after "security".

On page 389, line 8, strike "94-563" and insert in lieu thereof "93-567".

On page 180, in the table of contents for the Act, the caption of Sec. 446 is amended to read "Disregarding payments".

On page 228, sec. 124(a)(2) is amended to read as follows: "A trainee receiving public assistance, or whose needs or income are taken into account in determining such public assistance payments to others, shall receive an incentive, which shall consist of disregarding up to $30 per week of the basic hourly allowance, depending upon the number of hours spent in training, in determining the amount of public assistance payments under Federal or federally assisted public assistance programs."

On page 229, between lines 4 and 5, add a new subparagraph 124(a)(4) to read as follows:

"(4) Participants may be given allowances for transportation subsistence and other expenses incurred in training or employment.".

On page 256, lines 20-23, delete subsection 211(9) and renumber the following subsections accordingly.

On page 314, line 22, at the end of subparagraph 436(a)(5), insert the following clause: "except that the provisions of section 446 of this title shall apply with respect to the disregarding of allowances".

On page 330, line 1, the caption of Sec. 446 is amended to read: "Disregarding payments".

On page 330, line 2, the word "earnings" is amended to read "payments".

On page 241, between lines 23 and 24, add the following new subsection:

"(c) The Secretary may delegate within the Department of Labor authority over the Office established pursuant to section 135 in order to effectively carry out the purposes of such section.".

Mr. NELSON. Mr. President, this is a technical amendment to the committee bill. This technical amendment is to correct minor errors in the drafting and printing of committee bill S. 2570. It makes no substantive changes in the bill. It has been considered and approved by the ranking minority member (Mr. JAVITS).

Mr. JAVITS. It is approved on this side, Mr. President.

Mr. NELSON. I yield back the remainder of my time.

Mr. JAVITS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Did the Chair understand the Senator from Wisconsin was about to make an unanimous-consent request in behalf of the Senator from Vermont?

Mr. NELSON. Mr. President, I ask unanimous consent that Mr. Larry Patton of Senator PROXMIRE's office and Mr. Mike Choukas, of Senator LEAHY'S staff, be granted the privileges of the floor during the course of the pending legislation and any rollcall votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1785

(Purpose: To prohibit individuals who voluntarily terminate full-time employment, without good cause, from being employed in public service jobs)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk for myself and the distinguished Senator from New Mexico (Mr. SCHMITT) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself and Mr. SCHMITT, proposes an unprinted amendment numbered 1785.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, line 22, add the following new subsection:

SEC. 122. (c) No individual shall be eligible to be employed in a Public Service Employment position, if such individual has voluntarily terminated, without good cause, his or her last previous full-time employment at a wage rate no less than the Federal minimum

wage as prescribed under Section 6(a)(1) of the Fair Labor Standards Act, as amended.

On page 223, line 23, strike "(o)" and substitute "(p)".

Mr. DOLE. I ask unanimous consent that Ernest Garcia, of my staff, and John Backer, of Senator HAYAKAWA's staff, be granted the privileges of the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Will the Senator yield for a unanimous-consent request?

Mr. DOLE. Yes.

Mr. HATCH. I ask unanimous consent that Mr. Ron Docksai, of my staff, be granted the privileges of the floor during the consideration of the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I first want to recognize the chairman of the Committee on Human Resources, Senator WILLIAMS and ranking Republican Senator JAVITS, and the distinguished chairman, Senator NELSON, and the distinguished members of the subcommittee for the consideration that they have given to this complex and important legislation. While I believe there is more to be done, the committee is to be commended for making constructive and important changes to this very important bill.

Mr. President, it is my understanding that the distinguished floor leaders have considered my amendment and have agreed to accept it. I am pleased to have the committee accept my amendment as I believe it contributes to the committee's overall effort in trying to make CETA an effective program.

DOLE AMENDMENT

Mr. President, my amendment simply states that no individual shall be eligible to be employed in a public service position, at any time, under title II and VI if such individual has voluntarily terminated, without good cause, previous full-time employment at a wage rate not less than the Federal minimum wage as prescribed under the Federal Labor Standards Act as amended.

PSE'S: A LIMITED APPROACH TO SOLVING UNEMPLOYMENT

Mr. President, an issue that is critical to the success and public support of the CETA program, is whether CETA participants are able to secure nonsubsidized employment after leaving the program. The CETA experience, whether in the form of training or a public service job, should give the individual significant skills to enter the regular private sector job market.

One wonders, however, how serious we are in preparing an individual for meaningful employment in the private sector job market when you consider that of the current CETA budget of $11.5 billion, $8 billion is being spent to fund 725,000 public service jobs. The crucial question in this area is what is the best way of providing people with additional skills, experience, and references so that their chances of entering the private sector will be maximized. As I have stated previously I believe the emphasis of the CETA program should be redirected from public service jobs toward training and developing programs. In this regard, I believe my amendment provides a disincentive in the misuse of public service employment and on the other hand, provides an incentive for those who are lacking job skills and experience to utilize the training programs of CETA.

ON TARGET

Mr. President, this amendment, at first glance, appears to be a rather harsh approach in addressing some of the misuse of public service employment, however, when one considers that this amendment will greatly enhance the focus of PSE's upon individuals who are in most need of employment income, it is very much in line with the original intent of public service employment. That is, to provide a temporary emergency program of public service employment to help ease the impact of high unemployment.

THOSE WHO VOLUNTARILY QUIT THEIR JOBS

Mr. President, this amendment is designed to discourage those who have full-time employment at a wage rate not less than the Federal minimum wage, from voluntarily terminating their employment to acquire a public service job under the CETA program. The intent of public service employment was never to provide alternative employment but to provide employment and income to the hard-core unemployed. I would suggest to those who would voluntarily quit their jobs in search of a higher paying job or a more meaningful job to consider participation in the CETA training programs. Job training and skills development is one of the most effective ways in alleviating hard-core unemployment and not public service employment, a program which was designed to provide temporary unemployment relief to the hard-core unemployed.

Mr. President, this amendment also takes into consideration that there will be, unfortunately, those who will be forced to terminate their employment. In these cases, that is, voluntary termination with good cause, my amendment would not apply.

Mr. President, once again, I just want to say that I am pleased to have the committee accept my amendment.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. Does the distinguished Senator have a copy of his amendment? I was partially diverted by another discussion.

Mr. DOLE. I send a copy to the Senator.

Mr. President, while the distinguished floor manager is looking over the amendment, I might say that the determination of what would constitute "good cause" for terminating employment was originally addressed in my amendment by having this determination made as defined by appropriate State unemployment laws.

However, because of the diverse State interpretation of what constitutes "good cause," the need for developing a uniform standard is apparent. Therefore, it is the intent of this amendment to authorize the Secretary of Labor to promulgate the appropriate rules and regulations in defining "good cause." The Senator from Kansas would also suggest that until such rules and regulations are set by the Secretary, "good cause" will be defined as currently stated by State unemployment laws.

That is one area where I believe if the intent is not clear, we can clarify that with a brief change.

Mr. NELSON. I agree with the amendment offered by the distinguished Senator from Kansas. Persons who quit their job in the private sector or in other regular public employment should not participate in the CETA public service employment programs. The amendment by the distinguished Senator from Kansas (Mr. DOLE) would provide that a person who voluntarily quits a full-time job without good cause, and which pays at least the Federal minimum wage, is ineligible for public service employment program provided under the CETA legislation, To implement this amendment the managers of the CETA bill expect the Department of Labor to issue regulations to serve as a guide to prime sponsors as to the meaning of "without good cause," which is the language of the Senator's amendment.

There are many legitimate reasons for persons to leave their private sector jobs. For example, pregnancy, harassment, or moving from one geographical region to another would be such legitimate reasons. I think, with the Secretary having the flexibility to issue the regulations, that the proposal by the Senator from Kansas is a sound proposal. There has never been any intent, and should not be, that people who leave regular employment without good cause, where they are earning the minimum wage, go into a CETA program.

Mr. JAVITS. Will the Senator yield?

Mr. NELSON. Yes.

Mr. JAVITS. Mr. President, I think this is a good amendment and I am ready to accept it. I have just one point which we must make clear.

According to the terms of the bill, and I beg the Senator to turn to page 384, lines 6 through 15 of the bill—I shall just say it, then the Senator can catch up with it.

All the new provisions become effective and will be implemented by rules by April 1, 1979; that is, on or before April 1, 1979. Is our understanding correct, therefore, that in view of the need for the definition to accord with the pattern of the bill, this amendment would also become effective as of April 1, 1979?

Mr. DOLE. That is the understanding of the Senator from Kansas, yes.

I have just one other question. I agree with the distinguished Senator from Wisconsin with regard to the outlook, but in the interim, while the Secretary of Labor is promulgating regulations, would it be fair that we follow "good cause" as defined currently in existing State laws?

Mr. JAVITS. One of the reasons for my asking the previous question was that that becomes academic, because by April 1, he has to promulgate regula-

tions, anyway, so we do not have to worry about that.

Mr. DOLE. I thank the Senator. I understand.

Mr. NELSON. Mr. President, the distinguished ranking minority Member (Mr. JAVITS) and I agree with the amendment. We yield back the remainder of our time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1786

(Purpose: To provide membership for representatives of handicapped individuals on the prime sponsor's planning council)

Mr. DOLE. Mr. President, I send two amendments to the desk and ask that they be considered en bloc.

Mr. JAVITS. Mr. President, could we hear them before we vote on them?

The PRESIDING OFFICER. The amendments will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes unprinted amendment 1786:

On page 204, line 4, after "veterans' organizations" insert a comma and the following: "representatives of handicapped individuals".

On page 206, line 20, strike out the word "and".

On page 206, line 21, strike out the period and insert in lieu thereof a semicolon and the word "and".

On page 206, between lines 21 and 22, insert the following:

"(vi) representatives of handicapped individuals.

The PRESIDING OFFICER. Does the Senator from Kansas ask unanimous consent that they be considered en bloc?

Mr. DOLE. Yes, I do.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I think I can clarify them. There is no question on the amendments. They are direct and to the point. They amend the administrative provisions of title I to allow for greater participation with the CETA organization by handicapped consumers and representatives.

DESCRIPTION OF AMENDMENTS

My first amendment adds language to section 109 to include representatives of handicapped individuals to the list of members on the prime sponsor's planning council.

In a similar fashion, my second amendment adds representatives of handicapped individuals to the list of members comprising the State employment and training council under section 110.

Mr. President, throughout this bill, mention is frequently made of the needs of handicapped individuals and to the special disadvantages they experience in the labor market. Various sections of the bill clearly reflect the committee's views that handicapped individuals are to be regarded as legitimate recipients of CETA services.

The Senator from Kansas supports this concept, and hopes that in the future, there will be a noticeable increase in the number of disabled persons who are introduced into the labor market via CETA.

NEED FOR AMENDMENTS

As much as I support this concept, and regardless of how much I wish for these employment goals to be realized, the fact remains that the handicapped have always been eligible for CETA jobs. This bill does not change current policy in that respect.

Recognizing this, it then becomes imperative that some changes be made to S. 2570 to encourage greater participation of handicapped workers. I shall not suggest that the two amendments I offer today will remedy all the problems that contribute to the high rate of unemployment among the handicapped. However, by including the handicapped on the prime sponsor's planning council and on the State employment and training council, I feel we are moving a step or two closer to more active involvement of the handicapped within CETA.

IMPACT AND PLANNING STAGES

For the first time, these amendments allow for the handicapped to make recommendations on CETA activities at the administrative level, when reviewing the prime sponsor's plan. As members on the council, handicapped persons will be expected to evaluate and monitor the prime sponsor's employment and training programs. Membership on the council should insure that needs and concerns of the handicapped are represented at a level where critical decisions are made.

Likewise, including the handicapped on the employment and training council will allow them to check the operation of programs and the adequacy of State services. Clearly, my intention with these amendments is to help promote the participation of handicapped individuals in CETA programs.

Mr. President, I believe my amendments make desired improvements in the CETA legislation, and I urge my colleagues to accept them.

Mr. President, the bill clearly reflects the committee's concern about handicapped and I think by adding representatives, we underscore that concern that both the managers and others on the committee have. As far as I know, the amendments are acceptable.

Mr. JAVITS. Mr. President, if the Senator will yield, the amendment is acceptable to this side.

Mr. NELSON. Mr. President, we are agreeable to the amendment. I yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. JAVITS. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc.

The amendments were agreed to.

Mr. DOLE. Mr. President, let me say that I have a fourth amendment but we shall try to work that out and offer it later today. The committee report on title VII includes a paragraph that allows representation of community-based organization and clients on the private industry councils.

We have been trying to figure out some way, without mandating representation, particularly with reference to client representation on private industry councils, and I shall be discussing it later today with the distinguished floor managers. Perhaps we can agree on some compromise that will mandate community-based organization representation only, not clients. I can discuss that later and bring up the amendment later. I thank the distinguished floor manager.

AMENDMENT NO. 3527

(Purpose: To tighten eligibility requirements for public service employment programs and to improve the opportunities for public assistance recipients to receive employment and training services)

Mr. BELLMON. Mr. President, I call up amendment No. 3527 and ask that it be considered.

The PRESIDING OFFICER. Is this the amendment on which the Senator from Oklahoma had reserved 2 hours?

Mr. BELLMON. That is correct.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma, for himself and Mr. NELSON, Mr. JAVITS, Mr. MUSKIE, Mr. RIBICOFF, Mr. BAKER, Mr. CHILES, Mr. BARTLETT, Mr. DECONCINI, Mr. DOMENICI, Mr. HATCH, and Mr. DANFORTH, proposes an amendment numbered 3527.

Mr. BELLMON. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 182, line 14, after "rehabilitation" insert a comma and the following: "public assistance".

On page 185, line 9, insert after "shall" a comma and the following: "in coordination with units of general local government,".

On page 189, line 7, after "agencies" insert a comma and the following: "State public assistance agencies".

On page 190, line 23, strike out the word "or".

On page 190, line 23, before the period insert a comma and the following: "or are public assistance recipients".

On page 195, lines 3 and 4, after "education" insert a comma and the following: "State and local public assistance agencies".

On page 204, line 5, after "agencies" insert a comma and the following: "public assistance agencies".

On page 206, between lines 14 and 15, insert the following:

"(iii) one representative of the State public assistance agency;".

On page 206, line 15, strike out "(iii)" and insert in lieu thereof "(iv)".

On page 206, line 19, strike out "(iv)" and insert in lieu thereof "(v)".

On page 206, line 21, strike out "(v)" and insert in lieu thereof "(vi)".

On page 207, line 18, after "rehabilitation" insert a comma and the following: "public assistance".

On page 218, line 21, before the period insert a comma and the following: "and to eligible persons who are public assistance recipients or who are eligible for public assistance but not receiving such assistance".

On page 243, line 20, strike out "and" the first time it appears.

On page 243, line 21, insert before the semicolon a comma and the following: "and public assistance recipient status".

On page 244, between lines 11 and 12, insert the following:

"(6) an estimate of the savings realized in public assistance, food stamps, housing

assistance, medical assistance, and other programs due to the increased employment of recipients of benefits under those programs as a result of the employment and training services provided under this Act.".

On page 260, between lines 19 and 20, insert the following:

"SERVICES FOR PUBLIC ASSISTANCE RECIPIENTS

"SEC. 216. (a) Services for public assistance recipients under this part shall be designed to assist eligible participants in overcoming the particular barriers to employment experienced by such recipients, including lack of basic educational or vocational skills, insufficient preparation for the personal adaptations necessary for labor force participation, inability to find or successfully apply for employment, inability to obtain transportation to employment opportunities, medical problems, inability to obtain satisfactory child care, and lack of appropriate job opportunities.

"(b) The Secretary shall insure that each prime sponsor's plan for serving eligible public assistance recipients under this part includes provisions for—

"(1) coordinating services assisted under this part with other programs assisted under this Act;

"(2) coordinating services assisted under this Act with services provided by State and local public assistance agencies;

"(3) assisting public assistance recipients to develop skills necessary for taking advantage of opportunities to enter or reenter the labor force, including, but not limited to—

"(A) outreach, assessment, and orientation to the local labor market and to occupational and training opportunities available in the community;

"(B) counseling, placement assistance, and job placement;

"(C) technical assistance to employers for establishing flexitime, child-care, job sharing, and other innovative arrangements suited to public assistance recipients;

"(D) activities to overcome sex and welfare status stereotyping in job placement and development; and

"(E) other activities designed to increase labor force participation rates among eligible participants who are able and willing to work but have been unable to secure employment.

On page 263, delete lines 19 through 23.

On page 263, line 15, strike out "(a)".

On page 385, between lines 12 and 13, insert the following:

"(c) The Secretary shall develop information relating to the number of individuals who have attained sixteen years of age and who are members of a family with an income which is equal to or less than 70 per centum, 85 per centum, and 100 per centum of the lower living standard income level for the jurisdiction of each prime sponsor. The Secretary shall prepare and submit, not later than one year after the date of enactment of the Comprehensive Employment and Training Act Amendments of 1978, to the President and to the Congress a report on the information required by this subsection.".

On page 267, line 3, insert "(1)" after "person".

On page 267, line 4, strike out "twelve" and insert in lieu thereof "fifteen".

On page 267, line 5, before the period insert a comma and the following: "(2) or who is, or whose family is receiving aid to families with dependent children provided under a State plan approved under part A of title IV of the Social Security Act, or who is receiving supplemental security income benefits under title XVI of the Social Security Act".

On page 268, line 5, after "older workers" insert a comma and the following: "public assistance recipients,".

On page 292, line 7, after "agencies" insert a semicolon and the following: "State and local public assistance agencies".

On page 294, line 2, strike out "and".

On page 294, between lines 2 and 3, insert the following:

"(L) assurances that special efforts will be made to recruit youth from families receiving public assistance, including parents of dependent children who meet the age requirement of this subpart; and".

On page 294, line 3, strike out "(L)" and insert in lieu thereof "(M)".

On page 301, line 20, before the comma insert a comma and the following: "a description of arrangements with public assistance agencies on the employment of youth from families receiving public assistance, including parents of dependent children".

On page 314, line 10, after "organizations" insert a comma and the following: "public assistance agencies".

On page 353, line 25, after "service" insert a comma and the following: public assistance agencies".

On page 374, line 25, beginning with the word "a", strike out through line 5 on page 375 and insert in lieu thereof a hyphen and the following:

"(A) an individual—

"(i) who has been unemployed for at least ten out of the twelve weeks immediately prior to a determination under this section,

"(ii) who is unemployed at the time the determination is made, and

"(iii) whose family income does not exceed 85 per centum of the lower living standard income level based on the three-month period prior to the individual's application for participation; or

"(B) an individual—

"(i) who is, or whose family is, receiving aid to families with dependent children provided under a State plan approved under part A of title IV of the Social Security Act, or who is receiving supplemental security income benefits under title XVI of the Social Security Act,

"(ii) who has been unemployed for at least ten out of the twelve weeks immediately prior to the determination under this section, and

"(iii) who is unemployed at the time the determination is made.".

On page 178, in the table of contents, after item "Sec. 215." insert the following new item:

"Sec. 216. Services for public assistance recipients.".

Mr. BELLMON. Mr. President, I ask unanimous consent that Mrs. Carol Cox of the Senate Budget Committee be granted the privilege of the floor during debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. I am pleased to say, Mr. President, that this amendment is cosponsored by the managers of the bill, Senators NELSON and JAVITS, as well as the distinguished chairman of the Budget Committee (Mr. MUSKIE) and by Senators BAKER, RIBICOFF, DANFORTH, CHILES, DOMENICI, DECONCINI, and HATCH.

I am particularly pleased also that my colleague from Oklahoma, Senator BARTLETT, is cosponsoring this amendment, and he, perhaps, will be here later to make some comments about this amendment.

This amendment thus has support on both sides of the aisle. The administration—and, yes, many of the public interest groups—support this amendment. I am encouraged, Mr. President, by this wide acceptance of the amendment. I believe it reflects a broad commitment on the part of Congress, as well as those who have worked with the program to improve CETA.

I have here a letter, Mr. President, from Secretary of Labor Marshall expressing support for my amendment. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
*August 21, 1978.*

HON. GAYLORD NELSON,
*Chairman, Subcommittee on Employment, Poverty, and Migratory Labor, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: This letter is to express the views of the Department of Labor with respect to S. 2570, the "Comprehensive Employment and Training Amendments of 1978." The Department strongly supports passage of this bill which would reauthorize the Comprehensive Employment and Training Act of 1973 (CETA) for another four years, while making important changes in the design and management requirements of the programs conducted under the umbrella of CETA.

S. 2570 makes significant improvements in CETA. The bill targets CETA towards those most in need by imposing strict income and unemployment eligibility tests. It limits the length of time any individual can stay in a CETA program so as to eliminate substitution of CETA workers for permanent workers, to increase the number of persons who can be served, and to increase the transition from CETA into regular jobs.

S. 2570 also places strict limitations on the Federal wages that can be paid PSE workers and the amount by which local jurisdictions can supplement the Federal base. This will assure that CETA jobs are not more attractive than career-type jobs in the private economy.

The bill also increases the authority of the Secretary to eliminate fraud and abuse in the CETA program by giving him increased regulatory authority and by allowing him to directly attack violations of CETA by subgrantees and subcontractors of prime sponsors if the prime sponsor takes no action.

S. 2570 simplifies the paperwork burden on prime sponsors. Prime sponsors will have to provide in their comprehensive employment and training plans each year only the information that had changed from the previous year. In addition, the information required of prime sponsors has been limited to that information that is necessary for the Secretary to determine that the program is being conducted efficiently, effectively, and in conformance with the Act's requirements and purposes.

We strongly support the passage of S. 2570. CETA has met the needs of this Nation for a program that will train the structurally unemployed so that they can have marketable skills. At the same time it has served the Nation well in a time of economic crisis by providing employment to those persons who were countercyclically unemployed.

Under the proposed legislation, an increased emphasis would be placed on training as a component of any public service employment. Special programs would be conducted to help individuals facing special disadvantages in the labor market—such as the elderly and the young, the handicapped, displaced homemakers, and those of limited English-speaking proficiency. The Job Corps and the summer youth program would be extended, as would the youth programs that are experimenting with methods for improving the unsatisfactory unemployment situation of this Nations's young adults.

In addition, title VII of the bill would introduce into CETA a major, new attempt to involve the private sector in the design and implementation of programs. Under the new Private Sector Opportunities for the Economically Disadvantaged program, the private sector of the economy would work with prime sponsors to create opportunities for the economically disadvantaged in private industry. This program represents a critical effort to create permanent, career-type jobs in the private sector for those who are not in the mainstream of the economy.

We understand that Senator Bellmon intends to offer a series of amendment to S. 2570 that would increase the integration of CETA with State public assistance offices, would increase services to those on public assistance, and would make clear the eligibility for public service employment of those families receiving aid under title IV (Aid to Families With Dependent Children) and title XVI (Supplemental Security Income) of the Social Security Act. We support the purpose of these amendments and hope they will be adopted.

The amendments also include a proposal to eliminate the requirement that before any funds can be made available for title VI countercyclical PSE, $3 billion must be made available for title II structural PSE. We support this amendment. As we have seen in the past, the needs of the economy for structural or countercyclical PSE job opportunities change over time. We do not believe that the authorizing legislation should lock CETA into so rigid a formula. We believe it would be preferable to leave the amounts for title II and title VI to the flexibility of the budget and appropriation processes.

Finally, we are opposed to any amendment that may be offered to remove the Young Adult Conservation Corps (YACC) from the jurisdiction of the Labor Department. The current arrangement, whereby the Department makes referrals to the Departments of Agriculture and the Interior for the program and also promulgates certain regulations within our specific expertise and jurisdiction, has created a strong and smoothly run program. We believe that this program stability and the benefits generated by the central coordination of all employment and training policies in the Department of Labor are essential to maintain.

The Office of Management and Budget advises that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

RAY MARSHALL,
*Secretary of Labor.*

Mr. BELLMON. Mr. President, I have a brief description of the amendment, an explanation, and I ask unanimous consent it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXPLANATION OF PROPOSED FLOOR AMENDMENT TO S. 2570, COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978

The following is a summary of the changes the amendment would make in S. 2570.

ELIGIBILITY FOR PUBLIC SERVICE (PSE) JOBS UNDER TITLES II AND VI

Eligibility for the Title II PSE jobs—which are intended to relieve structural unemployment—would be limited to persons receiving AFDC or SSI benefits, and persons unemployed 15 weeks or more whose family incomes do not exceed 70 percent of the Bureau of Labor Statistics lower living standard for urban households. (The bill as reported by the Human Resources Committee would require 12 weeks of unemployment and would not make AFDC and SSI recipients categorically eligible for Title II jobs.)

For Title VI PSE jobs—intended to relieve cyclical unemployment—persons hired would have to be unemployed for ten out of the previous twelve weeks and either have family incomes of less than 85 percent of the Bureau of Labor Statistics lower living standard, or be receiving SSI or AFDC. (The Title VI eligibility provisions in the reported bill require ony 45 days of unemployment and do not make AFDC and SSI recipients categorically eligible.)

HIGHER PRIORITY FOR EMPLOYMENT OF PUBLIC ASSISTANCE RECIPIENTS

This amendment will emphasize throughout the CETA legislation that public assistance recipients are a high priority group for CETA employment and training services. These changes will require the Department of Labor, States and CETA prime sponsors to focus in their CETA planning and operations on steps to expand work and training opportunities for AFDC recipients.

ELIMINATION OF APPROPRIATIONS-FORCING PROVISIONS

This amendment will eliminate a provision which would require Congress to appropriate at least $3 billion for public service jobs for the structurally unemployed under Title II of the bill before any money was appropriated for counter-cyclical public jobs under Title VI. The amendment will leave Congress free to decide the levels and mix of structural and counter-cyclical public jobs in each year's appropriations process.

JUSTIFICATION FOR AMENDMENTS

These amendments will have the following benefits:

1. They will speed the re-orientation of CETA resources from attacking cyclical employment to providing increased employment and training services to people who are structurally unemployed. This shift, which is appropriate in light of the improved unemployment picture in the nation, is already contemplated by the reported bill; these amendments will emphasize and expedite this re-orientation.

2. By targeting public service jobs under Titles II and VI on more narrowly defined groups, the amendments will help minimize "skimming" more of the money will be spent in employing people who would not be able to obtain other jobs.

3. Recipients of cash public assistance benefits will receive a substantially larger share of the job and training opportunities under CETA pursuant to these amendments. The unemployment rate for employable public assistance recipients is in the 80% range. These amendments recognize that this group is at the end of the hiring line, despite the fact that they are required by provisions of the Social Security Act to register for work and accept work or training when offered. The amendments take account of the fact that, despite the emphasis placed on employment of welfare recipients in the 1976 amendments to CETA, only about 10% of total enrollments in the CETA public service employment programs are present or former recipients of AFDC. Employment of larger numbers of public assistance recipients in CETA public service jobs will help reduce expenditures for public assistance and food stamps.

4. Congress will be able to decide in the annual appropriations process the number of public service employment slots and training opportunities which should be provided in the next fiscal year and what the mix should be between jobs and training focused on the structurally unemployed and on the cyclically unemployed.

Mr. BELLMON. Mr. President, under my amendment, eligibility for the title II PSE jobs—which are intended to relieve structural unemployment—would be limited to persons receiving AFDC or SSI benefits, and persons unemployed 15 weeks or more whose family incomes do not exceed 70 percent of the Bureau of Labor Statistics lower living standard income. (The bill as reported by the Human Resources Committee would require 12 weeks of unemployment and would not make AFDC and SSI recipients automatically eligible for title II jobs.)

For title VI PSE jobs—intended to relieve cyclical unemployment—persons hired would have to be unemployed for at least 10 of the previous 12 weeks and either have family incomes of less than 85 percent of the Bureau of Labor Statistics lower living standard, or be receiving SSI or AFDC. (The title VI eligibility provisions in the reported bill require only 45 days of unemployment and do not make AFDC and SSI recipients automatically eligible.)

This amendment will also emphasize throughout the CETA legislation that public assistance recipients are a high priority group for CETA employment and training servcies. These changes will require the Department of Labor, States, and CETA prime sponsors to focus in their CETA planning and operations on steps to expand work and training opportunities for AFDC recipients.

Finally, this amendment will eliminate a provision which would require Congress to appropriate at least $3 billion for public service jobs for the structurally unemployed under title II of the bill before any money was appropriated for countercyclical public jobs under title VI. The amendment will leave Congress free to decide the levels and mix of structural and countercyclical public jobs and training programs in each year's appropriations process.

These amendments will have the following benefits:

First. They will speed the reorientation of CETA from attacking cyclical unemployment to providing increased employment and training services to people who are structurally unemployed.

Second. By targeting public service jobs under titles II and VI on more narrowly defined groups, the amendments will help minimize "skimming." More of the money will be spent in employing people who would not be able to obtain other jobs.

I want to stress to the managers of the bill that I believe it is critical that the Senate conferees not accept the much looser eligibility standards contained in the bill now pending in the House. This would, in my view, undermine the necessary targeting of CETA jobs and would make at least this Senator much less willing to support a large CETA program.

Third. Recipients of cash assistance will receive a substantially larger share of the job and training opportunities under CETA. The unemployment rate for employable recipients is in the 80 percent range.

Mr. President, I would like to reemphasize that point.

The unemployment rate for employ-

able recipients is in the 80 percent range.

This amendment is intended to closely target CETA jobs to that particular group of people.

Employment of larger numbers of public assistance recipients in CETA public service jobs will help reduce expenditures for public assistance and food stamps.

Fourth. Tighter targeting and increased emphasis on hiring of welfare recipients will reduce the inflationary effects of public service employment.

Fifth. Congress will have better control of the CETA program, as the mix of jobs and services (countercyclical and structural) will be subject to annual review through the budget and appropriations processes.

It would be impossible to discuss reauthorization of the Comprehensive Employment and Training Act (CETA), Mr. President, without adressing ourselves to the management failures and the abuses of the existing programs. We read about scandals in CETA daily, if not in the Washington Star or Washington Post—then in our hometown papers.

I am very hopeful that the passage of S. 2570 will mark the beginning of a new and better CETA, Mr. President. S. 2570, as reported by the Human Resources Committee, addresses many of the concerns we all share about the CETA program.

I commend the committee, and the staff of the committee, for the fine work that has been done in bringing S. 2570 to the Senate floor.

This amendment, Mr. President, will build upon the good work begun by the Human Resources Committee in the reported bill. It will tighten eligibility criteria for public service jobs under titles II and VI of CETA. It will improve access for welfare recipients to these jobs—and produce savings in cash assistance programs. Finally, Mr. President, this amendment will delete a requirement, which is included in the reported bill, for appropriation of $3 billion for public service jobs under title II, before any funds can be made available for title VI.

Mr. President, I urge adoption of this amendment.

While many of us have criticized the CETA programs, Mr. President, few of us will deny the need for a continued, concerted effort to provide employment for those of our citizens who suffer the burdens of unemployment—particularly those who are chronically out-of-work, the structurally unemployed.

I am prepared to argue, Mr. President, that CETA—with its basic commitment to decentralized delivery of services to the unemployed—is basically sound in concept. The problems of the unemployed in Oklahoma City, or in Tulsa, are different from the problems of the unemployed in New York City. A different mix of programs will make sense in different labor markets. Only by providing for local planning and priority setting can we hope to meet these different needs.

Federal funding for a program such as CETA with a decentralized delivery system presupposes, however, that the Federal Government has the responsibility to set and convey to State and local prime sponsors clear priorities and goals. It also presupposes a commitment on the part of the Federal administering agency (DOL) to see that these priorities and goals are met. This amendment, Mr. President, both clarifies priorities and it gives some very clear directions to the Department of Labor. Together with other amendments on which some of my colleagues have taken the lead, particularly Senator DOMENICI's antifraud and abuse amendment, which I cosponsored, this amendment can help turn CETA into a program which we can view with pride instead of embarassment.

THE SUBSTITUTION PROBLEM

One of the criticisms most often leveled at the CETA program is that State and local governments do not use public service funds to create new jobs; rather, that they use these funds to pay people they would have hired anyway to do things they would have done—absent this funding—with State/local dollars. This is referred to as "substitution." When CETA was last extended, in 1976, I offered an amendment which required a study of substitution. That study is still underway, although we received a preliminary report on it last March.

The National Commission for Manpower Policy contracted with the Brookings Institutions for a major field review of substitution in the CETA program—pursuant to my amendment. Preliminary results indicate that substitution is much less widespread in CETA than some have charged.

In its preliminary report, Brookings concluded that about 18 percent of CETA public service employment funds went to pay for positions they would label as out-and-out substitution. Brookings also concluded that about 30 percent of the funds were being used to fill positions which would otherwise have been left vacant because of severe State or local fiscal problems. This Brookings report is considerably more favorable to CETA than some other estimates of substitution rates—some had estimated substitution as high as 90 percent. Mr. President, even the substitution rates reported by Brookings are counterproductive in terms of the objectives of CETA. The Congress, of course, wants and expects that public service jobs created under CETA will be additional jobs—that they will represent a real increase in employment opportunities.

BETTER TARGETING OF CETA JOBS

To the extent that we target CETA jobs on the long-term, hardcore unemployed, we make substitution less and less likely, Mr. President. If State and local governments must hire people under CETA whom they would otherwise not hire, they are unlikely to substitute very much if at all. This amendment will tighten targeting by lengthening the required duration of unemployment, before a person will be eligible for a job under CETA as follows: In title II, the reported bill would require 12 weeks of unemployment. This amendment requires 15 weeks; in title VI, the reported bill requires 45 days of unemployment. This amendment requires unemployment during 10 out of the previous 12 weeks.

Tighter eligibility standards for CETA public service jobs has been strongly recommended by the National Commission on Manpower Policy in its latest annual report.

The Commission, Mr. President, would go even further. They recommend use of the eligibility criteria this amendment proposes for title II counterstructural jobs for title VI countercyclical jobs as well. I have been convinced, however, that in the countercyclical part of the jobs program, there is merit in having somewhat less restrictive eligibility standards so that in areas suffering especially high unemployment the working poor will become eligible for CETA jobs before they become destitute.

Tighter targeting has another important benefit, Mr. President. Most economists agree that, as unemployment declines the risk that public service jobs programs may be inflationary increases. Economists also agree, however, that to the extent such jobs are targeted on the long-term, low-skilled, structurally unemployed, that they do not place significant pressure on private sector wages and, therefore, they are much less inflationary. This is of major importance right now, as we must be very concerned about the potential inflationary impact of such programs as well as about the unemplovment problems these programs are designed to help solve.

A recent CBO analysis indicates that tighter targeting through lengthening the required weeks of unemployment is the most efficient way of reducing the eligible population for CETA.

I want to note at this point, Mr. President, that this amendment proposes no change in the income eligibility limits recommended by the Human Resources Committee. The reported bill provides that persons obtaining title II public service jobs must be from families with incomes below 70 percent of the Bureau of Labor Statistics lower living standard. This currently averages about $7,500 for a family of four. The bill provides that the family income eligibility for title VI countercyclical jobs will be 85 percent of the Bureau of Labor Statistics lower living standard—about $9,100 for a family of four.

I was initially inclined to try to move the title VI standard back to the 70 percent level. As with the weeks of unemployment standard, however, we become convinced that somewhat more flexibility is appropriate for countercyclical jobs.

PRIORITY FOR WELFARE RECIPIENTS

This amendment will build into CETA a set of unmistakably clear signals that welfare recipients are a high priority group for CETA training and public service jobs. My concern about this group of people—who have an unemployment rate of about 80 percent—stems both from the Budget Committee's efforts to identify savings in welfare programs as a result of the expansion of CETA, and from the work several of my colleagues and I have done on welfare reform during the past year.

One of the major dilemmas facing

those of us who would address the serious problems in the welfare system in this country today is the question of how to get more welfare recipients onto payrolls. To the extent that we can increase the participation of welfare recipients in the CETA program, we will reap the short-term benefit of reduced payments in existing cash assistance and food stamp programs; and we will help alleviate the perception that welfare reform presupposes the creation of huge numbers of new public jobs—on top of those funded under CETA.

This bill, as altered by the amendment we are now considering, will move the CETA program a considerable way in the directions pointed to in the welfare reform proposals contained in S. 2777. The focus on welfare recipients added by this amendment coupled with the private sector job voucher testing directed by title III of the bill, and the President's private sector initiatives incorporated in title VII of the bill, will, I believe, significantly increase the contribution CETA makes to improving the employability and increasing the employment of welfare recipients.

I am also hopeful that the tax bill we will soon consider will contain a targeted tax credit for employers who hire welfare recipients, unemployed youth, and handicapped persons. This will also help increase the private sector work opportunities for these groups. Congress thus has two big opportunities this year—the CETA bill and the tax bill—to adopt "reforms" which can help substantially on the "welfare problem" in this Nation.

ELIMINATION OF APPROPRIATIONS-FORCING PROVISIONS

In addition to tightening eligibility requirements and to increasing the emphasis on hiring welfare recipients under CETA, Mr. President, this amendment will eliminate the mandatory minimum funding requirement for title II public service jobs included in the reported bill. S. 2570, as reported by the Human Resources Committee, would require an appropriation of at least $3 billion for public service jobs under title II, before any funds could be made available for title VI.

In its report on the first budget resolution, the Budget Committee expressed its opinion that the time had come for a shift in the focus of Federal employment and training policy, from countercyclical to structural unemployment. The Budget Committee reaffirmed this position, in its report on the second budget resolution. As you would expect from my remarks on targeting, Mr. President, I wholeheartedly concur in this position.

The Human Resources Committee agreed with the Budget Committee, in this regard, Mr. President, and the reported bill reflects the Human Resources Committee's commitment to a major shift in emphasis in the CETA program from countercyclical to structural objectives.

S. 2570, as reported, groups most of the programs to serve the structurally unemployed in a new title II. The new title includes the training and employability development programs which are funded under title I of the existing law; and, as envisioned by the Human Resources Committee, it would include nearly one-half (or about 300,000 of the existing public service jobs. It couples these public service jobs for the structurally unemployed with training opportunities, counseling and placement efforts. As envisioned in the reported bill, by the end of the upcoming fiscal year, we will have the largest structural public service jobs program since the Great Depression.

As I have already stated, I believe the Human Resources Committee has presented us with a good plan for an orderly shift from the countercyclical focus of the existing programs to an emphasis on the needs of the structurally unemployed; I compliment the Human Resources Committee for its work.

S. 2570, in an effort to assure that the structurally unemployed receive the priority the Human Resources Committee feels they should receive, requires an appropriation of at least $3 billion for public service jobs under title II, before any funds can be made available for jobs under title VI (the proposed countercyclical title). While I wholeheartedly support the intent of this provision, I cannot support this kind of appropriations-forcing provision. We do not reconsider authorizing legislation annually. We do review priorities annually, through the budget and appropriations processes; and the Budget and Appropriations Committees, and the Congress, should not, I believe, be bound in this annual review by mandatory minimum appropriations provisions. Such provisions have virtually the same effect on the budget and appropriations processes as have entitlements. We already have far too little discretion in the Federal Budget—far too many "uncontrollables." For this reason, my amendment will strike this provision from S. 2570.

Lest anyone misunderstand, however, I shall support the policy which underlies the very position I move to strike. I shall resist, as we consider the second concurrent resolution on the budget, and when the Appropriations Committee considers funding for CETA, any effort to shortchange the structural programs under CETA in order to provide a higher level of jobs under the countercyclical title—title VI. I believe that the time has come to phase down countercyclical jobs—if the concept of a countercyclical jobs program which phases up and down with national unemployment is to have any credibility; but I sincerely hope the necessity of this phase down does not muddy the waters, with respect to our consideration of the needs of the structurally unemployed.

MANAGEMENT IMPROVEMENTS AND CONTROL OF FRAUD AND ABUSE

While I have the floor, Mr. President, let me say something about other amendments to this bill, of which I am a cosponsor. I enthusiastically support the amendment Senators DOMENICI and CHILES will offer which will strengthen the bill's antifraud and abuse provisions.

S. 2570, as reported, includes a number of antifraud and abuse provisions. It clarifies the responsibilities of the Secretary of Labor—particularly his responsibility to act promptly where fraud and abuse are alleged and his responsibility to withdraw funding and require repayment, where prime sponsors have misspent CETA funds. It makes it a criminal offense to misspend, embezzle, or otherwise make fraudulent use of CETA funds.

There is one major deficiency, I believe, in the antifraud and abuse provisions of the bill and that deficiency will be remedied by the Chiles-Domenici amendment. The Comptroller General, in a recent report on CETA, questions the ability of the existing CETA system to verify the eligibility of people enrolled in CETA jobs and training.

In my own State of Oklahoma, as well as here in the District of Columbia, we have had very disturbing recent reports of apparently ineligible people being hired in CETA jobs. We must end these abuses and make sure that the CETA jobs go to people who would otherwise be unemployed.

The Domenici-Chiles amendment, Mr. President, will establish a division of monitoring and compliance in the Office of the Secretary of Labor. It will charge that office specifically with investigation and action, in suspected cases of abuse or impropriety in the selection of participants. It will require the Secretary to satisfy himself that each prime sponsor's plan includes procedures for monitoring eligibility, in the prime sponsor's directly run programs, as well as in each subcontractor and subgrantee program. It will require the Secretary to establish national procedures to assure that participants are eligible. Finally, Mr. President, it will make it a criminal offense, subject to a fine of up to $10,000, for any individual to knowingly hire an ineligible participant in CETA.

I mention this amendment now Mr. President, because I believe that the adoption on my amendment—now before the Senate—and the adoption of the Domenici-Chiles antifraud and abuse amendment—when it is called up for consideration, promise a CETA program which will accomplish the objective of meeting the needs of the Nation's unemployed—particularly the structurally unemployed who must be our highest priority; and it will give us a CETA program free from scandal.

Mr. President, I urge the adoption of these amendments.

Mr. BELLMON. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. DECONCINI). The Senator from Wisconsin.

Mr. NELSON. Mr. President, I ask unanimous consent that Sara H. Turner of Senator ALLEN's staff be granted the privilege of the floor during the course of the consideration of the pending legislation and the rollcall votes thereon, along with Mr. Tom Altmeyer of the committee staff during consideration of this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I commend the distinguished Senator from Oklahoma. He has carefully drafted some modifications of the legislation

which are directed toward the objectives of the legislation. Speaking for myself, I think they are improvements. I am prepared to accept the amendment.

The Bellmon amendments would have the following impact:

First. Special consideration is to be given by prime sponsors to public assistance recipients and persons eligible to receive public assistance in filling public service employment jobs;

Second. Categorical eligibility is given to SSI and AFDC recipients in public service employment programs—titles II and VI;

Third. The required number of weeks of unemployment to be eligible for public service employment in titles II and VI is increased;

Fourth. Public assistance agencies and recipients are given increased attention in the planning and implementation of the CETA programs; and

Fifth. The provision that the first $3 billion made available for public service employment is to be used for the structural public service employment program is eliminated.

First. This amendment would modify section 122(c)(1) of the committee bill. Section 122(c)(1) provides that special consideration in filling public service jobs shall be given to eligible persons who are the most severely disadvantaged in terms of their length of unemployment and their prospects for finding employment and to persons who are Vietnam-era veterans. The proposed amendment would provide special consideration in filling public service jobs to eligible public assistance recipients and to persons who are eligible for public assistance, but who are otherwise eligible to participate in public assistance programs.

Public assistance recipients have a higher rate of unemployment than any other group of persons in this Nation. Yet, in fiscal year 1977 less than 14 percent of all title II public service job holders were public assistance recipients. That same year less than 18.5 percent of all title VI public service jobholders were public assistance recipients.

It is sound policy to provide for the employment needs of public assistance recipients in CETA. Not only would State and local governments benefit from the savings which would result from the transfer of public assistance recipients to federally assisted employment programs, but CETA would be serving persons who are most disadvantaged in their prospects of finding unsubsidized employment.

Second. S. 2570 provides that in order to be eligible for public service employment programs a person must both meet an income test and be unemployed for a certain length of time.

The proposed amendment would allow AFDC and SSI recipients to participate in title II and VI public service employment programs without regard to the number of weeks which they have been unemployed.

This amendment is similar to the eligibility provisions of the current title VI public service employment program. The 1976 CETA amendments provided that an AFDC recipient who meets the income eligibility requirement is eligible for public service employment services without regard to the number of weeks that person has been unemployed.

Under the Bellmon amendment, SSI recipients would be added to the list of groups for which the number of weeks of unemployment are disregarded.

By immediately employing AFDC recipients and SSI recipients, public assistance transfers may be reduced. Further, these persons will be given an opportunity to become gainfully employed before they begin to lose their ability to gain meaningful employment as a result of their protracted welfare status.

Third. The proposed Bellmon amendment also would lengthen the required weeks of unemployment for purposes of determining eligibility for public service employment from a minimum of 12 weeks in title II to 15 weeks; and from a minimum of 45 days to 10 out of 12 weeks in title VI.

These amendments are intended to tighten eligibility requirements for these programs and thereby help to assure that only those who are having the greatest difficulties in obtaining unsubsidized employment are served.

Fourth. The Bellmon amendment provides for a variety of other modifications to S. 2570 which will increase the coordination of State and local public assistance agencies and programs with CETA programs. These amendments also will assure that the employment related needs of public assistance recipients will be appropriately considered in development and implementation of CETA programs.

Fifth. The Bellmon amendment also would delete a provision in S. 2570 which directs the Secretary to first make available from the funds available for public service employment in titles II–D and VI $3 billion for the title II–D program.

The Human Resources Committee included this provision in order to insure that the structurally unemployed persons are given appropriate services under CETA. However, the committee at the request of the chairman and ranking minority members of both the Senate Budget and Appropriations Committees—Senators MUSKIE, MAGNUSON, BELLMON, and YOUNG—have agreed to delete this provision. The committee does not agree to this amendment on any substantive ground. However, in order to reach a compromise with the Budget and Appropriations Committees, the Human Resources Committee will comply with their request.

Mr. NELSON. I would make one comment. I would have preferred to leave in the legislation the provision that the first $3 billion allocated for public service employment be used for structural public service employment. However, I understand why there is some objection to that.

My view has been and is that in the long pull the most important objective of this legislation is to get people who are structurally unemployed the opportunity for employment and training, and the full-time jobs in the private sector.

I recognize also the importance of the countercyclical parts of the bill.

In any event, I understand why the Appropriations Committee prefers not to have—and the Senator from Oklahoma prefers not to have—us specifically identify the amount. There is a sound legislative rationale for that, and, in addition, the Carter administration itself opposes it.

Therefore, I am prepared to accept the total amendment. I commend the Senator from Oklahoma for doing a very careful job of improving the language in the legislation.

Mr. JAVITS. Mr. President, I yield to the Senator from Maine.

Mr. MUSKIE. I thank the Senator from New York.

I express my appreciation to the Senator from Oklahoma and the distinguished floor managers of the bill for reaching agreement on the Bellmon amendment, which I think is a constructive contribution to the bill.

Mr. President, I support the Bellmon amendments to the Comprehensive Employment and Training Act.

Since the inception of the budget process in 1975 the Budget Committee has been actively involved in employment and training issues because of the important role these programs play in fashioning a congressional economic policy.

In the first budget resolution for fiscal year 1976 the committee supported expansion of public service jobs as part of a mix of temporary recovery programs designed to alleviate the employment effects of economic recession.

Employment issues and employment programs were again a major focus during the markup on the first concurrent resolution for fiscal year 1977. During Senate Budget Committee debate, Senator CRANSTON offered a proposal developed in cooperation with Senator KENNEDY and MONDALE to provide public service jobs targeted on the low-income, long-term unemployed. This proposal was the forerunner of the 1976 amendments to title VI of CETA.

The committee went on record at that time in support of the concept of targeted public service jobs. The committee stated:

> Although Committee members did not formally endorse any specific public service program, the discussion of funding for such programs focused on the possibility of budget savings that would result from temporary programs with low unit costs that would concentrate on hiring low-income household heads now drawing unemployment insurance or other public benefits.

In February of 1977, as a result of continuing economic problems the committee considered a third budget resolution. There was extensive debate among committee members at that time regarding the increasingly structural nature of the unemployment problem as the unemployed population became increasingly comprised of the untrained, inexperienced, young, minority, and female. The third budget resolution allowed an additional $1.5 billion for youth employment, expanded public service jobs funded under CETA from 310,000 to 725,000, and provided significant expansion

in programs targeted on older Americans and other special populations. The committee report stated:

Much of today's unemployment problem is not susceptible to the macrostimulus cure. Changing rates of participation by various groups within the labor force and changing mixes of skill requirements dictate that a more targeted approach to training and job placement is the only means of significantly reducing unemployment for a meaningful length of time. Only a relatively small portion of the existing unemployment rate appears to be cyclical in nature, about 1½ percentage points. The remainder is primarily structural, requiring job training or retraining.

In the first budget resolution for fiscal year 1978 the committee again went on record in support of targeting. The report stated:

The Committee continued its support for provisions to target CETA Title VI public service jobs on the chronically unemployed and low income individuals and recommends that any reductions in jobs that occur as the recovery proceeds be taken in nontargeted public service employment.

During consideration of the first budget resolution for fiscal year 1979 the committee noted that economic conditions had improved and that there was a reduced need for countercyclical employment subsidies. The committee recommended at that time "that half the current spending effort for public service jobs be directed toward employment and training services for the structurally unemployed."

The amendment proposed by Senator BELLMON and the floor managers of the bill further strengthens the targeting in our employment and training programs. These amendments provide individual eligibility requirements more nearly consistent with current law than those included in the reported bill. These amendments also provide categorical eligibility for welfare recipients and additional language that makes welfare recipients a high priority clientele for employment and training services throughout the CETA legislation.

An additional amendment would eliminate provisions requiring Congress to appropriate at least $3 billion for public service jobs targeted on the structurally priority implicit in this provision, I cannot support the provision—and I am glad that the Bellmon proposal has dealt with it—because it reduces the discretion of the Appropriations Committee in providing CETA funding.

I encourage Senators to support these amendments. I am delighted that agreement has been reached to accommodate what I think are the essential thrusts supported by both the floor managers of the bill and their committee and the Budget Committee.

I do not really believe this amendment reflects a sharp division in objective by the two committees.

Mr. JAVITS. Nothing Senator MUSKIE could have told me would please me more than the fact that he recognizes the same priority. Knowing how we do business around here, frankly, the fact that the priority has been eliminated by the Bellmon amendment—which I hope will be accepted, because I agree with it thoroughly—does not disturb me a bit, so long as the chairman and the ranking minority member of the Budget Committee feel that we have pointed out the right way.

I have every confidence that the Appropriations Committee will see it the same way. It is the substance that counts with me, not the pride of authorship, but that is the way we wrote it.

How does the Senator from Oklahoma feel about that priority?

Mr. BELLMON. Mr. President, I agree with the comments of the distinguished Senator from New York.

I feel that the Appropriations Committee and some of the Budget Committees share the same priority preferences with the Human Resources Committee, and I am sure there will be no problem in working out satisfactory funding levels.

Mr. JAVITS. I thank both Senators. Their help is far more important to me than the language of the bill.

I think it is useful to refer for an instant to how this came about. I spoke before the Conference of Mayors late in 1977, and the demand there very clearly by the people who are the prime sponsors—they want this program—was that they were deeply concerned that it would be cut materially and indiscriminately, realizing that one of the major problems of our country, without regard to the fact that unemployment has come down from well over 7 to 6 percent, was the structurally unemployed. That is an endemic problem in America.

They impressed this on me so much that when I came back, I put the bill in that way. That is the genesis of our approach.

Mr. MUSKIE. I think another point should be made clear in this dialog, and it is this: There is a tendency in some quarters to believe that with unemployment down to 6 percent, with many of the changes in the labor market, unemployment as a problem has been reduced to a much less important one, and I could not disagree more. When we get down to 6 percent, what we really have done is dramatize the role of structural unemployment in creating social problems, problems of instability, and problems of lack of opportunity for minorities and the unemployed that we should not overlook. I could not agree more with the Senator.

I assure the Senator that in the discussions on the second budget resolution, structural unemployment was the emphasis of the Budget Committee, and there really is absolutely no distinction between us.

With all of us watching the appropriations levels, we should keep our efforts targeted in the direction the four of us agree upon.

Mr. JAVITS. I expect that Senator BENTSEN's amendment will help us with a very informed appraisal of the finite details of the economic scene.

I say to both my colleagues that one thing I have learned—and I think members of the committee will agree with me, but I will just speak for myself—in all this manpower problem of our country is that the problem of unemployment has a triple detailing: One is the division among the unemployed. What kind are they? I will speak to that in an instant—and I will not detain the Senate long—about the relative income levels, especially of the working poor, which are recognized by Senator BELLMON's amendment.

Second, we have learned that training is a critical point. I say to Senator MUSKIE and Senator BELLMON that it would amaze many of us to realize that some people have to be trained to set the alarm, get up at 6:30, put their pants on, have breakfast, and go to work. It is amazing, but it is true. It is almost a cultural deficiency.

Third, as to education, I doubt that I will ever see the day, but I wish to see every plant at GM, Ford, and IBM also a university. There is not any reason in the world why it should not be so, especially within this century when we are going to require, and Senator BENTSEN is well acquainted with this, 25 percent of the working force, that is a working force of almost 100 million, to be professional or paraprofessional. That is how technologically advanced we will be in the requirements. The hewers of wood and drawers of water are for the birds. That is old time stuff. There are very different requirements now for any kind of employment that pays anything that is worth living on.

So those are the points which we must keep abreast of here if we are going to do manpower bills which really make sense.

Mr. President, I should just comment very briefly on only one other thing. The targeting to the structurally unemployed we have already covered, I think, very effectively, and I am very satisfied with that. I do wish to call attention to the fact that we are emphasizing, both in the program and by this amendment, the working poor, those who are in the lower economic levels because that is what this is all about. And Senator BELLMON's amendment has various provisions which deal with that, and they are entirely acceptable to us. Senator NELSON has already indicated that.

But I wish to point out also the very study that Senator MUSKIE referred to, a study of the Congressional Budget Office issued in August 1978, which shows that under our bill the universe which is being reached is reduced from what it is under current law, some 41 million workers, to 8.2 million workers. In other words, we are reducing that universe by almost 80 percent. Then these amendments which Senator BELLMON is sponsoring further help us to reduce and consolidate that position, and I think that is what the position should be.

I am well aware of Senator BELLMON's welfare reform which will tie into this, and we are moving in that direction.

I do not want it exclusive any more than we want to send only poor children to one school, and also we wish to encourage the working poor, those who are a little bit above the absolute poverty level, so they are not welfare clients.

But we certainly must narrow those parameters because the purpose of public service employment is to reach those not

only disadvantaged by lack of a job or training, but also disadvantaged by economic conditions.

I think these amendments are very constructive, and I am very pleased, especially at the high degree of understanding, which to me is even more important than cooperation, on the part of Senator BELLMON and Senator MUSKIE which dictated the relationship to our staffs and enabled us to work this out. The amendment is acceptable to me, Mr. President, and on this side I believe it is divisible, so I ask unanimous consent that it may be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. BARTLETT. Mr. President, I would like to congratulate my colleague, Mr. BELLMON, for his efforts to restrict many of the abuses that have occurred under the Comprehensive Employment Training Act. I am pleased to join as cosponsor of his amendment. Senator BELLMON has already spent a good deal of time establishing the justification for his amendment. He has described the national problems which have resulted in many of the measures contained in the Human Resources Committee bill, and the amendment which my colleague has introduced.

I would like to take the opportunity to relate some of the specific examples in my own State of Oklahoma that would have been prevented if the Bellmon amendment had been part of the existing act.

Certainly Oklahoma has had its successes, and many people who might not have had an opportunity to work or learn a job skill have been assisted. Oklahoma is not the only State that has had problems in administering the CETA program, but I think we can learn from the incidents in Oklahoma, and correct the deficiencies in the law to insure that people who really need the employment and training are reached.

It is important to note that this amendment does not make it more difficult for a long-term or chronically unemployed person to obtain a CETA position. The amendment does however, make it more difficult for persons who are not really in need of assistance to become a CETA employee, or for a sponsor to divert the funds to political purposes.

In a recent report concerning the Oklahoma CETA program to the Federal Bureau of Investigations, 50 instances of possible violations of CETA have been noted. These violations include failure to establish a priority system for hiring which led to nepotism, favoritism, patronage and preselection.

Specifically, preselection is the creation of a job for a specific person rather than creating a necessary job for which a recruiting procedure among eligible applicants is carried out.

The result of this patronage preselection has been the elimination from eligibility of many qualified persons for which the CETA program was intended.

Senator BELLMON's amendment specifically targets recipients of supplemental security income and aid for dependent children for the receipt of public service employment jobs under title 2 of the act. Title 2 is directed at the chronically unemployed. Also targeted are those individuals unemployed for more than 15 weeks whose family income does not exceed 70 percent of the Bureau of Labor Statistics' lower living standard for urban households.

Further, for title IV public service employment jobs, similar methods are used with minor modifications to address the cyclical unemployment problem.

These strategies insure that such occurrences as local politicians obtaining jobs for their relatives will be impossible.

Senator BELLMON's amendment directs the Department of Labor, States and prime sponsors to focus planning and operations on steps to expand work and training opportunities for AFDC recipients. This makes it even more difficult for nepotism abuses like those in Oklahoma to occur.

All of these provisions would made it extremely difficult to "preselect" or to fail to list all the job opportunities available under the CETA program. These practices have allegedly occurred in Oklahoma and have resulted in loss of jobs to those who truly are in need.

I do not now whether a program such as CETA can ever be made to operate without the abuses that have occurred in Oklahoma and other States. It is the type of program that entices some people to indulge their public trust to the fullest extent. However, I believe that Senator BELLMON's amendment will provide significant redirection to the entire program.●

Mr. HART. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. JAVITS. I yield.

Mr. HART. Mr. President, I ask unanimous consent that C. L. Harmar, of my staff, be accorded the privilege of the floor during debate and votes on the pending measures.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I have a similar request. I ask unanimous consent that Miss Nancy Barrow, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I yield back the remainder of my time.

Mr. NELSON. Mr. President, I am prepared to yield back the remainder of my time. All time is yielded back.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment was agreed to.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NELSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1787

(Purpose: To authorize a study on structural unemployment programs to be done by the Joint Economic Committee)

Mr. BENTSEN. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1787.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 385, between lines 12 and 13, insert the following new subsection:

"(c) On or before March 1, 1979, the Joint Economic Committee shall report to Congress on the ability of targeted structural employment and training programs to achieve and sustain (1) a decrease in unemployment rates among those segments of the labor force having special difficulties in obtaining employment and (2) a decrease in the national unemployment rate without exacerbating inflation and shall make such recommendations, as the Committee deems appropriate, for improving the ability of targeted structural employment and training programs to achieve such goals. The Joint Economic Committee shall, to the extent feasible, consult with appropriate Federal agencies, the Human Resources Committee of the Senate and the Committee on Education and Labor of the House of Representatives, the Congressional Budget Office, the National Commission for Employment and Training Policy, the Board of Governors of the Federal Reserve, and other appropriate individuals, both public and private, and obtain their assistance in preparing the report."

Mr. BENTSEN. Mr. President, for the benefit of those who have been patiently waiting with their own amendments, I have two amendments here that I have discussed with the floor managers which I believe will be acceptable and should not take too long.

Mr. President, I wish to propose a short amendment to S. 2570, the CETA reauthorization bill, that will authorize the Joint Economic Committee to study and report on the impact of structural training and employment programs, such as CETA, on our economy's ability to reduce the unemployment rate without stimulating inflation. The amendment calls for the report to be completed by March 1 of next year, in time for the report's recommendations to be considered in the CETA appropriations bill.

Senator JAVITS, who is the ranking Republican Senator on the Joint Economic Committee, and who is also the minority floor manager for the CETA bill, has joined me as cosponsor of this amendment and it is at his urging and largely his inspiration that I propose this study.

Three and a half-years ago, our economy was mired in a deep recession that required highly stimulative monetary and fiscal policies. Millions of highly skilled workers had been thrown out of jobs in the cyclical downturn and appropriate macroeconomic policy measures were taken to get these workers back into the factories and construction sites where they could contribute to the productive power of our economy and earn a decent living for themselves and their families.

Today, most of these skilled workers are back on the job. The stimulative pol-

icies taken during the recession generally have been successful. Our economy has scored an extraordinary success in creating nearly 4 million additional jobs since last year. In July, 94.4 million workers were employed or 58.6 percent of the population.

But there are still more than 6 million potential workers who remain unemployed. These are not skilled workers jobless because of recessionary job cutbacks and layoffs. Instead, these persons include those segments of society that find it hardest to secure jobs—minorities, women, teenagers, new entrants to the labor force—people who have never held a job or have never been trained for a job. For example, unemployment among minority teenagers was 37 percent in July. That means hundreds of thousands of America's teenagers were forced into idleness, leading, for some, to a life of crime and, for others, to a life dependent on welfare and handouts.

Before we allocate resources to the CETA appropriations bill next spring, we need to know just how effective our dollars are going to be. We need some factual and analytical basis for determining the consequences of specific Government policy expenditures on the unemployment rate. Because our economy is vulnerable to severe imbalance resulting from an acceleration of the inflation rate, we need to choose very carefully the policies that will contribute the most benefit to the unemployed and the least detriment to price stability.

As vice chairman of the Joint Economic Committee, I believe our committee could and should undertake a study to determine the extent to which targeted structural employment and training programs can alleviate the problem of structural unemployment in the least inflationary way.

I have no preconceived notions about what the JEC study will find, no predetermined idea as to whether the report will be favorable or unfavorable. But I do believe it is essential that the CETA employment and training programs must be investigated to determine whether or not the American taxpayers are receiving full value for the billions of dollars devoted to this program.

Mr. President, I defer to the distinguished managers of the bill.

Mr. JAVITS. Mr. President, I am very pleased with what Senator BENTSEN had to say about this amendment and my part in it, and my reason for urging it upon the Joint Economic Committee was really twofold. I hope he will not mind my saying this.

He will be the chairman next year when this job is done. He has a very fine, I think as good as there is in this Chamber, touch with the business world, and it is the business world that is going to test out CETA because its graduates or terminees, as they are technically called, will be looking for jobs in the private sector. That is what this exercise is all about.

So I believe that a study really has a much better chance made that way in the Joint Economic Committee because especially under his chairmanship it will catch on to the business community.

Second, we have a very fine analysis from the Congressional Budget Office to which I have referred and Senator MUSKIE has referred. We must remember that the analysis from the Congressional Budget Office is technical. They are the technical people and the economists, and so on.

I think there is a good deal to be said for the working echelon, to wit, the Members of the House of Representatives and Senate on this joint committee. It is a joint committee giving us that study and refining its conclusions and recommendations.

Third, it is the broad relationship with all committees in the House, all committees in the Senate, and with the key Government agencies again on the top level like the Federal Reserve Board, the Treasury, the Department of Commerce, the Department of Labor, and the other economic agencies of the Government on the level which really can only be reached appropriately by Senators and Members of the House of Representatives.

The Joint Economic Committee has a splendid economic staff, which DICK BOLLING has helped to materially amplify now with this long-range study on the economy of the United States.

By the way, the study really has not had nearly enough notice considering its consequences and importance but will as its results begin to come out.

For all those reasons, Mr. President, I strongly commend this amendment to the Senate and certainly am for it myself.

Mr. NELSON. Mr. President, I agree with the remarks made by the distinguished Senator from New York. He covered the subject very well.

We are prepared to yield back the remainder of our time.

Mr. BENTSEN. I thank the distinguished manager of the bill and am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

UP AMENDMENT NO. 1788

(Purpose: To reduce the paperwork burden and regulatory costs of administering the Comprehensive Employment and Training Act)

Mr. BENTSEN. Mr. President, I have an amendment I send to the desk and ask the clerk to report.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1788.

Mr. BENTSEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 241, between lines 23 and 24, insert the following new subsection:

"(c) The Secretary shall, to the extent feasible, reduce the costs of compliance imposed on prime sponsors by rules and regulations issued under this Act including, but not limited to, the costs of applications, plan preparation, data collection, recordkeeping, report preparation, and other paperwork and regulatory cost burdens.

On page 244, line 12, insert "(1)" after "(e)".

On page 244, between lines 17 and 18, insert the following new paragraph:

"(2) In the annual report required in subsection (c), the Secretary shall include a description of the actions, if any, which the Secretary undertook during the fiscal year for which the report is made to reduce the costs of compliance imposed on the prime sponsors by rules or regulations issued under this Act, as required under section 127(c).

On page 248, line 4, insert "(a)" after "134.".

On page 249, between lines 6 and 7, insert the following new subsection:

"(b) The Secretary shall complete all audits of recipients of funds which he deems necessary in a timely fashion following the end of the fiscal year for which the audits are made. In the annual report required under section 128(c), the Secretary shall include a statement of the average delay between the end of each fiscal year and the audits of prime sponsors for such year, the actions, if any, taken by the Secretary to reduce the delay, and the additional funds and personnel the Secretary would need in order to carry out all audits within the 24 month period following the end of the fiscal year for which the audits are made.

On page 282, following line 25, add the following new subsection:

"(a) To reduce the cost of carrying out the provisions of this section, the Secretary shall consult with the National Commission on Employment and Unemployment Statistics.

On page 284, between lines 2 and 3, insert the following new subsection:

"(c) In order to reduce the paperwork burden and costs on prime sponsors, project applicants and program agents, in carrying out evaluations of the cost-effectiveness of identical or similar programs of prime sponsors, the impact of such programs on communities and agents, the implication for related programs, and the adequacy of the mechanism for the delivery of services, the Secretary shall to the maximum extent possible, consistent with the purposes of this Act, use statistical sampling techniques.

Mr. BENTSEN. Mr. President, my amendment is designed to relieve the horrendous paperwork burden imposed on the 450 city and State governments which act as prime sponsors for this program.

The regulatory and paperwork burden imposed on prime sponsors is a bottomless pit which has devoured the taxpayers money at an incredible rate. For example, in fiscal 1975, the prime sponsors had to file nearly 5 million forms or reports with the Department of Labor. By the Department's own estimate, these forms and reports took over 2 million hours to fill out.

This represents only the tip of the iceberg. When the paperwork required of the organizations who run the programs under the supervision of the prime sponsors is considered, the Commission on Federal Paperwork estimated that the CETA program absorbed more than 100 million man-hours annually just on paperwork.

That is equivalent to 50,000 full-time workers doing nothing but CETA paperwork. According to the Commission on Federal Paperwork, the total cost of all this paper shuffling was nearly $500

million. That is nonproductive expenditure of the taxpayers' money.

That was the figure for fiscal 1975, when the entire CETA program cost was about $3 billion. Today, CETA is an $11 billion program. If the compliance costs have grown apace—and there is every reason to believe they have—paperwork generated by the CETA program may now cost in excess of $1.5 billion.

This is an outrageous waste of tax dollars which should be devoted to training people for productive jobs rather than to filling out countless and often irrelevant forms.

Mr. President, all this paperwork has not produced a scandal free program. To the contrary, a program which is awash in unnecessary bureaucratic redtape and morassed in a floodtide of complex and often unnecessary rules, regulations, forms, and directives is one which cannot be managed effectively so as to prevent abuses.

So it is not surprising that the CETA program has been riddled with far too many examples of nepotism, favoritism, and payroll padding.

Mr. President, unemployment among minority teenagers was 37 percent in July. That means hundreds of thousands of America's teenagers were forced into idleness—an idleness which leads many into lives of crime, which causes many others to give up on the American system and which leads still others into lives of dependency on welfare and handouts.

We simply cannot afford to squander tax dollars earmarked to help these youngsters on mindless bureaucratic demands for more and more unnecessary and repetitive information.

The amendment I offer today will not eliminate all the waste and inefficiency in the CETA program. but it will go a long way toward alleviating a number of paperwork and regulatory problems which were first identified by the Commission on Federal Paperwork.

First, it requires the Secretary of Labor to cut the compliance costs imposed on the prime sponsors by DOL rules and regulations and to report annually to Congress on the actions taken during the previous year to cut compliance costs and regulatory burden.

Second, it requires the Labor Department to complete all audits of prime sponsors in a timely fashion, with a goal of completing audits within 2 years of the fiscal year being audited.

Third, it urges the Secretary of Labor to make full use of the findings of the Commission on Employment and Unemployment Statistics in developing hardship and local unemployment indexes, as required under the CETA reauthorization bill.

Finally, it authorizes the Labor Department to use sampling techniques wherever possible in gathering data to evaluate the effectiveness of CETA programs.

CETA is now an $11 billion program. The taxpayers of this country hold us responsible for assuring that this $11 billion is spent wisely and effectively. The American taxpayer is fed up with waste and inefficiency in Government programs.

My amendment, by cutting unnecessary paperwork and reducing the costs of complying with CETA rules and regulations, will help achieve this and provide a better managed and more effective employment and training program for unskilled and underskilled workers.

I know the Labor Department is sympathetic to this effort. My staff has worked closely with individuals at the Labor Department on this amendment, and their help is greatly appreciated. I trust that enactment of this amendment will be only the start of a major effort within the Labor Department to cut the regulatory costs of CETA programs and improve the administration of CETA.

I defer to the distinguished manager of the bill.

Mr. NELSON. Mr. President, let me say that I think the Senator from Texas has very carefully designed an excellent amendment. If there is anything that is a cause of despair among all of us it is the amount of paperwork the Government is able to generate somehow or other.

Incidentally, the Paperwork Commission concluded that the cost of paperwork in this country by all levels of government amounts to $100 billion a year.

It is my view, looking at lots of the paperwork that is required by various agencies, that 75 to 80 percent of it could be eliminated and thereby improve the efficiency and the information flow within the Government. That would mean we could also balance the budget and have a surplus if we were to save that amount.

So I am in agreement with the very fine amendment offered by the Senator from Texas.

Mr. JAVITS. Mr. President, the amendment offered by the Senator from Texas is completely acceptable to me, and I think it is in line with what the Senator has been doing very ably for all of us. It is the kind of job I would like to leave to him.

I would like to ask him one question because we do not seem to be quite as pressured on this bill as we have been on others. One thing appeals to me, and would he agree with me, that this inundation of paperwork was brought on by the same public that now demands that it cease, and I will explain why. I would just like to do that.

I have had trouble, because I have been involved in the poverty program so much for years, with agencies which are doing a marvelous job in antipoverty but have very bad records, and they have often been stripped of financing, they have been put out of business, because of the public clamor that, "Well, they don't keep accurate records. We cannot check back on every $5 that they spend. The petty cash is in disorder." So we will spend $50,000 to catch the last $5.

Business does not do that. Every chain and department store accepts 2 percent leakage minimum, that is, stealing, inefficiency, stuff disappears, and so on, but they realize that it is counterproductive.

The U.S. Government—and I am all for the amendment and I am all for cutting paperwork—but I hope the public will remember it when some Government agency has not spent $50,000 to catch the last guy who wasted or threw out in the wastebasket $10 or $20. I think that is an injunction we ought to constantly be giving ourselves as we cut paperwork. Let us cut it. I am all for it. But let us remember we do not get that free, either. There will be some price to pay, very well worth paying.

Mr. BENTSEN. The Senator makes a very good point because we are talking about putting on what we consider to be one of business' best techniques, and that is sampling techniques. Instead of checking every bloody form that is there, and, obviously, you are not going to catch everything, but if you see that there are some serious aberrations in an area, then you come in with a concentrated audit. But it results in some of the very things the Senator is talking about. These are things we should do in trying to save the taxpayers some money.

On these forms business is not totally without waste in its work on forms and having proliferation of forms. I can recall one where a management consultant told me he came into a major company and in their reorganization work asked that all forms that had to be filled out, all reports that had to be filled out, should all be sent to the president's office and not where they had been sent previously.

After 6 months he then went into the president's office where they had stacked these reports and found those that had never been asked for and never missed by the people they had previously been sent to, and he said, "Those we can eliminate."

So the same thing happens in business. You have to have these periodic purges, in effect, to try to clean up the records to see that we get effective management.

Mr. JAVITS. I thank my colleague.

Mr. BENTSEN. We are prepared to yield back the remainder of our time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

UP AMENDMENT NO. 1789

(Purpose: To assure inclusion of Hawaiian Natives in programs under title VII)

Mr. INOUYE. Mr. President, I ask that my amendment be called up.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Hawaii (Mr. INOUYE), for himself and Mr. MATSUNAGA, proposes an unprinted amendment numbered 1789.

Mr. INOUYE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 377, line 10, strike out "section 302(c)(1)(A)" and insert "sections 302(c)(1)(A) and (B)".

On page 377, line 15, strike out "section 302(c)(1)(A)" and insert "sections 302(c)(1)(A) and (B)".

On page 377, line 14, strike out "or a Native American entity" and insert "entities described in".

Mr. INOUYE. Mr. President, I am pleased to advise the Senate that I have discussed this matter with the distinguished managers of the bill and, in fact, the members of the staff actually drafted this amendment.

Mr. President, today I ask my colleagues' most serious consideration of an amendment to the Comprehensive Employment and Training Act of 1978. This legislation as reported from the Human Resources Committee bars native Hawaiians from receiving special native American benefits provided under title VII, private sector opportunities for the economically disadvantaged programs. My amendment seeks to instate native Hawaiians in this far-reaching provision of the act, and thereby significantly increase the beneficial impact the act will have on this very important portion of my constituency.

This amendment will permit native Hawaiians to receive special native American benefits provided under title VII, the private sector opportunities for the economically disadvantaged programs.

Mr. President, as some are aware, native Hawaiians were first incorporated as native Americans in the Comprehensive Employment and Training Act in 1977. At that time they were placed along with federally and State recognized Indian tribes and bands and Alaskan Native groups in section 302(c)(1) of title III, the native American employment and training programs. This action stood as yet another recognition by the U.S. Congress of the unique relationship existing between the Hawaiian people and the Federal Government. It was moreover another affirmation of the pressing social and economic crisis faced by this native American group.

Native Hawaiians, descendants of the original inhabitants of Hawaii, like other native Americans, have the highest incidence of poverty and the highest unemployment rate of any other racial group in my State. Their level of education, skill and training is among the lowest. Their level of effective participation in the system is almost nil.

The reauthorizing legislation now being considered by the Senate continues to recognize the desperate plight of the native Hawaiian people and the ability of CETA to effectively address their unique needs. This is commendable. It does not, however, recognize the grave necessity of providing Native Hawaiians with a means to enter into the private sector of our communities through employment and training for private sector employment options that will be allowed under program options. The bill as reported from committee does allow reservation Indian tribes and Alaskan native villages and groups to share in the title's 5 percent discretionary funds.

Native Hawaiians, like American Indian tribes and Alaskan Native villages and groups, have a demonstrated need for programs specifically designed to increase their participation in the private sector. A large number, as one Department of Labor official reported during a visit to Hawaii, seek employment in entrepreneurships and small business enterprises. Though CETA offers an excellent opportunity to gain the basic knowledge required for such activity current law has prevented assistance in this area. The new title VII, Private Sector Opportunities for the Economically Disadvantaged provisions, included in the legislation before us, was created to correct this problem. Accordingly, Native Hawaiian exclusion from title VII would greatly diminish CETA's potential impact on the Native Hawaiian people.

One reason given for this exclusion is that title VII is intended only for prime sponsors who serve large populations of disadvantaged individuals. Mr. President, there are approximately 150,000 Native Hawaiians in Hawaii and an estimated 150,000 more residing in other States. Twenty-one percent of those living in Hawaii are receiving some form of welfare assistance; 11.6 percent are unemployed; and 27. 4 percent exist below the poverty line. Though these employment figures correspond with those of Indians and Alaskan Natives, very few Indian tribes and Alaskan Native villages have as many as 150,000 members. Rather tribal and village memberships range from 155,000 to numbers below 100.

Concern has also been expressed that unlike tribal and Alaskan Native reservation Indians and Alaskan Natives, native Hawaiians are eligible for CETA PSE and title VII benefits from States and county prime sponsors. Though this is true, these prime sponsors have no programs specifically designed to answer the unique needs to Hawaii's native Hawaiian people. It is clear that the vast majority of the Hawaiians in my State would prefer to and do participate in the native Hawaiian CETA prime sponsor program rather than in those of other prime sponsors.

Further, officials in the Department of Labor inform me that reservation Indians and Alaskan Natives are also eligible for assistance from other prime sponsors as well as from Native American prime sponsors. In fact, title I general population prime sponsors operating in areas with high native American populations are required to assist native Americans who seek their services, either by providing direct services or subcontracting this responsibility to a native American prime sponsor.

On July 9, 1975, the Comptroller General issued an opinion supporting this assertion. (July 9, 1975, file B14868–Comptroller General Memorandum to Department of Labor.)

Another concern expressed concentrated on the difficulty of obtaining accurate population counts of native Hawaiians. Federally funded State census runs have taken care of this problem in Hawaii. However, official data counts of the numbers of native Hawaiians residing in other States is hard to come by.

I have been working with the Census Bureau to correct this problem and am confident that the next national census will provide the most accurate count of the mainland native Hawaiian population yet obtained. In the interim, I hope that the U.S. Senate can be responsive to the needs of Hawaii's native Hawaiians.

Mr. President, native Hawaiians comprise 18 percent of the Hawaii State population yet occupy the bottom most rungs of our social and economic ladders. I hope that the U.S. Senate will once again recognize the Federal responsibility to this segment of our citizenry and the urgent need of native Hawaiians for assistance by adopting my amendment.

Mr. MATSUNAGA. Mr. President, as a cosponsor, I rise in support of the amendment offered by Hawaii's senior Senator (Mr. INOUYE) which would make native Hawaiians eligible for assistance under title VII of the Comprehensive Employment and Training Act amendments.

Under existing law, native Hawaiians, along with American Indians, Eskimos, and Aleuts, are eligible for CETA assistance as native Americans. The current law, to which native Hawaiians were added by the 94th Congress, is consistent with the Community Services Act of 1974, which defines native Hawaiians as "Native Americans."

However, in amending the Comprehensive Employment and Training Act this year, the Committee on Human Resources separated native Hawaiians from other native Americans eligible for assistance under title III of CETA. While native Hawaiians would still be eligible for certain types of CETA assistance, they would not be able to receive aid under title VII, "Private Sector Opportunities for the Disadvantaged," or would they be eligible for public service employment programs funded under CETA. The proposed amendment would enable native Hawaiians to receive assistance under title VII.

Mr. President, the exclusion of native Hawaiians from certain types of CETA programs available to other native Americans is inconsistent with the intent of the 94th Congress and it would cripple efforts currently underway to help native Hawaiians achieve self-sufficiency. In enacting special CETA provisions to benefit native Americans, Congress wisely recognized that their high rate of unemployment is related, at least in part, to their unique culture and traditions. Native Hawaiians are no different, in this respect, from American Indians and Alaskan Natives. They need the special assistance provided under CETA to overcome the disadvantages they face after years of social change and exploitation.

Although native Hawaiians have a higher rate of unemployment than the general population in the State of Hawaii, and although they comprise a disproportionate share of welfare recipients in the island State, studies have repeatedly shown that what they desire above all is self-sufficiency. They are nearly unanimous in their desire to obtain better occupational training and educational

opportunities such as are provided under the Comprehensive Employment and Training Act. I urge my colleagues not to bar this door to opportunity. The special benefits provided under CETA to native Americans could make all the difference for native Hawaiians. I am happy to be a cosponsor of the amendment offered by Senator INOUYE and I urge the Senate to act favorably on it.

Mr. INOUYE. Mr. President, I am prepared to yield back the remainder of my time.

Mr. JAVITS. Mr. President, I find this amendment entirely acceptable.

THE PRESIDING OFFICER. The Senator from Wisconsin.

Mr. NELSON. Mr. President, I agree with the distinguished Senator from New York. I am prepared to yield back the remainder of my time.

Mr. INOUYE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment (UP No. 1789).

The amendment was agreed to.

UP AMENDMENT NO. 1790

Mr. CHAFEE. Mr. President, I had an amendment in the committee to establish a voucher demonstration project. That was accepted by the committee under title III, part B, section 317. The committee staff inadvertently left out the details——

The PRESIDING OFFICER. Is the Senator offering an amendment?

Mr. CHAFEE. I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE) for himself and Mr. WALLOP offers an unprinted amendment numbered 1790.

Mr. CHAFEE. How much time on the amendment, Mr. President?

The PRESIDING OFFICER. Thirty minutes equally divided.

Mr. CHAFEE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 224, beginning on line 5, strike all following "industries" through line 7 and insert in lieu thereof the following: "except for those jobs (i) for which there exists a training program, approved by the Secretary, of a specified length of time designed to teach specific skills and (ii) where the rate of labor turnover does not differ substantially from the rate of labor turnover in other industries in the same area."

Mr. CHAFEE. Mr. President, as I say, in the committee I had an amendment to establish a voucher demonstration, and that was accepted, as I mentioned a moment ago. The committee staff inadvertently left out the details of the intended program from the committee report.

Since the Labor Department has had the authority to run a voucher program for years, but has not used it, I believe it is necessary to spell out in more detail than usual what we had in mind with this voucher program.

Therefore, I ask unanimous consent that a proposed explanation be printed in the RECORD, dealing with the voucher demonstration program.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VOUCHER DEMONSTRATION PROJECT

Under current law, Section 311, the Secretary has had the authority to conduct an experimental program of issuing vouchers for subsidized private sector employment to offset the barriers to employment faced by disadvantaged persons. Thus far, the Secretary has not chosen to conduct such a program.

The Committee agreed that a voucher system deserves attention as a useful tool to encourage employment. Therefore, the Secretary is required to establish in FY 1979 a special voucher project to demonstrate the efficacy of providing vouchers to economically disadvantaged persons who are unemployed or underemployed. These vouchers shall entitle private employers who provide employment with or without training to such individuals to payment in amounts equal to the value of the voucher, pursuant to regulations of the Secretary.

The Secretary shall consider the following principles when developing regulations for this project:

1. Eligibility of participants is to be limited to persons who are unemployed, or underemployed, and disadvantaged.

2. Vouchers shall be issued by Prime Sponsors to enhance employability of individual. Vouchers shall be worth up to $1.00 per hour of paid work by the participant to offset the lower productivity of eligible individuals. Factors to be considered in determining the value of the vouchers shall include, but not be limited to, participant employability, local wage rates and labor market conditions.

3. Vouchers shall be portable between employers, not committing the employer or employee to continue the work arrangement other than by mutual agreement, and shall be valid for up to a year, as determined by the Secretary.

4. Procedures shall be established to insure that currently employed individuals are not displaced by voucher-eligible employees.

5. Voucher-eligible employees shall be paid at a rate not less than the higher of the minimum wage or the rate paid by that employer to other individuals performing the same or similar work.

6. In choosing prime sponsors to participate in this project, the Secretary shall select sites in such a manner as to insure an appropriate mix of rural and urban areas, of different concentrations of eligible participants, of different regions and labor markets and of different categories of prime sponsors.

7. Participating prime sponsors shall integrate vouchers into their comprehensive services, and utilize a significant proportion of available vouchers for individuals completing training programs, so as to direct voucher recipients toward jobs with meaningful advancement opportunities.

The Secretary is instructed to prepare and submit a report to the Congress evaluating the effectiveness of this demonstration project. The Secretary's report shall include an evaluation of the project's effectiveness in increasing the employability and earnings of eligible groups, the willingness of private sector employers to participate, the desirability and skill level of jobs obtained by participants, the administrative feasibility of the program and any other factors deemed important by the Secretary.

Mr. CHAFEE. Mr. President, in connection with the amendment which I have sent to the desk, it amends section 123 in the following manner: It leaves intact the language through line 4 and the first two words in line 5, and then inserts, after that, the following:

. . . except for those jobs (i) for which there exists a training program, approved by the Secretary, of a specified length of time designed to teach specific skills and (ii) where the rate of labor turnover does not differ substantially from the rate of labor turnover in other industries in the same area.

What I was particularly aiming at, Mr. President, is that, as provided under the prior legislation and the regulations pursuant thereto, the language specifically prohibits the training under CETA of any sewing machine operators. My language would permit the training of sewing machine operators, although it does not specifically refer to them, if it is determined that there is a need for such operators.

What I am striking at, Mr. President, is language that has grown up in the regulations which actually specifically mentions sewing machine operators in section 4 of field memorandum 285–77; and I send to the desk and ask unanimous consent to have printed in the RECORD this language, which states that CETA funds may not be used for the purpose of training sewing machine operators in the garment industry.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Employment and Training Administration]

Directive: Field Memorandum No. 285–77.
To: All Regional Administrators.
From: Floyd E. Edwards, *Administrator, Field Operations.*
Subject: Training of Sewing Machine Operators under CETA.

1. Purpose. To advise RA's of the continuing prohibition against using CETA funds for the training of sewing machine operators in the garment industry.

2. Reference. May 23, 1975, TWX to all ARDM's on same subject.

3. Background. Section 95.37(a) of the regulations states that "no participant may be enrolled in any activity or service under this act in any lower wage industry in jobs where prior skill or training is typically not a prerequisite to hiring and where labor turnover is high (section 704(a) of the Act)." The occupation of sewing machine operator in the garment industry has long been cited as a specific occupation having these characteristics. Recent data show that this occupation continues to be characterized by high turnover and low wages.

4. Policy. CETA funds may not be used for the training of sewing machine operators in the garment industry. This prohibition applies to any job which is, in fact, a sewing machine operator job regardless of the job title by which it is classified; e.g., "Strip Sewer" of "Shirring Machine Operator."

5. Action Required. RA's should ensure that all prime sponsors are aware of this prohibition and should ensure its enforcement. If CETA funds are presently being used for the training of participants in the prohibited occupation, the contracts should be allowed to expire and no further funds obligated for this purpose.

6. Inquiries. Questions should be directed to June Sekera on 8–376–7006.

Mr. CHAFEE. Mr. President, there could well be, and we believe there is in my section of the country, a need for sewing machine operators, but that can be determined by the Secretary in the usual course, just as he determines whether there is a need for training in

this work, that work, or whatever it might be.

Up in my area, the wage for sewing machine operators is $4.27 an hour, which is, indeed, higher than the general manufacuring wage. So, Mr. President, all this amendment would do—and it is necessary in order to have the regulations changed—would be to permit the training of workers in an area such as I have described, sewing machine operators, where a specific length of time is required to teach the skill, and where the rate of turnover does not differ substantially from the rate of turnover of other industries in the same area.

I have discussed the amendment with the floor managers of this bill, and it is my understanding that it is acceptable to them, Mr. President.

Mr. NELSON. Mr. President, we have examined this amendment, and it is in conformance with the objectives of the legislation. It is carefully drafted to apply only to a training program approved by the Secretary, for a specific length of time, to teach a specific skill, and the amendment is acceptable to the manager of the bill.

Mr. JAVITS. Mr. President, the way the amendment is drafted, it would send the present language—and Members should turn to page 224, lines 1 to 5, inclusive. It would end the present language after the words "lower wage industries" and would leave the definition of lower wage industries to the Secretary.

It is my understanding that the Secretary will construe lower wage industries to mean—and now I go to the rest of the words which are going to be stricken—"lower wage industries" will mean industries where there are jobs where prior skill or training is typically not a prerequisite to hiring or where labor turnover is high.

But the amendment will now permit even jobs in those industries to be permissible for CETA jobs, if there exists a training program approved by the Secretary, of a specified length of time, designed to teach specific skills, and the rate of labor turnover does not differ substantially from the rate of labor turnover in other industries in the same area.

With that understanding of the meaning of the amendment, it is entirely acceptable to me.

Mr. CHAFEE. Yes, it is, Mr. President, and we are striking at the particular area of sewing machine operators—I cannot understand the nationwide, industrywide prohibition, I guess it was an unfortunate experience in the West and Southwest, dealing with sewing machine operators—so that the regulations specifically prohibiting the training of sewing machine operators under CETA will be changed.

There are some possibilities in our area for employment of sewing machine operators where they can validly be used, and at least we want to have the opportunity to explore that possibility. Maybe it will not work out; maybe it will be rejected. But I do not think the law should specifically prohibit this particular section of industry.

I am grateful to the managers.

I want to quit while I am ahead, Mr. President, but I would say one thing about this whole act. It seems to me we are treading that narrow line between trying to prevent scandals about having people in the program who should not be there, and at the same time tying it up so much with regulations that we prevent the program from moving on to achieve the very purposes we are seeking. Sometimes it is a very difficult path to travel.

I have always felt in Government, and this may sound like a shocking thing, that there ought to be a little waste in Government. The answer to the little bit of waste is to have so many regulations, so many rules and so many watchers that nothing can be accomplished.

I think those who have worked so hard on this legislation have done a good job trying to tread this path, and I just hope it is not so bound up with prohibitions about this person or that person coming in that we will be prevented from getting on with the training of those people we want to train.

Mr. NELSON. I agree with the statement of the Senator. I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Rhode Island yield back the remainder of his time?

Mr. CHAFEE. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1791

(Purpose: To provide demonstration projects for training disadvantaged young adults in growth occupations)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1791.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 287, between lines 12 and 13 insert the following:

"'GROWTH OCCUPATIONS DEMONSTRATION PROJECTS

"'SEC. 318. (a) The Secretary shall establish demonstration projects designed to demonstrate the effectiveness of training young adults, disadvantaged individuals and structurally unemployed individuals for jobs in growth occupations such as positions in the transportation, energy, plastics and food processing industries. In carrying out the provisions of this section the Secretary is authorized to make grants to and to enter into contracts with public agencies and private organizations.

"'(b) The Secretary shall determine growth occupations for the purpose of the demonstration projects authorized by this section.".

On page 179 in the table of contents after section 317 insert the following:

"Sec. 318. Growth occupations demonstration projects.

Mr. GLENN. This amendment would provide for demonstration projects designed to demonstrate the effectiveness of training young adults, disadvantaged individuals, and structurally unemployed individuals in jobs in growth occupations in particular, such as positions in certain parts of the transportation industry, energy, plastics, and food processing industries.

Mr. President, I want to express my basic support for S. 2570. I think that the floor managers and staff have worked diligently to improve and tighten up the CETA program. My primary concern is that the CETA program be tightly targeted so that it provides meaningful training to those most in need. The administration and the committee have worked diligently toward this goal and I support these efforts.

My concern is that the skills training that we attempt to undertake through CETA be in viable skills areas that offer the promise of long-term, productive careers. Much of the damage to the reputation of CETA has come from an image of it as being heavily involved in irrelevant or frivolous job activities.

There clearly do exist major occupations that could be termed "growth occupations." These are occupations that indicate by projection that significant opportunities will exist in future years. I believe that the Labor Department, in its job training programs and demonstration projects, should try to target these professions. For example, I refer to transportation, energy, plastics, and food-processing industries among many others which the "Occupational Outlook Handbook" indicates will show significant growth in the years ahead.

Mr. President, as a specific example of my point, let me cite the motor carrier industry. The Labor Department's Office of National Programs currently funds an on-the-job training program with the Teamsters Joint Council 40 and 53 to train men and women to be tractor trailer truck drivers. This program will have 106 enrollees. It is the sixth contract with the Teamsters Joint Council. It is an outstanding success that has trained over 800 enrollees and placed 85 percent of them in jobs averaging $7 to $8 per hour.

Mr. President, I submit that is what CETA is all about, to attempt to do exactly that. It is not only to train people but to get them jobs in private industry, to move them out into well-paying jobs.

Similarly, the cities of Cincinnati and Cleveland at separate times had highly successful truck driver training programs that immediately placed 80 to 90 percent of their graduates. These Government-sponsored programs were well received by common carriers in Ohio, especially many that are too small to initiate their own in-house training programs. These courses were so comprehensive that common carriers accepted the graduates in many instances without recourse to the standard driving tests the carriers ordinarily give to new employees.

Mr. President, the career promise that this type of effort holds for the structurally unemployed and for minority youth is obvious. We should do as much as possible in this area.

I would like to ask the distinguished floor manager of the bill who has done so much to tighten up the language in the bill, and the ranking minority member also, if they do support efforts along the lines mentioned.

Mr. NELSON. I agree with the distinguished Senator from Ohio that it is true that CETA individuals should be offered training in industries with growth potential. Section 121(i)4 of the Senate committee bill provides that—

No person shall be referred for training unless there is a reasonable expectation of employment in the occupation for which the person is being trained.

Prior to placing CETA participants in a classroom, institution, or on-the-job training, a prime sponsor should assure that there is a reasonable likelihood that private sector employment opportunities will be available to trainees in the occupation in which they are trained.

Mr. GLENN. I am very encouraged to hear the comments of the distinguished floor manager of the bill.

I would welcome any comments by the minority floor manager also. I think this can help to point out, through the legislative history of this legislation, the intent of Congress, the intent that we mean it to be meaningful employment, and not only providing immediate employment but training that can move those trainees into private industry which can help in dislocations where industries are going downhill in a particular area and people need to be trained, or taking the unemployed and the disadvantaged and moving them into productive lives in the private sector.

Mr. JAVITS. The Senator is absolutely right. It ties in with the bill very closely. To me one of the most innovative parts of the bill is the $400 million provision for training in private enterprise. I was in attendance at the White House when the President announced that program. Many of the very top executives of major American enterprises were there. It looks very promising. It is something in which I deeply believe. I think this will be a very real guideline to those authorities who are charged with carrying that out, as well as the CETA program generally.

The Senator is absolutely right. One of the most successful of the voluntary programs, such as the nongovernmental programs, are the opportunities industrialization centers, which are run by Rev. Leon Sullivan, of Philadelphia. One of the elements that has commended that program is the fact that they have tied into local business so well that very little of their training is deadend, to wit, training for which there is no job at the end of the road.

I thoroughly agree with the Senator and I assure the Senator I will do everything I can.

We have already heard from Senator NELSON, to influence the Department to administer this law, to which it is so very pertinent, in exactly that manner.

Mr. GLENN. I thank the distinguished floor manager very much. I think these comments in the RECORD this morning will indicate to those who are managing the whole CETA program that any projects they can design to demonstrate the effectiveness of training of adults, the disadvantaged, and the structurally unemployed for the growth occupations will be particularly well looked on by Congress.

Mr. President, with that type of support and with the knowledge that the distinguished floor managers of this bill will be keeping close tabs on what is going on in the future and be influencing future legislation influencing these programs, I withdraw my amendment.

The amendment was withdrawn.

UP AMENDMENT NO. 1792

(Purpose: To give preference in CETA training program benefits to the unskilled over college graduates and holders of higher education degrees)

Mr. HATCH. Mr. President, I call up an unprinted amendment and ask for its consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes unprinted amendment numbered 1792.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 268, after "workers," on line 5, add "those who lack educational credentials."

Mr. HATCH. Mr. President, like many of my colleagues, I support the honorably stated purposes of this legislation. The stated purposes of any legislation are usually honorable, and in the case of CETA, all of us want to support any proper and effective effort to solve our national youth and structural unemployment problems. I believe my friends and colleagues (Mr. JAVITS and Mr. NELSON) deserve our gratitude and respect for their characteristic high-quality work in this regard. They have been willing to compromise, they have been willing to change, they have dedicated themselves and worked very hard, I think, to try to correct this bill and to make it a more just and service-type bill. I have nothing but respect for the work that they have done here.

As a member of the Senate Human Resources Committee, and as one who devoted a lot of his time to working to improve this bill, I want to vote for it. I feel that I can do so provided that the fine series of amendments to be considered by us during the full consideration of this bill are accepted, amendments which go a great distance to reinstitute respectability in the CETA program.

Respectability is a descriptive noun too seldom heard these days in the course of CETA discussions, and seldom seen in articles about CETA's administration. The series of articles on CETA in the Washington Post, in the Los Angeles Times or the New York Times all read the same. They describe the program's abuses. They quote the ballet dancers, the golfers, or the city bureaucrats, all of whom enjoy the most personalized of capital gains because of moneys they receive as CETA applicants.

Any reasonable citizen, especially anyone paying taxes, who reads any one of these stories will conclude that it would be in our national economic and ethical interest to be rid of this program; to be rid of this $11.4 billion drain on our national economy. Certainly I would, supporting all the more my own conviction that we must see this body approve amendments tightening eligibility and preventing fraud and abuse. We must approve amendments which are every bit as strong as those proposed by a number of us to assure that the scandals reported in the operation and administration of CETA are never again repeated. Senators BELLMON, BARTLETT, and DOMENICI have performed in exemplary fashion to draft a series of amendments intended to reform CETA, and I am delighted to be among their original cosponsors.

As a complement to this larger effort, I have sent to the desk the amendment I have offered is a straightforward and manageable modification in the language of S. 2570. It has the effect of expressly giving preference in CETA funding to the unskilled and needy job applicants over those who hold a college degree, a graduate school diploma, or any other certificate of higher education.

I believe the purposes of my amendment are self-evident, and it is both unfortunate and ironic that it should even have to be introduced. But of the many stories of CETA abuses which have been circulating this country—all of them accurate stories—certainly few can compete in flagrancy with stories about college graduates or other products of American education being on the CETA dole.

There have been a lot of stories about this, too many of them true. The most descriptive summary of this problem which my amendment attempts to solve was described by the distinguished economist, Mr. David Meiselman, who after conducting a thorough survey research study of the CETA program's applicant pool, concluded,

Evidence from diverse sources implies that CETA participants are best classified not as unskilled but as being from the middle of the skill range. Fewer than 46 percent of the persons hired under CETA were economically disadvantaged, using the federal government's own definition of a family earning less than the poverty threshold.

Mr. President, in a Federal program to help the hard-core unemployed develop job skills and find employment, it is wrong to see any of the funds provided given, in whole or in part, to those with higher education degrees not in dire need. Certainly American education has not waned to such a degree that college graduates need a Federal program to teach them a vocational skill; and certainly if they need it, they do not deserve it. It is the purpose of my amendment to direct the unemployment training relief to the indigent, to the unskilled and truly needy for whom this program was intended. They deserve our compassion, and they need our help, and I seek the assistance of my colleagues in righting this particular wrong.

Finally, Mr. President, I express my gratitude to my Human Resources Committee chairman and friend from New Jersey, HARRISON WILLIAMS, and to all of my colleagues on the committee for including in the final version of the re-

ported CETA bill an amendment sponsored and offered by Senator HAYAKAWA and myself. This amendment establishes a social bonus program to increase the participation of the private sector in the general effort to solve our Nation's structural unemployment problem. As this issue is addressed in the days ahead, I know that we will have the opportunity to discuss this in greater detail. Let it be said, though, that if our CETA experience to date has taught us anything, it has served to remind us of the problems inherent in any attempt to solve major social and economic problems using the arm of the Federal Government. As always, the private and independent sectors can do it better. They will do it, provided that we do not stifle their initiative, and that we give them the incentive required to conduct this major task.

On paper, as well as it is presented in theory, CETA is the best Federal aid program we have. It is decentralized. It is intended to attack the root of the welfare problem by teaching job skills rather than showering the countryside with Federal dollars, as is too often the bureaucratic custom.

But CETA, as it has been administered to date, has failed to serve its purpose, and has too often been a national disgrace. Hopefully, the problems needing solutions will get them. I believe they will if we pass the series of corrective amendments currently pending. And I hope that they will be passed, in order that I and many others can therefore vote for this legislation.

I can say this, that I expect to see changes in the administration of CETA in the future and I expect to see less ripoff from those living in the States, administering in the States, and administering in the Federal Government than has heretofore occurred. I think everybody in the Human Resources Committee feels exactly the same way.

If these things are not corrected and if they are not taken care of, we shall have to find ways other than CETA to correct these problems and provide relief for our structurally unemployed and the above 35 percent of the black youths in our society who do not have a job because now they are not only structurally unemployed but unemployable. I think it is time we did something about this major national disgrace, the biggest cancer facing our society today. I think that some aspects of this bill will help us to accomplish that and I do think my amendment will help us press on in that direction.

I believe the managers of the bill are prepared to accept my amendment. If that is so, I am prepared to yield back my time.

Mr. NELSON. Mr. President, let me say that a substantial number of criticisms that the distinguished Senator has made of the CETA program are correct. There have been sponsors in various parts of the country who have violated the spirit of the law, there are some who have violated the law. On the other hand, it is also clear that there are a large number of prime sponsors around the country who have done a very good job.

Mr. HATCH. I agree with the distinguished Senator.

Mr. NELSON. This bill, as the Senator knows, as he is a member of the committee, is a very comprehensive redesign and tightening up of the legislation in order to prevent the kind of abuses that all of us are critical of.

As the Senator knows, No. 1, we are trying to eliminate the substitution which has occurred under the law. Not all of that has been done illegally, of course, because in the historical development of this act, there have been those who, when unemployment was high, were supporting the concept of substitution.

I never did support that concept, but the law permitted it. So there was substitution that really was in compliance with the law, and then there was quite a bit that was not.

We have now targeted CETA programs to avoid that kind of question. For example, we only allow in title II, 18 months of employment, with extension under certain circumstances. Title VI, 12 months of employment. Training programs have to be developed with the concept being to get the unemployed into private employment in order to avoid the question of high-paid people being on the CETA programs.

There used to be no limit on wages, so we had people that were working in many cities at $17,000, $18,000, $19,000 a year. I have never approved of that, but it was legal because we did not limit the matching funds of the local municipality.

But in this bill, as the Senator knows, we limit the maximum that can be paid, both by the dollar amount and the number of people who can participate in the higher brackets by simply limiting to 10 percent of the Federal allocation, the amount of matching moneys the prime sponsor can contribute.

We also require that the average wage not exceed $7,800. The House, in fact, has set it at $7,000.

We emphasize, as the Senator knows, programs for the structurally unemployed and we have done a whole lot of work, in which the Senator participated very constructively, in tightening up this whole legislation, targeting it better, I think a very good job has been done by the Labor Department, the administration, by the minority and majority members and staffs, and that we have designed a very substantial improvement in the legislation which seeks to tackle very important problems in our society.

Now, the amendment of the Senator is three words. In the bill on page 219, the language would read, starting at line 3:

> Special emphasis in filling special service jobs shall be given to eligible members of groups specifically identified in section 301 (a) as facing particular labor market disadvantages, taking into account the household support obligations.

At that point, the amendment inserts three words: "and educational attainment" of persons applying for such jobs, but nothing in this act shall authorize the Secretary to establish hiring or participation goals for such persons.

Let me say, the general objective the Senator is talking about, I agree with. We are aiming and targeting, as best we can, to disadvantaged groups. Of course, an education is an advantage.

However, I want to be sure we understand the language correctly, because it reads: "taking into account the household support obligations and the educational attainment."

That is not a mandate that an education may prohibit one from receiving a job, or training under this program.

As the Senator knows, we have a provision for displaced homemakers. As the Senator will be well aware, a displaced homemaker at age 50 or 55 who has not been to college for 30 years and whose job has been for 30 years raising a family, even though that individual had a bachelor's degree in literature, or something else, does not mean one should be prohibited, now that they are displaced homemakers, with no skill that is salable, from participating in a program. Of course, we provided the displaced homemaker section here because one could have a college education and still be more advantaged than another person of a different age group, different experience, without a college education.

I am sure the Senator understands that.

Mr. HATCH. Yes.

Will the Senator yield?

Mr. NELSON. Yes.

Mr. HATCH. I agree with the Senator and I agree with the comments he has made with regard to this bill.

The Senator did have the wrong copy of my amendment. The language would apply to page 268.

Mr. NELSON. Pardon?

Mr. HATCH. It would apply to page 268, line 5.

Mr. NELSON. We were using a different one.

Mr. HATCH. An older version.

Mr. JAVITS. I think Senator HATCH will agree with me in this, the Senator did use in his presentation—and I do not want to extend this, I have nothing further to say——

Mr. HATCH. I understand.

Mr. JAVITS. But the Senator did use in his presentation the word "preference," and I think it is important we all agree, in other words, we do not want an absolute exclusion.

Mr. HATCH. No.

Mr. JAVITS. The word is "special emphasis."

Mr. HATCH. I also agree with both Senators, they are both right, that the preference is for those who lack educational credentials. But it does not foreclose those who have educational credentials, but who might otherwise be disadvantaged, such as a housewife who may have graduated from college at age 22, but now at age 55, after 33 years——

Mr. JAVITS. One with a bachelor's degree, 30 years ago, Senator HAYAKAWA understands that, might be really unemployed.

Mr. HATCH. That is right, or I presume, there are any number of other illustrative situations.

We do agree in this matter and I am hopeful the managers of the bill will accept it.

Mr. JAVITS. Mr. President, the amendment is acceptable to me.

Mr. NELSON. My marvelous contribution to the dialog was irrelevant.

Mr. JAVITS. No. It was very important.

Mr. NELSON. I stated three words, "and educational attainment," because I was addressing those three words when the Senator had in fact offered another amendment.

Mr. HATCH. I was wondering why we had that rather extensive educational dialog.

Mr. NELSON. I agree, obviously, with what was said.

Mr. HATCH. I am glad we had it. I am sure everybody else is.

Mr. NELSON. I agree with what I did say about it, and I do think it is important, but I was addressing the original amendment.

Mr. HATCH. Yes.

Mr. NELSON. Which was amended by the Senator.

I am perfectly prepared to accept the amendment.

Mr. HATCH. I thank the Senator and I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

Mr. HATCH. I move acceptance of the amendment.

The PRESIDING OFFICER (Mrs. ALLEN). The question is on agreeing to the amendment of the Senator from Utah.

So the amendment (UP No. 1792) was agreed to.

Mr. HATCH. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Senator HAYAKAWA addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida will be recognized.

Mr. CHILES. I yield to the Senator from California.

The PRESIDING OFFICER. The Senator from California.

UP AMENDMENT NO. 1793

(Purpose: To provide for utilization of funds under title VI)

Mr. HAYAKAWA. Madam President, I call up an unprinted technical amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an unprinted amendment numbered 1793.

Mr. HAYAKAWA. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 376, between lines 6 and 7, insert the following new section:

"UTILIZATION OF FUNDS

"SEC. 610. Funds available under this title to a prime sponsor may be used, with respect to individuals qualifying for assistance under this title, for programs authorized under title II (other than upgrading and retraining under part C and public service employment under part D), part A of title III, title IV, and title VII.

On page 181, in the table of contents after item sec. 609 add the following new item:

"Sec. 610 Utilization of funds.".

Mr. HAYAKAWA. Madam President, in both House and Senate versions of the CETA reauthorization bill, title II, includes a provision for the use of funds "for any programs or activities authorized by part A of title III, title IV, and title VII of this act." The House bill has an equivalent provision for title VI funds. My amendment now would add this provision to the Senate bill. The exact language has been discussed with the committee staff. The basic purpose of the amendment is of course to make unused title VI funds available for other appropriate titles of the bill.

I hope the floor managers of the bill will accept this technical amendment.

Mr. NELSON. I say to the distinguished Senator from California that I agree with the amendment. It should have been in the bill, in title VI. I am glad that the Senator from California called it to our attention and offered the amendment. I am prepared to accept it.

Mr. JAVITS. I accept the amendment.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

UP AMENDMENT NO. 1794

(Purpose: To establish a program of controlled evaluations of employment and training programs)

Mr. CHILES. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES), for himself and Mr. DOMENICI, proposes an unprinted amendment numbered 1794.

Mr. CHILES. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 284, between lines 2 and 3 insert:

"Annual Evaluation Plan and Report to Congress

"(c) The Secretary shall prepare and submit to the Congress, at the same time as the President submits his budget to Congress each year, an annual evaluation plan, setting forth major themes for the areas of research, statistics, evaluation, experimentation, and demonstrations to be undertaken in the succeeding fiscal year, the program purpose and policy alternatives to which each such area is related and the current and proposed funding and staffing levels. The Secretary shall specify in the portions of the plan relating to experimentation and demonstrations the intended outcome of proposed major innovations and the amount of time required to test the innovations or to achieve adoption of the demonstration.

"(d) The Secretary shall prepare and submit to the Congress at the same time as the President submits his budget to Congress each year, an annual evaluation report for employment and training programs. The Secretary shall include in such report—

"(1) a summary of the achievements, failures, and problems of the various programs authorized in this Act in meeting the objectives of this Act;

"(2) a summary of major findings from research, evaluation, and experiments conducted in the previous fiscal year;

"(3) recommendations for program modifications based upon analysis of such findings; and

"(4) such other recommendations for legislative or administrative action as the Secretary deems appropriate.

"(e) The Secretary shall develop an ongoing program to notify prime sponsors of experiments and demonstrations to be conducted in their States and shall disseminate to prime sponsors and governors the results of all research, demonstrations, evaluations, and experiments of employment and training programs;

"(f) Funds available under this section may be transferred to any other Federal department or agency to carry out functions delegated to that department or agency pursuant to agreements with the Secretary.

CETA REAUTHORIZATION

Mr. CHILES. Madam President, I would like to say a few words in general about the CETA reauthorization bill which the Human Resources Committee has reported. I wish especially to compliment the managers of the bill, Senator NELSON and Senator JAVITS, for their continued creative leadership in this area. They, as well as Chairman WILLIAMS of the full committee, have been particularly responsive to the views of Senators who are not members of the committee, but who share their concern for the importance of this legislation. I believe this legislation responds to changing economic conditions and to the actual operating experience of the last few years, and the committee deserves praise for being willing to redirect the program this way.

I will not repeat the detailed description of the bill already provided by the managers, but I do wish to highlight several areas which I think are very important, and where the committee has responded to the suggestions which Senator DOMENICI and I offered in the bill we introduced.

First, this bill returns the emphasis of CETA from the countercyclical goal of temporary job creation to the permanent goal of aiding those persons who are least able to obtain employment. This is a shift not just of language, but of $3 billion which is moved to comprehensive employment and training programs for disadvantaged persons. In addition, the bill contains provisions to tighten up eligibility standards and prevent local governments from substituting CETA funds for their normal hiring.

Second, the committee has recognized the essentially different needs of different age groups. They have taken the first step to mandate coordination of the various youth employment programs which have proliferated in recent years. The bill also contains an older workers section, which Senator DOMENICI and I suggested. This responds to the recognition that only 2 percent of current CETA enrollees are over age 55, yet this group has faced increasing problems in staying in the labor force. The new program will not shift older workers into public jobs, but will require CETA programs to work with

private employers to keep older workers on the payroll.

Without going into the general administrative provisions in detail, I think the committee should be complimented for maintaining local flexibility and control of the program. Many provisions offered by the administration would have reduced local flexibility or added to program fragmentation and complexity. The committee has resisted the temptation to create separate program structures for every new need, but has wisely kept them within the framework of the comprehensive service plan to be developed at the local level. I hope that as the various youth programs and other experimental projects come up for renewal, we will be able to work more of them into the comprehensive framework. The job voucher demonstration project included in the committee bill has the potential for becoming a major component in the set of tools we offer to local programs, so I will discuss it at greater length.

VOUCHER DEMONSTRATION PROJECT

Madam President, I am pleased that the CETA bill reported by the Human Resources Committee goes a long way toward improving private sector involvement. If 80 percent of the jobs in our economy are private sector, then we must train people for the skills and occupations which private industry needs. Work experience in a public job is helpful to a disadvantaged person in gaining entry to the labor market, but experience in a private job offers four times as many opportunities. Part of bills S. 2805 and S. 2806, which I introduced along with Senator DOMENICI, was a permanent program of tax vouchers for employing disadvantaged youths, as well as integrating private sector involvement in all phases of CETA.

Disadvantaged youth have a cluster of attributes which keep them out of jobs: Lack of skills, no experience, poor work attitudes and expectations, too low productivity to justify the Federal minimum wage or minimum union scale. An effective program should seek to modify all of the factors, and do so in a way that is most attractive to private employers. For this reason we designed a tax voucher system that will allow this kind of private business participation without requiring any contract or grant relationship between the employer and the local CETA program.

The CETA prime sponsor would determine eligibility and issue the youth a voucher, which would entitle a private employer to a credit against his employee withholding tax, with no grant applications or paperwork. Each prime sponsor will have a set amount of voucher authorization based on the prime sponsor's allocation. Each local prime sponsor would issue to eligible youth a voucher good for a credit of 50 cents to $1 an hour. The youth would then seek employment in the private market. The voucher would entitle the employer to a reduction of his employees withholding tax equal to that 50 cents to $1 for each hour worked. The youth would be paid minimum wage, or union scale, or whatever rate the employer considered appropriate. The voucher would be portable and valid for 24 months, so that the youth and employer would not have to worry about being locked into an unsatisfactory arrangement. The employer would not have to go through the paperwork of waiting for a grant or contract. He would get the immediate cash benefit at each payroll period. All he would have to do is add a column to his withholding statement and attach the voucher along with his W-2 forms at the end of his tax year. The youth would have the benefit of a regular private sector job, paid at the same rate as his fellow workers. If he did not perform well he could be fired; if he performed well, he could get raises and promotions.

Madam President, I am gratified that the Human Resources Committee included a required demonstration of the voucher concept in the bill it reported. Unfortunately, the accompanying report language which defined the way the demonstration is to be conducted was inadvertently omitted.

I had intended to offer an amendment to insert this clarifying language into the bill. However, I accept the assurance from the managers of the bill that they will include this description in the statement of the conference managers. In order to clarify the legislative history, I ask unanimous consent that the text of the clarifying amendment be printed in the RECORD at this point.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 287, strike lines 1 through 12 and insert:

"(b) The Secretary shall consider the following principles when developing regulations for this project:

(1) Vouchers shall be worth up to $1.00 per hour of paid work by the participant to offset the lower productivity of eligible individuals. Factors to be considered in determing the value of the vouchers shall include, but not be limited to, participant employability, local wage rates and labor market conditions. Voucher-eligible employees shall be paid at a rate not less than the higher of the minimum wage or the rate paid by that employer to other individuals performing the same or similar work.

(2) Vouchers shall be portable between employers, not committing the employer or employee to continue the work arrangement other than by mutual agreement, and shall be valid for up to two years, as determined by the Secretary.

(3) Procedures shall be established to avoid displacing currently employed individuals by voucher-eligible employees.

(4) Participating prime sponsors shall integrate vouchers into their comprehensive services, and utilize a significant proportion of available vouchers for individuals completing training programs, so as to direct voucher recipients toward jobs with meaningful advancement opportunities.

"(c) The Secretary is instructed to prepare and submit to the Congress not later than October 1, 1980, a report evaluating the effectiveness of this demonstration project. The Secretary's report shall include an evaluation of the project's effectiveness in increasing the employability and earnings of eligible groups, the willingness of private sector employers to participate, the desirability and skill level of jobs obtained by participants, the administrative feasibility of the program and any other factors deemed important by the Secretary."

EVALUATION AMENDMENT

Mr. CHILES. Madam President, as to the amendment I have sent to the desk, one of the frustrations I have had in considering CETA as a member of the Budget and Appropriations Committees is that we do not have good evaluations of the effectiveness of all the major components of the program. We get reports on bits and pieces as problems reach a crisis stage, but we have no assurance that all parts of the program are being evaluated. We are forced to allocate funds on the basis of the fine goals of the program, without clear evidence of whether the goals are being achieved. Over the last few years Congress has compounded the problem by adding different economic goals to the original program. The bill before us today goes a long way toward clarifying the objectives of the program in reducing barriers to employment.

My amendment will require the Secretary of Labor to develop an annual evaluation plan and report to Congress. This will tell us how he intends to use his broad discretionary authority to conduct experiments and demonstrations. He will have to tell us what he is going to spend and what we can expect to get out of these evaluations. More important, the Secretary will be required to report to Congress a summary of his findings on the achievements, failures, and problems in the various programs. This will allow us to put the money where it does the most good, and take any corrective actions necessary from the legislative side.

Madam President, I would not like to see this plan and report turn into a massive document loaded down with detailed descriptions of every little research project. Rather, I would hope that the Department would focus on pulling their projects together into major themes, and showing how those themes relate to the program objectives of CETA. I believe we will find in the initial attempt that there is no ongoing evaluation of how some of the basic purposes of the act are being fulfilled.

A second area addressed by this amendment is creation of an ongoing program to disseminate the results of research and evaluation. Governors and local prime sponsors should be notified about the various experimental and demonstration projects conducted in their States. They should also receive summaries of evaluation efforts conducted nationally or in other States, so that they can improve their own programs without waiting for Federal regulations.

The final provision of this amendment allows funds to be transferred among Federal departments in order to carry out experimental or demonstration projects. This is critical for areas like welfare reform, where we are trying to test out the relations among work, welfare, and food stamp programs. We have had the problem where experiments intended by Congress have been held up by administrative barriers on how to pay benefits for various programs. In any such case, the arrangement would be made pursuant to agreement of the Sec-

retary of Labor in order to protect the program purposes of CETA.

Madam President, program evaluation does not generate the kind of popular support that we get for funding services, but it is absolutely essential if we are to find out how those services can be provided most effectively.

I understand that the managers of the bill have looked at this particular amendment, and I hope that they will accept the amendment.

Mr. NELSON. Madam President, the amendment proposed by the Senator from Florida is a very good one. If there is anything that concerns us all, it is the lack of adequate information concerning the performance of programs that we legislate, but do not manage. We can design the legislation, but the management of programs is the business of the executive branch and not Congress.

We have the authority to authorize a program. We have authority to appropriate money for a program. We have authority to put in the statute the objectives of the program, and we have the oversight responsibility through the hearing process.

Nonetheless, the managers of all Federal programs are in the executive branch and not in the legislative branch.

Any program that is carefully designed to provide information, information index, if you will, of performance that is done in a manner so that Congress has better information to evaluate how well these programs perform so that we can further support them, reduce them, eliminate them, improve them, is a good concept and a good idea.

I agree with the amendment of the Senator from Florida in his mandating an annual evaluation program and it is designed in such a way that it does not go into great detail about how the Secretary must do it because I think the Senator is correct. We need to give him flexibility to produce the best information in the most efficient way so that we can judge the programs.

I am prepared to accept this very good and constructive amendment.

Mr. JAVITS. Madam President, I adopt everything that Senator NELSON has said.

I am prepared to accept the amendment.

Madam President, I yield back the remainder of my time.

Mr. JAVITS. I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida.

The amendment was agreed to.

UP AMENDMENT NO. 1795

(Purpose: To provide special emphasis for services for displaced workers)

Mr. CHILES. Madam President, I send to the desk a second amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) proposes an unprinted amendment numbered 1795.

On page 260, between lines 19 and 20, insert the following:

"SERVICES FOR DISPLACED WORKERS

"SEC. 216 (a) Services under this section shall have the purpose of overcoming the particular barriers to employment created by technological change or by the decline in local economies.

"(b) The Secretary shall insure that each prime sponsor's plans for serving eligible displaced workers under this part include:

"(1) Steps to assure that activities for displaced workers described in this section are, to the extent practicable, consistent with the overall economic development plan for the area required by section 202(b)(10) of the Public Works and Economic Development Act of 1965.

"(2) Steps to assure that private employers shall be involved in the planning and implementation of such programs for displaced workers.

"(3) Steps to assure that representatives of displaced workers shall be involved in the planning and implementation of such programs for displaced workers.

"(4) Such services may include, but not be limited to the Job Search Relocation Assistance authorized under Section 304.

(c) Each prime sponsor may use assistance available under this title for experimental projects designed to increase employment opportunities for displaced workers, with the approval of the Secretary.

(d) On page 178 in the table of contents after item "Sec. 215." insert the following: "Sec. 216. Services for displaced workers."

(e) On page 287, following line 12, insert: "Sec. 318:

"(a) The Secretary is authorized to carry out a special experimental program to link the employment and training activities of prime sponsors to a workable strategy for stimulating local private economic development and replacement of declining industries. Any determination concerning the nature of skills to be provided in training and retraining programs shall be made after consultation with agencies charged with fostering the growth or introduction of industries in a given labor market. This experiment may include use of vouchers as authorized in Section 317.

"(b) The Secretary shall take whatever action is necessary to assure that any experimental program conducted under this section is coordinated with Federal, State, Regional, and Local agencies responsible for administering and receiving funds from the Economic Development Administration pursuant to Sections 201 and 202 of the Public Works and Economic Development Act of 1965 and from the Small Business Investment Act of 1958. Activities under any such program shall be consistent with the overall economic development plan for the area required by section 242(b)(10) of the Public Works and Economic Development Act of 1965.

Mr. CHILES. Madam President, the purpose of this amendment is to restore one of the original purposes of title II of CETA, which is to provide services to workers who are displaced by technological change, by the decline of the industry in which they work or the economic decline of the area in which they live. This is a different kind of structural unemployment than that faced by persons entering the labor market for the first time. It is useless to retrain a worker unless you are also locating or expanding an industry which needs his or her new skills. This amendment therefore requires that local prime sponsors provide services appropriate to such displaced workers, and that they coordinate their efforts with the local economic development plans required under the Public Works and Economic Development Act. We also intend to offer a complementary amendment to that act, requiring economic development programs to coordinate their activities with CETA. We have two sets of Federal programs with related objectives, but we need a mechanism to get them working together.

The second section of our amendment authorizes the Secretary of Labor to carry out a special experimental program to link the employment and training activities of prime sponsors to to a workable strategy for stimulating local economic development and replacement of declining industries.

Madam President, I believe this is a problem we are all sensitive to, and we try to deal with it piecemeal by steering investment in many Federal programs to declining areas. However, we do not have an overall strategy to tie these efforts together.

We do know that availability of skilled workers is a major factor for industrial location decisions, including expansion decisions. The cost of labor is also a major factor. We ought to take advantage of the experimental authority to find out what kind of local economic development strategies will provide jobs for the people assisted by CETA, and how CETA can contribute to the success of those strategies.

Madam President, this amendment does not attempt to shift the emphasis of CETA from assisting disadvantaged individuals to assisting employers. Rather, it is a recognition of the fact that CETA acts within a set of local economic conditions, and carries that recognition to the fact that CETA can affect those conditions. The whole local structure of CETA is built on the necessity of relating employment and training programs to their local economic context. I hope the Senate will move to start the process of gathering the knowledge necessary to improve that relationship.

Madam President, the managers have looked over this amendment and I hope that they will accept it.

Mr. JAVITS. Madam President, again we understand the thrust of the amendment and we will certainly do everything we can, in the Appropriations Committee, et cetera, to enforce it, but we understand that while we do all that, I think any prime sponsor who acts under the bill is not going to expect that we are going to sue them tomorrow because we complain about how he handled this and get our money back.

In short, we understand that we mean it. We are going to enforce it. We will do our utmost to carry it out. But it does not represent a statutory requirement and condition precedent because we just could not administer it on that basis.

Mr. CHILES. I thank the distinguished Senator.

Mr. JAVITS. On that basis, Madam President, I am for the amendment.

We yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida.

The amendment was agreed to.

Mr. SCHWEIKER. Madam President, I would like to call to the attention of

my colleagues one very important provision of the committee bill. It outlines the role of community-based organizations in delivering employment and training services under CETA.

I am referring to section 123(m) of the proposed act, which provides that the Secretary and prime sponsors shall give special consideration in carrying out programs authorized by CETA to community-based organizations which have demonstrated effectiveness in the delivery of employment and training services.

I offer this provision during full committee markups of S. 2570, and I am pleased it was unanimously adopted. Our purpose is to insure maximum utilization of the effective programs offered by community-based organizations. This provision is virtually identical to one enacted last year in the Youth Employment and Demonstration Projects Act, and similar to requirements contained in the Senate-passed version of the original CETA legislation in 1973.

The record compiled by community-based organizations under CETA is impressive, as was illustrated in a recent survey of prime sponsors conducted by the Employment and Training Council of the United States Conference of Mayors. The survey included evaluations of the major national community-based organizations, opportunities industrialization centers, SER-Jobs for Progress, National Urban League, United Way/United Fund, and a wide range of local community-based organizations.

Prime sponsors rated the effectiveness of almost all community-based organizations in the top third of all organizations the prime sponsors deal with. Particularly noteworthy is the data compiled by the Conference of Mayors survey concerning the placement of trainees in permanent, unsubsidized employment during fiscal year 1977. Placement rates of trainees by community-based organizations varied from 46.6 percent to 76.6 percent. This compares very favorably to an overall CETA title I placement rate during the same period of 39 percent.

Therefore, community-based organizations have earned the special consideration our bill provides for.

Madam President, section 123(m) uses two terms I would like to elaborate on for the benefit of my colleagues. First is the term "special consideration." This term was very precisely and expertly explained by the distinguished ranking minority member of the Human Resource Committee last year during debate on the Youth Employment and Demonstration Projects Act as follows, and I quote.

> Special consideration means a strong impact . . . it means a very open door . . . it means that community-based organizations shall be used, and they shall be the ones whose services are employed unless there is a demonstrably better way.

The second critical term is "demonstrated effectiveness." By this term we contemplate a high standard of effectiveness—one which earns for the community-based organization the right to require special consideration of what it has to offer. Although the prime sponsor is not to impose upon community-based organizations higher performance standards than those which would be used in judging programs the prime sponsor directly administers, we are most anxious to see effective utilization of all CETA funds.

Appropriate considerations for determining "demonstrated effectiveness" should include an analysis of results of prior employment and training programs—or related services to the poverty community—taking proper perspective of the scope of the program, the clientele served, the similarity between past programs and the services the community-based organization is offering to perform, and other like considerations.

Careful attention could also be given, when appropriate, to the program to be offered, to the ability of the community-based organization to provide an effective outreach and recruitment mechanism to reach the hard-to-employ and economically disadvantaged, to maintain effective pretraining, in-training, and posttraining counseling, and to increase the chances for job retention.

Another possible consideration in appropriate circumstances is the value to prime sponsors, private sector employers, and the accountability of the entire CETA system, of employment and training programs which combine the functions of recruitment, counseling, training, supportive services, job placement, and followup.

Therefore, Madam President, it is not our intention to overburden the Secretary or prime sponsors with this special consideration requirement. However, it is the specific directive of section 123(m) that programs offered by effective community-based organizations are to be funded and utilized unless there is a demonstrably better way.

Madam President, I would like to ask if the managers of this bill share my understanding of the committee's intent in including section 123(m) in this bill.

Mr. JAVITS. Madam President, if the Senator will yield, I think the Senator has presented upon the basis of precedents a very fair and balanced appraisal of what we had in mind in the use of the term "special consideration."

I will say to the Senator that, having invented it, I had better learn how to live with it.

Mr. SCHWEIKER. The Senator certainly did a very fine job with that concept.

Mr. JAVITS. I thank the Senator. I am also very pleased that the Senator, in referring to what we had in mind, made it clear that it included a range of organizations, and he specifically named them in the bill because of our respect for them, the Opportunities Industrialization Centers, the SER-Jobs for Progress, the National Urban League and Main Stream, as well as a wide range of community action agencies.

I have long been a supporter of giving greater consideration to these organizations, and they also include in my own city the VFI, and I would like to call attention to the fact that Senator TOWER has been very devoted to the SER, which is essentially a Hispanic organization. The others are very well known as playing a very important part even in the history of CETA to date.

So, Madam President, I find myself, as I say, in agreement with the basic outline given to us of his understanding of the situation by Senator SCHWEIKER who has been, I might say, and quite justly, an indefatigable proponent of the usefulness of the Opportunities Industrialization Centers.

He was not here earlier when I commented upon their usefulness. I do so again. I think the record of their growth is a most extraordinary tribute to the worth of the organization, and also to Senator SCHWEIKER's advocacy of them as the Reverend Leon Sullivan comes from his State, and he has every reason to be very proud of what has been accomplished.

Mr. SCHWEIKER. I thank the distinguished Senator for his encouragement and support.

I would also like to ask the chairman, who has also been very helpful and responsive, the same question, whether this statement I made sets forth his understanding of what the intent of this section on special consideration is.

Mr. NELSON. Yes, I do agree with it.

Mr. SCHWEIKER. I sincerely thank the chairman.

AMENDMENT NO. 3526

Mr. SCHWEIKER. I call up my amendment 3526 and ask for its immediate consideration

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

> The Senator from Pennsylvania (Mr. SCHWEIKER) proposes an amendment numbered 3526.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

> On page 200, line 10, redesignate paragraph (2) as paragraph (3); and after line 9 insert the following new paragraph:
>
> "(2) If the Secretary concludes that a public service employment program is being conducted in violation of section 121(h)(1), (h)(2), (h)(3), (j), section 122(d), (f), or section 123(h), or regulations promulgated pursuant to such sections, the Secretary shall, pursuant to paragraph (1) of this subsection, terminate or suspend financial assistance in whole or in part, order the repayment of misspent funds from sources other than funds under this Act or other funds used in connection with programs funded under this Act (unless, in view of special circumstances, the Secretary determines that requiring payment would not serve the purposes of this section), and order such other sanctions or corrective actions as are appropriate.".

Mr. SCHWEIKER. Madam President, the purpose of this amendment is to provide stronger protection against abuses of the public service employment program. Specifically, it deals with the problem of substitution of regular local government employees with CETA

workers and other flagrant abuses, such as kickbacks, political patronage, nepotism, and the like. My amendment would establish the firm rule that when such abuses occur, the Secretary shall take strong action to correct the abuse and to require reimbursement of the misspent funds.

The Secretary is given this discretionary authority in the committee bill with respect to violations of any provision of the act or of applicable regulations. My amendment would make effective, appropriate enforcement action mandatory in connection with these most critical areas of abuse.

Estimates of the extent of substitution in the public service employment program vary considerably. It is clear that many cities have become heavily dependent upon CETA workers in the composition of their work force. Whenever substitution occurs, the entire purpose of the program—to create new jobs for the unemployed—is completely defeated.

Similarly, other abuses of the program not only waste millions of Federal dollars, but jeopardize public support for the entire CETA program.

It is essential that we send a clear message to prime sponsors, to the Labor Department, and to the American people that these abuses will not be tolerated. We must also make clear that prime sponsors must effectively police their own programs, and that when they fail to do so, the Federal Government will take effective action against them.

Under my amendment, when these abuses are found, after notice and an opportunity for a fair hearing, the Secretary shall suspend funding for the program in question until the problem is corrected. If it is not corrected, then he shall terminate funding. The Secretary shall also, absent very unusual circumstances, require reimbursement of the misspent funds from funds other than those provided by CETA. Nor may reimbursement come from local funds used directly in support of CETA programs such as funds legally used to supplement public service employment wages. The intent is to insure that remedies for abuses by prime sponsors do not adversely affect the very people CETA is designed to serve.

My amendment preserves some discretion for the Secretary not to require reimbursement from the prime sponsor under very limited and special circumstances.

For example, if CETA funds are misspent by a subcontractor of a prime sponsor in spite of the exercise by the prime sponsor of extreme care and prudence in selecting the subgrantee and monitoring compliance, the Secretary might reasonably conclude that repayment by the prime sponsor would not further the need to protect the integrity of the CETA program. In such special circumstances, reimbursement could be waived. However, I must stress that the intent of this amendment is to make reimbursement of misspent funds for these particularly critical abuses the prevailing rule, and the waiver of repayment a very narrow exception.

I would also like to point out that this amendment is very similar to one adopted by the House by a vote of 407 to 1 in their version of the CETA reauthorization bill. In addition, I want to make clear, in response to some concern expressed on the House floor, that this amendment would have no retroactive application.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. SCHWEIKER. I yield.

Mr. JAVITS. That was the only thing I was going to ask the Senator. The amendment deals with strict application of the law, but I think retroactivity would be very unfortunate. The Senator makes that clear, that there will be no retroactivity.

Mr. SCHWEIKER. I thank the Senator for that suggestion. We have incorporated that. I agree with him. As a matter of basic fairness, I feel enforcement standards and policy should be clear in advance. Therefore, only conduct occuring after enactment of this bill would be specifically covered by this amendment.

Mr. President, I wish to compliment the managers of this bill for their forceful and imaginative efforts to correct the abuses which have too frequently characterized the CETA program. My amendment, I believe, is entirely consistent with these efforts. I hope the chairman and the ranking members will support it.

Mr. JAVITS. Madam President, the amendment, with the observations we have just handled in the colloquy, is entirely agreeable to me.

Mr. NELSON. Yes, I agree with the amendment. The House tackled the question, and I believe the Senator from Pennsylvania has made a substantial improvement in the approach he took.

I am prepared to yield back the remainder of my time.

Mr. JAVITS. We yield back the remainder of our time.

Mr. SCHWEIKER. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania (Mr. SCHWEIKER).

The amendment was agreed to.

UP AMENDMENT NO. 1796

Mr. METZENBAUM. Madam President, I send to the desk an unprinted amendment in behalf of myself and Senators LONG, CHILES, RIEGLE, and CANNON, and ask for its immediate consideration.

The PRESIDENT OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM), for himself, Mr. LONG, Mr. CANNON, Mr. CHILES, and Mr. RIEGLE, proposes an unprinted amendment numbered 1796.

Mr. METZENBAUM. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 214, strike out lines 20 through 25 and on page 215 strike out lines 1 and 2, and insert in lieu thereof the following:

"(o) Funds available for employment benefits under this Act may be used, for the duration of participation, for contributions on behalf of participants who are, prior to July 1, 1979, enrolled in retirement systems or plans. With respect to participants enrolled in retirement systems or plans on or after such date, except as otherwise provided in regulations promulgated by the Secretary, no funds under this Act may be used for contributions to retirement systems or plans unless such contributions bear a reasonable relationship to the cost of providing benefits to participants. Such regulations shall take into consideration circumstances where efforts are being made to change State or local laws or both affecting retirement coverage for individuals who are participants in activities funded pursuant to this Act. Pursuant to section 314 of this Act, the Secretary shall provide technical assistance to recipients to enable retirement systems or plans to comply with section 122(1) and this paragraph."

On page 223, line 4, strike the period and insert in lieu thereof a comma and add the following:

". . . but within any single classification a distinction may be made between public service employees and other employees for purposes of determining eligibility for participation in retirement systems or plans which provide benefits based on age or service or both. Nothing in this paragraph or in section 121(o) shall be deemed to require a contribution to a retirement system or plan for the purpose of providing retirement benefits based on age or service, or both, to a public service employee unless funds under this Act are available, pursuant to section 121(o) to make such contribution."

Mr. METZENBAUM. Madam President, this amendment addresses the problem of how State and local laws governing retirement benefits can adversely affect the CETA program.

In many States CETA employers are required to contribute a portion of their operating funds—moneys which could be used to create public service employment—to a retirement system. This is so in spite of the fact that CETA employment is temporary in nature and despite of the fact that the employee could never qualify for a retirement check. The net effect of such contributions is a reduction in the number of PSE participants and a waste of local government tax revenues.

Our amendment resolves this complex problem which involves over 6,000 public pension plans, 50 State retirement statutes, and the regulations of the Department of Labor. Specifically, the amendment:

Places severe restrictions on the use of Federal funds to pay retirement benefits for participants in short-term public service jobs;

Insures that no State or local tax revenues will be used to pay retirement benefits; and

Insures that Federal funds will be used to create the maximum number of public service jobs instead of increasing the coffers of retirement systems from which few PSE jobholders will ever benefit.

This amendment insures that CETA funds will not be used to finance retirement systems, but it does permit payments in those few instances where CETA workers would lose tangible benefits if not enrolled. For example, in re-

tirement systems which couple other benefits with retirement CETA participants could lose health or disability coverage if they were excluded from participating in retirement plans. The cost of separately purchasing other benefits may exceed savings gained from excluding retirement.

Exclusion from retirement plans can occur immediately in some States, if the temporary nature of CETA public service jobs is acknowledged. Implicit in our amendment is that CETA participants are recognized as temporary employees. Thus, within any single employment classification a distinction may be made between public service employees and other employees for determining eligibility for participation in retirement systems or plans.

In other cases we need more time. Since CETA participants are not Federal employees but are employees of States, counties, cities, school boards, and community-based organizations, they are subject to the laws and collective bargaining agreements governing other regular employees. To exclude retirement as a benefit requires changes in numerous State and local laws. Since it requires time to implement those changes, we have chosen July 1, 1979 as the date by which we expect those changes to be made.

Our amendment makes funds available for employment benefits for the duration of their participation for those enrolled prior to July 1, 1979. Once a CETA participant has been hired with the understanding that his employer will make payments into a retirement fund on his behalf, no local, State or Federal law can change that situation without effectively changing a condition of employment and violating personnel practices. Hence, the only solution for current CETA participants is to continue to provide for their retirement coverage out of CETA funds. Given the time limits on participation in the CETA program, this cost is of a short-term nature which will rapidly phase out. Further, the equal benefits provisions of current CETA law, as interpreted by Federal regulation, created this obligation.

Finally, our amendment provides a safeguard for the local property taxpayer by insuring that nothing in CETA can mandate the use of local property tax revenues for CETA retirement coverage.

The Department of Labor estimates that between $150 and $175 million will be saved each year by this amendment. Frankly, I am not very comfortable with those numbers. But I do know that there will be a savings—both to the Federal Government and to the State and local governments which act as the prime sponsors.

I urge adoption of the amendment.

Mr. NELSON. Madam President, this amendment creatively and successfully undertakes to resolve the problem of pension contributions for CETA employees, and I think it is a very good proposal and I am prepared to accept the amendment.

Mr. JAVITS. Madam President, the amendment, it seems to me, fits in exactly with the basic purpose of the bill which, in section 121(o) on page 214, calls for such contributions, to wit, contributions to retirement systems, to "bear a reasonable relationship to the cost of providing benefits to participants."

I believe this amendment properly implements that purpose, and it is acceptable.

Mr. METZENBAUM. Madam President, I commend both the Senator from Wisconsin and the Senator from New York for their superb leadership in sponsorship of this legislation, which I believe to be very much needed legislation, based on yeoman work in bringing it to the floor.

I am very grateful to them for indicating that the amendment is acceptable to them. Therefore, Madam President, I yield back the remainder of my time and move the adoption of the amendment.

Mr. JAVITS. I yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment (UP No. 1796) of the Senator from Ohio.

The amendment was agreed to.

AMENDMENT NO. 3528

(Purpose: Authorizes prime sponsor planning council to review efforts to reduce artificial barriers to employment, thereby emphasizing the importance of these efforts)

AMENDMENT NO. 3529

(Purpose: To add to the bill a definition of "artificial barriers to employment")

AMENDMENT NO. 3530

(Purpose: To emphasize efforts to eliminate artificial barriers to employment by including such programs in the list of topics on which the Secretary may conduct research)

AMENDMENT NO. 3531

(Purpose: To insure coordination between the prime sponsor and the resources of the juvenile court system under the Youth Employment and Training Program)

Mr. PERCY. Madam President, I call up my amendments 3528, 3529, 3530, and 3531 to the CETA bill, and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. If these are the amendments of which we have had notice, while I generally call on them to be read, we are familiar with them and I will not insist on that.

The PRESIDING OFFICER. The amendments will be stated.

Mr. PERCY. I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT NO. 3528

On page 204, insert immediately before the period at the end of line 23 the following: ", including efforts to reduce and eliminate artificial barriers to employment".

AMENDMENT NO. 3529

On page 230 at line 15, insert the following new paragraph and redesignate the succeeding paragraphs and references thereto accordingly:

"(1) the term 'artificial barriers to employment' refers to limitations in the terms and conditions of employment which are not directly related to the individual's qualifications to perform the duties required by the employment position."

AMENDMENT NO. 3530

On page 278 at line 17, after the word "processes" insert the following: ", including programs designed to eliminate artificial barriers to employment".

AMENDMENT NO. 3531

On page 313, at line 18, after the words, "public employment service," and before "other youth programs" insert the following: "the courts of jurisdiction for status and youthful offenders,".

On page 314, at line 14, after "public employment service system" add the following: ", and the courts of jurisdiction for status and youthful offenders".

The PRESIDING OFFICER. Will the Senator use his microphone?

Mr. PERCY. I am sorry, Madam President, I have my microphone on.

Madam President, I am proposing today for consideration four amendments to the Comprehensive Employment and Training Act. Three would clarify and emphasize the general proviso already in the bill that programs under CETA "shall contribute to the maximum extent feasible to the elimination of artificial barriers to employment and occupational advancement." The fourth would require that applicants for funds under the CETA youth programs coordinate their activities with the juvenile justice system, as well as the other youth-related agencies already enumerated in the bill.

The bill reported by the Human Resources Committee authorizes the continuation of special Federal programs for disadvantaged workers who are in need of supplementary services beyond the scope of title II programs. The Secretary of Labor is directed to establish programs for certain groups, including offenders, who have unique employment problems.

The problems of all the people targeted by the bill—the handicapped, older workers, displaced homemakers, and others—urgently need solutions that we can provide. I can speak, however, with special knowledge of the problems of offenders because I have the honor of serving as an honorary chairman of the PACE Institute in Chicago. The PACE Institute is an organization of volunteers, businesspeople, Federal and local people who, for 10 years, have worked with the inmates of Cook County, Ill., jails giving them educational and vocational training opportunities they would not otherwise have had. Madam President, I ask unanimous consent that a description of the work of the PACE Institute be printed in the RECORD at the conclusion of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. PERCY. Under the effective leadership of the Reverend John R. Erwin, the PACE Institute has had an outstanding record of success in helping offenders become responsible members of the community, an effort which we can all recognize as a major deterrent to crime. It is because of Reverend Erwin that I have developed such an appreciation of the offender training programs

sponsored through CETA and others and an understanding of the need for the amendments I offer today. Although my amendments emphasize efforts to eliminate artificial barriers to employment for all disadvantaged groups it must be recognized that rehabilitated ex-offenders bear a uniquely heavy burden in this regard. Therefore, it is my hope that the three amendments concerning artificial barriers will be particularly helpful in assisting this group.

My fourth amendment would require that applicants for funds under the CETA youth programs coordinate their activities with the juvenile justice system as well as other youth-related agencies. I feel it makes good sense to mobilize and coordinate the efforts of all community agencies working with young people in order to maximize the effectiveness of their programs.

Madam President, I urge the Senate to adopt these simple amendments which I believe will go a long way toward improving the performance of prime sponsors and the Labor Department in addressing the special employment problems of disadvantaged groups in our country.

EXHIBIT 1

PACE PHILOSOPHY

PACE Institute, Inc., started out in 1967 with a handful of students, volunteers, and donated teaching machines to improve the lives of the inmates of the Cook County Department of Corrections. In response to a criminal justice system in which offenders are punished by incarceration that affords little chance for productive activity, PACE Institute believes that the incarcerated must be given the opportunity to grow and learn through meaningful educational activity if they so desire. Time spent doing nothing in jail leads, in the majority of cases, to repeated criminal behavior upon release. In 1978, PACE has expanded to an educational institution serving over 500 inmates a year. Housed inside the walls of the Cook County Jail, PACE (Programmed Activities for Correctional Education) provides basic academic education, vocational training, counseling, and job referral services.

It is PACE's philosophy that through its program offenders can learn to live positive lives outside the cycle of crime and that education can also reduce their rate of recidivism (return to jail). PACE has proven this with its 23% rate of recidivism (return to jail within one year after release) compared with the 80% rate of the Cook County Department of Corrections as a whole. The Institute currently is placing approximately 74% of its students in jobs, educational institutions, or vocational training schools after their release from jail.

PROGRAM PLANS

During 1978, PACE has plans for several new program initiatives. At the request of the Board of Directors of the Cook County Department of Corrections, PACE is designing an educational program to serve a greater number of the jail population on a self-selecting basis. Plans will be developed for expanded programs in (1) high school level education, (2) college level education, (3) vocational education, (4) counseling, (5) job referral, and (6) financial aid for furthering education after release.

PACE also has plans to create a formal, written curriculum in basic academic education, as well as begin new courses in vocational education—such as auto body and fender repair—so that our students acquire marketable skills.

The Institute will also be doing its own research into the most effective teaching methods in education for the incarcerated. PACE will be conducting an experimental program using slow scan TV (two-way visual/audio transmission) to instruct math and English courses—comparing this method with direct teacher-student instruction to judge the more effective technique. If the slow scan TV approach proves more beneficial there is the possibility of serving more inmates and offering more learning opportunities through this technology.

PACE also plans to work with personnel directors of major Chicago-area businesses in training inmates in how to write job applications and conduct themselves on job interviews. PACE has found through its experience that inmates lack the interpersonal communication skills necessary to "sell" themselves in the labor market. PACE also is aware that there are many personnel directors who are eager to learn how to evaluate more effectively the skills of inmates. The basic objective of this program is to improve the skills of both groups. PACE intends to get commitments from the participating businesses to hire PACE students.

Mr. PERCY. As I say, in the formation of these amendments, I have worked closely with the Reverend Erwin, for whom I have the highest respect.

Madam President, amendment No. 3528 refers to section 109 of the committee bill which requires that the prime sponsor's planning council provide a "continuing analysis of the need for employment training and related services in such area." In keeping with the overall commitment of this legislation to eliminating artificial barriers to employment, my amendment 3528 specifies that the need in the prime sponsor's community for efforts to reduce and eliminate these artificial barriers be a part of the overall analysis submitted by the council.

Amendment 3529 pertains to Part B: General Provisions of S. 2570. The bill provides that "Programs shall contribute to the maximum extent feasible to the elimination of artificial barriers to employment and occupational advancement." Nowhere in the bill, however, is there a definition of "artificial barriers." I think it would be helpful to both the administrators and the beneficiaries of these programs to have a definition to work under. The language of my amendment 3529 has been worked out carefully with the committee and I believe it is acceptable to the managers of the bill.

Amendment 3530 refers to section 311 of the bill which requires the Secretary to engage in research programs related to the purposes of the bill. In keeping, again, with the overall commitment of the bill to reduce and eliminate artificial barriers to employment, my amendment 3530 adds "programs designed to eliminate artificial barriers to employment" to the list of topics on which the Secretary of Labor may conduct studies.

Amendment 3531 concerns title VI of the bill, the reauthorization of the youth employment and training programs we passed last year. Section 436 of the bill requires that applicants for financial assistance under the youth programs show that they have coordinated with other agencies in the community that work with young people and certain types of agencies are listed. My amendment No. 3531 would include the juvenile justice system to this list. I think it makes sense to mobilize and coordinate the efforts of all community agencies working with young people in order to get the best results from these programs. The fact that the juvenile justice system is not mentioned in the bill is, I think, a small oversight I would like to correct. I move the adoption of the amendments en bloc.

Mr. JAVITS. Madam President, this amendment is uniquely appealing to me because I am the author of that section of the bill which is found under title III, section 301(b)(2), which relates expressly to offenders and an offender program. I thoroughly concur with and have worked very hard in the committee to bring about offender programs. I believe recidivism, to wit, the repetition of offenses, is one of the major problems in the administration of criminal justice, and the fact that a person has job training and the opportunities for a job is a great way to avoid recidivism.

We have an organization in New York called the Vocational Foundation, Inc., VFI, which specializes in this field and has done extraordinarily gifted work.

I am thoroughly in agreement with the Senator. I think what he has done is to take other aspects of the CETA activities and implement the offender program into those. I believe the amendment is very constructive and completely complimentary to the bill. I hope very much the Senate will accept it.

Mr. PERCY. I thank my distinguished colleague.

Mr. NELSON. Madam President, we are familiar with that very successful offender program in Illinois. We think this is a very constructive amendment to the bill. As manager, I am prepared to accept the amendment and yield back the remainder of my time.

Mr. PERCY. I yield back the remainder of my time.

Mr. JAVITS. I yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendments of the Senator from Illinois.

The amendments were agreed to en bloc.

Mr. PERCY. Madam President, I move to reconsider the vote by which the amendments were agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PERCY. Madam President, I wish to thank my distinguished colleagues very much for the work they have done in putting this bill together and particularly the attention they have given to the area of particular concern and interest to the Senator from Illinois. It is very much appreciated.

The Senator from Illinois would like to express appreciation also to the members of the staff of the floor managers of the bill who have worked so closely with Barbara Block, of my staff, to arrive at an agreement on these amendments.

I commend the entire committee in general for the work they have done on the bill. It is a good bill and one that I hope will bring a great many improve-

ments in the administration of the CETA program.

UP AMENDMENT NO. 1797

(Purpose: To reduce the reporting requirements of prime sponsors)

Mr. MARK O. HATFIELD. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. MARK O. HATFIELD) proposes an unprinted amendment numbered 1797.

Mr. MARK O. HATFIELD. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 243, lines 8 to 26 and page 244 lines 1 to 11, insert in lieu thereof the following:

"(d) In order to assist the Secretary in preparing the report required by this section, the Secretary shall require as a condition of financial assistance that annual reports and evaluations be submitted in accordance with regulations. The data derived from such reports shall be compiled on a State, regional, and national basis, and shall be included in the annual report to the Congress. Such reports shall include but not be limited to the following information:

"(1) a detailed comparison of program performance with approved plan;

"(2) participant characteristics (cross-tabulated) including age, race, sex, national origin, handicap, education level, previous wage, termination wage and public assistance status;

"(3) average cost per participant, including breakdowns by wages or salaries, allowances, training, supportive services, fringe benefits, administrative costs, and by program activity;

"(4) the types of outcomes that participants experience after the program including, but not limited to, placement in the public sector, placement in the private sector, entered school, entered the military, transferred to another program under this Act, and received public assistance (cross-tabulated by program activity);

"(5) a post-enrollment followup of a statistical sample of participants of each prime sponsor which is adequate to ascertain the duration of employment and wages paid to program participants for six months following their termination from federally assisted programs."

Mr. MARK O. HATFIELD. I would like to say I have discussed this amendment with the managers of the bill, both the majority and minority managers.

Madam President, this amendment would alter the reporting requirements, as required under section 128(d), to make them more manageable and cost-effective. Under the present legislation, prime sponsors are required to compile data, which many do not have the technical capabilities to process efficiently at this time. In addition, the Department of Labor at this time does not have the capabilities to provide the necessary technical expertise to adequately assist prime sponsors in establishing the necessary data systems. As a consequence, the present requirement will cost more to implement than will be effective for the purposes of the act and will produce a surplus of information which is unnecessary.

I applaud the committee's effort to reduce paperwork for prime sponsors and the Secretary of Labor. The committee has acknowledged that the more time and money spent on this kind of paperwork will result in less funds being available for program management and monitoring. The committee has expressed the need to be able to assess the "true virtues and failures occasioned by this complex multibillion dollar program" and this objective is accomplished in this legislation. However, the problems seemingly addressed by these reporting requirements will be moot as amendments aimed at tightening eligibility requirements and increasing auditing and monitoring are adopted.

The changes I am proposing in section 128(d) will be consistent with the committee goals, while making data collection more accessible and understandable. The reduction in the volume of information required of prime sponsors will contribute to knowledge rather than bury it in a morass of trivial data.

In section 128(d)(2) the reporting requirements will increase slightly from that which is presently required under CETA. However, S. 2570 requires that cross-tabulation be conducted according to program activity. Program activities are dynamic and changing, with participants often moving and changing. Each move by a participant requires that a participant's file must be pulled to log characteristics. If we assume each participant is involved in one and a half program activities, we can predict that the reporting system would be made about three times more complex and time consuming. This is clearly information overkill.

As can be seen throughout this section, the requirements for cross-tabulation have been reduced to only those areas that are most essential and cost-effective. The purpose here is to reduce prime sponsor paperwork, as well as require only meaningful information. As I stated earlier, to require cross-tabulation for age, sex, race, national origin, and handicap for each subsection is onerous and unnecessary. Prime sponsors do not have the necessary computer capability to report this information and it is unlikely that this technical capability would be available before the authorization for this act expires.

Finally, the postenrollment followup was reduced from 1 year to 6 months enabling prime sponsors to react more quickly to deficiencies in their program's effectiveness. In addition, this will reduce the load of information that must be recorded and maintained by prime sponsors and it will eliminate the difficulties that would arise from tracking participants for a full year after termination.

The essential purpose of this amendment is to provide the information desired by the Senate in this bill, but at a cost which is not prohibitive and which will yield the desired results.

Last, I would only state as a member of the Paperwork Commission, which has now ceased to exist, that I think this is one more opportunity to stay within the requirement of the data necessary to make assessments, evaluations, and reports of various kinds, but to cut down a little on the unnecessary paperwork that I feel would be an overburden to the prime sponsors.

Mr. NELSON. I agree with the senior Senator from Oregon. The only information which would be requested is that which is absolutely necessary. As I said earlier today, of the many forms I have looked at, 80 to 90 percent of the information they are asking for is totally unnecessary. I agree with the amendment and am prepared to accept it.

Mr. JAVITS. I agree with the amendment and yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MARK O. HATFIELD. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MARK O. HATFIELD. I thank the managers.

UP AMENDMENT NO. 1798

(Purpose: To provide greater flexibility in determining wage adjustments)

Mr. STEVENS. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for himself and Mr. GRAVEL, proposes an unprinted amendment numbered 1798.

Mr. STEVENS. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 221, line 14, strike out "." and insert in lieu thereof ", except in the case of an area where the average annual wage exceeds 150 percent of the national average annual wage of all such areas."

On page 222, line 2, strike out "." and insert in lieu thereof ", except in the case of an area where the average annual wage exceeds 150 percent of the national average annual wage of all such areas."

Mr. STEVENS. Mr. President, the amendment I am offering will provide for greater flexibility in determining wage adjustments under section 122(j) for those areas of our country where the average annual wage exceeds by 150 percent the national average annual wage for all other such areas under the authority granted to the Secretary under subsection (3) of section 122(j).

For many months, as this bill was being considered by the Employment, Poverty and Migratory Labor Subcommittee and by the full Human Resources Committee, we have attempted to convince Congress that S. 2570 is too restrictive to work effectively in Alaska. I have been assured that everyone understands that Alaska needs some exemptions because of its

unique problems which set it apart from all other areas of our country. The major problem Alaska faces under the bill as written is the limitation imposed upon wages for public service employees paid under this act. Mr. President, if I may, I would like to cite a few examples of Alaska's high wage rates. First, our State's average annual wage covered by unemployment insurance is 250 percent of the national average. Second, an economically disadvantaged family of four composed of two adults and two children with no income qualifies for a minimum of $13,584 in welfare benefits within the State of Alaska.

This is $1,584 above the maximum CETA wage authorized under section 122(j). In other words, an unemployed person in Alaska could make more on welfare than by going to work as a CETA employee. Third, the average entry level wage for a State of Alaska employee is approximately $17,000 per year. The average annual salary for an Alaska State employee is $22,497 per year. Fourth, neither the State of Alaska nor the municipality of Anchorage salary classification systems provide for salaries below the $12,000 per year maximum provided for in section 122(j).

Mr. President, the CETA program is extremely important to my State, as Alaska has the highest unemployment rate of any State in the Nation. I might add that our present 10.9 percent unemployment rate represents our summer employment rate when the construction season is in high gear. Our unemployment rate in the winter far exceeds this rate. Mr. President, I am asking for support for my amendment which will provide flexibility in determining appropriate wage rates for CETA participants. Otherwise, I fear for the CETA program in Alaska. The bill prohibits the creation of new job classifications for CETA participants. It prohibits dead-end, makework jobs. The Senate report accompanying this bill provides that transitional employment is the objective of the CETA program. Mr. President, Alaska must have relief from the wage limitation provision to enable our prime sponsors to create jobs which will lead to unsubsidized employment.

Under existing law, which provides for greater supplementation, the municipality of Anchorage under title II has successfully transitioned 66 percent of their CETA participants into unsubsidized employment. The State of Alaska, representing the balance of the State, has transitioned 45 percent of its CETA participants into unsubsidized employment. I suspect this is the most successful transition of CETA participants into unsubsidized employment in the country. Under the proposed bill, this success story will end as it is not possible to transition CETA participants from dead-end jobs into meaningful, productive unsubsidized jobs.

Last, Mr. President, I would like to add that my amendment does not provide any additional money for Alaska. All it does is provide greater flexibility in determining CETA wages given Alaska's tremendously high wage structure and given the need to comply with the intent of CETA. It would be ironic if the State most in need of a strong employment and training program would be unable to effectively participate in the proposed public service employment program. Without the flexibility that my amendment will provide, it will be extremely difficult for Alaska's prime sponsors to operate an effective public service employment program. I strongly urge my colleagues to adopt my amendment and at this time I thank the able Senator from Wisconsin (Mr. NELSON), chairman of the Employment, Poverty, and Migratory Labor Subcommittee, and also the distinguished Senator from New York (Mr. JAVITS), ranking minority member, for their understanding and compassion for Alaska's problem.

Thank you, Mr. President.

Madam President, I ask unanimous consent that the statement of my colleague be printed in the RECORD in full at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY MR. GRAVEL

Mr. President, the amendment Senator Stevens and I are introducing will assure the continuation of the CETA public service employment (PSE) program in Alaska. This amendment gives the Secretary of Labor discretion to raise the wage ceiling for public service employment in States experiencing an average wage at least 150% higher than the U.S. average wage as covered by unemployment insurance.

Earlier this year, I submitted testimony to the Subcommitte on Poverty, Employment, and Migratory Labor requesting an increase in the PSE wage ceiling. At that time, I pointed out that the wage rate of $10,000 imposed in 1972 had remained stagnant, while the Consumer Price Index had risen 52.2% cent and union wages had increased at least 7.5% each year.

The Committee recommendation allowed the PSE wages to increase up to $12,000 when local wages warranted an increase. The Committee's action responds reasonably to the inflationary condition experienced by most States. However, it clearly does not respond to Alaska's needs and it renders creditable provisions of the law requiring equal pay for equal work, adherance to fringe benefit policies, and reasonable assurance of transition to a private sector job meaningless in Alaska.

The entire Alaskan delegation has worked prodigiously to illustrate the unsuspected catastrophic effect of the wage ceiling on implementation of the PSE program in Alaska. Senator Nelson and Senator Javits in an effort to insure employment to the most economically and socially disadvantaged citizens within the confines of limited resources have extracted every fact and figure marginally relevant to Alaska's situation. Once they were satisfied of the legitimacy of our request they committed themselves to resolving our serious dilemma. I commend their responsible attitude and their understanding of a critical Alaskan problem.

Let me point out that Alaska's situation is not enviable. We have the highest unemployment rate in the country. Since the implementation of CETA my State has experienced an increase in double digit unemployment. Why has CETA not worked for us and why do we need an amendment to raise the wage ceiling on public service jobs?

The answer is revealed in a few simple statistics. To be eligible for a CETA public service job, an applicant must be economically disadvantaged, that is, have an income less than 70% of the BLS Lower Living Standard Budget, which is $12,000 for an Alaskan. Yet, once eligible, an Alaskan cannot earn a wage above the level of economically disadvantaged. The unemployed with families have little choice but to opt for welfare, which in Alaska provides at least $14,000 for a family of four.

Coupled with the economic disincentive for the unemployed to participate in CETA. is the equally difficult task of finding low-paying PSE jobs in Alaska. The program functions now because in excess of 55% of PSE slots are supplemented with non-Federal funds. These supplemented jobs are not the notorious jobs contributing to substitution that have been exposed in newspaper accounts of CETA. Rather these are the entry level, unskilled positions that CETA stresses. There are, in fact, no State entry level jobs paying less than $12,000.

The reauthorization of CETA eliminates supplementation for Title II PSE, limits the maximum wage to $12,000, and requires training and supportive services. Alaska cannot administer a public service job program with these requirements. We must have the flexibility to operate a program that responds to our unusual needs.

Mr. President, Senator Stevens and I propose to allow the Secretary of Labor to raise the wage ceiling for public service jobs up to the amount our average wage exceeds the national average wage as covered by unemployment insurance. As a precondition of this secretarial waiver, a jurisdiction must experience a significantly higher wage than the national wage.

Again, I appreciate the support and assistance of my colleagues, Senator Nelson and Senator Javits, and their steadfastness in redesigning the CETA program.

Mr. STEVENS. Let me state for the RECORD that, although my colleague is not here, I am sure he would join me in commending our staff assistants, Chip Wagoner and Nancy MacWood, who have worked very hard with the majority and minority staffs of the committee handling the bill from the Human Resources Committee. I feel that this amendment is most important to people of my State.

Mr. NELSON. Madam President, may I say that we have carefully evaluated and discussed this amendment. Alaska does stand alone, is unique, in terms of the wages paid and the high cost of living. This applies to only one State, in effect, because we are using the percentage of 150. I think that Alaska, without this provision, is being rather dramatically discriminated against. I think it is a sound amendment and I am willing to accept it.

Mr. JAVITS. Madam President, this amendment provides that Alaska will have more flexibility in this area. It just determines how the funds may be assigned to them. For the reasons advanced by Senator NELSON, I find the amendment unobjectionable on this side.

Mr. STEVENS. Madam President, as I pointed out in my statement, the Senator from New York is correct. We do not seek any additional funds.

Mr. JAVITS. Mr. President, we yield back our time.

Mr. STEVENS. I yield back the remainder of my time. Mr. President.

The PRESIDING OFFICER (Mr. MELCHER). Does the Senator from Wisconsin yield back his time?

Mr. NELSON. Yes, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STEVENS. I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1799

(Purpose: To permit handicapped individuals over the age of 21 to enroll in the Job Corps, if the Secretary approves)

Mr. WILLIAMS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. WILLIAMS) proposes an unprinted amendment numbered 1799.

On page 332, between lines 2 and 3, insert the following: "In the case of any handicapped individual, the Secretary may waive the maximum age requirement specified in the preceding sentence."

Mr. WILLIAMS. Mr. President, before I address myself to this amendment, and that will be brief, I should like to say a word of appreciation and applause not only for the management of the bill today on the floor by the Senator from Wisconsin (Mr. NELSON) and the Senator from New York (Mr. JAVITS), but for all of their work in bringing this measure to us. It represents the finest work in understanding problems that have developed in the CETA program, addressing them, and finding wise, very intelligent solutions to them and including them in the bill. As it develops on the floor today, the whole Senate has contributed to an understanding of this most necessary and worthy program. The Members have brought their good minds and concern to the floor with constructive amendments. What has been developed, not only by those I have mentioned, who are the leaders, but by all the Senate is a legislative masterpiece.

The fact that we have come this far without conflict in considering S. 2570 is a further tribute to the managers of the bill. They have worked tirelessly with Senators to shape further amendments which have strengthened the legislation without offending its essential principles, and I know that all of my colleagues share my deep admiration for the sensitive and expert way in which Senator NELSON and Senator JAVITS have handled this difficult responsibility.

Mr. President, I should also like to express my gratitude to all of the members of the Committee on Human Resources, who contributed greatly to developing the bill and the consensus that has formed behind it. In particular, I want to thank the distinguished Senator from West Virginia (Mr. RANDOLPH) for his special attention and many constructive suggestions for strengthening and streamlining the legislation and for his advice and assistance to me in obtaining adoption of special provisions for handicapped and older workers, who have unique needs in the labor market.

Finally, Mr. President, I should like to assure that my colleagues know how deeply we appreciate the work of the committee's dedicated staff, in particular the staff members of the subcommittee, Scott Ginsburg and Joan Hunziker for the majority and Jim O'Connell for the minority, and my assistants as chairman of the committee, Martin Jensen and Tom Lindsley. Their able assistance and technical expertise has been invaluable to the committee in shaping this legislation and to all the Members of the Senate who took a special interest in the bill.

Mr. NELSON. Mr. President, if the Senator will yield momentarily, I wish to say that this legislation is complicated. It is very important. There has been, as the Senator knows, a considerable amount of publicity here, in the Capitol, and many places around the country about certain abuses of the program, which were abuses, obviously enough, but I think exaggerated in the minds of many on how much abuse there was. Nevertheless, there were abuses and it is a difficult, complicated, controversial issue on which many months were spent in the hearings by the Human Resources Committee. They were participated in by the ranking minority member (Mr. JAVITS) as well as other members of the committee on both sides of the aisle. But even more important, the staff members who have worked on this, week after week, on the issues that have been raised by various Members of the Senate, have done a superb job in evaluating and working on the appropriate design of constructive amendments which have been offered by Members other than those on the committee. I want particularly to commend Mr. Scott Ginsburg and Ms. Joan Hunziker of the Subcommittee on Employment, Poverty, and Migratory Labor, and Mr. Jim O'Connell on the minority side for their constant, energetic and persistent work in designing a bill which I think shows the superb craftsmanship in its final result.

Mr. WILLIAMS. I certainly agree with the Senator from Wisconsin.

Has the amendment been stated, Mr. President?

The PRESIDING OFFICER. The Senator is correct.

Mr. WILLIAMS. Mr. President, in the Job Corps, eligibility extends to economically disadvantaged young persons who are 14, but not yet 22, years of age.

The amendment would simply permit the Secretary to waive the upper age limit in the case of handicapped individuals.

Age is not a particularly useful criterion to apply to handicapped individuals. Many who have passed the age of 21, because of their handicap or disability, have been unable to develop their employability in step with others their own age. The Job Corps provides an ideal setting for doing so.

The amendment would permit the Secretary to enroll handicapped persons beyond the age of 21 in the Job Corps.

It would neither increase nor decrease any other requirement respecting accessibility to Job Corps centers, since accessibility is now required for handicapped individuals between the ages of 14 and 22.

Mr. President, I know that this amendment has been studied and understood by the managers of the bill.

Mr. NELSON. Mr. President, we have previously looked at the amendment and discussed it with the distinguished chairman of the Committee on Human Resources. It is a constructive amendment to the pending legislation. I am prepared to accept it.

I shall yield back the remainder of my time as soon as the distinguished Senator from New York has completed.

Mr. JAVITS. I want to ask one question. The Senator has named an age bracket, 14 to 22. Is that in the regulations or in the bill?

Mr. WILLIAMS. That is in the law and restated in the bill.

Mr. JAVITS. Accepting that premise, because it would have to have some reference, I do not find the amendment objectionable. What did occur to me is, if there are any pragmatic difficulties brought up by the Department, though I am told the Department thinks this is all right, we shall hear about them. But certainly as we stand here——

Mr. WILLIAMS. They are apprised and have made statements of their approval that this be included.

Mr. JAVITS. I have no objection.

I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1800

Mr. WILLIAMS. Mr. President, I have a technical amendment which I send to the desk and ask to have considered.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. WILLIAMS) proposes an unprinted amendment numbered 1800.

Mr. WILLIAMS. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 226, between lines 3 and 4, insert the following:

"(2) The provisions of this subsection shall not apply to allocations for any fiscal year after the fiscal year ending September 30, 1981."

Mr. WILLIAMS. Mr. President, the Senator from Wisconsin earlier today offered an amendment designed to press the administration into acting as quickly as possible to establish a sound statistical basis upon which to base the distribution of CETA funds. The amendment was adopted.

Subsequently, we discovered a technical oversight in the amendment. It inadvertantly eliminated the outside time limit by which the statistical improvement process must be completed.

My amendment would simply add September 30, 1981, as the date after which previously utilized methodology for establishing unemployment rates could no longer be used as a basis for distributing any CETA funds.

Mr. JAVITS. Mr. President, the amendment is acceptable.

Mr. NELSON. Mr. President, we agree with the proposed amendment. We are willing to accept the amendment.

I yield back the remainder of my time.

Mr. WILLIAMS. I yield back the remainer of my time.

The PRESIDING OFFICER. (Mr. ZORINSKY). All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (UP No. 1800) was agreed to.

UP AMENDMENT NO. 1801

(Purpose: Technical change regarding educational institutions)

Mr. WILLIAMS. Mr. President, I send another technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. WILLIAMS) proposes an unprinted amendment numbered 1801.

Mr. WILLIAMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 196, lines 18 and 19, strike "local educational agencies" and insert in lieu thereof: "designated educational agencies and institutions."

Mr. WILLIAMS. Mr. President, during final markup of the bill, the committee divided educational agencies into two classes, for purposes of definition.

One class is "local educational agencies" as defined in the Elementary and Secondary Education Act.

The other class is "designated educational agencies and institutions" as defined in the Vocational Education Act, which includes certain postsecondary institutions.

The amendment would correct an oversight in changing the appropriate references to conform to the new definitions.

Mr. NELSON. Mr. President, we agree with that proposed change. I am prepared to accept the amendment. I yield back the remainder of my time.

Mr. JAVITS. Mr. President, the amendment is acceptable.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (UP No. 1801) was agreed to.

UP AMENDMENT NO. 1802

(Purpose: To define conditions under which CETA participants may be employed on the rehabilitation of housing for lower-income families)

Mr. WILLIAMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. WILLIAMS) proposes an unprinted amendment numbered 1802.

Mr. WILLIAMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 224, line 14, insert (1) after (c), and between lines 24 and 25, insert the following:

"(2) The Secretary shall issue regulations setting forth conditions under which prime sponsors, in carrying out community improvement projects, community betterment activities, and public service employment projects under this Act, may provide work for eligible participants on the rehabilitation of housing for lower-income families as defined in Section 8(f)(1) of the United States Housing Act of 1937, as amended, as part of community revitalization or stabilization projects."

On page 381, line 5, strike "low-" and insert "lower".

Mr. WILLIAMS. Mr. President, S. 2570 provides for the employment of CETA workers on a variety of community improvement and community betterment projects, including rehabilitation of housing for low-income families. However, the bill does not define "low-income families" for purposes of housing rehabilitation, nor does it establish any additional conditions under which such work may be done with CETA funds.

The amendment would establish, as a condition of such projects, that the housing to be rehabilitated be limited to housing that is for "lower income families" as refined in the U.S. Housing Act of 1937 and that is identified as in need of rehabilitation under a community revitalization or stabilization project.

Such projects are assisted under programs administered by the Department of Housing and Urban Development and carried out by local chief elected officials, who are also CETA prime sponsors or program agents.

The amendment would encourage coordinated use of HUD and CETA funds in housing rehabilitation projects. By using a common definition of eligible housing, administrative complexities would be avoided.

The result of combining CETA and other Federal funds in meeting urgent community needs would be a highly visible and valuable product that would reflect positively on the CETA program.

Mr. President, I hope the managers, who I believe have been advised of this amendment, will see the wisdom of getting comparability into the two programs so that CETA employees can work on housing rehabilitation projects in coordination with HUD programs.

Mr. NELSON. I am prepared to accept the very constructive amendment.

Mr. JAVITS. Mr. President, just one question.

We would not want to see the Community Development Corporations, which are authorized under title VII of the Economic Opportunity Act, excluded from this type of activity, because they also may employ CETA workers.

Mr. WILLIAMS. That is understood.

Mr. JAVITS. That would be covered.

Mr. WILLIAMS. They are directed toward the same objectives discussed here.

Mr. JAVITS. I have no objection.

Mr. WILLIAMS. I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (UP No. 1802) was agreed to.

UP AMENDMENT NO. 1803

Mr. NELSON. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 1803.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On Page 251, line 10, insert before the period: "and services, pursuant to regulations of the Secretary, to participants in programs under this Act in accordance with an agreement between the State vocational education board and the prime sponsor."

Mr. NELSON. Mr. President, this amendment would require State vocational educational boards to reach agreements with prime sponsors prior to dispensing funds provided to State vocational educational boards under title II of CETA. An amendment offered earlier in the week by Senator DOMENICI inadvertently eliminated such agreements from having to be entered into. I have checked with Senator DOMENICI, and he has no objection to this amendment.

Mr. JAVITS. That is fine with me, as long as Senator DOMENICI understands.

Mr. NELSON. We have checked with Senator DOMENICI.

Mr. President, I yield back the remainder of my time.

Mr. JAVITS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 1803) was agreed to.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

## ORDER TO RECOMMIT H.R. 3946 TO THE COMMITTEE ON FINANCE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Calendar Order No. 988, H.R. 3946, providing for a refundable Federal income tax credit for

educational purposes, be recommitted to the Committee on Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER TO INDEFINITELY POSTPONE SENATE RESOLUTION 524

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Calendar Order No. 990, Senate Resolution 524, waiving section 303(a) of the Congressional Budget Act with respect to the consideration of H.R. 3946, be indefinitely postponed.

Mr. JAVITS. Any required clearances have been made, I gather?

Mr. ROBERT C. BYRD. These have all been cleared on the Senator's side.

Mr. JAVITS. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order Nos. 1064, 1070, and 1071.

The PRESIDING OFFICER. Without objection, it is so ordered.

## DAYS OF REMEMBRANCE OF THE HOLOCAUST

The joint resolution (H.J. Res. 1014) designating April 28 and 29 of 1979 as "Days of Remembrance of Victims of the Holocaust," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## M/S WILLIAM E. BOONE

The bill (H.R. 2952) for the relief of M. Sgt. William E. Boone, U.S. Army, retired, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## STEPHANIE JOHNSON

The bill (H.R. 7162) for the relief of Stephanie Johnson, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, that completes the measures cleared for action by unanimous consent with the minority.

I thank Mr. STEVENS and Mr. JAVITS.

## PRIVILEGE OF THE FLOOR

Mr. HEINZ. Mr. President, I ask unanimous consent that the following members of my staff have the privilege of the floor for the duration of the day: Gwen King, Mary Louise Krukowski, and Bob Hepler.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978

The Senate continued with the consideration of S. 2570.

Mr. JAVITS. Mr. President, I yield 2 minutes to the Senator from Illinois, on the bill.

Mr. STEVENSON. I thank the distinguished Senator from New York for yielding.

Mr. President, it would be difficult to contrive more inefficient and politically corrosive means of creating employment than by the public service employment programs of CETA. The efforts of the distinguished managers of the bill and the Human Resources Committee will do little to reform programs which in concept are defective.

This expensive measure, over $11 billion in total CETA expenditures for fiscal 1979, most for public service employees, will authorize in practice a complex form of revenue sharing for units of Government facing less critical budgetary constraints than the Federal Government. CETA frequently produces Federal support for existing jobs, instead of new jobs. New jobs are sometimes "make work" jobs. The availability of funds depends on arbitrary formulas. The CETA programs require for their implementation layers of bureaucracy and consultants which absorb funds better saved or spent elsewhere. It will continue to facilitate widespread corruption. For example, records are missing which are needed to ascertain the uses of millions of dollars of CETA funds in East St. Louis, Ill. Last fall the Department of Labor recommended that the prime sponsorship for CETA be moved from that city to the Illinois Governor's Office of Manpower and Human Development. Now that office is itself the object of an investigation into allegations of corruption. CETA spawns corruption. It produces political patronage. And it is a grossly inefficient means of providing training and jobs for those most in need of both.

The funds would be better used to reduce the Federal deficit and reform the welfare system. They could create jobs by funding essential public works, housing or transportation facilities. During the depression the Federal Government involved itself directly in the creation of jobs and good works through such instrumentalities as CCC and WPA. The legacies of those efforts enrich our lives. The legacy of CETA is a mass of public cynicism and distrust toward government.

If my vote made the difference I would hesitate to cast it against this bill. Time is needed to develop alternative means of creating employment in the public and private sectors. Time is needed for the Congress to change its habits which first create unemployment, as by its refusal to permit a subminimum wage for youth, and then require it to fund jobs for unemployed youth. We are not likely to take the time and begin the effort without some protest against our habits and their consequences, including this bill. So I intend to cast my vote to protest a well-intentioned but ill-conceived measure which by its cost and waste causes unemployment and inflation.

Mr. JAVITS. Mr. President, we are ready for another amendment, if Senator DOLE wishes to call it up.

The PRESIDING OFFICER. The Senator from Kansas.

UP AMENDMENT NO. 1804

(Purpose: To include the membership of community-based organizations in the private industry councils)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself and Mr. SCHMITT, proposes an unprinted amendment numbered 1804.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 379, line 6, strike out "and".

On page 379, line 6, insert after "labor" a comma and the following: "community-based organizations."

On page 379, line 9, strike out "community-based organizations,".

Mr. DOLE. Mr. President, title VII of the Comprehensive Employment and Training Act is an innovative plan to coordinate private industry and CETA planners in an effort to solve the problem of structural unemployment. I am pleased to join the committee in wholeheartedly approving this measure which will foster the channeling of CETA participants into unsubsidized private sector jobs. I have long believed that, given appropriate training and employment opportunities, the vast majority of the hardcore structurally unemployed could be a viable and worthwhile part of the private sector work force. Title VII is a move in that direction, and I commend the distinguished members of the committee and, in particular, the two floor leaders of the bill for their thoughtful and innovative approach to this very serious unemployment matter.

DOLE AMENDMENT

Mr. President, the private industry councils to be set up on the local level will be the tool by which private industry will be drawn into the CETA effort. The success of title VII depends on the effectiveness of the PIC's to integrate business into CETA's goal of solving the problem of structural unemployment. S. 2570 mandates that busi-

ness, including small and minority businesses, and labor be represented on the council, a majority being business representatives. In addition to the mandated employer and labor representatives, the committee language provides that the prime sponsor may appoint representatives of community-based organizations, educational agencies, and representatives of persons eligible to participate in activities funded under this title.

My amendment to title VII would mandate the important participation on the PIC councils of existing community-based organizations under title VII. Mr. President, I firmly believe that the membership of such organizations, such as the SER-Jobs for Progress, the NAACP, the Urban League, and others would significantly enhance the effectiveness of the private industry councils. And I would further suggest that it would be unwise for us to permit their membership on the councils to be left up to the arbitrary discretion of the prime sponsor. To allow this, I believe we would be jeopardizing the potential effectiveness of the private industry council in making the private sector an integral part of CETA in the community.

MEMBERSHIP OF COMMUNITY-BASED ORGANIZATIONS ON THE PRIVATE INDUSTRY COUNCIL

Community-based organizations such as SER-Jobs for Progress, the NAACP, the Urban League, and other similar groups, have been striving for years to deal with the problem of structural, hardcore unemployment. These groups, with their experience and expertise in unemployment problem solving in their own respective communities can provide critical input to private industry councils. One has only to look at the long record of success of such groups to see that their presence on the PIC's would be a tremendous asset to business leaders who are attempting to solve structural unemployment problems. The proven effectiveness of community-based organizations clearly indicates that mandating their membership on the PIC's would provide the experience in unemployment problem solving that the business leaders will need, and would be an important linkage to the groups that local PIC's will serve. The official vote of community-based organizations on the council would be highly educational to council members not immediately involved in the delivery of manpower services. Mr. President, my amendment would serve only to strengthen the language of this bill so that representation by those who are very knowledgeable of the problems and needs of the hardcore unemployed be insured on the PIC's.

PIC'S: A REPRESENTATIVE GROUP

While the importance of input from community-based organizations is useful and important, the concept behind title VII rests on the belief that the problem of hardcore unemployment can best be alleviated through cooperation with private industry, thus the mandate for the majority of the members of the private industry council to be business representatives. This is as it should be, given the fact that the goal of title VII is to give private sector focus to local CETA programing. Mr. President, my amendment does not weaken the ability of business representatives to draw the private sector community into the private sector program, rather, through balanced representation of the private sector and community-based organizations, this amendment will aid the private industry council in helping to alleviate a very serious structural unemployment situation.

Mr. President, I urge the adoption of this important amendment.

Mr. President, as background, I think I should indicate that originally I had proposed an amendment that would mandate community-based organization representation and would mandate client representation on the private industry councils. I have since modified that amendment to eliminate a requirement for client representation on private industry councils and have retained the provision which would mandate representation by community-based organizations on private industry councils.

Specifically, I am talking about community-based organizations such as NAACP, SER-Jobs for Progress, CAP, the Urban League, and others who have had long experience in this area and who have a real interest in it.

Also, it is fair to say that the primary author of this amendment was the distinguished Senator from New York (Mr. JAVITS) in the committee. But I believe that by modifying the amendment, it is now acceptable to the floor managers, and on that basis I will not pursue it further.

Mr. JAVITS. Mr. President, I am the author of this idea, and I am very proud of it. I think it is a very good amendment, and it is acceptable to me.

Mr. NELSON. Mr. President, in all honesty I have to say I did not support including the placement of community based organizations on the private industry councils, in committee, not because I do not think the private industry councils should have representation on them from community-based organizations, but only that we should not mandate it, because all prime sponsors have other planning councils that do have representation from client organizations, community-based organizations, and in some circumstances it may be a good idea and in some circumstances it may not.

There was one other point, of course. This private industry council is entirely new. This bill only provides for representation of labor and management on the private industry councils. There were a number of people who had ideas about mandating categorical representation of many other groups.

I was concerned about expanding it beyond labor and management to leave the flexibility with the prime sponsor.

However, I am prepared to accept the amendment of the Senator from Kansas.

I yield back the remainder of my time.

Mr. DOLE. I might just say to the distinguished floor manager it had been modified, of course.

Mr. NELSON. Yes.

Mr. DOLE. Right

Mr. JAVITS. That is the reason it is acceptable.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). All time having been yielded back, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 3459

(Purpose: To eliminate the Senate's advice and consent waiver respecting the creation of a sixth Department of Labor Assistant Secretary)

Mr. HELMS. Mr. President, I have an amendment No. 3459 at the desk, which I call up, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an amendment numbered 3459.

Mr. HELMS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 389, strike lines 15 through 21.

On page 389, line 22, redesignate paragraph "(c)" as paragraph "(b)" and renumber all lines accordingly.

Mr. HELMS. Mr. President, I shall be quite brief. Two paragraphs in S. 2570 would create both a new assistant secretary position in the Department of Labor and further assure that it go to Nik B. Edes, currently Labor's Deputy Undersecretary for Legislation and Intergovernmental Relations. Edes' name is not mentioned in the bill, but everyone seems to agree that he would get the job.

My amendment leaves intact the newly created position, but it does remove the "grandfather clause." Along with OMB and key House Members, I do not approve of the language which appears designed to abridge the President's authority to make an appointment to an executive level position. This sets a bad precedent for the Senate.

Our Constitution requires that the President make all executive-level appointments and that the Senate give its advice and consent after examining the nominee's fitness to hold office. This procedure should not be altered.

For that reason, I urge adoption of the amendment, and I hope that the managers of the bill will accept it.

Mr. JAVITS. Mr. President, I yield such time as he may desire to the Senator from New Jersey.

Mr. WILLIAMS. I thank the Senator from New York.

Mr. President, the purpose of section 8 of the committee's bill is to establish a sixth Assistant Secretary in the De-

partment of Labor to manage the Department's legislative affairs and intergovernmental relations.

The White House has approved the establishment of this position so as to put the Department's legislative affairs activities on a par with that of other agencies who have an Assistant Secretary for those duties.

The section also provides that the President may—and I emphasize may—fill the new position, without the necessity of nomination and confirmation by the Senate, by appointment of the person who now performs those same duties for the Department as a Deputy Undersecretary.

In offering this section as an amendment to the CETA bill in committee, it seemed to me to be unnecessary to require the White House and the Senate to undertake the cumbersome confirmation process for an individual who has been performing well in a job whose title is being changed to conform to Federal agency practice.

I understand that a member of the staff of the Office of Management and Budget has objected that waiving the confirmation process would impinge upon the President's constitutional power of appointment. This simply is not correct.

The provisions of the section would allow the President to fill the new position with anyone he chose. It would allow the President full freedom to submit a nominee for the position to the Senate for confirmation, even if that nominee were the present Deputy Undersecretary, Mr. Edes.

Under the section, Mr. Edes would fill the new position, and the Senate confirmation process would be waived, only if those were the President's wishes.

It is not my intent to embroil the Senate in any debate over the wisdom of waiving the confirmation of an appointive official.

Therefore, in the interests of resolving this matter quickly, I would have no objection to the deletion of subsection (b) of section 8.

But I believe it is important for the Department of Labor to have an Assistant Secretary for handling these duties, and since that is the wish of the President, I hope that my colleagues will agree to the establishment of the position.

Mr. JAVITS. Mr. President, in reply to the Senator, as I understand it, the establishment of the position is taken care of by page 39, lines 12 through 14. What the amendment strikes is the vesting of that position in the person holding the office which means it strikes page 39, lines 15 to 21, and it is on that basis that the amendment is acceptable to me.

Mr. NELSON. I agree with the distinguished Senator from New York.

I am prepared to yield back the remainder of my time.

Mr. HELMS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from North Carolina.

The amendment was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1805

(Purpose: To prevent the use of CETA funds for promoting unionization or requiring persons to join a union as a condition of receiving training under CETA programs)

Mr. HELMS. Mr. President, I have another amendment at the desk which I call up and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes unprinted amendment numbered 1805.

On page 218, between lines 4 and 5, insert the following: "(bb) No prime sponsor may use any funds received under this Act to assist or promote union organizing.

"(cc) No individual may be required to join a union as a condition of enrolling in a program assisted under this Act in which only institutional training is provided, unless such institutional training involves individuals employed under a collective-bargaining agreement which contains a union security provision.

Mr. HELMS. Mr. President, on May 8, 1978, I received a letter from Mr. Willis Lawrence, an attorney representing the Guam Employer's Council, requesting that I look into the misuse of CETA funds in the territory of Guam.

The Guam Employer's Council had previously filed a formal complaint with Labor Secretary Marshall, and I understand the Department did in fact initiate an investigation of the allegations in March of 1978. However, it appears the Labor Department has been reluctant to hold an administrative hearing either in Guam or California on the alleged violations. Indeed the investigation seems to stalled at the present time. Upon receiving Mr. Lawrence's letter and supporting documents, I wrote to Secretary Marshall urging that the investigation be completed and a hearing scheduled if necessary. That was over a month ago, I have had no response from the Secretary.

Quite timely, Inquiry magazine published just this month an article by Bill Keller which describes this misuse of CETA funds in Guam. I ask unanimous consent that the article be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HELMS. According to the complaint of the Guam Employer's Council, Labor Department officials intentionally used the CETA program to enable the Operating Engineers Union to "lock up" the construction trades on the island. In fact, the Labor Department did award a $450,000 training contract to the operating engineers. It is alleged that this was accomplished without soliciting competitive bids as required by law and further that Labor Department officials conspired with union officials to simultaneously issue regulations to restrict the use of nonunion labor.

Because of these serious allegations and because of the Labor Department's seeming inability to get to the bottom of the matter, Senator HATCH and I will in all likelihood be calling for a GAO investigation within the next several days.

Mr. President, my amendment simply forbids prime sponsors from making CETA grants to unions for the purpose of enabling them to move in and organize an area—as has been the case apparently in Guam. My amendment serves notice that federally funded CETA grants cannot be used as political payoffs to unions.

My amendment is also directed at another unfair situation. The amendment would give limited protection to a worker by not requiring him to join a union as a condition of enrolling in any institutional training program assisted by this act and sponsored by a union unless such institutional training involves individuals employed under a collective bargaining agreement.

Since unions are eligible to receive CETA grants to operate training programs—programs financed by the taxpayers—as a matter of public policy, the trainees should not be required to join the union or be forced to pay union dues. The Federal Government should not be financing training programs where the enrollees are required to join the very union which has received the Federal grant. If the worker chooses to join the union voluntarily, then that is his choice. But he should have the choice as long as he is enrolled in the federally financed training which pays his salary.

My amendment simply provides the worker some freedom of choice and further protects the integrity of the CETA program by insuring that unions will not have the unlimited use of the taxpayers' funds to enlarge their own membership rolls without any restrictions whatsoever. I am pleased that the sponsors have agreed to accept the amendment.

EXHIBIT 1

LOCKING UP GUAM FOR LOCAL 3

(By Bill Keller)

Last February, employers in the construction industry on Guam sent a formal complaint to Secretary of Labor Ray Marshall alleging that Labor Department officials in San Francisco had conspired with the Operating Engineers Union and the Dillingham Corporation to award a $1.8 million CETA contract for job-training on the island. In March the department began an investigation of the charges, but to date it has issued no finding.

If the Labor Department has been slow in making a judgment on these charges, it is not because of a lack of evidence. Indeed, interviews and government documents reveal that Labor Department officials and politicians, notably Phillip Burton (D.-Calif), attempted to use the CETA program to help the Operating Engineers lock up the construction trades on Guam. In so doing, they have apparently broken the law by circumventing competitive bidding requirements and exercising administrative powers to promote union activities and accomplish objectives bar broader than the employment and training Congress intended. They have also attempted to disable competition from Asian firms by manipulating Guam's wage and labor structures. According to these sources, the department awarded a $450,000 training contract to the union—without soliciting bids as required by law—and issued regulations that raised construction wages and restricted the use of nonunion, alien labor. When Governor Ricardo J. Bordallo of Guam

opposed these actions, Labor Department representatives threatened to withhold CETA employment and training funds as a means of obtaining his cooperation.

Oddly enough the Labor Department-Operating Engineers plan to lock up Guam's construction trades for the union had its beginnings not on Guam, but in Hawaii. Late in 1976, when unemployment in the Hawaiian building trades was high, Governor George R. Ariyoshi and representatives of various trade unions set their sights on Guam as a possible solution for the problems of Hawaii's construction business.

Guam was an obvious choice. Located 6000 miles from the West Coast of the United States, Guam is a central link in the chain of islands on which the United States has anchored its military might in the Western Pacific. Major installations on the island include a nuclear submarine base, a large naval ship repair facility, and a Strategic Air Command airfield. Military spending is almost always a boon for the construction industry, but in 1976, nature and the military combined to make Guam especially attractive to builders. In May of that year, Typhoon Pamela swept the island, causing major damage; shortly afterwards, the navy was prepared to let over $400 million in contracts for redevelopment and construction on Guam. Short-term spending of this magnitude presaged a booming economy and certain prosperity for the construction industry. Everyone, including Governor Ariyoshi's friends, wanted to share in the feast.

Especially eager was Local 3 of the International Union of Operating Engineers. Based in San Francisco, Local 3 has 35,000 members in a jurisdiction covering Northern California, Nevada, Utah, Hawaii, and the mid-Pacific Islands. Local 3 has long been interested in organizing on Guam—it assigned staff members to the island in 1963 and built offices in Agana, the capital, in 1971—but its efforts have met with little success. Union officials have conceded that as of August 1977, they had organized only about 130 of Guam's estimated 4800 construction workers. Therefore, in recent years the union has intensified its drive on Guam, hoping to cash in on what it contends will be "massive amounts of construction and industrial development in the next 10–15 years" for "storm repair," "oil deposits," and "industrial and trade zone work to supply the booming Pacific Rim economy and the entire spectrum of ocean resources development."

Also anxious to get in on the construction boom in Guam was the Dillingham Corporation of Hawaii, a multinational conglomerate with a broad range of construction operations on the Pacific coasts of the United States and Canada, and in Hawaii, Australia, and New Zealand. Already involved on Guam through its subsidiary, the Hawaiian Dredging and Construction Company, Dillingham was looking for new ways to compete against local and Asian construction firms.

But it was not easy for the Operating Engineers or Dillingham to cash in on Guam's new construction prosperity. Guam's construction industry has traditionally used foreign laborers, principally "non-immigrant aliens" from the Philippines and South Korea, who are admitted for temporary work assignments. These workers have been brought in to ease a shortage of skilled construction workers. Many Chamorros, or natives of Guam, look down on construction work. As a result, few of them have been trained in the construction trades, and those who are skilled often leave the island for the higher wages and better working conditions on Hawaii or the U.S. mainland. Hence, in March 1977, temporary alien workers held approximately 82 percent of Guam's construction jobs. Moreover, the ready availability of foreign workers has kept wages low. For example, in 1977 a construction electrician on Guam received $3.22 an hour, while his counterpart in Hawaii was paid $10.34.

The use of alien workers angers the Operating Engineers, who have termed it "the inhuman and cancerous exploitation of working people on Guam." The union asserts that the practice artificially holds down wages and forces workers to accept substandard working conditions. The union is also concerned that its efforts to organize the island have failed largely because alien workers are granted only temporary working permits and generally must acquiesce in conditions offered by their employers or face deportation. But firms on Guam, as well as many Japanese and Korean companies that do business on the island, depend on temporary alien workers to fill their demand for skilled construction artisans. Without a ready supply of relatively inexpensive Asian labor, they cannot compete with huge, off-island American firms such as Dillingham.

It was with this in mind that the Operating Engineers and their government friends developed a strategy to unionize Guam's construction trades. According to informed sources, late in 1976 Governor Ariyoshi of Hawaii and trade union representatives met with Labor Department officials, including top Labor Department regional administrators William Haltigan and Royce Hulsey. At the meeting, they asked the Labor Department not to certify aliens for employment on Guam unless the employers there first recruited in Hawaii at prevailing Hawaiian wage rates. Similar meetings were held early in 1977. During these sessions the idea first surfaced of changing the certification of aliens and increasing wage rates to aid a union takeover on Guam. According to persons present at the meetings, Labor Department officials agreed to the concept of unionization for Guam, and supported Dale Marr of Local Union 3 in his plans to use the Comprehensive Employment and Training (CETA) program as a means of locking up the island. This could be accomplished if the Labor Department paid the union to run the CETA training program on Guam. CETA funds would then be used to recruit new union members and train them in organizing techniques, as well as in construction industry trades. The new union men would then enter "open shops" on Guam and apply their newly acquired skills.

Misuse of CETA funds on Guam has been commonplace for several years, and the training program has been an annual fiasco. In December 1976, a federal audit revealed "gross mismanagement and lack of control," and questioned nearly half of all CETA expenditures, and amount exceeding $1 million. Federal correspondence with Governor Bordallo chronicles numerous violations of CETA regulations, including "loss of control over program activities," "enrolling and employing ineligible participants," and "improper expenditure of program funds." On March 10, 1977, the Labor Department fired the CETA staff on Guam and ended funding for all CETA training programs and related activities. Within a fortnight, the associate regional administrator for Region IX withdrew Guam's letter of credit for federal funds, charging that the governor had overdrawn the CETA accounts by $192,112.

In mid-August 1977, Regional Administrator Haltigan traveled to Guam to present proposals that would set up a construction-trades training program under CETA, double wages paid to construction workers over a two-year period, and provide for new alien certification procedures to be administered by the Labor Department. Local newspaper accounts of that period document the near universal panic with which the Haltigan proposals were received on Guam. On August 20, the Pacific Daily News reported, "The proposals are directly opposed by business, construction, military and government officials, who say the increases will come too soon and will have a direct negative impact on the island's economy." Haltigan's proposals included a requirement that any employer who used alien labor must pay higher rates determined by the U.S. Department of Labor. Governor Bordallo stated, "This whole thing is going to hit Guam like a bombshell."

Alone in welcoming the proposal was Local 3 of the Operating Engineers Union. In a letter to Haltigan, dated August 9, 1977, union leader Dale Marr underscored his support for the proposals and warned, "I would point out to you that you can expect formidable opposition from a number of employees of federal [Government of Guam] agencies and politicians whose ox you will be goring. We are of the opinion, however, that the Carter administration, Secretary Marshall, and above all, Don Elisburg [assistant secretary of Labor] and the American labor movement will support your efforts on all fronts. Hang tough." According to another Pacific Daily News story, the Labor Department was under acute political pressure to solve the alien labor problem on Guam. "The pressure, sources have said, comes from the Governor of Hawaii, the AFL-CIO, representatives of the Departments of Defense and Interior and unnamed persons in the White House." In confirmation, Haltigan said "Guam is something of a cause célèbre at the moment. This thing has been squirreling around at very high levels on Capitol Hill."

The new proposals and the reaction on Guam also caused consternation at the Department of Defense. On August 19, 1977, high-level Defense Department officials telegrammed Undersecretary of Labor Brown, stating that "the bidding for all construction work for military activities on Guam has been postponed because of confusion about labor availability and wage policy applicable to Guam, and that DOD's contractual efforts to carry out the typhoon damage restoration effort have come to a complete standstill." Apparently, the navy was under pressure to spend its Guam construction funds, which exceeded $400 million. It became incumbent upon the Department of Labor to produce a labor force and get Guam's house back in order—to make sure that future allocations for the navy would not be jeopardized.

On September 13, 1977, under the Immigration and Nationality Act, the Labor Department published new regulations that imposed "adverse effect rates," doubling the wages of construction workers on Guam over two years, with the first increment to become effective as of March 1, 1978. The regulations also specified new certification procedures for temporary alien workers on Guam, and provided that the certification process was to be administered by the U.S. Department of Labor. Many Guam employers reviewed the new regulations uneasily, fearing the Labor Department's new certification power. In the face of mandatory wage hikes, they questioned whether they could continue to compete with large off-island and multinational construction firms. Many cast a wary eye at the Operating Engineers Union, fully aware that the new regulations removed major barriers to a union takeover on Guam.

The Guam employers did not know that early in September the Labor Department had begun informal discussions with a private consulting firm in San Francisco. During October and November, Labor Department representatives briefed members of the firm's staff on the situation in Guam and showed them many documents and letters. The name of Congressman Phillip Burton cropped up more than once in their discussions as a reference point and, though unseen, a force to be reckoned with.

On November 16, 1977, the consultants met in San Francisco with the Department of Labor grants officer and his staff to discuss a

way to refund the Guam CETA program. At that meeting a strategy was hashed out to hire and train a new CETA staff and to tender contracts to employers on Guam who had demonstrated training capabilities. Five days later, on November 23, the consultants submitted the final proposal to Associate Regional Administrator Hulsey. According to persons who were present, during that meeting Hulsey offered to hire the consulting firm to legitimize or "launder" illegal contracts with the Dillingham Corporation and the Operating Engineers Union, Local 3. When Hulsey made the offer, he mumbled under his breath. "What's that?" one of the consultants asked. "Dillingham," he repeated, "and the Engineers. The training contracts will have to go to them." On the following day, when the firm withdrew from the proposed scheme, Hulsey stated his intention to continue without its participation or assistance.

On the afternoon of November 18, 1977, another meeting took place on the ninth floor of the Federal Building in San Francisco. Labor Department administrators Haltigan, Hulsey, and Charles Pickens met with Local Union 3 officials, including Dale Marr, and with two executives of the Dillingham Corporation. Virginia Allee, regional administrator for the Employment Standards Administration, also was present. A plan to use CETA Title I funds to train construction workers on Guam was reviewed. The sum of $1.8 million was earmarked for the Engineers Union and Dillingham. At approximately 2:45 p.m., Congressman Burton arrived. Assistant Secretary of Labor Donald Elisburg arrived a few minutes later. The group exchanged greetings and the progress of the meeting to that point was summarized. Both Burton and Elisburg agreed on the soundness of the plan and on the scheme to set the union and Dillingham up in the training business. "Burton was brought in by the Engineers," one source said. "It was a show of strength; they go back a long way together."

This entente represented the culmination of a longstanding political alliance between the Operating Engineers and the Burton machine. Burton, who presides over the House National Parks and Insular Affairs Subcommittee which oversees Guam and the Pacific Trust Territories, found himself in a position to help his friends—friends whose unquestioned loyalty could be tabulated in terms of large yearly campaign contributions and membership support. The Guam employers didn't know they never had a chance.

In December, the Labor Department sent representatives Jess Ramos and Tony Cordero to Guam to convince Governor Bordallo to go along with the union-Dillingham CETA training deal. According to informed sources, the governor relented only after he was told that his complicity was a condition for refunding the CETA programs that had been terminated six months earlier. At that time, severe media criticism had been leveled at the governor's men for bungling the program and losing the CETA revenues and jobs. Presumably to protect his own reelection prospects, Bordallo agreed to support the union-Dillingham deal through a subcontract financial arrangement.

On January 18, 1978, the *Pacific Daily News* reported an agreement to start a new construction training program on Guam. The article stated, "The agreement was reportedly reached after three days of negotiations last week in Honolulu between officials of Dillingham Construction Company, the Operating Engineers Union, GovGuam and the U.S. Department of Labor."

By late January, the Labor Department was well on its way to insuring unionizing for Guam and to meeting Defense construction industry needs. But for an indiscretion on the part of the associate regional administrator, the Labor Department might have succeeded in containing the alien problem, controlling construction industry wages, and enriching the friends of Phillip Burton—all at the expense of the people of Guam and the increasingly rebellious American taxpayer.

This indiscretion took the form of a memo to Haltigan, which fell into the hands of Michael McClure of the Guam Employers Council sometime in early February. In it, Hulsey alludes to the opposition of the Guam employers to the union-Dillingham training agreement. According to the January 30 memo, Dillingham Vice President Pete Errect suggested that the Labor Department use its new certification power to snap the already weakening opposition of the Guam employers. Hulsey wrote:

"He [Errect] said that a little pressure from us—some overt manifestation of our commitment—should do the trick.

"I asked for something more specific, and he said our most effective leverage in this situation was our certification actions. He thought that if word got out that noncooperating contractors might have their certification requests reviewed with great pains, they would become noticeably more anxious to cooperate in the program.

"I see his point and agree that he is likely right in what he says. I told him we would do whatever we could do legitimately and legally. He thought that if that were our attitude, word to that effect ought to get out. I told him we would look into the matter and take the best course available to us.

"At any rate, I agree that the opposition is weakening and full active participation by all contractors seems to be fairly imminent. We will feel our way carefully and give a fateful push when we feel the time is right."

To many Guam employers whose businesses depend on foreign workers, this memo signaled the Labor Department's determination to exclude local firms from operating the training program and, if necessary, to move against them economically—using the new labor certification procedures as a weapon. Contrary to its intended purpose, the Hulsey memo galvanized opposition to the training program. On February 10, 1978, attorneys for the Guam Employers Council, Black Construction Company, and Modular Homes, Inc. sent a formal letter of complaint to the secretary of Labor requesting an investigation. And on March 9, a suit was filed in federal district court on Guam to halt the award of the joint-union-Dillingham contract.

Representatives of the aggrieved employer organizations and their attorneys have met with the Labor Department's investigators on Guam and provided substantial documentation supporting the charges in their complaint. In San Francisco, the investigators have questioned regional Labor Department officials closely and made copies of pertinent documents in their files. According to reliable sources who request that their names be withheld, the investigation team was informed of Congressman Burton's involvement, including the meeting of November 18—in which he and Assistant Secretary of Labor Don Elisburg met with the Operating Engineers and Dillingham to approve the joint training program. In addition, they were given copies of correspondence and complete information regarding the private consulting firm through which high-ranking Labor Department officials attempted to "launder" the training contracts under investigation. Since March, four months of official silence have elapsed. According to federal regulations, the secretary of Labor must investigate all complaints promptly, publish findings within a reasonable time, and provide an administrative hearing in all appropriate cases. Despite impressive evidence, repeated efforts, and rising costs, the Guam employers and their attorneys report that they "have been unable to secure any relief, prompt or otherwise, from the Secretary of Labor."

Faced with a lawsuit in the district court and the internal Labor Department investigation, the Dillingham Corporation has backed away from the union-management deal and its coercive tactics which were revealed in the fatal Hulsey memo of January 30. On the other hand, the Operating Engineers and Labor Department regional administrators remain unflappable—seemingly oblivious to the course of recent events and unconcerned about the as-yet unpublished findings of the investigation.

On May 13, 1978, the Department of Labor awarded a construction training contract to the Operating Engineers Union in the amount of $450,000. General President Jay Turner of the union jetted to San Francisco for the signing ceremony. A union press release of May 13 said, "Turner complimented Secretary of Labor F. Ray Marshall and Representative Phil Burton (D.-San Francisco) for their cooperation in establishing the new training program." The statement quoted Turner as Saying that Burton had been very active in supporting the Department of Labor and the Operating Engineers in their efforts on Guam. The contract provides funds to train 150 workers in construction trades, and to upgrade the skills of 50 additional workers. Dale Marr, who was present both at the November 18 meeting with Burton and at the signing ceremony, characteristically predicted, "If Guam contractors do not cooperate with the government by hiring these workers once they are trained, the Labor Department undoubtedly will have to tighten its enforcement of federal wage and hour rules."

This remark makes it clear that union leaders anticipate the continued assistance of the U.S. Labor Department in their drive to organize the construction trades on Guam. And they may just be right. It is likely that most of the 200 union trainees will turn out to be union men. If 10 percent of them also receive training in organizing techniques, the union will then have a 20-man task force to spread its influence across the island. Under current regulations, no contractor who uses alien labor will be able to refuse union-trained workers. And since all contractors depend on alien labor, all will have to welcome the newly trained worker-organizers. For the next 18 months, the union can consolidate its membership while "adverse effect rates" push up industry wages.

Large American construction concerns like Dillingham are favored by these conditions. Because wages are established by the Labor Department and paid through Defense Department contracts, cooperation with the Operating Engineers becomes a viable and paid through Defense Department contracts, cooperation with the tractors will dwindle as increased payrolls and tighter controls on the use of alien labor force many contractors out of business. As wage rates in Guam approach parity with those on Hawaii and the U.S. mainland, importing American workers will become more and more common. Foreign construction firms which have traditionally depended on cheap labor and advantageous currency exchange rates for their competitive edge will be handicapped by increased unionization and Labor Department policies structured to accommodate American interests and workers on Guam.

Several unanswered questions remain. They suggest that a full congressional investigation of this matter may be appropriate: What, if anything, did Representative Burton and the governor of Hawaii get for their troubles? Was their action a political payoff involving public funds? Why has the Labor Department investigation been stalled? By what reasoning has Secretary Marshall failed to grant an administrative

hearing or, in fact, take any action in the face of blatant official wrongdoings perpetrated by top Labor Department administrators? And finally, what remedies will be available to the Guam employers when Local 3 has succeeded in locking up the island?

Mr. NELSON. Mr. President, we will go along with the amendment as presently drafted, and I am prepared to accept it.

Mr. JAVITS. Mr. President, I understand this amendment has been worked out with Senator HELMS. I am not happy with it, but in the interest of facilitating passage of the bill, I interpose no objection.

Mr. HELMS. Mr. President, I appreciate the comments of the distinguished Senator from Wisconsin and the distinguished Senator from New York. I appreciate their being willing to accept the amendment.

I would like to have the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. ZORINSKY). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, will the Senator agree to have it back-to-back with passage of the bill?

Mr. HELMS. Indeed, I do.

Mr. JAVITS. Mr. President, I ask unanimous consent that the rollcall on this amendment take place immediately prior to the vote on passage of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back.

The bill is open to further amendment.

UP AMENDMENT NO. 1806

(Purpose: To assure that at least 90 percent of the funds used for private sector opportunities for economically disadvantaged are expended only for wages, employment benefits, training, and supportive services)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 1806.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 382, between lines 3 and 4, insert the following:

"(c) Not less than 90 per centum of the funds allocated in accordance with the provisions of this part which are used by a prime sponsor for private sector programs under this title shall be expended only for wages, employment benefits, training, and supportive services, to persons employed in private sector jobs pursuant to this title. The remaining funds may be used for administrative and other allowable costs (such as supplies, materials, and equipment) incurred by the prime sponsor, private industry councils, project applicants or subgrantees or contractors, in accordance with such regulations as the Secretary may prescribe.

Mr. HEINZ. Mr. President, the amendment which I offer today will insure that the funds authorized to be appropriated under title VII of the CETA bill, the private sector opportunities for the economically disadvantaged, will be expended primarily for promoting job opportunities, and not for administrative costs. My amendment would require not less than 90 percent of the funds allocated under title VII to be expended only for wages, employment benefits, training, and supportive services to persons employed pursuant to the conditions of this title. The remaining funds may be used for administrative costs and other allowable costs incurred by the prime sponsor, private industry councils, or contractors according to regulations to be developed by the Secretary of Labor. This means that of the $400 million authorization, no less than $360 million would be used for wages, training, and supportive services, and $40 million for administrative costs.

I believe it is high time we moved to get the private sector more involved in our efforts to get the people in this country back to work. Public service employment, as we all know, is not the place to build permanent jobs. And if we are serious about providing permanent employment opportunities, we must look for help to the private sector. Through the effective linking of CETA prime sponsor activities and the private sector involvement we can begin to address the problem of structural unemployment that has been plaguing our Nation. Government cannot do it alone, as our past experiences in this and other programs have shown us. While the CETA program has been working to try to develop employment opportunities for the economically disadvantaged, a great deal of concern has been expressed to me that the program has trained people in areas where there are no available jobs; and that there is no mechanism to effectively match training with future projected areas of need.

Title VII is a real attempt to improve those necessary linkages between private industry and CETA prime sponsors and assure the integration of business community activities with CETA activities toward a common goal.

But I am concerned that simply authorizing a sum of money without providing some guidelines as to how it is to be spent would be irresponsible. We have already seen the results of this kind of oversight in the charges of abuse and fraud that have met other Federal programs in the past, and, indeed, this program as well. I believe that the earmarking of funds to be spent for jobs and those to be used for staff and other administrative costs would be a reasonable and responsible approach to avoiding on the front end the kind of problems that could possibly occur further down the road.

Everyone knows what is expected of each party right from the beginning. The prime sponsors and the private industry councils know what is expected of them; what they will be held accountable for in the future; and the program perimeters within which they must operate. The Department of Labor knows what the Congress expects them to monitor and enforce. Yet, my amendment still leaves for the prime sponsors and the private industry councils the flexibility necessary to carry out the program activities encouraged under this title.

In sum, I am encouraged by this attempt to change the structural direction of the CETA program and begin in earnest to put the unemployed and economically disadvantaged back to work in jobs which ultimately contribute not only to their feeling of participation and self-worth, but also to the greater productivity and real growth of our national economy.

Mr. President, I understand that the committee has reviewed the amendment I offer today and is willing to accept it.

This is an amendment that has been discussed with the committee. Its purpose is to insure that at least 90 percent of the funds used for private sector opportunities for economically disadvantaged are expended only for wages, employment benefits, training, and support services.

It is my understanding the committee has evaluated this amendment and concurs in it.

Mr. NELSON. I was momentarily diverted and did not hear the inquiry of the Senator from Pennsylvania.

Mr. HEINZ. It is my understanding that the committee has carefully looked at this amendment and feels it can accept it.

Mr. NELSON. Yes, we have looked at this amendment and that sets the same percentage limitations as in the other titles of the bill, and I have no objection to it.

Mr. JAVITS. I have no objection either.

Mr. HEINZ. I thank my colleagues.

The PRESIDING OFFICER Is all time yielded back?

Mr. JAVITS. We yield back our time.

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield back his time?

Mr. HEINZ. I do.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1807

(Purpose: To provide for private employer incentive grant projects)

Mr. HEINZ. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 1807.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 278, between lines 2 and 3 insert the following new section:

"PRIVATE EMPLOYER INCENTIVE GRANT PROJECTS

"SEC. 318. (a) In order to achieve certain national and regional priorities and to provide incentives to private employers to employ individuals eligible for assistance under this Act, particularly unemployed veterans, youths and economically disadvantaged individuals, to provide additional employment opportunities the Secretary is authorized to make grants to private employers in accordance with the provisions of this section.

"(b) No grant may be made under this section unless the Secretary determines—

"(1) that the project for which the grant is made under this section will contribute to carrying out the purposes of this Act and will contribute to attaining other national priorities including, but not limited to, better housng, health care, agriculture, and transportation;

"(2) that the project for which the grant is made under this section will have a reasonable prospect of leading to long-term employment for individuals employed with assistance under this section;

"(3) that the private employer will provide to the employee assisted under this section training designed to contribute to such long-term employment potential;

"(4) that the project assisted under this section will not result in the displacement of any other employee of the private employer participating in the project assisted under this Act;

"(5) that the grant is applied by the private employer only for wages for employees assisted under this section;

"(6) that wages paid to individuals employed with the assistance under this section will not exceed the wage rate set forth in Title VI of this Act; and

"(7) that individuals employed with assistance under this section will be paid for a period not to exceed 6 months of employment with the private employer participating in the project assisted under this Act, unless the Secretary finds that a longer period is needed in order to achieve the purposes of this section, but in any event such period shall not exceed 12 months.

"(c) The Secretary shall establish such other necessary and reasonable criteria for making grants to achieve the purposes of this section.

On page 179, in the Table of Contents, after item Sec. 305. Insert the following:

"Sec. 306. Private employer incentive grant projects."

Mr. HEINZ. Mr. President, this amendment would authorize the Secretary of Labor to do something he cannot now do, and that is to establish programs to create employment opportunities in the private sector for individuals eligible for assistance under CETA by making grants available to private employers under title III.

Title III, of course, Mr. President, is the special national programs and activities title of this bill.

I first want to commend the managers of the bill, Mr. President, and the committee for a thorough, thoughtful work product. I know that Senator WILLIAMS, Senator NELSON, and Senator JAVITS have worked extremely hard on this legislation and that they have also carefully considered the issue raised by my amendment, private sector employment incentives. My interest in such incentives has been long-standing.

Over the last several years, I have endeavored on several occasions to persuade Congress to address this important issue. In fact, the Commerce Committees of the House and Senate were agreed in 1975 to adopt this approach; that is, programs to encourage private sector employment.

Now, title VII of this bill is a step in the right direction; it encourages private sector employment opportunities.

Title VII of the bill, through the establishment of private industry councils, each established within a prime sponsor area, will allow some private sector involvement in the CETA program, and that is good. But what is also equally true, because of the local nature of each prime sponsor area, is that the impact of those job initiatives will also be local. My amendment seeks to do the same thing, to encourage private sector employment, but on a national and regional level, by giving the Secretary authority to establish a national private employment program through which it will be possible to create both private employment opportunities and address national or regional priorities in a coordinated manner.

Addressing local priorities under title VII is good, but it is not enough. It cannot possibly succeed in meeting a national or regional priority as this amendment would authorize the Secretary to do.

I am sure the committee is familiar with the criticism that some have leveled against public service jobs as "makework" or "raking leaves and sweeping streets." While this may not be a fair characterization, the fact is that many of the jobs we provide under CETA are service-oriented and do not result in the construction or rehabilitation of vital facilities, for example, schools or hospitals or housing or bridges or roads or irrigation projects or what have you.

This amendment would provide an opportunity for jobs that produce lasting public benefits. A case in point, and one I think we are all familiar with, indeed, the Senate and the House in the 94th Congress passed legislation to this effect, is; namely, the rehabilitation of unsafe rail lines. As I say, that is a case in point. That is a precedent for this kind of program.

I am as concerned about costs as anybody else. I want to explicitly and emphatically point out that this amendment does not increase any cost, does not mandate any expenditures, does not increase any authorizations in the bill.

The purpose of this amendment, as I said in the beginning, is simply to give the Secretary discretion that he does not now have to take advantage of private sector opportunities through programs which would further national and regional needs in ways not possible under title VII or any other title of this bill.

Mr. President, I think there is general agreement that giving the unemployed the means to enter the private sector will reduce the need for long-term Government support of them while, most importantly, providing these Americans with job opportunities they deserve.

My amendment is carefully drawn to achieve these goals, while insuring that the Secretary provides rigid safeguards to prevent unjustifiable expenditures. It includes provisions to prohibit displacement of any existing employees or substitution for any other expenditure. It limits grants to those projects which would have a reasonable prospect of long-term employment, and which would include employer training programs designed to contribute to such employment.

It would establish the same wage rate limit which is set forth in title VI. It would require that grants not only achieve the purpose of the bill but would also contribute to other national priorities, including, but by no means limited to, such things as better housing, health care, agriculture, and transportation.

Mr. President, I think the time has come for us to broaden our focus, to develop programs to move the unemployed into productive positions in the private sector. Such programs can, and I believe they will, provide disadvantaged individuals, unemployed individuals, young people, minorities, veterans, and other groups to which CETA is correctly and justifiably directed, with the skills and experience to secure permanent, unsubsidized jobs in the private sector.

It is to this end, and to meet these goals, Mr. President, that I direct my amendment, and I hope my colleagues will accept it.

I reserve the remainder of my time.

Mr. JAVITS. Mr. President, I think that my attitude toward this amendment can best be characterized by a Member who approached me and said, "How are you going to handle this thing?" Because that is very accurate.

The fact is that I am extremely sympathetic to such actions, so much so that I introduced, in 1975, a bill to employ 20,000 workers on, generally speaking, a combination of public and private terms, to rehabilitate the railroads. Anybody who has taken a ride on the railroad, especially in the East, will cheer and applaud.

Our problem, Senator HEINZ, very frankly is this: You are putting your amendment in title III, which is the national projects title. Title III covers a great many people that we want to cover. They are spelled out in great detail, and as a matter of fact we have included another group today, respecting educational credentials. But they would include offenders, people of limited English language proficiency, handicapped individuals, single parents, displaced homemakers, youth, older workers, and so on—$400 million is provided for this title, and we have every right to expect that something like that is likely to be provided again.

The problem which we have is that what you want us to do is turn over this volition to a Secretary, without any more specificity, really, than that. Also, it presents some very grave union problems, Senator. I ran into that with the railroad proposition.

In addition, the bill already has two programs which are somewhat directed along these lines. One is found at section 439(a), which deals with an effort to provide particular incentives to pri-

vate business to establish additional employment opportunities for youth who have not had significant previous employment experience; this is Senator HAYAKAWA's "social bonus" program. We are to experiment with that in 10 areas. Then we have another program at page 286 of the bill, which is a voucher program. That is a well-known scheme by which we will give the individual a voucher in terms, again, of youth, to go out and see what he can do, carrying with him, as it were, the amount which the Government is willing to use to finance him in a job, and we call for a report by the Secretary no later than October 1, 1980, evaluating the effectiveness of this demonstration project.

I think the idea is a good one, as I say. I so characterized it myself when I opened, because it is something I have had very much in mind.

Pragmatically, I doubt whether we can do anything with it in CETA at this late stage of the consideration of the bill. Those are the realities of life. This would be threatening to various other vested people who will come under this national projects title, justly or unjustly.

So my feeling would be—as I say, I am very sympathetic, but my feeling would be that we need a somewhat more matured concept for this particular kind of enterprise, and as the ranking member of the committee, I would certainly do my utmost to press for a hearing upon a bill which the Senator could introduce, which could carry this idea.

I am deeply concerned that if we run the course of the hazard of a motion to table on this bill, and the amendment is tabled, while we always like to feel that tabling only means we do not want to think about it right now, actually it may mean more than that, and a very good idea may be run down the drain just because we are not ready for it on this particular bill.

I am laying that before the Senator very frankly. My colleague will expand on it.

Mr. NELSON. Mr. President, I wonder if I might make a suggestion. The objectives sought by the Senator from Pennsylvania I think everyone will agree with. It is, we find from dealing with this question in the Finance and Human Resources Committees, very complicated, but I wonder if I could make a suggestion to the Senator.

We have not had an opportunity to look at his proposal very closely, and, as the Senator from New York said, we have not had a chance to have hearings. However, there is a vehicle coming along, in the major tax bill. We have the question before us in the Finance Committee right now of expanding or modifying the current tax credit provision to employers who hire additional employees over their past number, employees in excess of 102 percent of their previous year's employees.

We will start the markup on that legislation, I believe, at the end of the first week or the beginning of the second week after we return from the Labor Day recess. I have no notion of what the Finance Committee itself may do with it or wish to do with it, but if the Senator offered his proposal as a bill, it would go to Finance in the meantime, and at least have an opportunity for everyone to take a look at the provisions of the bill; thus there would be an opportunity for the Finance Committee to consider it, and then there would be an opportunity, in the event the Finance Committee did nothing with it or did not approve of it, at least, to bring to the floor a bill that has been available to Senators for 2 or 3 weeks. If the Senator then still thought it was an amendment that ought to go on, there would still be a vehicle, which is the tax bill, to offer it on the floor at that time, rather than to this bill.

Mr. HEINZ. First, I think both of you have made excellent cases for this amendment, and I appreciate that. I understand also, Senator JAVITS, some of your concerns.

I would like to address those concerns because the Senator is a true expert in this matter and I think he is properly considered the father of the CETA legislation.

Taking the points as I recollect them, the Senator pointed out correctly that title III covers many, many groups of people. Indeed, the intention of my amendment is to cover exactly the same group. We would not be adding or subtracting any people. What we would be adding are different kinds of job opportunities if the Secretary of Labor feels that these opportunities are worthwhile and accomplish the purposes of the act.

The Senator also points out that we do delegate discretionary authority to the Secretary. This is not the first time we have done that. We have delegated a lot of authority to the various Cabinet Secretaries, and, indeed, we should.

This amendment contains most of the safeguards that anybody would reasonably want: safeguards against substitutions, safeguards to insure no diversion of the money, safeguards to insure that no outrageous wage is paid, safeguards to insure that any payment made in the form of a supplement does not go to somebody with an extremely high salary, and so forth.

If the Senator will look carefully at the third page of my amendment, he will see that we tell the Secretary to establish—and he will have to do so by regulation—such other necessary and reasonable criteria for making grants as he deems appropriate.

Therefore, he is going to be on the public record in implementing these programs, there is going to be opportunities for public comment. Senators from New York, from New Jersey, myself, anybody may comment. After all, we are the Congress, and if we do not like what the Secretary is doing we do not have to fund everything he wants to do. We have the power over the purse strings. We have the appropriations process. If we find that these programs are not working, we can terminate them, but I do not think that will be the case.

The Senator from New York, my good friend, brings up the question of union problems. I know what he is talking about. There may be matters which must be worked out, but I do not know of anybody better to deal with union disagreements of the nature we encountered on the rail jobs bill than the Secretary of Labor. If not the Secretary of Labor, who is better qualified? I do not know.

With respect to section 439 of the bill, the so-called social bonus program, that is a good program. It is directed toward youth with no job experience. However, it is also only a demonstration program. It goes just to 10 areas and those 10 areas are, once again, under the jurisdiction, so to speak, of the local prime sponsors. So it does not have the national or regional scope. It could not be used to meet those national or regional needs that I would hope would be met by my amendment.

The Senator also mentions section 317, which establishes a voucher program. Again, it is a demonstration program. Again, it is one subject to control by prime sponsors. It could not further the regional and national goals that I would hope my amendment would serve.

Finally, the Senator from New York has mentioned that he felt possibly that this amendment might create some threats to somebody or some group.

I do know this about my amendment, that it applies to the same people we are trying to help under title III and title I, the very same people, the same unemployed, the same underemployed. Those are the people who need jobs, who need permanent jobs, who need real jobs. I am a little at a loss to know exactly who we are threatening.

This simply provides an additional degree of freedom to those people we are trying to help. If we have reached the stage where freedom is a threat, then, indeed, we have changed what this country is all about.

Perhaps the Senator from New York would want to make that statement clearer. I honestly cannot see who it is that this amendment threatens.

To my good friend from Wisconsin (Mr. NELSON), I commend him and the work of the Finance Committee on the employment tax credit on which I know he is working. I do not know what the future will hold in the Finance Committee. He may or may not be able to write legislation that will be enacted into law. I do not wish to prejudge. We simply do not know.

I do know that we have precedents for this approach. The Senator from New York was kind and thoughtful enough to point out that he had supported, and the committee had passed, a similar measure, similarly targeted toward one area of our economy, the rail industry, by the creation of jobs for the unemployed restoring our railroad lines.

I would hope, Mr. President, that the committee could accept this amendment.

Mr. NELSON. Mr. President, I know the distinguished Senator from Pennsylvania is aware how complicated legislation of this kind is. Even if I studied it for the next week and reached the conclusion that this legislation was properly drafted and a good idea, that still does not permit me to support it today.

We started on this CETA legislation in February of this year. We conducted extensive hearings. The question of sub-

sidizing wages is a very complicated business, as the Senator knows.

We reported the bill more than 3 months ago. It has been here for over 3 months. The Senator now offers an amendment, which I saw for the first time 10 minutes ago, on an enormously complicated thing.

I know the Senator has thought about it because he drafted it, but those of us who are managing the legislation are certainly entitled to as much time to consider the implications of the legislation as the drafter of the amendment.

That is why I suggested what I believe to be a proper suggestion, that there is an appropriate vehicle, much more appropriate than this bill, which will be before us in 3 or 4 weeks. If the Senator would reconsider the concept of introducing it, so that it is printed, so that everyone involved has an opportunity to examine it, so that the Finance Committee has the opportunity to look at it, then if the Finance Committee did not agree, and I suspect they would not without any hearings because it is rare to adopt this kind of a complicated provision without some kind of hearings—I would feel irresponsible to accept it myself without having hearings on it—then the Senator would have the opportunity to come to the floor of the Senate 3 weeks or a month from now and say, "I introduced the legislation and I am now offering it as an appropriate amendment to the tax bill," which, in itself, will contain legislation for a tax credit, not a wage subsidy.

Then I think it would be a reasonable argument to say, "Well, the Finance Committee looked at it, the Members of the Congress have had a chance to look at it, the Senate, and the administration has had a chance to look at it. It is no surprise to anybody. Let us take it up and debate it."

Quite frankly, to ask me, as manager of the bill to accept an enormously complicated proposal, which has all kinds of implications in it, is asking much too much.

I urge the Senator to offer it today as a bill, and then bring it before the Committee on Finance. Then we shall have time to take a look at it. I might very well conclude, 3 weeks from now, when I am on the Finance Committee, that I could support it. I might conclude I cannot. But at least I would have a reason for supporting or opposing it. I cannot give any detailed analysis of the reasons pro or con at this time, since I have not had the chance to examine the legislation that the Senator from Pennsylvania, himself, has had.

Mr. HEINZ. I understand the feelings of the Senator from Wisconsin. I wish I could say it is an original amendment. It is not. We have had amendments like this before. I know the committee has had a lot of discussion about it. Notwithstanding that, even if I were to grant as 100-percent correct everything that the Senator has just asserted, the fact is that this is only permissive authority.

Even if the Secretary abused his discretion, even if he got around the regulation-writing process, even if we forgot how to read them, we still have the Committee on Appropriations as a brake if that is what the Senator is concerned about.

I just say briefly, Mr. President, and I do want to be brief because I know my colleagues want to get to a vote on this amendment, I am still concerned for those who are now unemployed. They do not much care that we, here in Washington, want to wait a month, 2 months, 4 months, 6 months, or, as in the case of the railroad jobs now, 3 years. They want decent employment opportunities. They want a chance to earn their own way. That simply is the purpose of this amendment.

I ask for the yeas and nays on the amendment. Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. NELSON. Mr. President, I move to lay the amendment on the table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, I realize that the motion to table is not debatable, but I ask unanimous consent that this rollcall, too, may come back to back with the other, the rollcall on Senator HELMS' amendment and final passage.

The PRESIDING OFFICER. Is there objection?

Mr. HEINZ. When might that occur?

Mr. JAVITS. Right away. We do not know of any other amendments.

Mr. HEINZ. I have no objection.

Mr. NELSON. In what order would they come?

Mr. JAVITS. My intention, I say to the Chair, was that this tabling motion would come first, followed by Helms, followed by what is, I assume, passage.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I yield myself 2 minutes on the bill and no more, because I do not want to detain the Senate any more. I should like to answer a couple of questions, because I shall vote to table with tears in my eyes, because I really like this amendment. But I cannot do anything else, and I shall explain why.

The Senator says we are going to use all the people who are provided for by title III. I doubt very much that we are going to satisfy those who are interested in offenders—that is, criminal law offenders—those who are interested in homemakers or the older workers, or handicapped individuals, that these broad national and regional projects are going to use them. We are going to have to use an awful lot of them and use more than $400 million.

Second, the Senator has made it mandatory that grants are to be provided to private employers to defray the wage costs only of the first 6 months of employment. Well, the juxtaposition between that and CETA is very great, On the one title, it is 6 months; under another title, it is 18 months. We are only experimenting with the idea of subsidizing private business. Under no circumstances that I know of has the United States paid the compensation of CETA workers who are working for private business. This is quite a stretch of this program.

So, again, I have one last suggestion to the Senator. We have a March 1 deadline for the Joint Economic Committee study. I believe, and I counsel him as my friend—and he knows that happens to be true in this case—that he ought to take about 5 minutes and write a paragraph saying that the JEC should report back on this proposition. He does not lose anything. If he wins on his motion to table and we take his amendment, he loses nothing. But I should like to see this proposition reported on. It is going to be studied by a very competent staff and it will take just three lines to make it part of that study. Then the Senators——

The PRESIDING OFFICER (Mr. NUNN). The Senator's time has expired.

Mr. JAVITS. I yield myself another minute on the bill.

Mr. President, I suggest the absence of a quorum on my time.

Mr. ZORINSKY. Mr. President——

The PRESIDING OFFICER. Does the Senator withhold his suggestion of a quorum?

Mr. JAVITS. Of course.

Mr. ZORINSKY. Could the majority floor manager yield me 1 minute for entering a statement into the RECORD?

Mr. JAVITS. I yield 2 minutes.

Mr. ZORINSKY. Mr. President. I rise in support of this legislation. The CETA program is a good one. The Comprehensive Employment and Training Act is one instance where a Federal program has had a positive impact on many Americans. CETA strives not to foster a dependence on government, but to train men and women to be independent and productive members of society. Of course it is not perfect—it has flaws—however, I say from first-hand experience that this program can work, it will work, and it is working in many communities throughout the country in helping to create jobs, in helping to train workers and in easing the waste of human energy that comes from unemployment.

In Washington, tax dollars are spent too freely and my voting record reflects a commitment to check the spendthrift inclinations that seems to pervade this town. But commonsense and logic dictate that it is more fiscally sound and more cost-efficient to establish programs which provide job training and experience than to pay the tremendous costs associated with high unemployment. We should not give the CETA program unbridled license to expand, but any changes in the CETA entitlements contained in S. 2570 should not be made without examining the long-range cost-effectiveness of these changes. I consider myself a fiscal conservative and I ask my colleagues not only to reflect on the costs of this program, but the high price we would pay if we did not have CETA.

I know there are problems with CETA and it is not perfect. But any reform of CETA should be structured to deal with the mismanagement, waste and cor-

ruption that has plagued some CETA programs, without destroying the decentralized authority that has allowed many CETA programs to become flexible and effective tools in dealing with unemployment.

Obviously, a high degree of accountability and program monitoring must be instituted to insure the integrity of this program and provisions in the CETA legislation before Congress will help promote just that. In the act, there are sections dealing with corruption in CETA—providing criminal sanctions for such activities as kickbacks, embezzlement of funds, and obstruction of CETA investigations. Bonding is required for officers, directors, agents, and employees of CETA recipients who handle funds or property under the act. No program may involve political activities and CETA wages are limited to a reasonable and realistic figure. Discrimination is prohibited and the Secretary of Labor is given better monitoring and investigatory authority. In addition, on Tuesday, an amendment to S. 2570 by the Senator from New Mexico, Mr. DOMENICI, was unanimously adopted; this amendment will strengthen the Secretary's ability to police the program even more. This measure, as it has been amended, will go far in ending the abuses that have plagued CETA.

In recent months there have been a number of news stories about CETA programs marked by scandal and abuse. Yet, we have heard little of the good news about CETA. Why? One reason is that many prime sponsors are busy trying to help people who are out of work and who need counseling, training, and job experience. Where the prime sponsors are effective in administering comprehensive employment and training programs, they do not really have time for a comprehensive public relations campaign. There are many cases where CETA programs are working extremely well.

I have seen the CETA program firsthand in Omaha where CETA performed an excellent job of training workers who were laid off. I have seen CETA's positive impact, both in terms of dollars, wisely and prudently managed, and in terms of bettered human lives. Although many programs are a waste and some CETA programs are poorly administered, the program in Omaha is compelling evidence that CETA can succeed in helping persons become less dependent on public dollars and more productive as contributing members of their community.

I ask to have printed in the RECORD an article by Bob Armstrong, director of CETA in Omaha, that was recently printed in the Omaha World Herald. Mr. Armstrong wrote this in response to a number of articles condemning the CETA program. The article does an excellent job of pointing out the shortsightedness of many of the armchair critics of CETA and underlining the effectiveness that CETA has had in Omaha and elsewhere.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Omaha World Herald, Aug. 16, 1978]

BUILD ON SUCCESSES OF JOB PLAN

(By Robert L. Armstrong)

In the August 8 World-Herald, James J. Kilpatrick jumped on the Comprehensive Employment and Training Act (CETA) bandwagon, borrowed heavily from an article written by Ralph K. Bennett in the August issue of Reader's Digest, added a few adjectives, and became a self-proclaimed critic of CETA. I find this kind of journalistic piracy deplorable.

I should point out that there are 466 CETA programs around the country. The number of programs criticized in all of the articles written totals 22. I would be the first to admit that all CETA programs are not responsibly administered; however, the percentage is quite small and has been blown completely out of proportion. For those of us who put in long hours trying to help people in need and who are unemployed, this kind of journalism is irresponsible and immature.

If Kilpatrick and other critics properly researched CETA, they would find there are different parts or titles which make up the total act. Contrary to what Kilpatrick reported, the original intent of CETA is still intact.

Title I assists the "hard-core" unemployed by providing needed vocational and academic training: Title II provides subsidized employment for 12 months to those individuals who have skills, but are unemployed; Title III provides funding for youth programs and special projects; Title IV provides funding for the Job Corps; Title V establishes a National Commission for Manpower Policy; and Title VI (the one that has received all the criticism) provides staff funding for community projects in non-profit organizations. I might also add that Title VI was the last one developed, and was designed to ease the recession of 1975.

We have an outstanding CETA Program in Omaha. We are serving all segments of society that need our help, as intended by the act. We have not been accused or found guilty of favoritism, nepotism, political handouts, and/or mismanagement of our program.

I have never been asked or pressured, during my eight years' involvement with employment and training programs, by any elected official to put into effect any irregular or irresponsible activity. I think this speaks well for the integrity of the elected officials in the Douglas and Sarpy County area.

If more of these self-appointed CETA critics would travel beyond their typewriters and telephones and observe a CETA program in operation, then perhaps they would understand that CETA, as it currently exists, is not a bad piece of legislation.

I do not believe that a good program can be legislated. I believe that administrators and local staff, with the cooperation of the total community, can make any program work if given the flexibility to adjust their program to local needs. Omaha has done this, and done it well.

Any business organization which is successful does not scrap its entire operation because a few of its units are not functioning properly; rather they concentrate on resolving the weaknesses and bringing those sub-standard units up to par. So it should also be with CETA.

I would hate to see a good piece of legislation destroyed because of the errors of a few; instead, it should be built around the successes of the majority.

Mr. NELSON. Mr. President, I ask unanimous consent that the last two votes, the vote on the Helms amendment and the vote on final passage, be limited to 10 minutes.

The PRESIDING OFFICER (Mr. HOLLINGS). Is there objection?

Mr. SCOTT. Mr. President, reserving the right to object, could we have a 15-minute vote on the first and then 10-minute votes on all subsequent ones?

Mr. NELSON. That is my intention.

Mr. SCOTT. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum on my time.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, as far as I know, I do not wish to call for third reading, because we shall have another minor amendment, but just for the information of Members, I do not know of any other amendments and we are ready to vote on the tabling motion in respect of the Heinz amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the Heinz amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Maine (Mr. HATHAWAY), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Maine (Mr. MUSKIE), the Senator from Tennessee (Mr. SASSER), and the Senator from Alabama (Mr. SPARKMAN) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BARTLETT), the Senator from Massachusetts (Mr. BROOKE), the Senator from Missouri (Mr. DANFORTH), the Senator from New Mexico (Mr. DOMENICI), the Senator from Maryland (Mr. MATHIAS), the Senator from Kansas (Mr. PEARSON), and the Senator from New Mexico (Mr. SCHMITT) are necessarily absent.

The result was announced—yeas 47, nays 32, as follows:

[Rollcall Vote No. 366 Leg.]

YEAS—47

| | | |
|---|---|---|
| Allen | Glenn | Nelson |
| Bayh | Hart | Pell |
| Bentsen | Hodges | Proxmire |
| Bumpers | Hollings | Randolph |
| Burdick | Inouye | Ribicoff |

| Eastland | Kennedy | |

So the motion to lay on the table UP amendment No. 1807 was agreed to.

UP AMENDMENT NO. 1808

Mr. JAVITS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. JAVITS), on behalf of himself and Mr. Heinz, proposes an unprinted amendment numbered 1808.

Mr. JAVITS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. I will read the amendment to the Senate.

I submit this amendment on behalf of myself and Senator HEINZ. It is in deference to the fact that many of us think he had a good idea, though we voted to table. But the matter hit us at a moment when we could not take it, as managers.

So my suggestion is to give him a study, and we have one study in the bill now; so the amendment reads as follows:

On page 385 insert the following: "The Joint Economic Committee as part of the above report to the Congress, is requested to include with recommendations, if any, an analysis of the subject of incentive grants, or other assistance permissible under this act, to private employers in reducing unemployment rates among individuals eligible for assistance under this act, through national priority projects, including, but not limited to, better housing, health care, agriculture and transportation".

As one of the managers of the bill, I find the amendment acceptable.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. HEINZ. I thank the Senator from New York sincerely for his amendment. I am pleased to be a cosponsor. I appreciate his interest in obtaining a definitive recommendation in the form of a study.

I thank Senator JAVITS and Senator NELSON.

Mr. NELSON. Mr. President, the amendment offered by the distinguished Senators from New York and Pennsylvania is perfectly acceptable to me.

I yield back the remainder of my time.

Mr. JAVITS. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. WEICKER. Mr. President, I wonder if the distinguished managers of the bill will yield for a question.

Do they have a cost estimate for the study which is requested in this amendment?

Mr. JAVITS. I believe it will represent no greater cost than the cost we already have of the study, which is an amendment to the bill, by the Joint Economic Committee, of the subject generally.

Mr. WEICKER. So the Senator does not feel that this will add to that cost?

Mr. JAVITS. Not at all.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, I do not have an amendment.

Mr. President, will the Senator yield me time on the bill?

Mr. NELSON. I yield whatever time the Senator desires from the bill.

Mr. HELMS. I thank the Senator.

Mr. President, several Senators have close schedules and need to catch planes. The yeas and nays have been ordered on an amendment which I submitted earlier this afternoon which is acceptable to the managers of the bill. To save Senators time I ask unanimous consent that the order for the yeas and nays on my amendment be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, will the Senator yield further?

Mr. NELSON. I yield.

Mr. HELMS. Mr. President, CETA has grown, in just 4 years time, from a relatively modest $1.5 billion program to $11 billion. Such incredible growth really is no surprise, because this is just another typical example of the futility of throwing tax dollar after tax dollar at a problem.

But we cannot be blind to the real problem in this country at the present time: the overburdened American taxpayer who is on the verge of total revolt against the big spending policies of this Congress, and rightfully so. If we really wanted to do something for the oppressed taxpayers of this country, we would curtail this massive CETA boondoggle.

Nearly every day I read about some new and startling example of CETA funding abuse. For many people, CETA has become a better alternative than going to work for the minimum wage. Perhaps James J. Kilpatrick has described it best:

The authors of this grotesque imposition on the taxpayers could not prevent abuses if they kept at the rewriting job till Christmas. Nothing in my experience—not food stamps, nor foreign aid, nor the old Job Corps, nor the follies of the arts and humanities people—nothing has approached the sheer mind-boggling, boondoggling waste and corruption of the CETA billions.

And millions of Americans feel exactly the same way. Typical of the many letters I have received is one that came from Mr. Daniel M. Harris of Raleigh, N.C. Listen, my colleagues, to what he wrote:

Given the choice of supporting the Carter Administration plan to maintain the present CETA program or Senator Roth's suggestion for tax cuts that will guarantee business expansion and the creation of permanent taxpaying jobs, I would support the latter. CETA will do nothing except contribute to more inflation.

Why not follow Mr. Harris' suggestion and approve the Kemp-Roth concept? Why not create real jobs, real business expansion, and real economic opportunity?

The amendments that have been adopted are just feeble gestures toward reform of the CETA boondoggle, and there is no doubt in my mind that we will be reading about massive abuses in the program this same time next year. We are not helping the taxpayers with this big spending, inflationary program. To the contrary, we would perform a great service for the American taxpayer if we just let CETA die right here today.

I thank the Senator.

AMENDMENT NO. 1805

Mr. NELSON. Mr. President, we have discussed this amendment. Speaking as manager of the bill I am prepared to accept this.

Mr. JAVITS. We have no objection.

Mr. NELSON. I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NELSON. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. No, not on passage.

Mr. JAVITS. Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, I yield a half minute to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I ask unanimous consent that Mr. Eric Hultman of the Judiciary Committee staff, be accorded the privilege of the floor during the vote on S. 2970.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, I give my utmost support to S. 2570, a bill to amend the Comprehensive Employment and Training Act of 1973 and to praise the floor manager, the able and dedicated Senator from Wisconsin, Mr. NELSON and the ranking minority member of the Subcommittee on Employment, Poverty, and Migratory Labor, Senator JAVITS of New York, and to acknowledge the important input from the Senator from New Jersey, Mr. WILLIAMS, as chairman of the Human Resources Committee.

As ranking majority member of the authorizing committee for the Comprehensive Employment and Training Act, I have worked, in conjunction with my colleagues on the committee, to revise and modify this program to facilitate the accomplishment of the program's goals as defined in the act we authored in 1973. This program, through its decentralized implementation, provides an opportunity for all Americans to be among the ranks of the employed, contributing to their families, their communities, and the country.

An ancillary benefit of this program, but of great significance, is its ability to afford our country's disadvantaged the opportunity to develop the sense of self esteem and self worth which accompanies gainful employment.

CETA reaches out to attack, head-on, one of our country's most persistent problems—chronic unemployment. Through its job training and counseling provisions, its public service employment, and its involvement of the private sector, CETA has, in large part, been responsible for reducing the rate of unemployment from greater than 8 percent in 1976 to its current level of less than 6 percent. This contribution alone should serve as a mandate to the Congress to reauthorize and offer its uncompromised support to the CETA program.

Therefore, I join with those who express genuine concern and a deep feeling of urgency about the need for passage of CETA legislation without delay and without crippling amendments.

In our State of West Virginia and throughout the Appalachian region, we are familiar with the damaging effects that follow when projects legislated begin to work and then are suddenly curtailed, weakened, cut back, or designed for built-in failure.

I am especially concerned that we not "throw out the proverbial baby with the bath water" as we try to correct problems with the program.

There are some programs that have been operating successfully under CETA. We do not hear about them. Some point with alarm to the programs that are guilty of misuse and abuse of Federal funds. Seldom is it newsmaking to report reliable, dependable programs that year after year recruit those people who need help, and give them motivational and attitudinal training as well as skills training, place them on a job and provide them with "hands-on" counseling throughout the entire process.

A program which does just this is OIC, Opportunities Industrialization Centers, founded by the Reverend Leon Sullivan, a Baptist clergyman.

Although Reverend Sullivan was originally from Charleston, W. Va., he is now based in Philadelphia, Pa., the national headquarters for OIC of America, which currently operates in 45 States.

Senator SCHWEIKER of Pennsylvania and myself have in a way symbolically reflected the contribution that our two States have made through Reverend Sullivan by cosponsoring the OIC Skills Training and Community-Based Organization Job Creation Act of 1978. When the 1978 CETA legislation was brought before the Human Resources Committee, we submitted an amendment to provide an insurance policy that this exceptionally good employment and training program and other community-based organizations will survive and continue to deliver cost-effective services, training, and job opportunities.

The track record of Opportunities Industrialization Centers in our State in Huntington and Charleston is outstanding. The 85 percent retention rate of people placed and the 78 percent rate of placement of OIC has led our businessmen and employers to regard an OIC label on a trainee as the equivalent of the label "sterling" on silver.

OIC has a reputation of producing a quality product at the least cost. At a per capita cost of $1,500 Reverend Sullivan plans to train and place 100,000 unemployed for a cost of $150 million. He has already managed, with commendation from GAO for accountability, a $100 million budget which this past year was secured through the prime sponsors and the CETA system.

A program like this one deserves special consideration by prime sponsors and is the kind of effort we should encourage. It is my judgment that programs such as OIC which were doing a good job before CETA gained the confidence and cooperation of private industry and Government. They should not be fragmented or phased out during the development of CETA during the next 4 years.

Mr. President, West Virginia, as well as the other 49 States, have benefited from the services provided by OIC and other similar community-based organizations in addressing the problems of our society's less fortunate. I recommend the CETA legislation to my Senate colleagues and strongly urge its passage.

Mr. MUSKIE. Mr. President, the legislation we consider here today, the Comprehensive Employment and Training Act Amendments of 1978, would reauthorize the major spending programs for job training and job creation included in the Federal budget.

These programs have expanded dramatically over the past 4 years from $2.5 to $12 billion in response to cyclical unemployment problems created by the recent economic downturn. The major expansion has come in public service jobs funded under CETA, which have expanded since 1974 from 50,000 jobs to the current 725,000 jobs level. The Budget Committee has supported this expansion in light of economic conditions.

During the recent recession the unemployed population was composed largely of skilled workers who required temporary jobs until regular employment became available with economic recovery. These cyclically unemployed people did not require extensive training and supportive services to make them employable.

As a result, most of the resources spent under CETA have gone in recent years to providing temporary public service employment to the cyclically unemployed.

The economy has made considerable progress during the 3 years of expansion since the severe 1974–75 recession. The unemployment rate has fallen from 8.8 percent in the second quarter of 1975 to 5.9 percent in the second quarter of 1978, entering the 5 to 6 percent range in which most economists would place the point at which inflationary pressures become significant in the labor market.

The current unemployed population contains many persons with insufficient training and work experience to make them employable. These people are the structurally unemployed. Cyclical unemployment has fallen substantially and the emphasis of economic policy should now shift more to the more difficult challenge of reducing structural unemployment while at the same time restraining inflation.

Unless job creation programs are targeted on individuals who have few opportunities in the labor market, such programs run the risk of competing with regular employers for available workers, thereby tightening labor markets and adding to inflationary pressures. The more targeted the program is on the structurally unemployed, the less risk of inflation it entails.

During consideration of the first budget resolution the committee noted the problem of structural unemployment in its discussion of CETA programs.

The committee report stated:

> This Committee believes that economic policy, while maintaining the high level of aggregate demand necessary for the success of any employment policy, must gradually shift its primary emphasis from overall economic expansion to the task of targeting employment opportunities on the structurally unemployed.

In order to shift Federal employment and training policy from its current countercyclical emphasis to a more structural focus, the report on the first budget resolution for fiscal year 1979 recommended that at least one-half the resources devoted to maintaining the current 725,000 public service jobs be redirected to structural purposes.

This bill would bring about a fundamental shift from countercyclical to structural purposes as envisioned in the first budget resolution. Senator NELSON and members of the Human Resources Committee are to be commended for re-

porting a bill which redirects this important employment and training program to the needs of the most severely unemployed.

The shift in emphasis from the countercyclical title VI to the new structural title II proposed in this bill would reduce inflationary pressures that could result from the continuation of the existing countercyclical program level during this period of economic improvement.

Moreover. to the extent that the structural portions of this bill would provide training and job experience for the unskilled and inexperienced, the program would assist recipients in obtaining permanent jobs, thereby expanding the Nation's potential output and reducing the level of unemployment which is consistent with nonaccelerating inflation.

To further counteract potential inflationary pressure, the bill would set wage limits on public service jobs and incorporate some measures to reduce substitution of Federal funds for State and local payrolls.

It is crucial that Federal dollars appropriated for countercyclical purposes be used by local governments to hire more people than they would have hired in the absence of the program. If there is simply a substitution of Federal dollars for local payrolls then the employment effects are no larger than those which would result from revenue sharing programs.

Some estimates of fiscal substitution range from 30 to 100 percent over an 18 month period. These estimates, however, tend to focus on the CETA program prior to the increased targeting included in the 1976 amendments.

A more recent and more extensive study requested by Senator Bellmon and conducted by the Brookings Institution found that of every 100 jobs funded, 18 represented positions that would have been financed out of local funds in the absence of CETA, 31 represented positions which already existed but which would have been eliminated in the absence of CETA, and 51 represented CETA-induced job creation. The study concludes that these more optimistic findings result from the increased targeting included in the CETA program in the 1976 amendments.

In light of these findings I am disturbed that targeting provisions proposed for the new countercyclical title VI are liberalized as compared with current law. I do not favor reduced targeting in title VI. The new provisions would double the size of the eligible poor of clientele and encourage CETA employers to hire those who need the jobs least. This "creaming" would encourage substitution of Federal dollars for State and local payrolls.

Furthermore, it is my view that the most needy should be served first, even in a countercyclical program.

There has been some concern that excessive targeting would slow the rate of implementation—a crucial factor in countercyclical programs. Targeting provisions in the existing CETA title VI are much more stringent than those proposed in this bill. Yet existing provisions did not impede the rapid expansion from 310,000 to 725,000 public service jobs funded in the economic stimulus appropriation.

For these reasons I will support amendments to be offered by Senator BELLMON to tighten the targeting provisions for public service employment.

In light of forecast unemployment and inflation, the second budget resolution as reported recommends that the level of countercyclical public service jobs should be phased down beginning in fiscal year 1979. S. 2570 suggests that the countercyclical jobs be funded in view of economic conditions but provides no specific phase-down mehanism and authorizes "such sums" as may be necessary. This bill leaves the appropriate funding level for countercyclical jobs to the budget and appropriations processes, where the responsibility should be.

I urge Senators, not only to support this important legislation, but to support improvement to it through amendments to target spending on the people most in need.

Mr. JAVITS. Mr. President, I ask unanimous consent to insert in the RECORD a statement by Senator MATHIAS.

STATEMENT OF SENATOR MATHIAS

Mr. President, I would like to speak briefly in support of the Comprehensive Employment and Training Act and to commend the Chairman of the Human Resources Committee and the Chairman of the Subcommittee on Employment, Poverty and Migratory Labor for their careful work in preparing this bill and in preserving the strong national commitment to assist the unemployed and disadvantaged to become productive citizens.

For the past four years, CETA has been the keystone in the domestic policy of this country. It has assumed even greater importance than we originally anticipated. The CETA system has been called on to address the persistent difficulties of moving the structurally unemployed into the economic mainstream, and it has responded. The system was used to stimulate a sagging economy and, in an eight-month period, nearly three-quarters of a million of the long-term unemployed were hired, earning income and providing needed local public services. As Congress recognized the critical nature of the problems of youth unemployment, CETA was there to launch major new initiatives and to put hundreds of thousands of youths to work.

The CETA system has, in its infancy, responded effectively to the major demands of both social and economic policy. It has been required to undergo unprecedented expansion and rapid redirection in a very short time, and it succeeded. Yet in spite of its impressive record, the CETA system has not always been judged on the total record of its solid achievement.

In the past several years, allegations of abuse have been made about corporations, about unions and even about the Presidency. In none of these cases, however, has it been proposed that to root out the abuse the institution itself be abolished. Yet some of my colleagues may feel that scattered abuses in CETA warrant crippling legislative action. I do not agree. I urge my colleagues to resist adopting amendments that would further restrict this valuable program.

It is our responsibility to act on the total record of the CETA program. The abuses that have occurred in the CETA program are serious. They demand serious responses. And I believe the bill before us today represents that response. It addresses the major shortcomings of the program without unduly restricting the flexibility of local officials to act on local needs.

The CETA program is our most important and effective national tool for putting people back to work and for helping those who have never worked gain the skills necessary to participate fully in our economy. We must remember that the national unemployment rate has fallen largely because of the responsible acts of this Congress in fully funding CETA.

In the Baltimore Metropolitan Area, the Prime Sponsor has budget authority for more than $170 million for this year. More than 150,000 people received both subsidized and unsubsidized full-time employment through CETA. An additional 28,000 youths received part-time employment. This is a substantial record of accomplishment.

It is important that the flexibility and effectiveness demonstrated by the Baltimore Metropolitan Manpower Consortium be fostered not frustrated by Congress. It is incumbent on us to ensure the continuing success of CETA. I hope we will support this bill enthusiastically and resist amendments designed to unduly hamper the achievements of the laudable goals of the program.

CETA has in great measure helped us move toward economic recovery and social stability. The program is expensive. But we must measure that expense against the cost of unemployment, lost productivity and lost hope. Those are the costs we really can't afford.

● Mr. HART. Mr. President, I would like to join my colleagues in commending Senator NELSON and other members of the Human Resources Committee for their diligent efforts to improve the Comprehensive Employment and Training Act. Because of their efforts, I will support S. 2570 in the belief that the reforms which the committee has recommended should be given an opportunity to work. S. 2570 contains many important new provisions which should improve administration of CETA programs, target assistance at those individuals with the greatest need, and discourage abuses which seriously threaten the credibility of the act.

My support of S. 2570, however, must be qualified. While I applaud the efforts of my colleagues who have worked so hard on this legislation, I am not as optimistic as some that legislative remedies can correct the abuses CETA has experienced. Certainly, clearer goals, tighter eligibility criteria, wage ceilings, improved administrative procedures, and strong enforcement provisions should discourage abuses. Many of my constituents support these reforms and have urged me not to oppose the entire program because a small number of those responsible for operating it have used it for their own purposes, in conflict with the purposes of the act.

We cannot turn our backs on those people who want to work but are unsuccessful in competing in the labor market for lack of skills or opportunities. Programs such as CETA have an important advantage over other employment policies because they can target such individuals directly. But I am concerned that CETA does not become another institution which survives long after it has outlived its purpose or its effectiveness. I am concerned that without the full cooperation and commitment of local sponsors who operate CETA programs, CETA will become another costly Federal program mired in regulations and increasingly occupied with ferreting out fraud and

abuses. The American people will not tolerate this happening and it would be tragic if our less advantaged citizens seeking gainful employment were to become victims of this all too familiar scenario.

I intend to exercise my oversight responsibilities and do what I can to see this program works by giving the taxpayers their money's worth or is terminated.●

● Mr. CRANSTON. Mr. President, I rise in support of the pending measure, S. 2570, the "Comprehensive Employment and Training Act Amendments of 1978." I would like to express my appreciation to the distinguished floor managers of this measure—Senator NELSON, the chairman of the Subcommittee on Employment, Poverty, and Migratory Labor; and Senator JAVITS, the ranking minority member of both the subcommittee and the full Human Resources Committee. I have worked very closely with them, and the other members of the committee in developing this measure. I believe the committee has done both a responsible and a magnificent job in designing the reauthorization legislation.●

● Mr. KENNEDY. Mr. President, I rise to support the reauthorization of the Comprehensive Employment and Training Act. CETA is our primary vehicle for dealing with the problems of the structurally unemployed. It is an important part of our efforts to meet the problems of the cyclically unemployed.

At any one time some 400,000 people are receiving training under CETA programs and some 725,000 people are employed through these programs. Many of those who are employed receive on-the-job training.

During the course of a year, some three times as many people rotate through these training programs, and millions benefit from the employment programs.

There is no greater purpose that this body can have than assuring employment opportunities to everyone in this country who is able to work and desires to work. The No. 1 issue in the land—the first priority on the agenda of economic justice—must continue to be providing jobs for American workers. With this act we attempt to provide the tools with which people can go out and get jobs in the private sector or in the regular public sector. We also provide the means by which those who are cyclically unemployed can make great contributions to our communities.

Mr. President, there are many important amendments which have been incorporated into our reauthorization of CETA. They make this a better bill. Senator NELSON, the chairman of the Employment, Poverty, and Migratory Labor Subcommittee of the Human Resources Committee and Senator JAVITS, who is the ranking minority on both the full committee and the subcommittee deserve great credit for the work that they have done in improving this act.

I have been particularly interested in, and am particularly pleased, with some of the changes we have made.

We have strengthened the role of the community based organizations. We have decided that title VI workers should all be employed through the project method. And, we now allow these projects to continue beyond a year; where a project has been providing valuable service to those employed in it and to the community at large, it should not be leveled at the end of 12 months.

We have added to the flexibility of prime sponsors and the equitable treatment of CETA employees by taking regional cost differences into account in setting the ceiling wage rates that may be paid to CETA employees.

We have focused more of our efforts on the structurally unemployed. Not only are the structurally unemployed given greater training opportunities, but a new section of the act, title II–D, provides public service employment positions specifically reserved for such people. That employment must be accompanied by appropriate training.

We have also improved our focus on other people who would particularly value CETA services. In title III, the Secretary of Labor is required to fund programs to help displaced homemakers. We also call for greater assistance to help ex-offenders to take regular jobs in society. We have retained the requirement that programs for Indians and migrants should be administered at the national level; elsewhere in the act we have increased the proportion of the funds which must be devoted to Native American programs.

Mr. President, two developing national concerns are reflected in amendments which I introduced and which are in this bill.

First, section 316 reflects our concern that governmental agencies be made as responsive as possible to the reasons for which they were established. In this provision, we have established that the Secretary shall award funds to prime sponsors on the basis of how well they have done in placing CETA trainees in jobs, how good those jobs are, and how long the people who have been placed hold them. The Department of Labor, in evaluating the prime sponsors which volunteer for this program, will have to control for economic conditions and for the personal characteristics of those involved, so as to avoid penalizing areas with high unemployment and to avoid "cream skimming" among the CETA eligible population. With this amendment, we will, for the first time, be rewarding those prime sponsors which really get the job done—thus helping the trainees and spending taxpayer money most effectively.

This reauthorization also incorporates amendments which I introduced which reflect our growing concern with the energy problem and the consequences of our energy policies. One amendment mandates that the Department of Labor do an employment impact statement on energy proposals coming out of the Department of Energy, as well as energy related proposals coming out of other departments, like HUD. This is important because certain energy sources which are just as efficient, employ a larger number of workers, while requiring less capital. The act is also amended so that work on solar and renewable energy sources would be eligible for CETA activity. CETA workers will now be able to install solar panels and wood burning units. Under the current authorization, they are limited to conservation activities.

Mr. President, we have before us today the legislation upon which the hope and future of so many of our fellow citizens depends. This legislation has been tailored to respond more effectively to the employment and training needs of American workers. I support its reauthorization, and I believe that my colleagues will, as well.●

Mr. McCLURE. I would like to ask? How do you perceive the role and responsibilities of the Department of Labor under the Comprehensive Employment and Training Act?

Mr. NELSON. The role of the Department is that of administrative oversight. It is supposed to assure that prime sponsors, in their plans, have given adequate attention to such concerns as client selection, selection of program operators, auditing and monitoring procedures, and other priorities expressed by Congress.

The Department is supposed to oversee the implementation of those plans, to assure that the objectives of the plans are met, that the clients who are supposed to be served are actually receiving services, to assure that funds are being spent according to plan, and according to law, and to assure that the prime sponsors have sufficient records and adequate monitoring to meet congressional expectations—both in terms of information about the program and in terms of assuring compliance with the Federal law.

It is critical to the role of the Department of Labor that the Department focus its energy on the activities of those prime sponsors who are operating programs in violation of the law or where there are allegations of impropriety. It is clear that the Department cannot give equal attention to all prime sponsors. This involves a simple ordering of priorities.

On the other hand, the Labor Department should regularly audit and review the operations of all CETA prime sponsors. It should also make technical assistance and training available to State and local governments, to help them with reporting requirements, to help them develop adequate selection procedures, to help them develop systems to audit subcontractors and subgrantees, and to help them develop programs suitable to the needs of a particular clientel.

Mr. McCLURE. How does the role of administrative oversight, which the managers have so adequately described, square with the activities of the Labor Department over the last 4 years? It seems to me that the Department has often becomed bogged down in administrative minutia and/or acted like a frustrated program operator. Let me give you some examples of what I mean. The Labor Department seems to have an overwhelming urge to tell prime sponsors what program mix the State or

locality should have to meet their clients' needs.

That is to say that it is not unusual for the Department to tell a prime sponsor they need more classroom training; or, as has clearly been the case in many areas that the prime should spend more money on on-the-job training. Now I happen to favor on-the-job training in the private sector; but I thought CETA specifically left the decision on program mix to the prime sponsors—subject to review by the Labor Department only if it appeared that certain funds or programs were being abused.

We all know of specific instances where the Labor Department has brought pressure to bear on prime sponsors to select specific subcontractors or subgrantees. In the absence of indications that there is something wrong with the State or local selection process, does the Department have any business intervening in favor of specific deliveries of service?

One more specific example of what seems to me a misuse of resources by the Department, is the retirement issue—which I understand we will see an amendment to deal with today. I have no doubt that some prime sponsors must have abused CETA, by using CETA funds to build up their retirement funds and reduce the local burden for supporting such funds. There must have been such blatant abuses to have justified the reaction of the Department. But I ask you: Would not it have been more consistent with the role of the Labor Department as you have described it either to have clamped down on those prime sponsors who were doing something wrong; or to have come to Congress and asked for some legislative remedy; or both. What I understand the Department did, however—and please correct me if I am wrong—was to issue elaborate regulations, which is some cases required prime sponsors to violate their own State laws, which in some cases required changes in existing State laws, and which have generally proved incapable of implementation.

All of this consumed a great deal of time. And yet, the Labor Department evidently has let actual cases of alleged out-and-out abuse of CETA law and hiring practices go for over a year, without reaching a final resolution, right here in the District of Columbia.

Mr. NELSON. The Department of Labor has not always exercised its administrative oversight responsibilities in the appropriate manner. There are some mitigating circumstances. First, CETA programs have grown very quickly. Second, the goals of the program, and the expectations of the Congress, have not always been clearly articulated. And finally, we expect a certain amount of dislocation in any new program.

S. 2570 takes a number of important steps to solve these problems. The reported bill contains many provisions designed specifically to make clear to the Department of Labor and to CETA prime sponsors, just exactly what the Congress expects.

A number of amendments proposed to this bill have had as their purpose an even clearer articulation on those expectations. The Labor Department is required under this bill to require specific information from the prime sponsors—as to the prime sponsors' plans for management, auditing, and monitoring of the CETA program. It is required to establish a division for monitoring and compliance, within the office of the Secretary. The Department must establish procedures for monitoring of prime sponsors and for auditing, and for assuring that prime sponsors have the capacity to assure that their subcontractors and subgrantees are properly carrying out their responsibilities.

The Department must report to Congress, as to its progress in these areas, and as to any action it takes against prime sponsors under the compliance and sanctions sections.

We have included in the bill a whole section, which amends the criminal code, to make individuals who fraudulently use CETA funds, or who knowingly hire ineligible individuals, subject to personal prosecution and fines.

We could go on and on, but the point is: if the Department fulfills the specific responsibilities assigned to it under this bill, its performance should conform much more closely to the expectations of the distinguished Senator from Idaho—and of us all. The CETA program should have a new beginning, and an opportunity to fulfill the promise we have all held for it—since its enactment—that is, it should provide an effective, manageable, decentralized delivery system to serve the Nation's unemployed.

● Mr. HATHAWAY. Mr. President, I am pleased to support the pending reauthorization of the Comprehensive Employment and Training Act. As approved by the Employment, Poverty, and Migratory Labor Subcommittee and the full Human Resources Committe, on which I am pleased to serve, it contains a number of substantial improvements and reforms to the existing program.

Key to these provisions are strengthened requirements that the employment and training opportunities under CETA be targeted to those most in need. The bill stipulates that eligibility for title II structural programs be limited to those with incomes less than 70 percent of the lower living standard for the area as defined by the Bureau of Labor Statistics. For the title VI countercyclical programs, eligibility is limited to 85 percent of the lower living standard.

The bill also imposes strict limits on the length of time an individual can participate in CETA activities, and limits the wages paid to CETA workers, as has been detailed by the Senator from Wisconsin. It also includes rigid criminal penalties for fraud and abuse of CETA funds, and links CETA programs to the private sector through private industry councils.

In addition, the bill includes a number of amendments I proposed at the subcommittee level which should improve its administration, and allow it to better fulfill its stated objectives.

First, as a result of one of my amendments, the bill will require prime sponsors, in formulating their comprehensive employment and training agreement, to include a detailed description of the methods and arrangements to be used to involve community based organizations, educational agencies, and other deliverers of services, and also the methods used to select these deliverers of services from an inventory of those potentially available.

This amendment would thereby establish a mechanism to promote greater cooperation at the local levels and at the same time provide greater accountability with respect to the utilization of public funds. While many prime sponsors are already involving all available deliverers of services to the maximum extent practicable, there are instances where resources and facilities which could be used to great advantage are somehow excluded from participation in CETA programs.

This amendment does not dictate to any prime sponsor which mix of deliverers of services to utilize. That would be contrary to the principles behind CETA, which stress local decisionmaking and responsibility. But the amendment does require the prime sponsor to set forth methods and criteria used to determine who will participate from an inventory of all those community-based organizations, educational facilities, and other deliverers of services, which expressed an interest in being a part of CETA.

This system of accountability will then be reviewed at the State and local level by the Governor, by the State employment and training council, by the prime sponsor planning council, by appropriate units of general local government, and by labor organizations in the area, as required by new section 104. With the language of this amendment, these individuals and entities will have the opportunity to review the rationale which went into determining which deliverers of services are to be relied upon, as opposed to being presented with a bottom line fait accompli.

Equally important, the community-based organizations and educational facilities will have the opportunity to assert to these bodies their ability to be relied upon and to ask that, if they are unjustifiably excluded, such a decision be reexamined.

While in most parts of the Nation, cooperation is occurring, there have been instances where individual prime sponsors have set up delivery services which are duplicative of those already existing. This amendment is intended to eliminate this practice and to encourage to the maximum extent possible the utilization of available community programs and facilities.

Further, this would not create an impossible paperwork or administrative burden on prime sponsors. On the contrary, the Department of Labor has estimated that the changes made by the reauthorization, by relying on one comprehensive agreement, along with annual plans, paperwork for prime sponsors would be cut between 20 and 33 percent.

My second amendment dealt with the overall conditions set forth for utilization of CETA funds with respect to public service employment. This amendment

modifies the condition contained in the administration bill requiring that public service jobs be provided in occupational fields which are most likely to expand within the public and private sector. The amendment added as a complementary condition that public service employment at the same time:

Shall meet community needs including but not limited to community betterment activities (including rehabilitation of public properties, assistance in the weatherization of homes occupied by low income families, demonstrations of energy conserving measures including solar energy techniques, and neighborhood revitalization), education, health care, transportation services, crime prevention and control, and environmental quality control.

Thus this language, set forth as an overall requirement on the expenditure of all CETA funds, will serve to insure that overall community needs are being met.

In the 1977 fiscal year, nearly 1 million individuals were employed in CETA funded public service employment (PSE) programs. Over $3 billion was devoted to these activities.

While many worthwhile projects were undertaken, at the same time there has been criticism in the national media regarding some make-work, leaf-raking activities. Though only a very small proportion to the overall effort, this has nonetheless served to give CETA as a whole a tarnished reputation.

This amendment would clearly stipulate that all public service employment activities should be directed toward community needs. As a condition on the utilization of such funds, this language will provide added impetus to fulfilling this goal in all parts of our Nation.

My third amendment modifies section 311 of the bill. The amendment imposes the additional requirement that the demonstration programs authorized under the act be conducted in rural as well as urban areas, in sparsely populated as well as densely populated areas, and in areas with inadequate means of transportation.

Section 311 is intended by the administration to fund demonstration projects which are to be the precursors to welfare reform. It is essential to the well-being of our Nation and to the integrity of each of our citizens that our welfare system be made to function fairly and equitably. I applaud the President's initiatives in this regard and look forward as a member of the Committee on Finance and the Committee on Human Resources to working to shape these proposals into their final form.

But in the course of demonstrating effective methods to reform this system, it is vital that these activities be conducted in all parts of our Nation. The problems of the rural poor are different from those of their urban counterparts. They are further isolated from available job opportunities and lack the resources—transportation and otherwise—to extricate themselves from their Catch 22 dilemma.

These problems may well be the most difficult to solve as we undertake welfare reform.

Yet, unless the statutory language is explicit, I fear that demonstration of welfare reform may be overly concentrated on urban centers, to the detriment of rural areas, and in the end of the detriment of the Nation as a whole to the degree that a proposed solution neglects these needs.

This amendment would clarify this situation and form the basis for mandating that rural areas be fully included. I intend to monitor this matter closely as definitive welfare reform proposals are developed, but this language will serve as an important first step to achieving our overall goals.

Fourth, I offered language requiring that the school-based youth programs in title IV be coordinated with the activities under the Career Education Incentive Act. That act, signed into law last December, is intended to give greater attention to providing career skills and knowledge in our Nation's schools, and it is appropriate that the youth programs under this bill be coordinated with it.

Finally, there has been considerable attention in recent weeks and months to abuses under CETA, which I am convinced are the rare exception rather than the rule. But to give my colleagues an example of how CETA can work extremely well, I ask unanimous consent that there be printed in the RECORD at the conclusion of my remarks an article titled "Penobscot, Maine, CETA: 'One of the Best,' " by Gloria Stevenson, which appeared in the August 1978 edition of Worklife.

[From Worklife, August 1978]

PENEBSCOT, MAINE, CETA: "ONE OF THE BEST"

(By Gloria Stevenson)

A few months ago, Newsweek magazine called the Penobscot Consortium Training and Employment Administration—a two-county program headquartered in Bangor, Maine—"one of the best local CETA programs" in the country. Noting that the consortium will serve some 4,000 persons this year, Newsweek also reported that local officials responsible for the program have "opted for professional—not political—management."

Among readers familiar with CETA, (Comprehensive Employment and Training Act), the Newsweek statements were apt to provoke several question: How does the Penobscot program operate? Is it effective in moving people into jobs? Does "professional" management mean freedom from local politics?

To seek answers to questions like these, WORKLIFE visited the $9.9 million Penobscot program and found a structure that reflects traditional Maine values of individualism, self-reliance, and pragmatism. These qualities have been present since the program's beginning in 1975.

At that time, every county in Maine was served by the balance-of-State program. But the three commissioners governing Penobscot County, population about 138,000, applied to become an independent prime sponsor. This effort was led by Earl Banks, chairman of the county commissioners and a long-time resident of the Bangor area.

Banks, then 66, had owned a successful automotive supplies store before being elected county commissioner. A firm believer in local government, he thought that Penobscot County would get better CETA services if it ran its own program rather than relying on the State. The commissioners' application was approved, and Penobscot County, which had virtually no background in the employment and training field, became a prime sponsor.

"The minute we got this thing organized," Banks recalls, "We knew it was beyond our ability to run it. We needed a professional director, and that's what we got in Chuck."

"Chuck" is Charles Tetro, now 31, who was running a county CETA program for the New Hampshire balance-of-State when the Penobscot opening arose.

He was referred to the Penobscot opening by the National Association of Counties, a political interest group with a strong interest in CETA. "I wanted a change," Tetro says, "but I wasn't hungry for a job. I was quite interested in the opening, but I wanted it on my terms."

Key among those terms was that the Penobscot County commissioners, who served as the executive board for the program, would maintain a hands-off policy toward managing the program. They agreed, and Tetro took the job. One of his first moves was to hire Earl Banks, who had finished his term as county commissioner, to be his administrative assistant.

Banks, who had long been active in both local and State civic groups, was able to introduce Tetro to organizations and individuals whose support would help the program. Through membership in the Chamber of Commerce and Rotary club, he knew most Bangor employers and was able to enlist their cooperation. His service with the Boy Scouts and on the YWCA Executive Board and the board of directors of the local community action agency had given him access to community-based organizations. He had been active in the Maine Association of Counties and the Maine Economic Development Association and knew political figures throughout the State. Through friends in the Maine AFL–CIO, he was able to help CETA establish a working relationship with organized labor.

"My contacts were what helped to put this together," Banks says." "I had the open door to the big guys and the open door to the little guys."

With Banks leading efforts to gain community acceptance, Tetro, an energetic man who thrives on innovation, was free to concentrate on program development. At the outset, Tetro, Banks, and one other person were the sole CETA employees. But Tetro hired several bright young professionals to fill key administrative posts, proposed and received funding for new programs—including a contract to run Maine's entire migrant and seasonal farmworker program, covering some 200 persons—and expanded operations considerably.

The program also grew after neighboring Hancock County, formerly served by the balance-of-State, asked to join the Penobscot program. Hancock—which includes Bar Harbor, Acadia National Park, and a variety of other woods and waterfront vacation areas—is the fastest growing county in Maine, but its population now numbers only 41,000.

"I sat down," Earl Banks recalls, "with the three Hancock County commissioners and said, 'You're welcome to join us, but we're going to run the program. You're the authority, but it has to be professionally run.' "

The commissioners agreed, and in October 1976, the two counties formed a consortium whose staff now numbers about 100. Says Banks, who still serves as Tetro's administrative assistant, "None of the six commissioners who run the program have ever made any attempt to use patronage or nepotism or to interfere—except to offer suggestions—in our operations. We have a good relationship that way."

Tetro adds. "We have about as much freedom to run a program as you can get within CETA. Since we didn't have political

constraints, we wert able to sit down and build, as an architect would, the structure to fit our program scheme."

The consortium's program design reflects, first, the needs of a rural labor market. According to the prime sponsor's last annual, plan, about 5,100 local residents will become unemployed sometime during the fiscal year. These potential CETA participants are widely dispersed over an area that measures about 130 miles from northernmost to southernmost points and 120 miles from east to west.

Women make up about 70 percent of the economically disadvantaged persons in the area. Among jobless women, many are entering or reentering the work force after being widowed, divorced, or separated. Unemployment among youth is also severe. Most jobless residents are white: Only about 55 unemployed residents are from minority groups, and most of these are Native Americans.

Like most other rural areas, Penobscot and Hancock counties lack large industries. The biggest employers are papermills, but since they experience little turnover, vacancies seldom arise. Clerical and business occupations, allied health jobs, logging, heavy equipment operation, and mechanics jobs provide some of the best local opportunities. Hancock County also offers fishing, lobstering, and tourism jobs, but these are highly seasonal.

As a result of geographic and economic conditions, area residents often travel long distances, as much as 80 miles one way, to work. Public transportation is not available, so a driver's license and reliable car—one that can brave severe winters and bumpy roads—are usually necessities for work. Lack of transportation is a special problem for women and youth.

To bridge the distance between CETA headquarters and outlying areas, the consortium has set up three local Offices of Training and Employment Programs (OTEP's,) where participants can get comprehensive intake, counseling, and job placement services. These are located in Bangor, Ellsworth (in Hancock County), and a rural area of western Penobscot County. In addition, the rural OTEP oversees several smaller satellite offices—most consisting of only one person—which serve the most remote parts of Penobscot County, while outreach staff from the Ellsworth OTEP regularly hold office hours in a variety of Hancock County locations.

The OTEP's are staffed primarily by employability developers (E.D.'s)—the name Penobscot has given counselors in order to emphasize their role in helping applicants overcome job barriers. John Dorrer, the consortium's director of policy, evaluation, and research, explains, "We want to get away from the whole social service, do-good image. The fundamental notion of what we're about is to provide participants an economic service rather than a social service."

OTEP staffs also include youth employability developers and job developers. In addition, Employment Service personnel are stationed at the Bangor OTEP part time to offer placement assistance.

"Our philosophy," says Operations Manager Barbara Hamaluk, "is that each OTEP should offer the whole array of CETA services. We're interested in providing comprehensive services at one-stop centers."

Services are also highly individualized. Each CETA applicant is interviewed at length by an E.D. who helps him or her draw up an individual employability development plan. The plan lists employment barriers such as inadequate education, lack of skills, and transportation problems. Personal problems such as alcoholism are included, too. The plan also outlines specific actions which the applicant must take in order to overcome each problem. Applicants are not enrolled as CETA participants until after this plan is completed.

The time and attention spent in applicant assessment reflect the consortium administrators' belief that CETA should confine its activities to those which are likely to improve participants' employability. "CETA has to know what it can do and what it can't do," says Charles Tetro. "We're not a therapeutic social service agency. We can't rehabilitate alcoholics, for example. But we can help them remove other labor market barriers after they've dealt with that."

Another consortium stance is that CETA participants must assume responsibility for themselves and their worklives. Tetro says, "Our communications with participants emphasize that this is a shared opportunity. We tell them that we'll do our part, but they have to do theirs." Brian Sass, an E.D. in Bangor, puts it this way: "Applicants have to convince me that they really want to help themselves. Otherwise, it just doesn't work."

The number of persons who apply for CETA services is far greater than the number selected for service. According to Barbara Hamaluk, only about 10 to 25 percent of all applicants become participants. Most others are referred to local social service and rehabilitation agencies for assistance or to the Job Service for placement assistance.

Individuals who do enter the program generally work with the same E.D. throughout their participation. Each title I participant is also immediately introduced to a job developer who will be responsible for finding an appropriate on-the-job training (OJT) slot or job opportunity as soon as the person is ready. Consortium staff believe that such one-to-one relationships mean better service to each individual.

In line with their respect for self-reliance, program administrators favor training activities that enable participants to become economically independent. "We prefer intensive investment in a few individuals to less investment in a wider range of people," Tetro says. Most title I participants go through several program components, such as classroom training, work-experience, and OJT.

Penobscot puts heavy emphasis on direct training by employers. The consortium has subcontracted with the Maine AFL–CIO to develop OJT positions in unionized occupations, and OTEP job developers seek OJT slots in other fields. Because most area employers are small, OJT opportunities are developed to meet the needs of individual participants, and most employers have only one or two trainees.

Some 500 of the 1,250 persons to be served under title I this fiscal year are scheduled to get OJT. The proportion of title I participants to be served through this form of training is thus 40 percent, much higher than the 12 percent average registered last year for all CETA programs. Moreover, all Penobscot OJT positions include employer commitments to hire participants after training, which averages about 6 months.

In addition, two local employers are conducting larger CETA training programs which also include commitments to hire. Eastern Maine Medical Center, the local hospital, is conducting a STIP project (See *STIP, the Private Sector Connection* in the April 1978 issue of WORKLIFE) to train 30 people—many of them women receiving welfare—as medical secretaries and respiratory therapy technicians. Training will last 9 months and will include classroom study, laboratory training, and a practicum at the hospital.

In the other program, a large diesel repair shop, Bean & Conquest, is providing vestibule training for 32 diesel mechanics under a title I contract. Both programs were designed by the employers to meet specific hiring needs, and both are being conducted on employers' premises by employers' staff.

The Penobscot consortium plans to move about 400 title I participants into unsubsidized jobs in fiscal year 1978, and at the end of the second quarter it was only 5 people behind its mid-year target of 186. Title I funds for the year total $1.3 million.

The consortium also expects to put 1,269 individuals in public service employment (PSE) funded under title VI this year. Penobscot's $5.7 million title VI program is called LIFTE—Local Initiative Funding for Training and Employment. The name, Charles Tetro explains, was designed to help the PSE projects concept gain local acceptance.

Penobscot now funds about 300 LIFTE projects, most with 3 or 4 employees. "We try to use LIFTE positions almost like we use work-experience," says E. D. Brian Sass, "to help individuals develop a job history and to get their work habits and skills up to the level they need for OJT." Sass also reports that staff members try to keep in touch with LIFTE participants by visiting or calling them at their worksites at least once a month.

Among ongoing LIFTE projects are these:

The Spruce Run Association, a private, nonprofit organization, has hired four persons to staff a shelter for battered women. The shelter offers temporary housing, a 24-hour telephone hot line, a crisis intervention program for the children of battered women, and personal and divorce counseling. Project employees also seek community resources needed by shelter residents. The four persons hired for the project all had previous counseling experience, but each got at least 36 hours of crisis intervention training before going to work.

The Bangor Historical Society and the Penobscot Heritage Museum have jointly hired eight persons to catalog, label, and preserve what one consortium staff member calls "a whole museum full" of previously neglected artifacts owned by these agencies. In addition, LIFTE employees now staff the museum—which was formerly open only by appointment because of lack of funds—on a regularly scheduled basis.

The Penobscot consortium has employed 20 LIFTE participants to renovate three old barracks that recently became CETA's administrative headquarters. The consortium leased the dilapidated structures—built for a Strategic Air Command base and now owned by Bangor Community College—after they had stood vacant for about 8 years.

The barracks are being revamped to accommodate offices, space for classroom and laboratory training, and sleeping quarters for CETA trainees from remote parts of the consortium area. LIFTE employees are reshaping rooms within the structures, rebuilding window frames, repairing floors, replacing plumbing, painting interior and exterior walls, and building bookcases and other furniture. The project employs eligible CETA participants and Employment Service registrants who had indicated an interest in construction work.

Sixteen teenagers employed through the Youth Community Conservation and Improvement Projects (YCCIP) program are also helping to renovate Penobscot CETA headquarters. The Maine AFL–CIO sponsors this project, which is funded under title III of CETA. Enrollees are unemployed, out-of-school youth, two of them female.

The YCCIP project is supervised by two union members with extensive experience in the construction trades. They teach basic carpentry skills, stress good work habits, and serve as mentors for participating youth.

As designed by law, YCCIP does not emphasize remedial education, formal training, or support services for participants, and Charles Tetro finds this lack disturbing. "I don't think sweat jobs per se help dropouts get jobs," he says, "although we're evaluating this project closely and will eventually see whether or not that's true."

He continues, "We haven't offered the kids any extras, but we did wait to see if they'd ask for more. And they have. Fifteen of the 16 don't have driver's licenses and some want help in getting them. Others have asked for training in welding and pouring foundations."

Combatting youth unemployment—especially among dropouts—is a consortium priority. In an effort to strengthen services to this group, Penobscot recently proposed to establish a highly innovative Job Corps center. The Employment and Training Administration has accepted the proposal, and the new center—the first in the country to be operated directly by a local prime sponsor—will open in September.

The coed center will be situated on the campus of Husson College, a small, private school about 2 miles from CETA headquarters. It will provide residential services for 250 high school dropouts and will serve another 100 commuters, most of them women receiving Aid to Families with Dependent Children.

Enrollees, who will be recruited by the consortium from throughout Maine, will live in Husson dormitories, share dining halls with regular students, and attend some classes at the school. Additional training will be provided by Bangor Community College and other training facilities used by CETA. Says Tetro, "By colocating the center on the Husson campus, we're offering a positive social environment for growth."

Center activities will include a pilot Advanced Career Training program that will provide 3 to 4 months of intensive education to enrollees who dropped out of high school shortly before graduation. The program will be geared to preparing Corpsmembers for community college enrollment.

The Job Corps center has given the consortium another opportunity to build a program from the ground up, an activity that staffers seem to relish. In other developmental projects, administrators are setting up a new program to provide CETA participants with localized job market information, gearing up for further program expansion—neighboring Piscataquis County is scheduled to join the consortium in October—and devising a sophisticated economic model for evaluating program results.

Few prime sponsors as small as the Penobscot consortium have put much emphasis on evaluation, but Penobscot administrators regard it as a key program ingredient. John Dorrer, who heads the evaluation effort says, "Evaluation of outcomes is a vital part of decisionmaking concerning the allocation of resources. It's the rationale for determining what we do in this system."

Tetro adds, "Without a sufficiently developed method of evaluating program output, nobody can say with any assurance that investments in employment and training pay off."

The concept of investment figures prominently in the consortium's overall management philosophy. Says Tetro, "We've tried to stress that employability developers are making investments in human capital formation."

Tetro often describes CETA activities in terms of costs and benefits. He says, for example, "The consortium offers relatively little work-experience. Twenty-six weeks of work-experience translates into $3,000. But there are often better ways to use that $3,000. We're looking for optimality in the training mix for each individual."

The consortium also seeks maximum program flexibility to serve individual needs. The administrative staff is organized along functional lines—planning, OTEP operations, and finance and budget, for example—rather than according to CETA titles. "This way," Tetro says, "there are no institutional constraints to providing any service for any eligible participant. And practically speaking, we can deal with any CETA legislative changes that might emerge."

Consortium staffers—all of whom but Tetro are covered by an employee merit system developed with the help of the U.S. Civil Service Commission—seem highly committed to the local CETA program and its aims. Key administrators routinely put in 60-to-70-hour weeks. Tetro reports, and OTEP staff members often arrive at work early and stay late.

Brian Sass, from the Bangor OTEP, expresses his enthusiasm by saying, "CETA is a beautiful program. It's not perfect, but it's great. It gets people jobs and it gets workers for employers.

"As an E.D., I have a chance to really get to know people, and I'm pleased when they do well. That's the nonmonetary reward. And when I see someone on the street who thanks me, that's the little—and here he makes a *p-o-o-o-f* sound—that makes everything, even the paperwork, worthwhile." ●

"CETA ARTS TRAINING IS TICKET TO GOOD POST"

● Mr. PELL. Mr. President, widespread news accounts of abuses, mismanagement, and ineffectiveness in the CETA jobs program have tended to create the impression that CETA is not accomplishing the objectives Congress intended that it should.

However, while some problems do exist—problems which are addressed and explicitly resolved in the new bill at hand—CETA had produced some notable and durable positive results.

One of the most successful and effective dimensions of the CETA program involves CETA/Arts projects, which offer highly meaningful employment opportunities to unemployed and underemployed artists, as well as a wide variety of support personnel. Approximately 10,000 such positions are currently filled in CETA/Arts projects across the country, with results that are almost uniformly positive. Such projects naturally attract popular support, and are a real credit to the overall program.

An article appearing in the August 17 edition of the Washington Post helps to illustrate my point. The article, by Post staff writer Joann Stevens, is entitled "Arts Training Is Ticket to Good Post." It describes the encouraging progress being made by Arts D.C., "a local, nonprofit agency dedicated to placing CETA participants and other artists in training programs that lead to permanent, unsubsidized jobs." Arts D.C., currently has 60 CETA arts trainees working with 36 local arts agencies. About 38 percent of the participants have found permanent employment, and Arts D.C., hopes that figure will increase to 50 percent by year's end.

Ms. Stevens' article offers convincing evidence that CETA/Arts projects do "provide training that leads to well-paying permanent jobs," thus effectuating congressional intent. As one of the successful project participants told Ms. Stevens, "I thought CETA was a very positive experience. It expanded my scope of skills, and should this job fall through, I feel I'm better qualified to find other employment."

Mr. President, I ask that Ms. Stevens' article be included at this point in the RECORD.

The article follows:

ARTS TRAINING IS TICKET TO GOOD POST

(By Joann Stevens)

Film-maker Wilfred Williams is a CETA graduate—a testimonial that the government program does provide training that leads to well-paying, permanent jobs.

Ten months ago, Williams said, he was a CETA arts management trainee making $9,500 a year. Today he earns what he calls a "satisfactory" $14,000 in a permanent, unsubsidized job as assistant director of Arts D.C., a local, nonprofit agency dedicated to placing CETA participants and other artists in training programs that lead to permanent, unsubsidized jobs.

The agency has 60 CETA arts trainees working in 36 local arts agencies, including the Capitol Ballet, the Museum of African Art and the Childrens Opera Theater.

This year, Williams said the center hopes to place half of its CETA artists in permanent positions. About 38 percent already have found permanent jobs, he added.

"One of our people got a $20,000-a-year job in New York with a public relations firm," he offered as an example. The trainee had worked with the Washington Area Filmmakers organization, and the director of a New York public relations firm had been impressed with the way the trainee had coordinated a Washington film festival, Williams said.

"A lot of stage technicians and actors are also being absorbed by different theaters."

As Williams pointed out the benefits of CETA, he chatted easily about his own lean years of employment, which he smilingly called his freelance period. That period ended one morning last October after he had read a newspaper article about city funding, through CETA programs, for unemployed artists.

Williams said he went to the unemployment office that afternoon and narrowly missed the program deadline for filing a CETA certification application. The next day he was interviewed by a prospective employer, and a few days later he began his CETA job at The Support Center, 1424 16th St. NW., as an arts management consultant to local arts groups.

"They had a CETA grant for three arts management consultants. We provided free consulting services to arts groups in the city," he said.

Information was provided about fundraising, arts management, taxes, accounting, public relations and various other issues, he said.

Williams said he worked with seven to 10 different arts groups handling most of the public relations work. One of his groups was Arts D.C. When the agency learned its assistant director was leaving her job, Williams said, he was offered the position.

A native of Brooklyn, N.Y., Williams said he rapidly developed Potomac Fever when he came here to attend Howard University 10 years ago. In 1972 he was graduated with a B.A. from the School of Communications, and for several years, he said, he worked at local radio and television stations where he earned his 3rd Class FCC license and filmed various youth documentaries and television series.

He misses the film-making, he said, but "I've found it's important to get into the administrative end, too. I thought CETA was a very positive experience. It expanded my scope of skills, and should this job fall through I feel I'm better qualified to find other employment."●

● Mr. STONE. Mr. President, I would like to direct the attention of my colleagues momentarily to a specific provision of the bill currently before us. At the beginning of this Congress legislation was introduced by the Senator from Indiana (Mr. BAYH) which was intended to

provide for the special needs of women forced into the job market through divorce or widowhood. This legislation proposes the establishment of centers for such women throughout the country, offering vocational training, job placement, guidance counseling, and referral services for health care, education and legal problems. I became a cosponsor of the Displaced Homemakers Act upon its introduction 2 years ago, and have testified on its behalf in committee hearings. The language of the bill has since been incorporated into S. 2570, the measure we are considering here today, as most existing centers for displaced homemakers are presently operating in part under grants from the Comprehensive Employment and Training Act.

Those of us committed to the resolution of this growing national problem had hoped that the incorporation of the Displaced Homemakers Act under CETA might result in the allocation of specific funds addressing these needs. Unfortunately, the $10 million originally requested under our bill has now been replaced by language directing the Secretary of Labor to "make available financial assistance," of an undetermined amount, for displaced homemaker centers. Although the committee report reflects a verbal commitment from the Secretary to spend $5 million, we believe that this amount cannot begin to scratch the surface of this growing national problem.

In 1977, there were 10 million widows and 4.9 million divorced women in the United States, and the numbers are steadily increasing. Many, middle-aged or older, are entering the job market for the very first time and are finding themselves in competition with younger and more experienced people. An overwhelming percentage of those who need financial assistance are ineligible for existing welfare, social security, or unemployment compensation programs. Furthermore, lacking job skills and self-confidence, these women face an almost insurmountable task in trying to support themselves.

At a time of heightened consciousness about unwarranted Government spending, I realize that new and relatively unproven programs are subject to reduced priority. However, many local and privately supported centers—including one which has already helped hundreds of women at Valencia Junior College in Orlando, Fla.—are already flourishing around the country, many with the benefit of CETA grants. If we do not support such a Federal program now, we will be supporting these same women later—but then it will be in programs for welfare, battered wives, alcohol, or drug abuse.

The $10 million originally requested in the Displaced Homemakers Act is the barest minimum that can be allowed if we are to establish a national commitment to the alleviation of this problem. I am hopeful that the Secretary of Labor will recognize the urgency and the economic advantage of helping this segment of our population become productive citizens.●

● Mr. NUNN. Mr. President, I would like to take just a moment to ask the distinguished floor manager of this legislation a question in regard to his interpretation of certain provisions of the CETA bill.

In reviewing this legislation, I have noticed in several places that the bill refers to "work experience programs" or "on-the-job training." I would like to know if these phrases are meant to include the very successful cooperative vocational education program. The cooperative education program assists schools in providing young people with on-the-job supervised training, mostly with the private sector, which is coordinated with in-school academic and vocational learning. There are currently 700,000 youths in this program and approximately one-half of the participants stay with their present employers after the structured program ends. The cooperative education program also has a job placement rate of over 90 percent.

I believe that it is very important to utilize existing and successful training programs in any efforts to serve our targeted youth population. I would appreciate the bill manager's comments on the cooperative education program and his views as to its potential involvement in the CETA program.

Mr. NELSON. The current CETA law permits prime sponsors to determine the appropriate mixture of services for their clients. This concept is continued under the committee bill, thus "work experience" and "on-the-job training" programs may be combined with cooperative vocational educational programs as well as other programs.●

● Mr. HUDDLESTON. Mr. President, first, I commend the distinguished floor managers of the bill for the outstanding job they have done in bringing this most important legislation before the Senate. The extension of the CETA program is of great importance to the entire country and by acting on S. 2570 now we can be assured that these vital services will continue.

I am particularly pleased to see that in the committee reported bill there is a provision which, as I understand it, will alleviate a problem that has occurred in the northern portion of my State. This past January the Bureau of Labor Statistics changed the way unemployed is estimated. Although these changes had no effect on the real level of unemployment in Kentucky, they did substantially change the unemployment rate for three northern Kentucky counties near Cincinnati. While the numbers of hardcore unemployed are increasing, the new methodology for computing unemployment statistics is causing an uncalled for, unrealistic reduction in Federal allocations for programs based on rates of unemployment in Boone, Kenton, and Campbell Counties.

Section 123(e)(1) of the bill before us directs the Secretary of Labor to provide the sufficient funds to assure that allocations under any title of the CETA program are not reduced by the termination of the use of current population surveys to determine annual unemployment data prior to January 1, 1978. This speaks directly to the problem at hand in northern Kentucky and other cities and counties adjoining metropolitan area across the country. Hopefully, those overseeing the operation of other Federal programs will take notice of this action and conform their regulations accordingly.

I might also comment here on Senator NELSON's amendment, which I have cosponsored, that mandates a 6-month notification of any changes in the methodology used to determine unemployment rates. Certainly such prenotification will prevent the kind of situation that we had in January when a sudden change had a very dramatic, negative impact on certain areas of the country. State and local officials will now at least have time to prepare for adjustments that must be made to conform with new statistical data. This too is a productive and necessary step.●

Mr. THURMOND. Mr. President, I am supporting S. 2570, the Comprehensive Employment and Training Assistance Act Amendments of 1978, because I believe that a number of changes have been made on the Senate floor which substantially improve what some have called another Government give-away program.

This legislation would extend for 4 additional years a program that was originally created to put the unemployed back to work. Because it was a new program, it was subject to certain abuses that have been published in a number of newspaper articles and editorials.

I have always opposed waste and inefficiency in Government. The taxpayers deserve to have their tax dollars spent wisely and productively. Although the CETA program has been subject to some abuse in the past, I think the Senate has taken substantial steps to curb abuses and problems in this program.

There are provisions in the bill to crack down on abuses in CETA programs that have led to embezzlement, fraud and misuse of funds. The Secretary of Labor may make use of State and local agencies, especially law enforcement agencies, to monitor and enforce the requirements of the program.

The eligibility requirements of the bill have been tightened up in order to target in on the hard-core unemployed such as welfare recipients, youth, seasonal farmworkers, women with limited educational backgrounds and disabled veterans, as well as other handicapped persons. By taking people off the welfare rolls, and training them to work on jobs that will keep them employed is the primary goal of the CETA program. The tightening of eligibility requirements should improve the record of this program.

Mr. President, $3 billion has been cut from the bill for public service employment. While this cut is contingent on certain conditions that were added in floor amendments, it recognizes that Federal spending must be reduced, and a careful reduction of this program of $3 billion will not hurt the program, but instead will help keep inflation down and make the program more acceptable to a number of people.

Finally, provisions have been added to give Congress more control over this program. Increased oversight by the Senate Human Resources Committee,

the Appropriations Committee, and the Budget Committee should lead to a more efficient program. This program is also run by State and local citizens as well as the Federal Government. Thus, increased accountability up and down the line should help to eliminate any past abuses or problems in the CETA program.

Mr. President, I am against big Government spending, but I also want to see every American have a job. Jobs mean salaries, which help feed the family. Salaries mean taxes, which help support our schools, roads, and public services. Jobs means fewer people on welfare. Any program that can achieve those objectives should be given a chance to work.

Mr. BAYH. Mr. President, I would like to take this opportunity to comment on one particular aspect of the pending CETA legislation—that portion which provides for funding of displaced homemakers programs under title III of CETA as well as under other titles of the bill.

On January 30 of this year, I introduced legislation which called for the funding of displaced homemakers programs under CETA. This legislation was cosponsored by Senators McGOVERN, HUMPHREY, RIBICOFF, CLARK, METCALF, LEAHY, MARK O. HATFIELD, PELL, ABOUREZK, RIEGLE, SARBANES, PERCY, ANDERSON, STONE, KENNEDY, CHURCH, HATHAWAY, BENTSEN, and HASKELL.

I would like to take this opportunity to thank the chairman of the Employment, Poverty and Migratory Labor Subcommittee, Senator NELSON, for incorporating much of this earlier legislation into the bill we have before us today. I would like to also thank one of my earlier cosponsors, Senator RIEGLE, for his tireless efforts in moving this legislation through the committee.

During the last 15 years, we have made great strides toward eliminating discrimination against women in employment. We have enacted the Equal Pay Act of 1963, title VII of the Civil Rights Act of 1964, and title IX of the Education Amendments of 1972. These legislative barriers against discrimination along with an increased societal awareness of the importance of the labor force participation of women have contributed to a significant increase in the number of women in the civilian work force over the last decade. In fact, during this period women accounted for nearly three-fifths of the total increase in the civil labor force. The Department of Labor now predicts that 9 out of every 10 young women will work at some time in their life.

With these employment advances for women, what have we done to assure the financial security of those 15 million married women who have chosen to be full-time homemakers? The answer is not nearly enough. To begin with, we have never adequately recognized the value of the homemaker's contribution to our Nation's economy. We have neglected the homemaker's contribution despite the fact that as early as 1918, the National Bureau of Economic Research estimated the value of the homemaker's work as one-fourth of the gross national product.

For the homemaker, who has spent a substantial number of years providing unpaid services to family members, we have provided little, if any, assistance to become a productive member of the labor force when faced with sudden financial insecurity due to death of her spouse, divorce, or loss of traditional family income. These women, who are not in the labor force and are over the age of 40, are designated "displaced homemakers." It is difficult to estimate the number of women who would qualify as "displaced homemakers" since Government statistics are not collected on homemakers as such. How we can see the scope of the problem faced by displaced homemakers by looking at some selected statistics; for example:

Thirty-five percent of all female heads of households were widowed in 1975;

Over the past decade, single parent families headed by women have grown 10 times as fast as two-parent families;

The highest rate of labor force participation by women family heads was among those 45 to 54 years of age where nearly 7 out of every 10 worked; and

In 1975, there were 10,104,000 widows and 3,978,000 divorced women; a 45 percent increase in widows since 1950 and 223 percent increase in divorcees since 1950.

What happened to these displaced homemakers once they lost their traditional source of income? Many of these women try to reenter the work force without marketable job skills or training. Unable to secure employment on their own, some of these women turn to the Federal Government for assistance. Sadly, the eligibility criteria for most Federal programs do not cover displaced homemakers.

Because there has been no nationwide program addressing the concerns of displaced homemakers, several localities have attempted to address the employment problems of these women. The most notable of these efforts have been in Baltimore, Md., and Oakland, Calif. In my own State of Indiana, the Fort Wayne displaced homemakers program has also been successful in this regard. The bill the Senate is considering today will strengthen the efforts of these programs, as well as permitting the establishment of other similar programs across the Nation.

Briefly, the CETA bill before us today would provide for the funding of displaced homemakers programs under title III of CETA, as well as other titles of the bill. While the bill does not provide for a specific set aside of $5 million for the funding of displaced homemakers programs under title III, it is the understanding of this Senator and the chairman of the committee, that the Department of Labor has committed to spending this amount on displaced homemakers programs during fiscal year 1979. This amount would be in addition to any moneys made available to displaced homemakers programs under other titles of the bill.

In defining displaced homemakers, the Human Resources Committee stated in its report that it did not place a statutory age limitation in the bill, however, the committee did believe, "in implementing the program, the Secretary should take into account and give special attention to the needs of older women who are displaced homemakers." Since the problems of displaced homemakers are too often a combination of both age discrimination and sex discrimination, I would hope the Secretary of Labor would be particularly mindful of the committee's recommendations in this area.

Statistical evidence indicated clearly that women are entering the labor force in increasing numbers for basic economic reasons. Older women, whether to support their children or themselves, are often ill prepared to enter the job market. If they do breach the barriers of age and sex discrimination they are still likely to be employed at menial, low-level occupations which provide only marginal income. This cycle can be broken only by supplementing their inadequacies of earlier education and training with counseling and training programs designed to provide better paying job opportunities. It is this need which would be addressed by the displaced homemaker provisions of the CETA legislation.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. JAVITS. I yield back my time.

Mr. NELSON. Mr. President, I yield back the remainder of our time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Maine (Mr. HATHAWAY), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Maine (Mr. MUSKIE), the Senator from Tennessee (Mr. SASSER), the Senator from Alabama (Mr. SPARKMAN), the Senator from Mississippi (Mr. STENNIS), the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON), the Senator from Minnesota (Mrs. HUMPHREY), and the Sen-

ator from Georgia (Mr. TALMADGE) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BARTLETT), the Senator from Massachusetts (Mr. BROOKE), the Senator from Missouri (Mr. DANFORTH), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), the Senator from Kansas (Mr. PEARSON), and the Senator from New Mexico (Mr. SCHMITT) are necessarily absent.

The result was announced—yeas 66, nays 10, as follows:

[Rollcall Vote No. 367 Leg.]

YEAS—66

So the bill (S. 2470), as amended, was passed.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. NELSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NELSON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 2570.

The PRESIDING OFFICER. Without objection, it so ordered.

Mr. NELSON. Mr. President, I ask unanimous consent that S. 2570 be printed as passed by the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, at a time when inflationary pressures are great—at a time when we need to do whatever we can to put an end to the cycle where wages and prices rise in an illusory attempt to "catch up" with each other—an excessive reliance on monetary and fiscal policy to reduce unemployment can prove counterproductive. Indeed, exclusive reliance on macroeconomic stimulus can leave us with an unacceptably high rate of joblessness. This is the case largely because many individuals with limited skills and experience—the structurally unemployed—would be bypassed, while the wages of skilled workers would continue to be bid up.

Fortunately, there is another way to lower the level of joblessness among the structurally unemployed, a way which will not exacerbate inflationary pressures. Job-creation programs can be targeted to those who are generally excluded from the job market because of lack of skills and experience. Such programs lead to an expansion of economic growth without a concomitant bidding up of the wages of those already employed.

In addition, it has been documented that there is a real increase in the employment and earnings potential of participants in such programs. While the increase is limited, it does indicate that these targeted programs can work to the benefit of the structurally unemployed.

Mr. President, the facts are these: We have seen a dramatic decline in joblessness over the past 19 months—from 7.4 percent in January 1977 to 6.2 percent last month. However, some segments of our society have not fully benefited from this improvement. Blacks and youths are two such groups. The joblessness rate for blacks, 12.5 percent in July, was more than twice the 5.3 percent rate for whites. The unemployment rate for youths 16 to 19 years of age was 16.3 percent.

The need to expand programs for the hard-to-employ is reflected to the Comprehensive Employment and Training Act Amendments of 1978. The amendments as reported by the Human Resources Committee call for support in fiscal year 1979 of public service jobs at the current level of 725,000. About half of these jobs would be under title II, the structural unemployment title of the bill.

Mr. President, I believe that the chairman of the Employment, Poverty, and Migratory Labor Subcommittee, Mr. GAYLORD NELSON, and the ranking minority member, Mr. JACOB JAVITS, are to be commended for their work on the Comprehensive Employment and Training Act—particularly for having partially refocused the bill on the problem of structural unemployment. With the changes they and other members of the Human Resources Committee have made, CETA will play a vital role—together with a moderate tax cut—in helping to move our Nation toward fuller employment without exacerbating inflation.

---

## SECOND SUPPLEMENTAL APPROPRIATIONS, 1979—CONFERENCE REPORT

Mr. MAGNUSON. Mr. President, I submit a report of the committee of conference on H.R. 13467 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13467) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of August 10, 1978.)

Mr. MAGNUSON. Mr. President, this is the supplemental appropriation bill. The committee on conference met on August 10, and a report was filed in the other body on that date and printed in the RECORD. Thus the conference report has been available now to the Members of Congress for almost 2 weeks.

The bill, as agreed to in conference, is $6,808,778,686, which is $359,668,300 under the President's budget estimates, $475,389,000 above the House bill, and approximately $89 million above the Senate bill, $89,550,000 to be exact.

It is very important that we finish this bill today because a great portion of this money involved mandatory pay raises in most of the departments of Government which were not included in the regular appropriation bills.

There are some other items in the conference report which are greater than the House or Senate bill. This was due to the lack of authorizations on some of the very necessary items or late submission of items after we marked up the regular bills.

Mr. President, I would like to review some of the matters which were in conference which have resulted in the conference report being greater than both the House and Senate bill.

The conferees deleted a Senate rescission of $30,000,000 in emergency drought and flood assistance funds available under the agricultural conservation program.

The conferees agreed to an appropriation of $52,200,000 for construction and renovation of St. Elizabeths Hospital. These funds were not contained in the Senate bill. They were in the budget.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

### PRIVILEGES OF THE FLOOR

Mr. HATCH. Mr. President, I ask unanimous consent that Ken Beadles of my staff be accorded privileges of the floor during the consideration of all the bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that Ron Tammen of my staff be given privileges of the floor during debate on the tax bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. Mr. President, diverting from the conference report, after this when this Senator gets started on a very important matter he is going to ask unanimous consent that if Senators want

some of their staff on the floor that they go out there and drop their names in a box so that we can proceed with the Senate's business. I think that will be a good change in the rules. It is not his fault, I say to the Senator from Wisconsin.

Mr. President, I ask unanimous consent that there be printed in the RECORD, at this point, a memorandum that addresses a number of the distortions and inaccuracies that have been circulating regarding the Hart Building. I also ask unanimous consent that a fact sheet regarding the Hart Building be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMORANDUM ON THE HART SENATE OFFICE BUILDING, AUGUST 21, 1978

The recent discussions concerning the Hart Senate Office Building have given rise to a number of distortions and inaccuracies concerning the physical characteristics of the building which it seems useful to rectify and clarify.

Without necessarily indicating the items in order of importance, the following list consists of those most often referred to:

1. The sixteen foot ceiling heights. It is useful to note that only 15% of the ceiling heights in the Hart Building, namely in the offices which are on the exterior perimeter of the building, are of that ceiling height. The balance of the building office space, that is to say 85% of it, has an eight foot ceiling height, which is less than the ceiling height in the existing Dirksen Building in the office areas. In fact, the so-called sixteen foot ceiling height is slightly less than that in the existing Russell Building built in 1910, and which is thought by most people to be the most desirable of the two present Senate Office Buildings.

The Hart Building was designed to make very efficient use of the volume in the building by providing virtually all of the floor area with low ceiling heights. The distortion associated with the comments that have been made concerning the ceiling heights have made it appear that the building has high ceilings throughout, whereas, in fact, it is an unusual circumstance and confined only to certain small areas, thus increasing the internal efficiency of the building and at the same time creating an atmosphere comparable to the Russell Building.

2. The gymnasium. The gymnasium is in fact a simple basketball court together with associated locker rooms and shower rooms. It is not usually mentioned that there are also locker rooms for male and female staff personnel, so that they can also use the physical fitness facilities. The basketball court can be divided at one end with nets so that paddle ball games can be played. It is not a large area, it has no room for spectators and is in the simplest form possible.

The so-called existing gymnasiums are, in fact, not gymnasiums at all. They are simple exercise rooms, one of which exists in the Dirksen Building and is 17 x 34 feet, slightly larger than most living rooms, with a very low ceiling height and which contains a few exercise machines; a similar room exists in the Russell Building and is about 12 x 12 feet in dimension, smaller than the size of a living room in many homes, and again with very low ceilings and containing a few exercise machines. These are by no means capable of being termed gymnasiums in the ordinary sense of that word. Thus, the facility that is being added is comparable to that which exists on the House side and would be available for health giving exercise for staff personnel as well as Senators. It is austere and simple in its design and in its characteristics. There are no steam rooms, saunas, swimming pool or any other facilities except a basketball court which can also be used alternatively for indoor tennis.

3. The Ninth Floor Dining Facility. This facility was never at any time intended to be, nor was it designed to be, a private dining room for Senators only. It is a simple dining room with an associated kitchen in which it is intended to serve buffets to the public as well as to staff personnel and Senators, similar to the function of the cafeterias presently in existence in the Dirksen Building. 80 percent of the floor on which the facility is located is devoted to the use of mechanical and electrical equipment under the roof itself; it therefore is a location which makes efficient use of an isolated area of the building.

4. The Multi-Media Room. The temporary title of this room has apparently caused a good deal of misunderstanding to arise. It is in fact a hearing and assembly room for the use of the public and the writing press, as well as for the electronic media, for those instances in which recording and reporting of hearings is desirable. It has built in facilities to enable television cameras and the writing press to be able to provide accurate reporting of events to the public and at the same time not have television equipment and cables running up and down the corridors and damaging the buildings as is presently occurring because the existing buildings were designed before the advent of television. Thus, it is not an overly decorated or opulent room; it is a simple hearing room for the use of the public.

5. The marble exterior. It is useful to recall that the exterior and the interior design of this building was the subject, for the first time in history and prior to Senate approval, of public hearings conducted by the Senate Committee on Public Works on the design of a public building. The use of marble was chosen as of architectural importance in order to match the material of the existing buildings and especially since the Hart Building is connected directly to the existing Dirksen Building. To use another material was judged to have been inappropriate in the light of the architectural and historical aura on Capitol Hill. It is further a material of extreme durability and therefore is cost beneficial in terms of maintenance, as is well known. The design is simple and dignified and was so judged by the numerous professional architectural critics that testified before the Committee, as well as by the comments made in the press which covered the hearings widely at the time.

6. Paneling in the Senator's personal offices. Wood paneling was chosen not only for the aura of quiet dignity which it exudes, but also because of its cost benefit value, in that it does not require redecorating, repainting or other costly maintenance over its life, as do plaster walls. It was felt to be an appropriate expenditure which, of course, could be eliminated, but nevertheless needs to be viewed on the basis of its cost benefit value in small areas of the building. Less than 1% of the wall area in the building has paneling.

The following general comments are also useful to note:

A. The building has a sophisticated electronic control system as well as electrical and mechanical systems which yield extremely high energy efficiency and which are designed to interconnect with the energy management program that is being installed throughout the Hill. The initial increased expenditures for energy efficiency are well known, and are deemed to be not only advisable but a necessity in the light of the present energy concerns of the nation. Just as it costs more money to insulate a private house than not to insulate it, the cost of providing sophisticated mechanical and electrical control systems in an office building costs more initially but more than pays for itself and thus is extremely cost beneficial as well as energy saving.

B. The interior of Senators' offices is austere and simple. It is by no means complicated, nor is it highly decorated or expensive either in fact or in appearance. The staff spaces are modern, simple and inexpensive to maintain. Some of the materials that have been used are deemed to be necessary as a life cycle cost benefit decision, inexpensive materials which are difficult to maintain and need to be replaced more often were avoided. This is particularly evident in examples such as baseboards which receive the continuous abuse of mops and floor polishing equipment.

C. The need for the building. The documented need has been made apparent by study after study beginning as early as 1971 indicating the extreme shortage of space with which everyone is familiar. The fact that only 67 square feet per employee exists in the average Senator's office, thus reducing productivity, generates requests for increases in staff because the working conditions often do not enable staff to produce the amount of work necessary to respond to constituent and legislative needs. With increased productivity because of increased space availability and modern configurations of furniture and word processing equipment, increases in staff in the future can be either minimized or reduced to zero.

D. It should be remembered that $18 million of the funds requested has resulted purely and simply from increases in construction costs resulting from inflation in the economy larger than that which was estimated. Thus, without any change in the original program at all, an additional $18 million is necessary in order to make up for the change in the value of the dollar that has occurred since the time the original estimates were made.

E. The vote of the House of Representatives. The vote on the floor of the House was taken without a single hearing of any kind having taken place on the House side with regard to this project since its inception five years ago, and therefore without any direct knowledge on the part of any Committee of the House nor any of the Members of the House with regard to this project; the rule of comity was thus observed during the entire development of the project. Many of the Members of the House were unfamiliar with the fact that the building is already under construction, and presumed that the funding was being requested for a future building, not yet even in the planning stage. Thus, not only was the vote not on the issue of the project as it exists, taking into account all the facts, such as the $60 million loss that would take place as a result of termination of the project, but also without regard to the needs or any other matter of fact associated with the project. It was thus obviously an uninformed vote.

F. It has been the intention from the beginning, one, to design a building which is flexible, so that the needs of the Senate in the future can be accommodated irrespective of how those needs may require the use of space, and secondly, to design a building that was austere and functional, and yet gave an appearance of dignity and decorum commensurate with the historic qualities of the Senate itself. It should be emphasized that there is nothing in the design of this building either exterior or interior which creates the feeling of opulence or excess.

---

HART BUILDING FACT SHEET

COMPARABLE SQUARE FOOT COSTS OF OTHER BUILDINGS

Hart: $101 per sq. foot.
Rayburn: $186 per sq. foot.
FBI: $90 per sq. foot.

AT&T Long Lines Bldg., Bedminster, N.J.: $111 per sq. foot.

Federal Office Bldg., Albany, N.Y.: $139 per sq. foot.

Underwood Headquarters Bldg., Westwood, Mass. $110 per sq. foot.

IBM Bldg., New York City: $120 per sq. foot; ($92 per sq. foot for shell plus $30 to $40 per sq. foot to finish).

AT&T Headquarters Bldg., New York City: $170 per sq. foot ($137.50 per sq. foot for shell plus $30 to $40 sq. foot to finish).

AT&T Headquarters Building, N.Y. City will cost $110 million for 1,000 employees.

Hart Building will cost $125 million and house 3,000 employees.

Currently, about 1,700 employees are housed in the old Carroll Arms Hotel, Senate Courts and other Senate annex buildings. These buildings are not intended for use as office space. In fact, Senate rules prohibit anything larger than two drawer file cabinets for fear that a larger file cabinet would result in a collapse in the flooring with the larger file cabinet crashing through to the floor below. Also, the limited wiring capacity is inadequate for office space and the possibility of a dangerous overload is ever present.

The Hart Building is designed to house these 1,700 staff personnel now housed in substandard facilities and alleviate current overcrowding in the Russell and Dirksen Office buildings.

9 Hearings held and Senate has voted for building 4 times already.

It is true that the number of employees on the Senate rolls has increased by 150% over the past 20 years (from 2,415 in October of 1958 to 6,312 in October 1977). However, during this same period the Federal Budget for which the Congress is charged with oversight, has increased 500% (from $82.6 million in 1958 to $462.2 million in 1978). (During this period, the GNP rose by 500%, from $442.1 billion to $2043.2 billion). Does any Member seriously think he can do a quality job for his constituents here in the Senate with a 1958 level of staff which would be one-third of the current level? Increased complicity of legislation requires more staff with specialized knowledge in order to keep Senators abreast of solutions to complicated problems.

Mr. MAGNUSON. Mr. President, the Senate acted responsibly in enacting a ceiling of $135 million for the Hart Building.

Unfortunately, the action of the House of Representatives will have only one effect. It will delay the completion date with the result that the total cost will necessarily rise above the $135 million ceiling.

If the House keeps delaying, it might cause the present cost of $101 per square foot for the Hart Building to exceed the $186 per square foot cost of the Rayburn House Office Building. But I doubt that the delays would ever cause the Hart Building to approach the $250 per square foot cost of the building sponsored by the senior Senator from Rhode Island (Mr. CHAFEE). That is all I have to say about it.

The conferees agreed to the House figure for the student loan insurance fund. This is a mandatory item, and the figure agreed upon was $223 million, which is $43,939,000 above the Senate bill.

I would like to point out that the conference considered a total of 83 amendments. Of that total, the Senate receded on 6 and the House receded on 31. A total of 15 Senate amendments were further amended and agreed to by the House, and 30 amendments have been reported to the House in technical disagreement.

Mr. President, I would like to thank the members of the committee for their assistance in bringing this conference report to the floor, because of its urgency. The Senator from North Dakota (Mr. YOUNG) had a great part in this as ranking minority member; so, Mr. President, I will yield to him, but first I ask unanimous consent that immediately following my remarks there be printed in the RECORD a summary table showing the conference totals and comparative figures.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY—SUPPLEMENTAL BILL

| | New Budget authority estimates fiscal year 1978 | New Budget authority House fiscal year 1978 | New Budget authority Senate fiscal year 1978 | New Budget authority conference fiscal year 1978 | Conference compared with fiscal year 1978 estimate | Conference compared with House bill | Conference compared with Senate bill |
|---|---|---|---|---|---|---|---|

Mr. MAGNUSON. I yield to the Senator from North Dakota.

Mr. YOUNG. Mr. President, the distinguished chairman of the Committee on Appropriations (Mr. MAGNUSON), has given us a good summary of the conference report on the second supplemental appropriations bill. I am in accord with his views.

More than half of this $6.8 billion bill agreed to by the conferees is needed to pay for the October 1, 1977, pay raise for military and civilian personnel. Overall, this bill is $359 million below the budget estimate.

I am very disturbed about the action of the House concerning the Hart Building. The rejection by the House of the conference item on the Hart Building breaks a longstanding tradition of comity between the two bodies for their respective funding requirements. I was less than enthusiastic about providing additional funds for the Hart Building, but the issue was debated at length on the Senate floor and it was the will of the Members of the Senate to provide the additional $54 million to complete the Hart Building.

It does not make sense to me to stop construction of the building when it is half completed. I was opposed to it when it was first started and I was opposed to adding all the additional employees under Senate Resolution 60, and other measures which made it necessary to provide more office space. I supported the $54 million in additional funds to complete the Hart Building because it was a far better alternative than to have spent a huge amount of money and then leave the building partially completed.

The amendment of the chairman of the Appropriations Committee (Mr. MAGNUSON) also provided a cap of $135 million for the completion of the construction of the Hart Building, which was intended to put to rest the issue of the construction of the building. Some of the opponents of the Hart Building were claiming the cost would reach at least $200 million or more.

Mr. President, I hope that the action of the House will not create a feud between the two bodies and that this problem can be resolved. I do not believe this is the time to react to the House action. I recommend that we accept the House's disagreement and approve this bill as reported by the conferees.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. INOUYE). The question is on agreeing to the conference report.

Mr. MAGNUSON. Mr. President, I yield to the Senator from Alaska.

Mr. STEVENS. Mr. President, I certainly agree with the ranking member on our side and the chairman of our committee concerning reactions to the Hart Building matter. I do not feel it is time for us to get in a feud, necessarily, and I accept Senator YOUNG's advice in that regard. But I would like to point out to the Senate that the House has increased its own contingency expenses by $14 million over last year. That is an increase of 15 percent.

We have been silent about that in the past. Those are contingent funds, and a Member who does not spend his allowance from that contingent fund may pocket the difference. It has meant that some of our colleagues on the other side have had sort of a free ride in voting against pay raises, because they could, by not spending the contingent fund, thereby have additional income from not spending for contingent expenses.

I only mention this because I think the record ought to be clear that if we are going to stop this historic practice of not looking into the expenses of the other body, I think we ought to start by looking at some of the items in the legislative appropriations bill next year.

It is my hope that the House will see fit to reconsider its action. Even though many of us had some questions about the Hart Building in the beginning, and others had questions as to whether it should continue, it was a Senate decision, and I do not believe that the House should allow this very bad precedent which it has established on a supplemental appropriation bill to continue over until next year, because while we may and I hope we will accept the request of the chairman and the ranking member that this bill be cleared, I think if this precedent persists through the balance of this year, next year we should look at every item in the House legislative appropriations bill with great care.

Mr. MAGNUSON. Mr. President, I want to express my approval of the remarks of the Senator from Alaska, and I do hope we will work this matter out. But there are so many other important, pressing items in the bill that I felt the better part of discretion now was to get this bill down to the White House. It involves paychecks early next month, and there might be some layoffs involved; and as pointed out by the Senator from North Dakota, almost half of the bill is for mandatory pay raises.

Mr. YOUNG. Two-thirds.

Mr. MAGNUSON. Two-thirds of the bill; close to $4 billion.

Mr. President, the Senator from Pennsylvania wishes to be heard on this matter. I yield to him.

Mr. SCHWEIKER. Mr. President, I join with our chairman (Mr. MAGNUSON) in recommending adoption of the conference report on the second supplemental appropriations bill for fiscal 1978.

In all, the Labor-HEW chapter of the conference report provides an additional $394,964,000 for fiscal year 1978, $96,639,000 more than the Senate version of the bill, and $15,190,000 more than the House, but $92,788,000 less than the supplemental budget request.

For the most part, the conferees accepted the Senate amendments to the House bill. Of the 17 amendments in chapter V, the House agreed to recede on 13, and accepted compromises with the Senate on 2 others.

I am deeply disappointed in the conference report's resolution of one important area, the question of funding a new influenza immunization program. I led the fight against this proposal in the Appropriations Committee and on the floor of the Senate, and I continue to believe it is very unwise to proceed with a new program this year. We do not have the scientific questions resolved: we cannot predict with certainty whether or not a flu epidemic will occur, and if it does, whether or not the vaccine will provide protection. We cannot produce a vaccine that will be free from the serious paralyzing and sometimes fatal side effect of Guillain-Barre syndrome.

There are also serious questions of liability that have not been resolved. The Secretary of HEW does not plan to have recommendations on liability policy until another 12 to 18 months have passed. Liability claims against the United States for immunization programs date back to 1972, and the total of claims from the ill-fated swine flu program is now approaching 1 billion.

It is also unclear whether or not the program as designed will have any noticeable effect on immunization rates, since it may just supplant private immunization efforts. Lastly, and this is a very serious point, attempting to gear up a new immunization program now through the end of September, when the school year is beginning, means that there will be an adverse affect on the important, proven childhood immunization program.

I do not wish to belabor these points. I am sure all my colleagues are aware of my concern. I sincerely hope that the authorizing Health Subcommittee, on which I serve as the ranking Republican member, will address these questions in the proper way before we end up with a per-

manent new influenza immunization program. I hope the conference decision of this bill does not place Congress in the position of having to appropriate additional amounts later to deal with liability and other problems that could be created by this immunization program, for which the conference report provides $8.2 million.

The House conferees agreed to the Senate amendment to provide $6 million for the rural health initiative program to expand services to medically underserved areas.

The Senate conferees receded to the House on the questions of funding for the renovation of St. Elizabeths Hospital. The agreement will provide $52.2 million to make needed repairs so the hospital can regain its accreditation.

The conferees also agreed to increase the allowance for medicare administrative expenses by $8.8 million to cover increasing costs in medicare claims processing contracts. Of this amount, $3.8 million is for outstanding bills and $5 million is for possible further cost increases arising from unanticipated growth in workload.

Under education, the Senate conferees also agreed to the House position to provide $223.9 million for the student loan insurance fund. This amount is the same as the budget request and is necessary to cover mandatory payments for federally insured student loans. The supplemental is required by unexpected growth in the number of new loans granted.

The conferees agreed to provide the positions needed by the Office for Civil Rights to comply with a court order to clear up a large backlog of discrimination complaints and to work on compliance with the new regulations covering the handicapped.

With the exception of the Russian flu immunization program, I believe we have developed an acceptable Labor-HEW chapter and I recommend its adoption.

Mr. MAGNUSON. I yield to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I would like to ask a brief question of the chairman.

As I understand it, the additional money for the Hart Building was knocked out, as well as the cap was knocked out, so the bill is as it originally came to the floor of the Senate, with no money in it one way or the other for the Hart Building?

Mr. MAGNUSON. That is correct.

Mr. CHAFEE. So, therefore, the present appropriation for the Hart Building remains at the $85 million where it was before we started this whole business?

Mr. MAGNUSON. Yes, and then I understand—I do not have the exact figures, but within that amount there are some unspent funds.

Mr. CHAFEE. That is correct.

Mr. MAGNUSON. I think it is $32 million.

Mr. CHAFEE. No—well, whatever it is.

Mr. MAGNUSON. Whatever it is, I will put the exact figure in the RECORD.

Mr. CHAFEE. I also understand that we expect, somewhere down the road, probably early next year, that the proponents of the Hart Building will be back for more money to complete that building.

Mr. MAGNUSON. I suspect that will be true.

Mr. CHAFEE. And I suspect we will all be waiting for them.

Mr. MAGNUSON. I imagine on the first supplemental next year, they will show up and make their case.

Mr. CHAFEE. I thank the Senator.

Mr. BELLMON. Mr. President——

Mr. MAGNUSON. I yield to the Senator from Oklahoma.

Mr. BELLMON. Mr. President, I have a statement I would like to make in behalf of the chairman of the Budget Committee (Mr. MUSKIE), who could not be here.

The Senate is about to act on the conference report on H.R. 13467, the second supplemental appropriations bill for 1978. This is likely to be the last spending bill for fiscal year 1978. It provides budget authority of $6.8 billion, with outlays estimated at $5.6 billion.

As chairman of the Budget Committee, Senator MUSKIE would like to bring to the Senate's attention the current status of the budget in comparison to the final budget ceilings for fiscal year 1978 which we adopted in the second budget resolution last September.

If this bill is enacted into law, outlays for fiscal year 1978 would total $448.0 billion, a comfortable $10.3 billion below fiscal year 1978 second budget resolution ceilings.

Let me repeat that for emphasis:

If this bill is enacted into law, outlays for fiscal year 1978 would total $448.0 billion, a comfortable $10.3 billion below fiscal year 1978 second budget resolution ceilings.

Budget authority, however, would total almost $500 billion, leaving only about $0.2 billion in budget authority remaining under the second budget resolution ceiling. Any subsequent spending legislation which exceeds the remaining very small amount of budget authority would not be in order since it would cause the second budget resolution budget authority ceiling to be exceeded.

Mr. President, it now appears that fiscal 1978 will be the third consecutive year that the Congress has been successful in keeping Federal spending within its own budgetary ceilings. I offer my congratulations to Members of both the Senate and the House for this significant achievement.

I believe that our success in meeting budgetary targets is compelling evidence that the budget process is an orderly and effective tool to insure responsible Federal spending. I hope and expect that its success will continue in future years.

Mr. MAGNUSON. I want to add on behalf of the members of the Appropriations Committee, I hope this is the last one. There have been eight supplemental appropriations bills. Some were directed to specific things, like the drought money, with loans; but there have been eight. It is getting to be so that there are more supplementals than regular appropriations. All members of the committee have joined to alert the administration that we are going to put our foot down on supplementals. They better have their estimates ready for the regular bill. If there is some real emergency, we will entertain it. But they dillydally along and get them up here late. The legislative committees do not authorize. The Appropriations Committee is developing, I hope, a get-tough attitude on this, and I hope this is the last one.

Mr. BELLMON. I congratulate the chairman for taking that position.

Mr. MAGNUSON. All Members have helped me and joined with me.

Mr. HARRY F. BYRD, JR. Will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. HARRY F. BYRD, JR. As I understand the conference report now before the Senate, insofar as the new Senate Office Building is concerned, the conferees eliminated the $54 million which the Senate added to the bill.

Mr. MAGNUSON. The House did. The House eliminated it.

Mr. HARRY F. BYRD, JR. The House eliminated it.

Mr. MAGNUSON. After we had had our conference.

Mr. HARRY F. BYRD, JR. But the conference report now before the Senate——

Mr. MAGNUSON. The report now has it out.

Mr. HARRY F. BYRD, JR. It has the $54 million out.

Mr. MAGNUSON. That is right. And it has out the ceiling, too, which I was sort of hopeful would be left in. But maybe we want to change the ceiling. I do not know. I think I might agree to that.

Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LONG. Will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. LONG. Mr. President, as one Member of this body I want to go on record as supporting the chairman of the Appropriations Committee and his committee in doing their best to move forward with that office building. The reason I say that is the greatest waste in Government is to start something and never finishing it. It is like building a road that goes halfway out of town and then stops without getting it to an adjoining city. Everything you have put into it at that point is an absolute and complete waste.

I do not have the figures, but I believe the chairman and his committee have the figures, which show that we have far more people working with the amount of floor space we have in the building now than when the building was built. I recall when we built the Dirksen Building, the figures were that there were five times as many people working in that Senate Office Building as there were when the building was first built. I know that in my office as well as in a number of other offices we can find as many as eight people working in a single room back to back. That sort of crowding really is not a good idea.

I am not here to pass judgment on the design of the building. I did not look

into all that. All I want to say is that we do very much need the space. It is inefficient to be crowded together the way we have been. There is no greater waste in my judgment than to start something and not finish it.

Mr. MAGNUSON. I hope both Houses will take a good, long look at this matter. As I pointed out, there is some money available, unspent money, to continue some basic progress in the building. Then we will see where we are next year.

Mr. RANDOLPH. Will the able chairman yield?

Mr. MAGNUSON. Yes, I yield.

Mr. RANDOLPH. I wish to follow the colloquy between Senator LONG and the chairman.

I recall when we authorized this building in the committee which I chaired in 1972, the amount of money then was just in excess of $47 million. The Senator from Louisiana said, of course, when there are delays, whatever are the reasons for the delays, there is a spiraling inflation which sets in.

This is what I want to enforce, if I may: There are many Members of the Senate, and I shall not refer to them by name—their names are on the record—Members who are very conservative, Members who try to keep the cost of Government to the minimum, hoping, however, for realistic efforts. I remember one Senator who said at that time, and he is a Member of this body who, by his votes, as all others know, tries to keep down the cost of operations of the Federal Government. But he has said, "If I am to serve my constituency I must have space for the staff I am working with, and they are working with me, to serve these constituents. I cannot do it with the present quarters that I have as a Senator."

That is just an illustration of what one Member has said. I know he was speaking from personal experience in the operation of his office.

I deplore, of course, the increasing costs of any building, as do other Members, but I do know that when we begin any project, and there is a period of time that elapses before beginning the construction, with the authorizing and appropriations of moneys for that structure—or for a road or for any type of public or private structure—that the costs under the inflationary spiral rise in amounts that, frankly, make us wonder what has happened.

That is what has happened here.

I think a close look, a careful review, is certainly a good idea of the able chairman.

Mr. MAGNUSON. I thank the Senator.

Mr. LUGAR. Will the Senator yield for a comment?

Mr. MAGNUSON. I yield.

Mr. LUGAR. Mr. President, I rise simply because the comments made with regard to the bill have certainly extended the debate. The Senators from Louisiana and West Virginia have spoken well. But let me add for the record that one reason the House of Representatives apparently intruded into this question is that many Members of the House have been hearing from their constituents. Whatever our general judgments may be about service to our constituents, there are a number of our constituents who simply do not want to be served in that way, that is, with such a substantial new edifice constructed.

I think the debate can proceed at another time on this matter.

I am aware by the mail received from my constituents that they would prefer that the building be stopped. I voted in behalf of the measure of the distinguished Senator from Rhode Island last week, as an expression of that sort of feeling.

I hope as the Appropriations Committee proceeds it would be mindful of what I think is a rather substantial groundswell of opinion in the country and at least at minimum will cut the ceiling below the $135 million which was mentioned. If we are to proceed at all, we should at least do so with a great deal more prudence and sensitivity as to what is going on in this country as an expression about the building.

I thank the Senator.

Mr. MAGNUSON. Mr. President, I think the members of the Appropriations Committee have a fair knowledge of what is going on. The trouble is that so much of this got off into a tangent about whether or not there is going to be a restaurant upstairs or down in the basement, who will eat in there, and all of that, which is incidental. If the Appropriations Committee decided, we would not have to have it there.

I think the basic thing is whether or not we need some more office space. The other things, the so-called frills, those are the ones that were played up quite a bit. That need not be in there at all. There is not enough money now to continue the basic building over there instead of having the skeleton standing up there. It may end up just being a plain office building; I do not know.

I know that many of the Senators are pretty well cramped, including the Senator from Washington. We have people sitting on top of one another in my office. It is because this country is bigger; you get more mail. And when you have a $500 billion budget, I think you get just as much criticism if you do not pay attention and review that amount of money and have the help to do it as you would for building a place to house them. A $500 billion budget is a pretty big budget.

It still is—well, I guess it is the best example of our growth. It is still about 21 percent of the gross national product, $500 billion. That is the average of the last 17 years; it has been from 18, 19, to 22. It is now 21 percent of the $500 billion. But that shows you what the growth is and what we have to do. People expect us not only to give personal service, but to take a look at the expenditure of that vast amount of money.

Senators have an important part to play in that, not only the members of the Appropriations Committee, because we hear from all of them. It is a question of whether we want to spend some amount of money to be consistent with our responsibilities in carrying them out. We should not go overboard on it or do something that is wrong. But we should not base our decision on whether or not we are going to have some frill here or some frill there. We are building a building, no matter what we build over there, to last.

I have had an office for over 30 years in the same building. It is now, I think, the old one, close to 90 years old, I think; that is when they started it. You know, the only real repairs they have made are that they now find they have to change the windows over there. They had wood frames, but the wood was so good that they have lasted all these years, almost three quarters of a century. So when you do build a building, you are going to have to spend a little more money for an ordinary office building, because you want it to last.

We are working these things out to be as prudent as possible and consistent with the responsibility of Senators.

Mr. MAGNUSON. Mr. President, if there are no further comments and no further amendments, I move adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Maine (Mr. HATHAWAY), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Montana (Mr. MELCHER), the Senator from New York (Mr. MOYNIHAN), the Senator from Maine (Mr. MUSKIE), the Senator from Georgia (Mr. NUNN), the Senator from Tennessee (Mr. SASSER), the Senator from Alabama (Mr. SPARKMAN), the Senator from Georgia (Mr. TALMADGE), and the Senator from Minnesota (Mrs. HUMPHREY) are necessarily absent.

I also announce that the Senator from Alaska (Mr. GRAVEL) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BARTLETT), the Senator from Massachusetts (Mr. BROOKE), the Senator from Missouri (Mr. DANFORTH), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Kansas (Mr. PEARSON), and the Senator from New Mexico (Mr. SCHMITT) are necessarily absent.

The result was announced—yeas 61, nays 11, as follows:

[Rollcall Vote No. 368 Leg.]

YEAS—61

| | | |
|---|---|---|
| Allen | Glenn | Packwood |
| Bayh | Hansen | Pell |
| Bellmon | Hart | Percy |

| Eastland | Johnston | Sparkman |
| Goldwater | Kennedy | Talmadge |
| Gravel | Mathias | |

So the conference report (H.R. 13467) was agreed to.

Mr. MAGNUSON. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the Senate concur in the amendments of the House to the amendments of the Senate numbered 18, 29, 51, and 62, en bloc.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

*Resolved*, That the House recede from its disagreement to the amendment of the Senate numbered 18 to the aforesaid bill, and concur herein with an amendment as follows:

In lieu of the matter proposed by the said amendment, insert:

For an additional amount for influenza vaccination, $8,200,000, to remain available until September 30, 1978.

*Resolved*, That the House recede from its disagreement to the amendment of the Senate numbered 29 to the aforesaid bill, and concur therein with an amendment as follows:

On lieu of the matter proposed by the said amendment, insert:

Special Institutions

Hereafter, Gallaudet College, Howard University, the National Technical Institute for the Deaf, and the American Printing House for the Blind are authorized to make purchases through the General Services Administration.

*Resolved*, That the House recede from its disagreement to the amendment of the Senate numbered 51 to the aforesaid bill and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert "$50,000".

*Resolved*, That the House recede from its disagreement to the amendment of the Senate numbered 62 to the aforesaid bill and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: " *Provided*, That not to exceed $20,000 shall be available from existing appropriations made under this heading to be used for construction and installation of improvements to existing National Bureau of Standards buildings.".

*Resolved*, That the House insist on its disagreement to the amendments of the Senate numbered 48 and 82 to the aforesaid bill.

The PRESIDING OFFICER. Is there objection to the request that the Senate concur in the amendments of the House to the amendments of the Senate numbered 18, 29, 51, and 62?

Without objection, it is so ordered.

Mr. MAGNUSON. Mr. President, I move that the Senate recede from its amendments numbered 48 and 82.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

---

## CONSTRUCTIVE SALE PRICE FOR EXCISE TAX ON CERTAIN TRUCKS, BUSES, TRACTORS, ETC.

Mr. ROBERT C. BYRD. Mr. President, under the previous order, I ask the Chair to lay before the Senate Calendar No. 1046.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1337) to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera.

The Senate proceeded to consider the bill which had been reported from the Committee on Finance with an amendment to strike all after the enacting clause and insert the following:

SECTION. 1. EXCISE TAX ON CERTAIN TRUCKS, BUSES, TRACTORS, ETC.

(a) IN GENERAL.—Paragraph (1) of section 4216(b) of the Internal Revenue Code of 1954 (relating to constructive sale price) is amended by inserting after the second sentence thereof the following new sentence: "In the case of an article the sale of which is taxable under section 4061(a) and which is sold at retail, the computation under the first sentence of this paragraph shall be a percentage (not greater than 100 percent) of the actual selling price based on the highest price for which such articles are sold by manufacturers and producers in the ordinary course of trade (determined without regard to any individual manufacturer's or producer's cost)".

(b) CONFORMING AMENDMENT.—The second sentence of paragraph (1) of such section 4216(b) is amended by inserting "(other than an article the sale of which is taxable under section 4061(a))" after "sold at retail".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to articles sold by the manufacturer or producer on or after the first day of the first calendar quarter beginning 30 days or more after the date of enactment of this Act.

SEC. 2. HOME PRODUCTION OF BEER AND WINE.

(a) EXEMPTION FROM TAX ON WINE.—Section 5042(a)(2) of the Internal Revenue Code of 1954 (relating to production of wine for personal consumption) is amended to read as follows:

"(2) WINE FOR PERSONAL OR FAMILY USE.—Subject to regulations prescribed by the Secretary—

(A) EXEMPTION.—Any adult may, without payment of tax, produce wine for personal or family use and not for sale.

"(B) LIMITATION.—The aggregate amount of wine exempt from tax under this paragraph with respect to any household shall not exceed—

"(i) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(ii) 100 gallons per calender year if there is only 1 adult in such household.

"(C) ADULT.—For purposes of ths paragraph, the term 'adult' means an individual who has attained 18 years of age, or the minimum age (if any) established by law applicable in the locality in which the household is situated at which wine may be sold to individuals, whichever is greater."

(b) EXEMPTION FROM TAX ON BEER.—

(1) IN GENERAL.—Section 5053 of such Code (relating to exemptions from excise tax on beer) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new section:

"(e) BEER FOR PERSONAL OR FAMILY USE.—Subject to regulations prescribed by the Secretary, any duly registered adult may, without payment of tax, produce beer for personal or family use and not for sale if the amount of such beer on hand at any time (including beer in process) does not exceed 30 gallons. The aggregate amount of beer exempt from tax under this subsection with respect to any household shall not exceed—

"(1) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(2) 100 gallons per calendar year if there is only 1 adult in such household.

For purposes of this subsection, the term 'adult' means an individual who has attained 18 years of age, or the minimum age (if any) established by law applicable in the locality in which the household is situated at which beer may be sold to individuals, whichever is greater."

(2) ILLEGALLY PRODUCED BEER.—

(A) Section 5051 of such Code (relating to imposition and rate of tax) is amended by adding at the end thereof the following new subsection:

"(c) ILLEGALLY PRODUCED BEER.—The production of any beer at any place in the United States shall be subject to tax at the rate prescribed (a) and such tax shall be due and payable as provided in section 5054(a)(3) unless—

"(1) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(2) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use)."

(B) Section 5054(a)(3) of such Code (relating to illegally produced beer) is amended to read as follows:

"(3) ILLEGALLY PRODUCED BEER.—The tax on any beer produced in the United States shall be due and payable immediately upon production unless—

"(A) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(B) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use)."

(3) DEFINITION OF BREWER.—Section 5092 of such Code (defining brewer) is amended to read as follows:

"SEC. 5092. DEFINITION OF BREWER.

"Every person who brews beer (except a person who produces only beer exempt from tax under section 5053(e)) and every person who produces beer for sale shall be deemed to be a brewer."

(4) EXEMPTION FROM CERTAIN PROVISIONS RELATING TO DISTILLING MATERIALS.—Section 5222(a)(2)(C) of which Code (relating to certain exemptions) is amended by striking

out "; or" and inserting in lieu thereof "or 5053(e); or",

(5) PENALTY FOR UNLAWFUL PRODUCTION OF BEER.—

(A) Section 5674 of such Code (relating to penalty for unlawful removal of beer) is amended to read as follows:

"SEC. 5674. PENALTY FOR UNLAWFUL PRODUCTION OR REMOVAL OF BEER.

"(a) UNLAWFUL PRODUCTION.—Any person who brews beer or produces beer shall be fined not more than $1,000, or imprisoned not more than 1 year, or both, unless such beer is brewed or produced in a brewery qualified under subchapter G or such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).

"(b) UNLAWFUL REMOVAL.—Any brewer or other person who removes or in any way aids in the removal from any brewery of beer without complying with the provisions of this chapter or regulations issued pursuant thereto shall be fined not more than $1,000, or imprisoned not more than 1 year, or both."

(B) The item relating to section 5674 in the table of sections for part III of subchapter J of chapter 51 of such Code is amended to read as follows:

"Sec. 5674. Penalty for unlawful production or removal of beer."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the first day of the first calendar month which begins more than 90 days after the date of the enactment of this Act.

SEC. 3. REFUNDS TO BE MADE TO AERIAL APPLICATORS IN CERTAIN CASES.

(a) ENTITLEMENT OF AERIAL APPLICATORS TO REFUND OF GASOLINE TAX IN CERTAIN CASES.—Subsection (c) of section 6420 of the Internal Revenue Code of 1954 (defining use on a farm for farming purposes) is amended by redesignating paragraph (4) as paragraph (5) and by inserting after paragraph (3) the following new paragraph:

"(4) CERTAIN FARMING USE OTHER THAN BY OWNER, ETC.—In applying paragraph (3)(A) to a use on a farm for any purpose described in paragraph (3)(A) by any person other than the owner, tenant, or operator of such farm—

"(A) the owner, tenant, or operator of such farm shall be treated as the user and ultimate purchaser of the gasoline, except that

"(B) if the person so using the gasoline is an aerial applicator who is the ultimate purchaser of the gasoline and the person described in subparagraph (A) waives (at such time and in such form and manner as the Secretary shall prescribe) his right to be treated as the user and ultimate purchaser of the gasoline, then subparagraph (A) of this paragraph shall not apply and the aerial applicator shall be treated as having used such gasoline on a farm for farming purposes."

(b) ENTITLEMENT OF AERIAL APPLICATORS TO REFUND OF SPECIAL FUELS TAX IN CERTAIN CASES.—The second sentence of subsection (c) of section 6427 of such Code (relating to use for farming purposes) is amended to read as follows: "For purposes of this subsection, if fuel is used on a farm by any person other than the owner, tenant, or operator of such farm, the rules of paragraph (4) of section 6420(c) shall be applied (except that 'liquid taxable under section 4041' shall be substituted for 'gasoline' each place it appears in such paragraph (4))."

(c) CONFORMING AMENDMENT.—Subparagraph (A) of section 6420(c)(3) of such Code is amended by striking out "except that" and all that follows down through the semicolon at the end of such subparagraph (A).

(d) EFFECTIVE DATE.—The amendments made by the first section of this Act shall take effect on the first day of the first calendar quarter which begins more than 90 days after the date of the enactment of this Act.

SEC. 4. PARTIAL ROLLOVERS OF LUMP SUM DISTRIBUTIONS.

(a) PARTIAL ROLLOVER PERMITTED.—Paragraph (5) of section 402(a) of the Internal Revenue Code of 1954 (relating to rollover amounts) is amended to read as follows:

"(5) ROLLOVER AMOUNTS.—

"A) GENERAL RULE.—If the balance to the credit of an employee in a qualified trust is paid to him within his taxable year in a termination or discontinuance distribution or in a lump sum distribution and he transfers all or a portion of the total taxable amount (as defined in subsection (e)(4)(D)) of the distribution to an eligible rollover source, then the amount transferred shall not be included in gross income.

"(B) DEFINITIONS.—For purposes of this paragraph—

"(i) QUALIFIED TRUST.—The term 'qualified trust' means an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

"(ii) TERMINATION OR DISCONTINUANCE DISTRIBUTION.—The term 'termination or discontinuance distribution' means a distribution on account of a termination of the plan of which a qualified trust is a part, or, in the case of a profit-sharing or stock bonus plan, a complete discontinuance of contributions under the plan.

"(iii) LUMPSUM DISTRIBUTION.—The term 'lump sum distribution' means a distribution described in subparagraph (A) of subsection (e)(4) (determined without regard to subparagraph (B) of that subsection).

"(iv) ELIGIBLE ROLLOVER SOURCE.—The term 'eligible rollover source' means—

"(I) an individual retirement account described in section 408(a),

"(II) an individual retirement annuity described in section 408(b) (other than an endowment contract),

"(III) a retirement bond described in section 409,

"(IV) a qualified trust, or

"(V) an annuity plan described in section 403(a).

"(C) SPECIAL RULES.—

"(i) TRANSFER TREATED AS ROLLOVER CONTRIBUTIONS UNDER SECTION 408.—A transfer described in subparagraph (A) to an eligible rollover source described in subclause (I), (II), or (III) of subparagraph (B)(iv) shall be trtated as a rollover contribution as described in section 408(d)(3).

"(ii) SELF-EMPLOYED INDIVIDUALS AND OWNER-EMPLOYERS.—Qualified rollover sources described in subclause (IV) or (V) of subparagraph (B) shall not be treated as qualified rollover sources for transfers of a distribution if any part of the distribution is attributable to a trust forming part of a plan under which he employee was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan.

"(iii) PROPERTY ROLLED OVER MUST BE THE PROPERTY RECEIVED.—Subparagraph (A) shall not apply to a transfer of property other than money unless the property transferred is the property which was received in the distribution.

"(iv) TRANSFER MUST BE MADE WITHIN 60 DAYS OF RECEIPT.—Subparagraph (A) shall not apply to any transfer of a distribution made after the 60th day following the day on which the employee received the property distributed.".

(b) TAXATION OF PORTION EXCLUDED FROM ROLLOVER.—Paragraph (6) of section 402(a) of such Code (relating to special rollover rules) is amended—

(1) by striking out "For purposes of paragraph (5)(A)(i)—" and inserting in lieu thereof "For purposes of paragraph (5)—", and

(2) by adding at the end thereof the following new subparagraph:

"(C) TAXATION OF NONROLLOVER PORTION.—If the total taxable amount of a distribution described in paragraph (5)(A) exceeds the amount transferred in a transfer described in such paragraph, then—

"(i) subsection (e) and section 62(11) shall not aply with respect to the distribution, and

"(ii) to the extent that the total taxable amount of such distribution exceeds the amount transferred, the excess shall be treated as ordinary income (or loss)."

(c) SPECIAL RULE.—For the purpose of applying the amendment made by subsection (a) of this section in the case of a taxpayer whose attempt to comply with the requirements of section 402(a)(5) of the Internal Revenue Code of 1954 (relating to rollover amounts) for a taxable year beginning before the date of enactment of this Act failed to meet the requirement of such section that all property received in a distribution be transferred, the provisions of such section (as amended by subsection (a)) shall be applied by treating any transfer of property made on or before the later of December 31, 1978, or the 60th day after the date of enactment of this Act as if it were made on or before the 60th day after the day on which the taxpayer received such property. For purposes of this subsection, a transfer of money shall be treated as a transfer of property received in a distribution to the extent that the amount of the money transferred does not exceed the fair market value of the property distributed on (or at any time within 60 days after) the date on which the taxpayer received the distribution.

(d) EFFECTIVE DATE.—The amendment made by subsections (a) and (b) shall apply with respect to taxable years begining after December 31, 1974.

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, for the information of the Senate, following the disposition of Calendar No. 1046 under the order previously entered, I will ask the Chair to lay before the Senate Calendar No. 1032.

In the meantime, Mr. LONG has a conference report which he will call up.

## CUSTOMS PROCEDURAL REFORM—CONFERENCE REPORT

Mr. LONG. Mr. President, I submit a report of the committee of conference on H.R. 8149, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8149) to provide customs procedural reform, and for other purposes. having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of August 17, 1978.)

Mr. LONG. Mr. President, this bill is the most important customs legislation to come before Congress in the last 30 years.

H.R. 8149 will permit the establishment of more efficient and flexible proce-

dures for handling the documentary and financial aspects of import transactions. It will also improve the ability of the Customs Service to enforce customs laws.

H.R. 8149 will revise the customs law penalty for false statements to relate the amount of the penalty to the culpability of the offender. It will also provide due process for persons potentially liable for penalties.

The provision of H.R. 8149 which is of most interest to the general public will permit returning travelers to enter free of duty up to $300 worth of goods they purchase abroad. The next $600 worth of goods purchased by a traveler will be subject to a flat 10-percent duty. The purpose of these changes is to speed the customs processing of travelers when they return to the United States.

Mr. President, this is a good bill. It will bring many antiquated customs procedures up to date. It will help to end long delays for travelers at airports and ports. It is noncontroversial. I recommend the Senate approve the conference report.

I ask unanimous consent that a more detailed summary of the conference report be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

PRINCIPAL FEATURES OF THE BILL

Under present law, each importation is a separate transaction. Appropriate documents and estimated duties must be deposited at the customhouse for each entry. Under the statutory scheme, goods will not be released to the importer until they are inspected and the entry documents are verified. After release of the goods, any overpayment or underpayment of duties is settled with the importer on an entry-by-entry basis. Most goods are in fact released before all the entry documents and the estimated duties are deposited. This is permitted under customs regulations which require all documents and duties to be deposited within 10 days after the goods are released. Accounts are settled with importers under this system on an entry-by-entry basis.

The Conference Report on H.R. 8149 would permit the Secretary of the Treasury to release goods when an entry document is filed. All documents relating to the importation would have to be filed within 10 days after the entry document is filed. Estimated duties would have to be deposited within 30 days. Customs intends to send importers a periodic (monthly) consolidated statement for all entries made during the billing period. To insure compliance with this system, H.R. 8149 would impose recordkeeping requirements on importers and strengthen Customs authority to inspect import related books and records. It would also insure the collection of accurate import statistics by Customs under the new entry system.

PENALTIES

The Conference Report would amend section 592 of the Tariff Act of 1930, the penalty provision for false and material statements in the Tariff Act. Existing section 592 is strongly criticized by all segments of the importing public because it requires a fixed penalty regardless of the nature of the violation, lacks due process safeguards, and does not permit effective judicial review.

Present law prohibits the importation of goods into the United States "by means of any fraudulent or false invoice, declaration, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or application whatsoever" unless the person has reasonable cause to believe the truth of such statement. The penalty imposed for violation of this provision is forfeiture of the merchandise itself or a fine equal to its domestic value.

The penalty under section 592 applies without regard to the degree of culpability. The penalty of forfeiture value may be applied to a violation occurring as a result of simple negligence. While Customs has procedures for mitigation of a section 592 penalty, the issuance of the original unmitigated claim creates several problems. For example, publicly held corporations must disclose penalty claims as contingent liabilities leading to difficulties involving the corporation's financial relationships. H.R. 8149 would provide different penalties for three different degrees of culpability: fraud, gross negligence, and negligence.

Section 592 also lacks procedural safeguards for the alleged violator and does not permit effective judicial review. The respondent is forced to choose between accepting the mitigated administrative penalty or face a Government suit, in which case the claim is for full forfeiture value. The court can only decide whether or not a violation occurred. It cannot change the amount of the statutory penalty, domestic value.

The risks of litigation are enormous when the initial penalty may become the final assessment. H.R. 8149 provides procedural rules for Customs consideration of penalty cases and provides for a trial in the Federal district courts on all issues if the matter is not resolved administratively.

CUSTOMS RULINGS

The Conference Report would require the publication of precedential Customs rulings in response to requests for advice from private parties regarding import transactions.

CUSTOMHOUSE BROKER REPORTS

The Conference Report would require licensed customhouse brokers to report every 3 years to Customs. The report would state whether or not they are actively engaged in the brokerage business and their address.

PERSONAL EXEMPTIONS

The personal duty exemption for returning residents would be increased from $100 to $300. The current $100 exemption has been in effect since 1961. The proposed increases are intended to expedite the entry of travelers and account for the effects of inflation.

TEN-PERCENT DUTY FOR TRAVELERS

A 10 percent rate of duty would be applied to articles brought to the United States by individuals if the importation is not commercial and the goods are for the traveler's personal use and their value does not exceed $600. The application of tariff classification procedures to merchandise imported by travelers requires an inordinate amount of processing time, compared to the amount of duty collected, and creates a bottleneck in the processing of persons entering the country. The bill would help to eliminate the bottleneck without adversely affecting customs revenue collections.

TRAVELERS RETURNING FROM U.S. POSSESSIONS

The Conference Report would increase the personal duty exemption from $200 to $600 for U.S. residents returning from American Samoa, Guam, or the Virgin Islands of the United States. The flat rate of duty applied to articles referred to in the previous paragraph would be 5 percent for articles acquired in these U.S. insular possessions. Further, travelers returning from these possessions could have the personal exemption and flat rate provisions applied to those goods shipped home as well as to those goods accompanying the traveler through customs entry.

LIQUOR AND TOBACCO

The disparity between the rights of U.S. residents and nonresidents to enter liquor and cigarettes free of duty would be reduced. A nonresident may now bring in duty free substantially more liquor and cigarettes than may a resident. Under the bill, both resident and nonresidents would be able to import 1 liter of alchoholic beverages and 200 cigarettes duty free. This represents a cutback in present levels in all respects save the quantity of liquor which a resident may now import duty free.

TIME LIMIT ON LIQUIDATION

The Conference Report would put a 1-year limit on the time in which customs has to liquidate an entry. "Liquidation" means the final ascertainment of the amount of duties due on an entry. Eliminated by this provision would be unanticipated requests by Customs, many years after importation, for additional duties which often result in substantial losses to importers because they are unable to anticipate such duties when pricing their products. Surety companies, which are jointly liable with importers for additional duties, would be better able to control their liabilities. Sureties would also be better protected against losses resulting from the dissolution of their principals in instances where there has been undue delay in liquidating entries. Benefits to Customs would primarily relate to improved management of the liquidation process which could result in some cost savings.

COUNTERFEIT TRADEMARKS

The Conference Report changes the procedures relating to disposal of imported merchandise which violates the law prohibiting unauthorized imports of merchandise bearing a mark copying or simulating a U.S. registered trademark. The bill would require notification of the trademark owner when such goods are seized by the Customs Service.

Goods seized under this provision would be forfeited to the Government unless the trademark owner consents, in writing, to some other disposition of the goods. The Government would have to attempt to donate the forfeited goods to a Federal, State, or local government agency or to a charitable institution. One year after forfeiture, the goods could be sold at a public auction. Destruction of the goods would be permitted if they are unsafe or a hazard to health.

PREFERENTIAL TREATMENT FOR U.S. OFFICIALS

The Conference report would prohibit duty-free entry for the baggage and effects of any individual including an officer or employee of the Federal Government or Member of Congress.

AUTHORIZATION OF APPROPRIATIONS

The Conference Report would require an annual authorization of appropriations to the U.S. Customs Service beginning with fiscal year 1980. Authorizing legislation would require Finance and Ways and Means Committee review, on a regular basis, of the operations of the Customs Service. Customs now receives nearly $400 million a year for operating expenses.

Mr. MORGAN. Mr. President, with regard to the conference report on the Customs Procedural Reform Act, I wish to make a few remarks that I consider extremely important to the Members of the Senate concerning the matter that took place with regard to this bill, some acts which I think seriously infringe upon the rights of the Members of the Senate to investigate and to legislate.

A DISTURBING INFRINGEMENT

Mr. President, when I returned from Japan last spring, I was very disturbed by the impact that the dumping of Japa-

nese television sets has had on the American industry. I had advised officials of the Japanese Government that such tactics could only undermine relations between our countries. The matter was serious. Thousands of jobs had been lost in the U.S. television industry, which essentially lay in ruins.

By chance, upon my return, I met an attorney I knew, who shares my interest in antitrust law. And I might add, Mr. President, that he previously was a staff member of the Judiciary Committee in the Senate. I raised the issue of television dumping with him, and discovered that he himself was representing an American manufacturer of television sets, and was concerned about the problem. In our discussion the matter of the Customs Procedural Reform Act came up.

The act as drafted would have retroactively lowered the penalties for the false filing of customs documents, which I believe to have been part and parcel of the dumping scheme. It would have increased and shifted the burden of proof, and it may well have allowed those responsible for the dumping to escape all penalty, or at the very least to suffer only a very reduced penalty.

I ask the attorney to inform me fully of the situation, and he complied.

Disturbed by the prospects offered by H.R. 8149, Senator CURTIS and I offered an amendment to make certain that the law on the books when the violations occurred would apply to the filing of false customs documents, and not the provisions of H.R. 8149 as drafted. Senator CURTIS and I were successful, and I am very glad to see that appropriate handling of the issue is reflected in the language of the conference version of the bill. I want to commend Senator LONG, Senator RIBICOFF, and Senator CURTIS for their work on this matter in the conference committee.

But I think the Senate should know of one other result of our efforts which ought to be of great concern to all my colleagues, for it involves an infringement of any Senator's right to investigate and to legislate.

A little background is in order. One very disturbing fact about the Customs Procedural Reform Act is that attorneys representing Japanese television manufacturers had a hand in drafting the bill which came over from the House.

It is perhaps less disturbing that a highly active lobbying campaign was carried on to get the Curtis-Morgan amendment dropped in conference. That is to be expected.

But it is positively outrageous that in the middle of our attempts to make sure the amendment stayed in the bill, attorneys representing the Japanese subpenaed all the documents sent to me by the attorney from whom I had requested information, and who had petitioned me for redress.

Mind you, they did not subpena my own files. They subpenaed from the attorney copies of everything he had sent me. They subpenaed every communication between him and every Member of the Senate or House. They subpenaed his correspondence with his client. They subpenaed his communications with public officials in the executive branch.

Mr. President, I ask unanimous consent that copies of the subpenas be included at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MORGAN. The subpenas were issued in a case, pending in the eastern district of Pennsylvania, and the taking of depositions was scheduled for the very day the conference committee was to take up the issue in question. I might add that the attorney who cooperated with me in my legislative activity was not a party to that suit. But his client was, and the Japanese television manufacturers and American importers, on whose behalf the subpenas were issued, were parties. The case is an antitrust suit growing out of the dumping, and has no direct connection with the Customs Procedural Reform Act, save for a similar cast of characters.

I have informed the court that I intend to file an intervention in the matter of the subpenas. I am doing so, because such harassment is of concern to me and to every Member of this Senate. I am not doing it to hide anything. There is absolutely nothing in my files which would embarass me or the Senate or the attorney with whom I corresponded. The only people who might be embarrassed are those involved in television dumping or violation of the customs laws.

But two points need to be made loud and clear.

First, I have a privilege, as does every Member of this Senate, to investigate, coterminous with my legislative intent. Unless we are going to start issuing congressional subpenas every whip-stitch, we must be able to depend on the willingness of interested parties to supply information to us.

In the second place, every citizen has the absolute right under the first amendment to petition Members of the Senate for redress of grievances. And he ought to be able to exercise that right without the threat of having lobbyists on the other side of a question haul him into court.

I ask my colleagues in the Senate to consider the relationship between these two facts.

How can we obtain information voluntarily from those who have it, if giving that information might subject a citizen to harassment, including the subpenaing of his files wholesale? Who would want to cooperate if he knew he might have to defend himself in a court in a distant city; in this case in Philadelphia?

What attorney would want to risk his attorney-client relationship by having companies, in direct competition with his clients in the marketplace and in court, have access to his files? In this case, a cartel of Japanese firms might have a good look at inside information on one of the few remaining American manufacturers, if there is anything there. It might even be possible for secret information relating to the competitive strength of American industry to become known to foreign competitiors and governments, so close is their relationship in foreign countries, and especially in Japan. Yet, we would have no information showing the lobbying, and other activities between foreign companies and their attorneys, on the one hand, and the Government of Japan, on the other.

If subpenas of this kind become a successful tactic, then American citizens would be penalized for exercising their first amendment rights, or for cooperating with the Congress in its investigations.

We do not want the first amendment to become a risky proposition for our citizens. We do not want our ability to investigate and legislate infringed. But the use of American legal process, by foreign interests or any other interests, to undermine that process of communication, can only have a chilling effect, both on exercise of the first amendment, and on congressional investigations. The two are very closely related, and both must be preserved.

Mr. President, in closing let me say that after receiving these documents I made a statement on the floor of the Senate concerning this matter. The Washington Post did an article on it, and it was following that that the attorney was harassed by having his records subpenaed and subjecting him to a deposition in the courts on the very day the conference committee was meeting. Now he and his law firm are involved in extensive litigation in the city of Philadelphia simply because he complied with my request to give me information which led to the Curtis-Morgan amendment to the Customs Procedural Reform Act.

I think it is a serious matter, and I think it is one the public should know about and the Senate should take note of.

EXHIBIT 1

[In the U.S. District Court for the Eastern District of Pennsylvania, Civil Action No. 74-2451, M.D.L. 189]

ZENITH RADIO CORPORATION, PLAINTIFF, V. MATSUSHITA ELECTIC INDUSTRIAL CO., LTD., ET AL., DEFENDANTS

(In re Japanese electronic products antitrust litigation)

NOTICE OF DEPOSITION

To: Edwin P. Rome, Esquire, Blank, Rome, Klaus & Comisky, 1100 Four Penn Center Plaza, Philadelphia, Pa. 19103. Counsel for Plaintiff Zenith Radio Corporation.
All defense counsel

Please take notice that pursuant to the Federal Rules of Civil Procedure, defendant Motorola, Inc., will take the deposition of Bernard Nash, Esquire, Blum, Parker & Nash, 1015 18th Street, N.W., Suite 408, Washington, D.C. 20036 at the offices of Kirkland & Ellis, 1776 "K" Street, N.W., Washington, D.C. before a notary public or some other person authorized to administer oaths. The deposition will commence at 10:00 A.M. on Thursday, August 3, 1978, and will continue thereafter from day to day, or as required, until completed. You are invited to attend and to examine the witness.

A subpoena duces tecum will be served on the deponent, requiring him to produce the documents specified in the attached Schedule of Documents to Be Produced.

KIRKLAND & ELLIS,
By THOMAS COFFEY,

Dated: July 27, 1978.

(Standard Oil Building, 200 E. Randolph Avenue, Chicago, Illinois 60601 (312) 861-2000, Attorneys for Motorola, Inc.)

SCHEDULE OF DOCUMENTS TO BE PRODUCED

1. All documents in the possession, custody or control of Bernard Nash or the firm of Blum, Parker and Nash which relate in any way to remarks concerning Motorola, Inc. which were made by Senator Morgan on June 27, 1978, and which were subsequently published in the *Congressional Record* for June 27, 1978, 124 CONG. REC., p. 19159–19164 (daily ed. June 27, 1978) (remarks of Sen. Morgan).

2. All documents in the possession, custody or control of Bernard Nash or the firm of Blum, Parker and Nash referring or relating in any way to the identity of any person or persons who communicated to Senator Morgan or any member of his staff information pertaining to Motorola, Inc. which was subsequently published in the *Congressional Record* for June 27, 1978, 124 CONG. REC., p. 19159–19164 (daily ed. June 27, 1978) (remarks of Sen. Morgan).

3. All documents in the possession, custody or control of Bernard Nash or the firm of Blum, Parker and Nash pertaining to Motorola, Inc., which were communicated to any member or employee of the legislative or executive branch of government, including but not limited to the Antitrust Subcommittee of the Senate Judiciary Committee, Senernment, including but not limited to the Department of Justice, or which were communicated to any official or employee of any agency or activity of the United States government, including but not limited to the Securities Exchange Commission.

4. All documents in the possession, custody or control of Bernard Nash or the firm of Blum, Parker and Nash or documents pertaining to Motorola, Inc. which bear on the face of the document the legend "CONFIDENTIAL PER COURT ORDER."

5. All documents in the possession, custody or control of Bernard Nash or the firm of Blum, Parker and Nash which relate in any way to any communication, relating in any way to Motorola, Inc., between Bernard Nash or the firm of Blum, Parker and Nash and any member, employee or official of the legislative or executive branch of the United States government or any agency of the United States government or official or employee thereof since January, 1976.

6. All documents in the possession, custody or control of Bernard Nash or the firm of Blum, Parker and Nash pertaining to Motorola, Inc. which were obtained from Zenith Radio Corporation or any employee thereof, including but not limited to Philip Curtis or John Borst, or any member of the firm of Blank, Rome, Kalus and Comisky or any attorney associated with that firm, if those documents were designated confidential pursuant to Pretrial Order No. 35 in the case of Zenith Radio Corporation v. Matsushita, et al., Civil Action No. 74–2451.

---

CERTIFICATE OF SERVICE

I, Patrick T. Ryan, Esquire, certify that on this date copies of the Notice of Deposition of Bernard Nash, Esquire, were today served on Edwin P. Rome, Esquire, 1100 Four Penn Center Plaza, Philadelphia, Pennsylvania 19103, counsel for plaintiff Zenith Radio Corporation, by hand delivery, and a copy mailed, first class mail, postage pre-paid, to all defense counsel.

Dated: July 27, 1978.

PATRICK T. RYAN.

SCHEDULE OF DOCUMENTS TO BE PRODUCED

A. DEFINITIONS

1. As used herein, the term "you" means you, any partner, associate or employee of the firm Blum, Parker & Nash, and any other person employed by you or subject to your control.

2. As used herein, the term "Zenith" means plaintiff Zenith Radio Corporation, including but not limited to its divisions, departments, subsidiaries, branches, its predecessors in interest, present or former officials, executives, officers, employees, agents, attorneys, and all other persons acting or purporting to act on behalf of Zenith Radio Corporation, its divisions, departments, subsidiaries, branches, predecessors in interest or joint ventures in which it is a party or participant.

3. As used herein, the term "documents" means all written or printed matter of any kind, and recorded, transcribed, punched, taped, filmed or graphic matter, however produced or reproduced, including the originals and all non-identical copies, whether different from the originals by reason of any notation made on such copies or otherwise, including without limitation, correspondence, memoranda, notes, diaries, letters, telegraphs, minutes, agendas, contracts, reports, studies, checks, statements, receipts, returns, summaries, pamphlets, books, prospectuses, interoffice and intraoffice communications, written notations of conversations, bulletins, computer printouts, teletypes, telefax, invoices, worksheets, graphic or manual records or representations of any kind, including without limitation, photographs, charts, graphs, microfiche, microfilm, videotape, tape recordings, motion pictures and electronic mechanical or electric records or representations of any kind, including without limitations, tapes, cassettes, discs, and recordings.

4. As used herein, the term "persons" or "persons" includes not only natural persons, but also firms, partnerships, associations and corporations, subsidiaries, divisions, departments or other units thereof, joint ventures or syndicates.

5. As used herein, the term "consumer electronic products," means radios, phonographs, stereo and audio instruments, mono-

chrome television receivers, color television receivers, tape equipment, and components of each of the above, including but not limited to, picture tubes for monochrome and color television receivers. Use of this defined term does not indicate any endorsement of or agreement with any of the allegations, definitions, terms or language in the Complaints filed in the above captioned actions.

6. As used herein, the term "communication" refers to any contact, message, notice, report, statement or submission, whether written, oral or in any other form.

7. As used herein, the terms "and" and "or" shall be interpreted conjunctively and shall not be interpreted disjunctively to exclude any information otherwise within the scope of any specification.

8. As used herein, the term "trade association" means any formal or informal association, organization, council, committee or group, or any officer, director, employee, attorney, representative agent, committee, subcommittee or other subdivision thereof, the members or participants in which constitute, in whole or in part, manufacturers, sellers or distributors of consumer electronic products in the United States, including without limitation the Electronic Industries Association ("EIA"), the United States Chamber of Commerce, the Electronic Industry Committee for Fair International Trade ("EICFIT"), Fair International Trade and Employment ("PITE") and the Committee to Preserve American Color Television ("COMPACT").

9. As used herein, the term "labor union" means any association or group of workers, the members of which are employed by manufacturers, sellers or distributors of consumer electronic products, including without limitation the following:

(a) Industrial Union Department, AFL–CIO;

(b) Allied Industrial Workers of America, International Union;

(c) American Flint Glass Workers of America, North America;

(d) Communications Workers of America;

(e) Glass Bottle Blowers' Association of the United States & Canada;

(f) Independent Radionic Workers of America;

(g) International Association of Machinists;

(h) International Brotherhood of Electrical Workers;

(i) International Union of Electrical, Radio & Machine Workers;

(j) United Furniture Workers of America; and

(k) United Steelworkers of America.

10. As used herein, the term "United States governmental body" means any United States governmental agency, department, commission, legislative body or committee or subcommittee thereof, or employee, including but not limited to the Justice Department, the Treasury Department, the Customs Service, the Securities and Exchange Commission, the Federal Maritime Commission, the International Trade Commission, the Labor Department, any congressional committee or subcommittee and any congressman or his staff.

11. As used herein, the terms "refer or relate" and "concerning" include alluding to, responding to, connected with, commenting upon, in respect of, about, regarding, discussing, showing, disclosing, describing, explaining, mentioning, reflecting, analyzing, constituting, comprising, evidencing, pertaining to, setting forth, summarizing or characterizing, either directly or indirectly, in whole or in part.

B. PRIVILEGED DOCUMENTS AND COMMUNICATIONS

With respect to any document responsive to this subpoena which you may decline to produce by reason of any claim or privilege or immunity, a statement is to be provided setting forth, as to each such document:

(a) the name of the sender(s) of the document;

(b) the name of the author(s) of the document;

(c) the name(s) of person(s) to whom copies of the document were sent or furnished;

(d) the job title of every person named in (a), (b), and (c) above;

(e) the date of the document;

(f) the date on which the document was received or sent by you;

(g) a brief description of the nature and subject matter of the document; and

(h) the statute, rule or decision which is claimed to give rise to the privilege or immunity.

C. RELEVANT PERIOD

Each of the following specifications calls for documents prepared during, or which refer or relate to, the period January 1, 1963 to date.

D. DOCUMENT SPECIFICATIONS

1. All documents which refer or relate to any communication between you and any United States governmental body concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees.

2. All documents which refer or relate to any communication between Zenith and any United States governmental body concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees.

3. All documents which refer or relate to any communication between any trade association, labor union or any other person and any United States governmental body, concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees.

4. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which have been submitted by you to (i) any United States governmental body, or (ii) any other person, including but not limited to any person affiliated with any news media or trade publication.

5. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which have been submitted by Zenith to (i) any United States governmental body, or (ii) any other person, including but not limited to any person affiliated with any news media or trade publication.

6. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which have been submitted by any trade association, labor union or any other person to (i) any United States governmental body, or (ii) any other person, including but not limited to any person affiliated with any news media or trade publication.

7. All documents which refer or relate to any communication between you and Zenith concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees.

8. All documents which refer or relate to any communication between you and any trade association concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees.

9. All documents which refer or relate to any communication between you and any labor union concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees.

10. All documents which refer or relate to any communication between you and any other person, including but not limited to any person affiliated with any news media or trade publication, concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged conconspirator of defendants or the impact of such imports, trade practices or activities upon the United States manufacturers or assemblers of such products or their employees.

11. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged conconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which you have received from Zenith.

12. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which you have received from any trade association.

13. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which you have received from any labor union.

14. All documents concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or assemblers of such products or their employees, which you have received from any other person.

15. All documents which refer or relate to your activities as a lobbyist on behalf of Zenith and/or any other person concerning imports of consumer electronic products into the United States, the trade practices or other activities of any defendant in this litigation or of any alleged coconspirator of defendants or the impact of such imports, trade practices or activities upon United States manufacturers or asemblers of such products or their employees, including but not limited to all documents which refer or relate to your registration as a lobbyist under any applicable statute or regulation.

CERTIFICATE OF SERVICE

I, Patrick T. Ryan, Esquire, certify that on this date copies of the Notice of Taking Deposition of Bernard Nash were today served on Edwin P. Rome, Esquire, 1100 Four Penn Center Plaza, Philadelphia, Pennsylvania 19103, counsel for plaintiff Zenith Radio Corporation, by hand delivery and a copy mailed, first class mail, postage prepaid to:

Peter J. Gartland, Esquire, Wender, Murase & White, 350 Park Avenue, New York, New York 10022 and E. Huston Harsha, Esquire, Kirkland & Ellis, Standard Oil Building, 200 E. Randolph Avenue, Chicago, Illinois 60601.

PATRICK T. RYAN.

Dated: July 27, 1978.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

PRIVILEGE OF THE FLOOR

Mr. LONG. Mr. President, I ask unanimous consent that the same staff members of the Joint Committee on Taxation and the Finance Committee who had the privilege of the floor Wednesday be permitted to be on the floor when the other tax bills are considered today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that Pamela Milton, of the Judiciary Committee, have the privilege of the floor during the consideration of the tax bills today.

Mr. CRANSTON. Mr. President, I make the same request for John Fleming, of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I ask unanimous consent that all other staff members who had the privilege of the floor in connection with the tax bills earlier this week also have the privilege of the floor today.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CONSTRUCTIVE SALE PRICE FOR EXCISE TAX ON CERTAIN TRUCKS, BUSES, TRACTORS, ETC.

The Senate continued with the consideration of the bill (H.R. 1337).

Mr. LONG. Mr. President, the pending bill H.R. 1337, as reported by the Committee on Finance, is a combination of several small bills which have been passed by the House, and a committee amendment dealing with individual retirement accounts.

The first section of the bill provides that the use of the administratively developed "cost floor" rule is specifically prohibited as an alternative tax base for purposes of computing the excise tax on trucks, buses and other highway equipment sold by manufacturers at retail. Under a committee amendment to the House bill, this rule will apply beginning with the first calendar quarter which begins more than 30 days after enactment.

The second section of the bill deals with excise taxes on beer and wine. It corrects problems in interpreting present law so that an adult may brew beer or make wine in limited quantities for personal and family use without incurring beer or wine excise taxes or being subject to certain penalties.

The third section of the bill expands the farming exemption from fuel taxes to enable an aerial crop duster who uses fuel for farming purposes to claim the tax refund or credit. Under a committee amendment to the House-passed provision, the farmer must waive his right to the refund or credit in order for the crop duster to claim it.

Finally, the bill would allow tax-free treatment for any portion of a lump-sum distribution from a qualified retirement plan which is deposited in an individual retirement account or another qualifying plan. Under present law an individual is required to deposit the entire proceeds of the lump-sum distribution in order to obtain tax-free rollover treatment. Under this provision, there is also a special make-up rule for individuals who previously attempted to make a rollover deposit but failed to transfer the required amount.

Mr. President, this is truly a small bill since all of its provisions taken together will result in a revenue loss of $3.5 million in fiscal year 1979 and thereafter $3 million per year. I urge the adoption of H.R. 1337.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator.

Mr. PROXMIRE. As I understand it, this bill really incorporates the four different provisions of three bills and one amendment.

Mr. LONG. Yes.

Mr. PROXMIRE. The first one, H.R. 2028, dealt with the home production of beer and wine. This simply permits the home production of beer and wine.

Mr. LONG. That is right, for one's own personal consumption.

Mr. PROXMIRE. So I take it the Milwaukee brewing industry does not have to worry about this.

Mr. LONG. No.

Mr. PROXMIRE. There is no objection from the brewers or wine makers?

Mr. LONG. There is no objection from the Treasury or anyone, as far as I know. No. Apparently Schlitz is not worried the least bit about the competition of a home brewery.

Mr. PROXMIRE. There is no effect on revenues?

Mr. LONG. The entire bill would have a revenue impact of less than $3.5 million annually.

Mr. PROXMIRE. What section of the bill would have that revenue? Is that the IRA amendment by Senator CURTIS?

Mr. LONG. The principal consequence of the retirement rollover amendment is that it has a great deal of justice and equity to recommend it.

Mr. CURTIS. Mr. President, will the Senator yield at that point?

Mr. PROXMIRE. I yield.

Mr. CURTIS. I do not believe that this would have any adverse revenue effect. What it does is it corrects an error. When Congress passed the Individual Retirement Act, Congress provided that workers who participated in a company pension plan or a private sharing plan, when that was terminated they could take their proceeds and roll them over into an individual retirement account. That is the law. They have the right. There is nothing in this bill that changes that. And there is not any loss of revenue.

This bill arose out of a case in Nebraska where a man who performed physical labor, worked his entire life, came to the end of his employment and he had an accumulation of lifetime savings of only about $22,000, as I recall. His company erroneously, because the IRA was just barely into law—I do not think all the regulations are written yet—erroneously advised him that there was an insurance policy that he might pay up out of these proceeds. He did so with a few hundred dollars, paid up that insurance. Then he went to his local bank and went through the process of putting this in an individual retirement plan.

Months later when he filed his tax return he learned for the first time that if he did not put every dollar of his accumulation into the individual retirement plan he was subject to a very severe penalty. Actually it amounted to between 15 and 18 percent of his lifetime savings.

As I say, the program was totally new. The bank and the trust company were not aware of this requirement. His employer was not. The insurance company apparently did not know what was going on.

It was not discovered until he filed his income tax return and was faced with a penalty of about 15 or 18 percent of his lifetime savings.

If saving him from such a penalty is a loss of revenue, it is a loss of revenue, but it is not. It is not. All we are asking is that this be corrected so that this man will not have an unjust and unconscionable penalty.

It calls for considerable imagination on my part when they figure any sizeable amount of loss of revenue here because the Government is not entitled to the revenue in the first place.

Mr. PROXMIRE. May I ask the Senator from Nebraska, the Government does say there is a loss of revenue. The Senator from Nebraska may be dead right that there is at least no just loss.

Mr. CURTIS. Because of an unjust penalty. It was the intent of Congress that if there were such a rollover it should be tax free. This man got caught on the technicality. That is grossly unjust.

Mr. PROXMIRE. Would the $3.5 million, if there is such an amount, accrue to one taxpayer or many?

Mr. CURTIS. No. There is only $22,000 involved and this is his total lifetime savings, and he is subject to this penalty of about 15 or 18 percent, which I would guess is a couple thousand dollars. I do not have the figures right now.

Mr. LONG. The retirement rollover provision has a negligible impact on the budget.

The amendment relating to beer and wine that would involve a revenue loss of less than $1.5 million a year.

Mr. PROXMIRE. That would be several thousand homebrewers.

Mr. LONG. At least.

Mr. PROXMIRE. Maybe tens of thousands.

Mr. LONG. It could be 100,000.

I have a dear friend, a relative, and I suppose without his consent I should not use his name, but my wife gave that dear person a set to go in the backyard, where he has a grape vine, and he takes the grapes, and they enjoy sitting there and crushing up the grapes and putting them aside, and after a while they have a little wine.

Some people find more enjoyment making the stuff than they do in consuming it.

So that type of thing is a great big pain in the neck for the Treasury to go around and check on it and it is a bother for the citizen.

I guess the Senator recalls, if he studied history, that one of the first revolts we had during the Civil War was the Whiskey Rebellion where some people back in the woods——

Mr. PROXMIRE. In Pennsylvania.

Mr. LONG [continuing]. In Pennsylvania were concerned about the Federal excise tax on liquor at that time.

But this just involves people who make some wine in their own homes.

Mr. PROXMIRE. Wine and beer, not whisky.

Mr. LONG. That is right, only wine and beer. Nothing really strong, Senator. Nothing to put hair on your chest, you might say.

Mr. CURTIS. Mr. President, will my chairman yield? I am interested in this colloquy. I am interested in the homebrew business, but I am fascinated at these estimates of loss of revenue. If it was not for this bill, they would spend 10 times this much trying to collect, and collect nothing. This saves the Treasury money, in my opinion.

Mr. PROXMIRE. The Senator said $1.5 million for H.R. 2028; a negligible amount for the Curtis amendment; then, dealing with cropdusting, was there a loss there?

Mr. LONG. Less than $1 million for cropdusting.

Mr. PROXMIRE. The remainder then on the Cranston amendment, which, as I understand it, is S. 3424, which concerns the paperwork of filing reports to the Federal Government for beer- and wine-making at home.

Mr. LONG. The Senator from California has not offered an amendment yet. I see he is ready to offer an amendment, and I assume that is what he had in mind. But I believe that would also have a negligible revenue impact. It probably would save us some money.

Mr. CRANSTON. It would save some money.

Mr. LONG. It would save money because it would cut down on needless paperwork.

UP AMENDMENT NO. 1809

(Purpose: To provide equal treatment in the regulation of the home production of beer and wine)

Mr. CRANSTON. May I offer the amendment now? I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. METZENBAUM). The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes an unprinted amendment numbered 1809.

Mr. CRANSTON. Mr. President, I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, strike out section 2 and insert in lieu thereof the following:

(a) EXEMPTION FROM TAX ON WINE.—Section 5042(a)(2) of the Internal Revenue Code of 1954 (relating to production of wine for personal consumption) is amended to read as follows:

"(2) WINE FOR PERSONAL OR FAMILY USE.—Subject to regulations prescribed by the Secretary—

"(a) EXEMPTION.—Any adult may, without payment of tax, produce wine for personal or family use and not for sale.

"(b) LIMITATION.—The aggregate amount of wine exempt from tax under this paragraph with respect to any household shall not exceed—

"(i) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(ii) 100 gallons per calendar year if there is only 1 adult in such household.

"(C) ADULTS.—For purposes of this paragraph, the term 'adult' means an individual who has attained 18 years of age, or the maximum age (if any) established by law applicable in the locality in which the household is situated at which wine may be sold to individuals, whichever is greater."

(b) EXEMPTION FROM TAX ON BEER.—

(1) IN GENERAL.—Section 5053 of such Code (relating to exemptions from excise tax on beer) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new section:

"(e) BEER FOR PERSONAL OR FAMILY USE.—Subject to regulations prescribed by the Secretary, any adult may, without payment of tax, produce beer for personal or family use and not for sale. The aggregate amount of beer exempt from tax under this subsection with respect to any household shall not exceed—

"(1) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(2) 100 gallons per calendar year if there is only 1 adult is such household.

For purposes of this subsection, the term 'adult' means an individual who has attained 18 years of age or the minimum age, if any, established by law applicable in the locality in which the household is situated for individuals to whom beer may be sold, whichever is greater."

(2) ILLEGALLY PRODUCED BEER.—

(A) Section 5051 of such Code (relating to imposition and rate of tax) is amended by adding at the end thereof the following new subsection:

"(c) ILLEGALLY PRODUCED BEER.—The production of any beer at any place in the United States shall be subject to tax at the rate prescribed in subsection (a) and such tax shall be due and payable as provided in section 5054 (a)(3) unless—

"(1) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(2) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).".

(B) Section 5054(a)(3) of such Code (relating illegally produced beer) is amended to read as follows:

'(3) ILLEGALLY PRODUCED BEER.—The tax on any beer produced in the United States shall be due and payable immediately upon production unless—

"(A) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(B) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).".

(3) DEFINITION OF BREWER.—Section 5092 of such Code (defining brewer) is amended to read as follows:

"SEC. 5092. DEFINITION OF BREWER.

"Every person who brews beer (except a person who produces only beer exempt from tax under section 5053(a)) and every person who produces beer for sale shall be deemed to be a brewer.".

(4) EXEMPTION FROM CERTAIN PROVISIONS RELATING TO DISTILLING MATERIALS.—Section 5222(a)(2)(C) of such Code (relating to certain exemptions) is amended by striking out "; or" and inserting in liue thereof "or 5053(e); or".

(5) PENALTY FOR UNLAWFUL PRODUCTION OF BEER.—

(A) Section 5674 of such Code (relating to penalty for unlawful removal of beer) is amended to read as follows:

"SEC. 5674. PENALTY FOR UNLAWFUL PRODUCTION OR REMOVAL OF BEER.

"(a) UNLAWFUL PRODUCTION.—Any person who brews beer or produces beer shall be fined not more than $1,000, or imprisoned not more than 1 year, or both, unless such beer is brewed or produced in a brewery qualified under subchapter G or such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).

"(b) UNLAWFUL REMOVAL.—Any brewer or other person who removes or in any way aids in the removal from any brewery of beer without complying with the provisions of this chapter or regulations issued pursuant thereto shall be fined not more than $1,000, or imprisoned not more than 1 year, or both.".

(B) The item relating to section 5674 in the table of sections for part III of subchapter J of chapter 51 of such Code is amended to read as follows:

"SEC. 5674. PENALTY FOR UNLAWFUL PRODUCTION OR REMOVAL OF BEER.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the first day of the first calendar month which begins more than 90 days after the date of the enactment of this Act.

Mr. CRANSTON. This amendment is very simple.

It establishes for homebrew beer the same legal treatment provided in H.R. 1337 for homemade wine.

First, brewers of home beer for personal consumption will not be required to register with the Bureau of Alcohol, Tobacco and Firearms.

Second, home beer brewers will be limited to 200 gallons annually as are home winemakers.

Third, the amendment removes the proposed 30-gallon-on-hand limitation presently provided in H.R. 1337.

Treasury has indicated that the registration requirement for winemakers, which has been in effect for many years, has been of little use to the Federal Government, and indeed, has proven burdensome to the public and it is costly, too,

because Government employees have been doing work that does not need to be done.

Concern has been expressed that removing the registration provision sought to be imposed on home beer brewers for the first time somehow will afford camoflage for illegal whiskey distilling operations.

According to BATF, this is the problem: Beer mash is technically "mash fit for distillation." But prosecutions for possessing a mash fit for distillation are rare. And, without strong corroborating evidence of a capability for distilling whiskey and an intent to do so, such prosecutions virtually cannot be sustained.

BATF, I might add, does not suspect home beer brewers of being illegal moonshiners.

Then what is the purpose of requiring otherwise law-abiding citizens to register with the Federal bureaucracy so they can make a few gallons of beer in their homes for their personal consumption?

As far as I can determine, BATF merely wants to hold on to some busy work for its clerks.

I think such white-collar leaf-raking is unfair to Government workers and gives Government a bad name.

To go ahead with legislation requiring home beer brewers to register with the Federal Government is a waste of everybody's time, energy and money. The Bureau has adopted a sensible position with respect to homemade wine. It should do the same for homebrew beer. My amendment assures that the agency will do so. I have just learned that Treasury has no objection to my amendment. I am most pleased at this development.

I urge the amendment's adoption.

Mr. PROXMIRE. Mr. President, will the Senator from California yield?

Mr. CRANSTON. Yes.

Mr. PROXMIRE. This amendment seems to be very meritorious, but I am disturbed about one thing. First, the Treasury, as I understand, supports the amendment?

Mr. CRANSTON. Yes, it just came around to supporting it now.

Mr. PROXMIRE. But, on the other hand, part of the Treasury which the Senator was talking about, that is, the Bureau of Alcohol, Tobacco and Firearms, do they still oppose the amendment? As I understood the Senator, he indicated they wanted to protect their busy work, and they opposed the amendment on the ground apparently that they would not be able to do it.

Mr. CRANSTON. The official Treasury position now is no opposition to the amendment.

Mr. PROXMIRE. But does the Senator have any information on how the Bureau of Alcohol, Tobacco and Firearms feels about this?

Mr. CRANSTON. They want to hang onto it because they have some work to do, and they would like to do it.

Mr. PROXMIRE. Do they have any argument, any reasoning, at all?

Mr. CRANSTON. They have never given a reasonable argument for it.

Mr. PROXMIRE. At any rate, what the Senator is saying is these reports are filed, they constitute, therefore, a burden on the people who produce the wine and beer.

Mr. CRANSTON. And a burden to the taxpayers.

Mr. PROXMIRE. The reports are never used, they are simply stored?

Mr. CRANSTON. Right.

Mr. PROXMIRE. With cost to the Federal Government, but they are not processed?

Mr. CRANSTON. Right.

Mr. PROXMIRE. Has there been any enforcement under this provision?

Mr. CRANSTON. No.

Mr. PROXMIRE. Has there been any investigation?

Mr. CRANSTON. No.

Mr. PROXMIRE. Has anybody ever gone to jail or been brought into court on it?

Mr. CRANSTON. No.

Mr. PROXMIRE. So the Senator's argument is it is of no use, a burden both on the private sector and the public sector?

Mr. CRANSTON. Yes. If ever there was a regulation and paperwork we can do without this is a classic example.

Mr. PROXMIRE. Does the Treasury agree there would be no revenue loss?

Mr. CRANSTON. No what?

Mr. PROXMIRE. No revenue loss.

Mr. CRANSTON. We do not know how there could be a revenue loss. This is going to be a gain to the taxpayer because there will be some people no longer needed to do some work.

Mr. PROXMIRE. The only kind of revenue loss you would have is that you have violations, I presume, so there will not be since you are not enforcing the law, and the revenue loss would be, if they produce it in the bathtub or wherever they produce it, that therefore they escape the very, very high excise taxes we have on wine and beer.

Mr. CRANSTON. I do not know any revenue we are getting from that source, so I do not know how we can lose it.

Mr. PROXMIRE. All right.

Mr. President, I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1810

(Purpose: To provide in certain instances, cash payments in lieu of food stamps to recipients of SSI benefits)

Mr. CRANSTON. Mr. President, I send to the desk one more amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for himself and Mr. HAYAKAWA, proposes an unprinted amendment numbered 1810.

Mr. CRANSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add at the end thereof the following new section:

SEC. . (a) Section 8(d) of Public Law 93-233 is amended by adding at the end thereof the following new sentences: "For purposes of this subsection, if the State requests the Secretary to make the finding specified in the first sentence of this subsection and to make an additional cash payment under title XVI in lieu of food stamps, in the amount and the manner described below, to every individual in the State who does not have an eligible spouse and who receives a supplementary payment pursuant to an agreement under section 1616(a) of the Act (other than an individual who (i) receives such a supplementary payment at a level prescribed by the State by reason of his or her residence in an institution, or other living arrangement in which board and care are provided, or (ii) receives payments pursuant to section 212 of Public Law 93-66 at a level in excess of the level applicable to such individual as established by the State under such agreement), the Secretary shall make such payments if he finds that the conditions of paragraph (1) have been met (and for this purpose the conditions of paragraph (1) shall be considered to have been met to the extent that they involve amounts payable under the law referred to in paragraph (1)(B) notwithstanding the suspension in 1978 of the cost-of-living increase in State supplementary payments under such law) for months beginning with the first month in which, as determined by the Secretary, such additional cash payment can be made, and ending with the month before the first subsequent month for which the conditions of paragraph (1) are met without regard to this sentence (and the requirements of paragraph (2) shall also be considered to have been met, effective on the first day of such first subsequent month, for purposes of applying the first sentence of this subsection to that month and succeeding months). For purposes of the preceding sentence, the amount of an additional cash payment under title XVI in lieu of food stamps shall equal the cash value of the minimum allotment specified by section 8 (a) of the Food Stamp Act of 1977 for one-person households, and such additional cash payment shall be appropriately included in or with the check issued to such individual in payment of his supplementary security income benefit (or supplementary payment under such section 1616(a)).".

(b) No additional cash payment under title XVI of the Social Security Act may be made pursuant to the third sentence of section 8(d) of Public Law 93-233 (as added by subsection (a) of this section) for any month beginning before October 1, 1978, or ending after September 30, 1979.

Mr. CRANSTON. I want the RECORD to note that Senator HAYAKAWA has joined me in this amendment. It is not controversial, and it will take me just one moment to explain it.

Mr. President, this amendment addresses a problem which has recently arisen regarding the supplemental security income—SSI—program in California. This amendment is identical to H.R. 13814 which was introduced by Representative CORMAN in the House on August 9, and which was ordered favorably reported by the House Ways and Means Committee on August 16. I know

that the distinguished floor management (Mr. LONG) is well aware of the problem this amendment is designed to correct.

HEW has been fully advised as to the nature of this amendment and has no opposition.

Mr. President, briefly, this amendment would amend section 8(d) of Public Law 93–233 to provide that SSI recipients in California who would become eligible to receive food stamps in that State on September 1 would, instead, receive an amount in cash equivalent to the value of their food stamp entitlement. This amendment would be effective for 1 year only.

Mr. President, when the SSI program began in 1974, California included in its State supplementary cash payment an amount equal to the average bonus value of food stamps that SSI recipients in the State generally would have been eligible to receive. California was authorized to and did maintain "cash-out" status as long as the Federal Government was contributing to the cost of the State supplementary payment under the "hold-harmless" provisions of section 401 of Public Law 92–603.

In 1976, however, California would have lost this "cash-out" status under the provisions of Federal law then in effect because of increases in the Federal SSI benefit level. At that time, at the request of the State of California, Congress enacted legislation—Public Law 94–379—that allowed California to continue its "cash-out" status as long as it met two conditions. First, the State had to pass through to SSI recipients any cost-of-living increases provided in the Federal SSI benefits and, second, the State had to provide a yearly cost-of-living increase in the State supplementary SSI payment.

California has met these two conditions up to this time; however, effective September 1, 1978, the State will no longer meet the second condition because it has recently suspended the cost-of-living increase in its SSI supplementary benefits. Most single, aged, or disabled SSI recipients in California will become eligible on September 1 for $10 in food stamps.

The cost-benefit ratio of administering this program after conversion would be totally unacceptable, I think. The State estimates that approximately 42 percent of the eligible SSI recipients will participate in the food stamp program and, on an annual basis, that only $25 million would be paid in food stamps benefits, whereas total administrative costs are estimated to be about $75 million. In other words, the taxpayers will be expending $3 in administrative costs for every $1 in benefits which goes to recipients.

This amendment would provide that the Secretary of HEW—upon the request of the State—would make an additional monthly cash payment of $10—the minimum food stamp allotment for an eligible one person household—to eligible recipients. This additional payment would be included in or with the individual's SSI check. These SSI recipients would receive this cash payment in place of the food stamps they would otherwise be entitled to receive.

It is estimated that the total annual costs under this amendment—benefits plus administrative costs—would be approximately $60 million. This is $40 million less that the total estimated costs after conversion to a regular food stamp program.

Mr. President, while this amendment will affect only the State of California, each of us shares an interest in seeing that funds—Federal, State, or local—intended to help the needy are expended in the most cost-effective and efficient manner. This amendment is designed to serve that purpose.

Mr. President, this amendment is virtually identical to S. 3424, a bill I introduced on August 16. I ask unanimous consent that the full text of my remarks on August 16, explaining the background and purpose of this amendment be reprinted in the RECORD.

I urge adoption of the amendment.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

CALIFORNIA SSI/FOOD STAMP PROGRAM

Mr. CRANSTON. Mr. President, I am introducing today a measure dealing with a problem which has recently developed in California regarding the supplemental security income—SSI—program in that State. This bill is identical to one introduced last Wednesday in the House by my good friend from California, Mr. Corman, H.R. 13814, which was today ordered favorably reported by the House Ways and Means Committee.

BACKGROUND

When the SSI program began in 1974, California included in its State supplementary cash payment an amount equal to the bonus value of good stamps that SSI recipients in the State generally would have been eligible to receive. In other words, the State provided SSI recipients with an additional amount of cash generally equivalent to the average value of, and in place of, food stamps, and in this sense "cashed-out" food stamps for SSI recipients. Pursuant to section 401 of the law establishing the SSI program, Public Law 92–603, California was able to maintain this "cash-out" status as long as the Federal Government was contributing to the cost of the State supplementary payment under the "hold-harmless" provision of section 401.

In 1976, as a result of increases in the Federal SSI benefit level, California would have lost the "cash-out" status allowed under the provisions of Federal law then in effect. At that time, at the request of the State of California, Congress enacted legislation—Public Law 94–379—that allowed California to continue its "cash-out" status as long as it met two conditions: beginning June 1976, and for every month thereafter, the State had to first, pass through to SSI recipients any cost-of-living increases provided in the Federal SSI benefits and second, provide a yearly cost-of-living increase in the State supplementary payment. California has continued to meet these two conditions up to this time, and has, in effect, continued to "cash-out" food stamp benefits for SSI recipients.

Beginning in September 1978, however, Mr. President, California will cease to meet the second of these statutory conditions because the State suspended, as of September 1, 1978, the cost-of-living increase in its SSI supplementary payments. The State will thus lose its "cash-out" status and most noninstitutionalized, stride, aged or disabled SSI recipients will be eligible for the minimum stamp allotment of $10 per month. Couples and most single, blind SSI recipients will not qualify for food stamps because the level of their SSI payments exceed the income limits under the food stamp program. Institutionalized SSI recipients will not qualify for food stamps because they do not constitute an eligible household under the provisions of the food stamp law.

TEMPORARY MEASURE

At this time, Mr. President, California has reached an oral agreement with the Department of Agriculture under which, at least until December 1978, food stamps will be distributed to eligible SSI recipients under a demonstration project system that will greatly simplify food stamp eligibility determination and distribution procedures. The State estimates that during these 4 months approximately 90 percent of the noninstitutionalized, single, aged, and disabled individuals who would be entitled to $10 a month in food stamps will participate in the program. According to the State, the estimated annual cost under the demonstration project system is $51 million for food stamp benefits and $6 million for administration.

CONVERSION TO REGULAR SYSTEM; ADMINISTRATIVE COSTS OUTWEIGH BENEFITS

The State advises that, as of January 1, 1979, it will have to begin converting from the demonstration project to the regular food stamp eligibility determination and distribution procedures. SSI recipients will then have to make application for food stamps at the local welfare offices and pick up the stamps at designated locations. After conversion to the regular food stamp system, the State estimates that participation in the program will drop to 42 percent and, on an annual basis, that $25 million will be paid in food stamps benefits with administrative costs increased to approximately $75 million. In other words, the taxpayers will be expending $3 in administrative costs for every dollar in benefits that go to recipients. Of the total costs, the Federal Government will pay all the costs of the benefits and one-half of the administrative costs, with the State paying the other half.

PURPOSE OF LEGISLATION

The object of the measure I am introducing today is to avoid this patently wasteful result by amending section 8(d) of Public Law 93–233 to provide that SSI recipients in California who would be eligible for food stamps will receive an amount in cash equivalent to the value of their food stamp entitlement. Under this legislation, if requested by the State of California, the Secretary of Health, Education, and Welfare, would, during fiscal year 1979, make an additional monthly cash payment of $10—the minimum food stamp allotment for an eligible one person household—to eligible recipients. This additional payment would be included in or with the individual's SSI check. These SSI recipients would receive this cash payment during fiscal year 1979 in place of the food stamps they would otherwise be entitled to receive.

The amendment would allow California to resume "cash-out" status beginning with the first month in which the additional payments in lieu of food stamps provided under this bill are actually made by the Secretary of HEW. These additional payments would end at the end of fiscal year 1979 or sooner with the first month California comes back into compliance with the two conditions contained in Public Law 94–379. Thus, if California resumes including cost-of-living increases in its supplementary payments before the end of fiscal year 1979, including amounts necessary to reflect all increases in the cost of living which have occurred since June 1976, the special $10 payments would cease and the State could continue its "cash-out" status under the provisions of current law. The amendments also specifies that the requirements of paragraph (2) of section

8(d) will be considered to have been met when California does make the required cost-of-living increases. This provision makes clear that, when California does resume making annual cost-of-living increases in its State supplementary SSI payment, the State will be considered to have satisfied the requirement of paragraph (2) of section 8(d) of Public Law 94-379 that such increases have been paid for all months since June 1976.

COSTS OF PROPOSED LEGISLATION

It is estimated that the total annual costs under this proposed legislation—benefits plus administrative costs—will be approximately $60 million in fiscal year 1979, or about the same as the annualized cost of the food stamp demonstration project system scheduled to begin on September 1, 1978. The benefit costs under the proposed legislation will be somewhat higher, but the administrative costs should be less. This, however, will be $40 million less than the total estimated costs after conversion, as required by law, to the regular food stamp program after January 1, 1979.

Under the regular food stamp program, Mr. President, the State estimates that it will cost about $75 million to administer $25 million worth of food stamp benefits, and the total fiscal year 1979 cost to the Federal Government will exceed $60 million. Under this proposed legislation, approximately $60 million in benefits will be provided to eligible SSI recipients with negligible administrative costs since the additional payments will be made along with regular SSI checks. Twice as many individuals will receive benefits during fiscal year 1979 under this legislation at essentially the same cost to the Federal Government. Thus, this money will go into direct cash benefits, rather than administrative costs.

Mr. President, I have been informed that this legislation will affect only the State of California, but I think that everyone of us shares an interest in seeing that funds—Federal, State, or local—intended to help the needy are expended in the most cost-effective and efficient manner. This legislation is designed to serve that purpose.

Mr. LONG. Mr. President, I know of no objection to the amendment. The Senator has explained it to me and, as he has stated, the department has no objection to it.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, will the Senator yield for a question on that amendment? I just wonder, the Senator says this is an amendment that would enable SSI recipients in California who would become eligible to receive food stamps to receive an amount of cash equivalent to the value of their food stamp entitlement; is that right?

Mr. CRANSTON. They have to convert it to regular food stamps, and it is a saving, incidentally, of $40 million.

Mr. PROXMIRE. A saving?

Mr. CRANSTON. Yes, a savings of $40 million.

Mr. PROXMIRE. How can there be a saving if they are given cash, they are paid cash?

Mr. CRANSTON. Well, effective September 1, California would no longer meet the condition of cash-out requirements because it recently suspended the cost-of-living increase in SSI supplementary benefits. Most single, aged, or disabled SSI recipients in California will become eligible on September 1 for $10 in food stamps.

The cost-benefit ratio of administering this program at conversion would be totally unacceptable. I think it would be a very costly operation.

Mr. PROXMIRE. I see. So if we do not pass this amendment the beneficiaries would receive food stamps——

Mr. CRANSTON. Right.

Mr. PROXMIRE. At great cost to the Federal Government. Instead of those food stamps they would be given $10 in cash and that would be far less expensive to administer?

Mr. CRANSTON. It would be.

Mr. PROXMIRE. To the extent of $40 million?

Mr. CRANSTON. Yes, $40 million. The taxpayers would be paying if we did not adopt this amendment $3 in administrative costs for every $1 in benefits to go to the recipients. It would be an incredibly noncost-effective program.

Mr. PROXMIRE. I am a little puzzled by that, but I am not on the Committee on Finance, and I just do not know. But you have a situation here where they are supplied food stamps because they are unable to get adequate food.

Do we have any precedent for providing cash in substitution?

Mr. CRANSTON. California is currently providing cash.

Mr. CURTIS. As provided in the law.

Mr. PROXMIRE. I thank the Senator.

Mr. CURTIS. Mr. President, I have no objection to the amendment, but I want to be recognized just briefly before we vote on the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CURTIS. Mr. President, I wish to inform the Senate, particularly the distinguished Senator from Wisconsin, that I now have the file before me.

This man worked for his employer for 34 years. He had an accumulation of $23,660.88 coming to him. Before the check was drawn to put into the IRA account to provide for his retirement, the sum of $368.31 was deducted to pay for a small fully paid up life insurance policy. The law said it all had to go over there, but because of this error of paying for a life insurance policy of $368, he was subjected to a penalty tax of $3,815.13. It amounted to 16 percent of his lifetime savings.

Instead of this being a loss to the Treasury, what it is is stopping the Treasury from gaining something they should not gain, because there was no fraud involved. It was a new law; no one told him that if he permitted his employer to pay out $368 to pay up his life insurance, and he put the rest in the plan, he would be subject to a penalty.

So, rather than being a loss in revenue, it is just preventing the imposition of an unconscionable penalty. It was one of those things that were not anticipated when we passed the law on the individual retirement.

Then, in reference to the alleged loss of revenue from the gasoline tax for crop dusters, gasoline taxes are imposed to build roads. Gasoline taxes are imposed for highway purposes. We do not impose the gasoline tax for gasoline consumed elsewhere, whether it is to generate electricity, to plow a field, or what not. This exemption relates to that fuel burned by a small airplane that does not use the highways. It cannot be said that a loss of revenue is accruing to the taxpayers. It is merely correcting a situation, so that the Government would not receive something they are not entitled to receive, because we do not impose the tax on diesel fuel or gasoline where it is not used for highways.

UP AMENDMENT NO 1811

(Purpose: To permit certain State and local governments to distribute to charity amounts generated by the advance refunding of high-yield general obligation bonds before the publication of a Treasury Department decision prohibiting such distributions and to provide relief to those jurisdictions which have already accounted for such amounts)

Mr. EAGLETON. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 1811.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert the following new section:

SEC. . DISPOSITION OF AMOUNTS GENERATED BY ADVANCE REFUNDING OF CERTAIN GENERAL OBLIGATION BONDS.

(a) Notwithstanding any provision of the Internal Revenue Code of 1954 or any regulation or ruling promulgated thereunder to the contrary, interest or other amounts generated by the advance refunding, before September 24, 1976, of one or more issues of general obligation bonds issued by a State or political subdivision of a State (hereinafter referred to as the "refund profit"), held in a trust fund or escrow arrangement, or held by an underwriter or other person under an agreement (whether or not enforceable), which provides for the payment of the refund profit to one or more organizations described in section 501(c)(3) of the Internal Revenue Code of 1954 and exempt from taxation under section 501(a) of such Code, may be paid out in accordance with the provisions of such agreement as if the distribution of such amount were permitted under regulations promulgated by the Secretary of the Treasury under the Internal Revenue Code of 1954.

(b) In the case of a State or political subdivision of a State which has accounted to the United States for all or a portion of the refund profit directly, or by purchasing United States obligations which bear an interest rate substantially lower than the highest rate of interest borne by public debt securities of the United States generally available for purchase at the time such obligations were purchased, the Secretary of the

Treasury shall pay, out of any amounts in the Treasury not otherwise appropriated, an amount equal to that portion of the refund profit for which the State or political subdivision has accounted to the United States. Amounts paid to a State or a political subdivision of a State shall be distributed within 180 days after receipt in accordance with the provisions of subsection (a) in the same manner as if such amounts had been held in a trust or escrow arrangement under an agreement which provided for such distribution.

Mr. EAGLETON. Mr. President, I rise to discuss an amendment to the bill currently before the Senate, which would attempt to correct a problem created by the Internal Revenue Service's efforts to clarify regulations on refinancing of tax-exempt bond issues.

On September 24, 1976, the IRS issued a press release outlining some new "do's and don'ts" for municipal bond refundings. My colleagues and I certainly do not object to this legitimate exercise of IRS authority. However, we feel that IRS has erred in trying to apply their new interpretation of the law retroactively. In doing so, IRS is changing the rules in the middle of the ball game for the seven local governments which are affected by my bill. These other jurisdictions are located in Pennsylvania, Rhode Island, Kansas, Wisconsin, West Virginia, and Alabama.

These involve seven local governments, or creations of local governments. For instance, in Missouri it is Jackson County, Mo. In Alabama it is a school district in Mobile; and other local entities of government in these other States as well. Furthermore, IRS is taking millions of dollars out of the coffers of some very worthwhile charities.

In a municipal bond refunding, Mr. President, the issuer purchases U.S. Government obligations which are deposited in escrow until the initial bond issue is refunded. Under arbitrage restrictions enacted in 1969, the Government obligations must bear a limited yield rather than a market yield. Prior to the September 24, 1976, news release, issuers could purchase these obligations in either of two ways. One way was to buy them from a private party at a price greater than the market price thereby generating a "windfall" profit which was held in escrow. The other way was to buy special low-yielding obligations issued by the U.S. Treasury, thereby generating a "windfall" for the Federal Government.

Jackson County, Mo., was one local government which had chosen to go the first route. In the spring of 1976, Jackson County refinanced $65 million worth of general obligations bonds, and in the process picked up a windfall profit of about $4 million. In order to dispose of the profit in accordance with IRS rules, the county devised a plan to distribute the money to 200 local charitable and civic organizations.

That was the situation on September 24, 1976, when IRS threw a wrench into the works with its press release. The release indicated that such "windfall" profits no longer would be allowed. Furthermore, the IRS indicated that the new interpretation would be effective retroactively. The IRS since has proposed that "windfall" profits accumulated prior to the September 24 release should be allowed to be distributed only to the U.S. Treasury, or to the investment bankers involved in the refundings. It appears that the IRS intends to regard the bonds issued as arbitrage bonds, which will lose their tax-exempt status if the windfall is distributed to charity.

It should be noted, Mr. President, that this whole issue is a matter of IRS interpretation. There is no statute on the books which would prohibit charitable distribution of this type of profit, nor were there any regulations in effect to prohibit this at the time Jackson County and the six other local governments refunded their bonds. In fact, Congress in 1973 had an opportunity to enact legislation very similar to the current IRS policy, and Congress chose not to act on the issue.

I do not quarrel with the Internal Revenue Service's right and duty to interpret the regulations. I do quarrel with the manner in which these regulations are being arbitrarily applied to seven jurisdictions which already had completed their bond refundings, and had done so in good faith and in accordance with existing rules. I further find it somewhat ironic that while the IRS will not allow the profits to be given to tax-exempt charities, they seem perfectly content to allow the profits to be given to the investment bankers who consulted on the refundings.

Mr. President, I feel that my amendment would rectify this situation, with the effect of allowing only these seven local governments to proceed with the distribution of their windfall profits. However, some of my colleagues have expressed their concern that there has not been sufficient time for committee deliberation of this amendment. I will, therefore, defer to the judgment of my colleagues on the Finance Committee and I will not call up my amendment at this time, in the hope that the Finance Committee will be able to schedule a brief and modest hearing on this subject in the near future.

While I recognize the need for adequate committee deliberation, I also recognize the urgency of the problem faced by Jackson County and the other communities, and I hope to solve that problem as quickly as possible.

I might say to the Senator from Louisiana that I talked with the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), and he indicates that, subject to necessary scheduling constraints, he would try to work this matter in before his subcommittee sometime after Labor Day. I most deeply appreciate the interest he has shown in the matter, and I compliment Senator LONG, and say to him that I appreciate the help that his staff has been to me on this subject matter.

I will pursue the matter further at a later time.

Mr. LONG. Mr. President, I thank the distinguished Senator for withholding the matter at this point. We are going to legislate in this area in connection with the big tax bill. There have been witnesses before the committee testifying, not on this particular amendment, but in favor of permitting more industrial bonds to be issued, and testifying about the jobs they have created and the employment that has been made possible in areas of the Nation that very much need the jobs.

A good case has been made that something should be done in the area, so we will be considering amendments of that nature in connection with the bill. That would be the appropriate time for the Senator to offer his amendment.

Mr. EAGLETON. I thank my colleague from Louisiana. The matter he was talking about, industrial bonds, is an analogous hearing to what I am talking about, not identical. This is a bit separate and distinct. But the broad subject matter will be before the committee. I appreciate the attention of the Senator from Louisiana.

Therefore, Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. PROXMIRE. As I understand it, the bill in its present form as amended by Senator CRANSTON is approved throughout in every detail by the Treasury Department, is that correct?

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Yes.

Mr. PROXMIRE. And, in addition, the total lost revenue is $3.5 million?

Mr. LONG. That is correct.

Mr. HASKELL. Mr. President, I have a question regarding this bill's effect on the so-called cost-floor method of calculating the tax base. I understand that this cost-floor method was developed administratively by the IRS and is nowhere reflected in the Internal Revenue Code. Therefore, this bill specifically prohibits the use of the cost-floor rule. Am I correct?

Mr. LONG. That is correct. Congress has never enacted the cost-floor rule into law.

Mr. HASKELL. I understand that no inference is to be drawn as to the application of the cost-floor rule to controversies between the IRS and taxpayers concerning sales prior to the effective date of this bill. However, as the Senator has pointed out, the cost-floor rule has never been a part of the Internal Revenue Code. Therefore, I further understand that it would be incorrect for the IRS to contend in controversies relating to sales prior to the effective date of this bill that the cost-floor rule had ever been adopted by Congress.

Mr. LONG. That understanding is correct in all respects.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment, as amended, and third reading of the bill.

The committee amendment, as amended, was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 1337), as amended, was passed.

Mr. LONG. Mr. President, I move to

reconsider the vote by which the bill was passed.

Mr. CURTIS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

An Act to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera, home production of beer and wine, refunds of the taxes on gasoline and special fuels to aerial applicators, and partial rollovers of lump sum distributions.

## REFUND OF EXCISE TAX ON ALCOHOLIC BEVERAGES DESTROYED BY VANDALISM OR MALICIOUS MISCHIEF

Mr. LONG. Mr. President, I move that the Senate proceed to the consideration of Calendar Order No. 1032.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 1920) to amend section 5064 of the Internal Revenue Code of 1954 to provide for refund of tax on distilled spirits, wines, rectified products, and beer lost or rendered unmarketable due to fire, flood, casualty, or other disaster, or to breakage, destruction, or other damage (excluding theft) resulting from vandalism or malicious mischief while held for sale.

The PRESIDING OFFICER. The Senate will proceed to its consideration.

The Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment to strike all after the enacting clause and insert the following:

SECTION 1. REFUND OF TAX ON ALCOHOLIC BEVERAGE LOSSES RESULTING FROM DISASTER, VANDALISM, OR MALICIOUS MISCHIEF.

(a) IN GENERAL.—So much of section 5064 of the Internal Revenue Code of 1954 (relating to losses caused by disaster) as precedes subsection (c) is amended to read as follows:

"SEC. 5064. LOSSES RESULTING FROM DISASTER, VANDALISM, OR MALICIOUS MISCHIEF.

"(a) PAYMENTS.—The Secretary, under such regulations as he may prescribe, shall pay (without interest) an amount equal to the amount of the internal revenue taxes paid or determined and customs duties paid on distilled spirits, wines, rectified products, and beer previously withdrawn, which were lost, rendered unmarketable, or condemned by a duly authorized official by reason of—

"(1) fire, flood, casualty, or other disaster, or

"(2) breakage, destruction, or other damage (but not including theft) resulting from vandalism or malicious mischief,

if such disaster or damage occurred in the United States and if such distilled spirits, wines, rectified products, or beer were held and intended for sale at the time of such disaster or other damage. The payments provided for in this section shall be made to the person holding such distilled spirits, wines, rectified products, or beer for sale at the time of such disaster or other damage.

"(b) CLAIMS.—

"(1) PERIOD FOR MAKING CLAIM; PROOF.—No claim shall be allowed under this section unless—

"(A) filed within 6 months after the date on which such distilled spirits, wines, rectified products, or beer were lost, rendered unmarketable, or condemned by a duly authorized official, and

"(B) the claimant furnishes proof satisfactory to the Secretary that the claimant—

"(i) was not indemnified by any valid claim of insurance or otherwise in respect of the tax, or tax and duty, or the distilled spirits, wines, rectified products, or beer covered by the claim; and

"(ii) is entitled to payment under this section.

"(2) MINIMUM CLAIM.—Except as provided in paragraph (3)(A), no claim of less than $250 shall be allowed under this section with respect to any disaster or other damage (as the case may be).

"(3) SPECIAL RULES FOR MAJOR DISASTERS.—If the President has determined under the Disaster Relief Act of 1974 that a 'major disaster' (as defined in such Act) has occurred in any part of the United States, and if the disaster referred to in subsection (a)(1) occurs in such part of the United States by reason of such major disaster, then—

"(A) paragraph (2) shall not apply, and

"(B) the filing period set forth in paragraph (1)(A) shall not expire before the day which is 6 months after the date on which the President makes the determination that such major disaster has occurred.

"(4) REGULATIONS.—Claims under this section shall be filed under such regulations as the Secretary shall prescribe."

(b) CLERICAL AMENDMENTS.—The table of sections for subpart E of part I of subchapter A of chapter 51 of such Code is amended by striking out the item relating to section 5064 and inserting in lieu thereof the following:

"Sec. 5064. Losses Resulting From Disaster, Vandalism, or Malicious Mischief."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to disasters (or other damage) occurring on or after the first day of the first calendar month which begins more than 90 days after the date of the enactment of this Act

SEC. 2. EXCISE TAX EXEMPTION FOR CERTAIN TRAILERS DESIGNED TO BE USED WITH LIGHT-DUTY VEHICLES.

(a) IN GENERAL.—Section 4063(a) of the Internal Revenue Code of 1954 (relating to exemptions from motor vehicle excise taxes) is amended by adding at the end thereof the following new paragraph:

"(8) CERTAIN TRAILERS USED FOR FARMING OR FOR TRANSPORTING HORSES OR LIVESTOCK.—The tax imposed under section 4061(a) shall not apply in the case of any trailer or semitrailer, or any chassis or body for any trailer or semitrailer, which is—

"(A) suitable for use with a vehicle having a gross vehicle weight of 10,000 pounds or less (as determined under regulations prescribed under section 4061(a)(2), and

"(B) designed to be used for farming purposes (determined in accordance with section 6420(c)) or for transporting horses or livestock.".

(b) FLOOR STOCKS REFUNDS.—

(1) IN GENERAL.—Where, before the day after the date of the enactment of this Act, any article made exempt from taxation by reason of the amendment made by subsection (a) has been sold by the manufacturer, producer, or importer and on such day is held by a dealer and has not been used and is intended for sale, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article, if—

(A) claim for such credit or refund is filed with the Secreary of the Treasury or his delegate before the first day of the tenth calendar month beginning after the day after the date of the enactment of this Act based upon a request submitted to the manufacturer, producer, or importer before the first day of the seventh calendar month beginning after the day after the date of the enactment of this Act by the dealer who held the article in respect of which the credit or refund is claimed; and

(B) on or before the first day of such tenth calendar month reimbursement has been made to the dealer by the manufacturer, producer, or importer an amount equal to the tax paid on the article or written consent has been obtained from the dealer to allowance of the credit or refund.

(2) LIMITATION ON ELIGIBILITY FOR CREDIT OF REFUND.—No manufacturer, producer, or importer shall be entitled to credit or refund under paragraph (1) unless he has in his possession such evidence of the inventories with respect to which the credit or refund is claimed as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061 of the Internal Revenue Code of 1954 shall, insofar as applicable and not inconsistent with paragraphs (1) and (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(c) DEFINITIONS.—For purposes of subsection (b)—

(1) The term "dealer" includes a wholesaler, jobber, distributor, or retailer.

(2) An article shall be considered as "held by a dealer" if the title thereto has passed to such dealer (whether or not delivery to him has been made) and if for purposes of consumption title to such article or possession thereof has not at any time been transferred to any person other than a dealer.

(d) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to articles sold on or after the date of the enactment of this Act.

Mr. LONG. Mr. President, this bill, H.R. 1920, provides for repayment of the alcohol taxes and duties paid on distilled spirits, wines, rectified products, or beer held for sale if these products are lost or ruined by fire, flood, casualty, or other disaster, or by damage—not including theft—resulting from vandalism or malicious mischief.

Mr. President, alcohol taxes become due upon the making of the product. The cost of the product thereafter, as in the hands of the retailer, includes a larger portion representing prepaid taxes than does any other type of product. In some instances of distilled spirits, more than half the cost of the product may represent taxes. Nevertheless, present law permits these taxes to be refunded to the merchant holding these alcohol products for sale only if the cause of their loss is a "major disaster" which is so declared by the President of the United States.

This bill extends the relief for loss of alcoholic products held for sale, as I have described, to certain losses that are not described by the President as "major disasters."

In order to avoid undue administrative problems to the Internal Revenue Service, the bill requires that the tax refund claimed on account of any single disaster or damage event must be at least $250. In addition, a claim must be filed within 6 months after the loss. This should also discourage unfounded claims.

Also, the committee added to H.R. 1920 the substance of H.R. 2984 as passed by the House. This amendment would exempt certain farm trailers from the 10-percent excise tax imposed on trailers

and semitrailers. The exemption would apply to farm trailers suitable for use with a "light-duty" towing vehicle.

The provision relating to alcohol taxes would reduce budget receipts by about $500,000 annually and the provision relating to farm trailers would reduce budget receipts by less than $2 million annually.

Mr. President, I urge the adoption of this bill.

Mr. PROXMIRE. Mr. President, the bill would exempt from the 10-percent manufacturer's excise tax on trucks, truck trailers, and buses, those trailers or semitrailers which are suitable for use with a towing vehicle having a gross vehicle weight of 10,000 pounds or less and which are designed to be used for farming purposes or for transporting horses or livestock. Provision also is made for refund of the tax to dealers holding tax-paid trailers exempted by the bill which they hold for sale on the day after the date of enactment of the bill.

I am just talking about the first part of the bill. The first part of the bill I understand has no objection to it. I am talking about the truck and truck trailer part.

The Revenue Act of 1971—Public Law 92-178—exempted from the manufacturer's excise tax trucks with a gross vehicle weight of 10,000 pounds or less and trailers and semitrailers with a gross vehicle weight of 10,000 pounds or less if suitable for use with a vehicle having a gross vehicle weight of 10,000 pounds or less. The proposed bill would remove the present 10,000 pound limit for the exemption of trailers and semitrailers provided they were designed to be used for farming purposes or for transporting horses and other animals.

Because the trailers proposed to be exempted would have a gross vehicle weight in excess of 10,000 pounds, the exemption would be accorded to trailers with a gross vehicle weight at which single unit trucks are taxable. The proposed exemption for trailers thus would constitute an obvious discrimination against single unit trucks in the 10,000 to 20,000 pound class. That is the first objection.

The bill also would create a dual standard for trailers over 10,000 pounds gross vehicle weight which are suitable for use with pickup trucks. Those designed for farming purposes or the hauling of animals would be exempt, while trailers of the same capacity designed for hauling general merchandise, or supplies and equipment for mechanics, would continue to be taxable.

The Treasury opposes H.R. 2984 because the bill would discriminate against single unit trucks and non-farm trailers and semitrailers of the same carrying capacity. It could also be expected that there would be problems in differentiating trailers and semitrailers "designed to be used for farming purposes" from similar vehicles designed for the carriage of general cargo.

The revenue loss is small but it is a revenue loss, a loss of $2 million a year.

I would suggest to the distinguished manager of the bill, if he would be willing to do it, that he drop the second section of the bill, that is, the section dealing with trailers that I just spoke about, I would have no objection to the first section. Otherwise, I would propose that we have a division and approve the first part and then I would want to discuss at some length the second part.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I am sure the Senator realizes that this is a House-passed bill that we are talking about. It is not a bill sponsored by one of the Senators.

We could consider it at some later date if some Senator wanted to move the bill in order to expedite consideration of the bill to which the amendment is attached. I think it would be well to drop the amendment.

UP AMENDMENT NO. 1812

Mr. LONG. Mr. President, I ask unanimous consent to strike everything on page 7, line 9 through page 10, line 8. We can perhaps consider this in connection with some other measures later on.

Mr. PROXMIRE. I thank the distinguished chairman very much. I appreciate it.

The PRESIDING OFFICER. Is the Senator offering that as an amendment?

Mr. LONG. Yes, Mr. President.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 1812.

Strike everything from page 7, line 9 through page 10, line 8.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LONG. There is no need to change the title now, Mr. President, in view of the fact that the amendment has been deleted.

Mr. PROXMIRE. As I understand it, the bill in its present form would have the support of the Treasury Department.

Mr. LONG. There is no opposition to it. The Treasury is not opposed to it.

Mr. PROXMIRE. There is no opposition to it.

Mr. LONG. That is right.

Mr. PROXMIRE. Could the Senator give us an estimate of the Treasury loss with that section he deleted?

Mr. LONG. It is about $500,000 annually, a half-million dollars. And, of course, the Senator knows that a loss to the Treasury is a gain to the taxpayer in this situation.

The PRESIDING OFFICER. Are there further amendments? If there are no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended was agreed to.

The PRESIDING OFFICER. The question is on engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 1920) was passed.

Mr. LONG. I move to reconsider the vote by which the bill was passed.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

An Act to amend the Internal Revenue Code of 1954 with respect to the refund of tax on alcoholic beverages lost or rendered unmarketable due to disaster, vandalism, or malicious mischief, and to exempt from the excise tax imposed on trailers and trailer designed to be used with a light-duty vehicle for farming purposes or for transporting horses or livestock.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. LONG. I yield.

## TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. I ask unanimous consent that there now be a period for the transaction of routine morning business, that Senators may speak up to 20 minutes, and that the period last no longer than 1 hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGE FROM THE HOUSE

ENROLLED JOINT RESOLUTION SIGNED

At 3:43 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 554. A joint resolution proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

The enrolled joint resolution was subsequently signed by the Acting President pro tempore (Mr. BURDICK).

## ORDER FOR STAR PRINT OF REPORT NUMBER 95-1125

Mr. CANNON. Mr. President, I ask unanimous consent that a star print of Senate Report 95-1125, the Deep Seabed Mineral Resources Act, be authorized, in order to make technical corrections that were omitted when the original report was filed by the committees.

The PRESIDING OFFICER. Without objection, it is so ordered.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MUSKIE, from the Committee on Environment and Public Works, with an amendment and an amendment to the title:

S. 2083. A bill to establish a uniform and comprehensive legal regime governing liability and compensation for damages and cleanup costs caused by oil pollution, and for other purposes (together with additional views) (Rept. No. 95-1152).

By Mr. TALMADGE, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. 3467. An original bill to designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station", and to designate the U.S. Department of Agriculture Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center" (Rept. No. 95–1153).

S. 3468. An original bill to amend the Agricultural Act of 1949 to ensure that the interest rates on price support loans for upland cotton are not less favorable to producers than the interest rates for such loans on other commodities (Rept. No. 95–1154).

By Mr. PELL, from the Committee on Rules and Administration, without amendment:

S. Res. 538. A resolution authorizing the reprinting of the committee print entitled "Colonization of the West Bank Territories by Israel: (Rept. No. 95–1155).

S. Res. 548. An original resolution to pay a gratuity to Valerie E. Kait, Marguerite E. Gill, and George E. Gill.

By Mr. HUDDLESTON, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment:

S. 976. A bill to amend the Perishable Agricultural Commodities Act, 1930, relating to practices in commodities (Rept. No. 95–1156).

By Mr. BARTLETT, from the Select Committee on Indian Affairs, with an amendment:

S. 1081. A bill to amend the laws relating to the Osage Tribe in Oklahoma (Rept. No. 95–1157).

By Mr. DECONCINI (for Mr. ABOUREZK), from the Select Committee on Indian Affairs, with an amendment and an amendment to the title:

H.R. 11092. An act to increase the authorization of appropriations under the act of December 22, 1974 (88 Stat. 1712) (Rept. No. 95–1158).

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, with an amendment:

S. 2981. A bill to amend the Department of Transportation Act as it relates to the local rail service assistance program, and for other purposes (Rept. No. 95–1159).

By Mr. RANDOLPH, from the Committee on Environment and Public Works, without amendment:

S. Res. 549. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to consideration of S. 2083. Referred to the Committee on the Budget.

By Mr. RIBICOFF (for Mr. SASSER), from the Committee on Governmental Affairs, without amendment:

H.R. 8112. An act to repeal chapter 27 of title 44, United States Code (Rept. No. 95–1160).

H.R. 12915. An act to amend section 2301 of title 44, relating to the National Archives Trust Fund Board (Rept. No. 95–1161).

By Mr. RIBICOFF (for Mr. SASSER), from the Committee on Governmental Affairs, with amendments and an amendment to the title:

S. 2376. A bill to authorize withholding from salaries disbursed by the Secretary of the Senate and the Architect of the Capitol for contributions to certain charitable organizations (Rept. No. 95–1162).

By Mr. EAGLETON, from the Committee on Governmental Affairs, with an amendment:

H.R. 7747. An act to amend title 23 of the District of Columbia Code with respect to the release or detention prior to trial of persons charged with certain violent or dangerous crimes, and for other purposes (Rept. No. 95–1163).

By Mr. RANDOLPH, from the Committee on Environment and Public Works, without amendment:

S.J. Res. 131. A joint resolution to change the name of Copan Dam and Lake in the States of Oklahoma and Kansas to Copan Dam and the Lake of the Delawares (Rept. No. 95–1164).

By Mr. RANDOLPH, from the Committee on Environment and Public Works, with amendments and an amendment to the title:

H.R. 12112. An act designating Gathright Lake on the Jackson River, Va., as Lake Moomaw (Rept. No. 95–1165).

By Mr. SPARKMAN, from the Committee on Foreign Relations, with an amendment and an amendment to the title:

S. Res. 469. A resolution concerning the inhuman acts of the Government of Cambodia against the people of Cambodia (Rept. No. 95–1166).

By Mr. STONE, from the Committee on Agriculture, Nutrition, and Forestry and the Committee on Environment and Public Works, jointly, with an amendment:

S. 3337. A bill to terminate, in the year 1979, further construction of the Cross-Florida Barge Canal project, to adjust the boundary of the Ocala National Forest, Fla., and for other purposes (Rept. No. 95–1167).

By Mr. STONE, from the Committee on Agriculture, Nutrition, and Forestry and the Committee on Commerce, Science, and Transportation, jointly, with an amendment:

S. 3408. A bill to provide for the development of aquaculture in the United States, and for other purposes (Rept. No. 95–1168).

By Mr. FORD (for Mr. HASKELL), from the Committee on Energy and Natural Resources, with an amendment:

S. 3189. A bill to further amend the Mineral Leasing Act of 1920 (30 U.S.C. 201(a)), to authorize the Secretary of the Interior to exchange Federal coal leases and to encourage recovery of certain coal deposits, and for other purposes (Rept. No. 95–1169).

By Mr. DECONCINI, from the Select Committee on Indian Affairs, with amendments;

S. 3002. A bill to modify a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and for other purposes (Rept. No. 95–1170).

By Mr. ROBERT C. BYRD (for Mr. SPARKMAN), from the Committee on Foreign Relations, with an amendment:

S. Res. 536. A resolution expressing the sense of the Senate with respect to whether certain international agreements should be submitted as treaties (Rept. No. 95–1171).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROBERT C. BYRD (for Mr. SPARKMAN) from the Committee on Foreign Relations, without reservation:

Ex. J, 95–2. Protocol Amending the International Convention for the High Seas Fisheries of the North Pacific Ocean (Exec. Rept. No. 95–27).

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. WALLOP:

S. 3463. A bill to amend section 1035(c) tax credit for production sharing contracts; of the Tax Reform Act of 1976 relating to the Committee on Finance.

By Mr. STONE:

S. 3464. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax liability for increases in social security taxes resulting from increases in social security tax rates, and the contribution and benefit base effective after December 31, 1978; to the Committee on Finance.

By Mr. DANFORTH:

S. 3465. A bill to amend the Internal Revenue Code of 1954 to treat as public charities certain institutions which operate libraries; to the Committee on Finance.

By Mr. NELSON (for himself, Mr. PERCY, and Mr. BELLMON):

S. 3466. A bill to amend the Internal Revenue Code of 1954 to change the period for the payment of taxes under section 4161(a) of such code; to the Committee on Finance.

By Mr. TALMADGE (from the Committee on Agriculture, Nutrition, and Forestry):

S. 3467. A bill to designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station", and to designate the U.S. Department of Agriculture Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center." Original bill reported and placed on the calendar.

S. 3468. A bill to amend the Agricultural Act of 1949 to insure that the interest rates on price support loans for upland cotton are not less favorable to producers than the interest rates for such loans on other commodities. Original bill reported and placed on the calendar.

By Mr. MOYNIHAN:

S. 3469. A bill for the relief of the Manhattan Bowery Corporation, of New York, N.Y.; to the Committee on Finance.

By Mr. MOYNIHAN (for himself, Mr. CRANSTON, and Mr. LONG):

S. 3470. A bill to amend the Social Security Act to improve the operation of the aid to families with dependent children program and thereby provide fiscal relief for State and local welfare costs; to the Committee on Finance.

By Mr. TOWER (for himself, Mr. MORGAN, Mr. HAYAKAWA, Mr. STONE, Mr. HATCH, and Mr. LUGAR):

S. 3471. A bill to postpone the increase in the minimum wage and the adjustment to the tip credit under the Fair Labor Standards Act of 1938; to the Committee on Human Resources.

By Mr. HART (by request):

S. 3472. A bill to amend the Atomic Energy Act of 1954, as amended, to provide for the protection from unauthorized disclosure of safeguards information, and for other purposes; to the Committee on Environment and Public Works.

By Mr. TOWER (for himself and Mr. CRANSTON):

S. 3473. A bill to permit Federal savings and loan associations to raise additional capital through the issuance of mutual capital certificates, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HART:

S. 3474. A bill to amend the Clean Air Act to require vehicles sold at high altitudes to comply with emission standards; to the Committee on Environment and Public Works.

By Mr. DECONCINI (for himself and Mr. KENNEDY):

S. 3475. A bill to provide for the reform of class action litigation procedures; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

S. 3476. A bill to amend the Internal Revenue Code of 1954 to provide the same treatment, with respect to determination of sources of income, for interest paid by foreign branches of domestic banks and interest paid by foreign branches of domestic savings and loan institutions; to the Committee on Finance.

By Mr. RANDOLPH:

S. 3477. A bill to amend the Internal Revenue Code of 1954 to insure that the deduction for contributions to a black lung benefit

trust be allowed for any such contributions which are made for the purpose of satisfying unfunded future liability, and for other purposes; to the Committee on Finance.

By Mr. PROXMIRE (by request):

S. 3478. A bill to amend the One Bank Holding Company Act of 1970; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CHURCH:

S. 3479. A bill to amend title XVIII of the Social Security Act to prevent the imposition, under part B thereof, of more than one deductible with respect to expenses incurred for the purchase or rental of any particular piece of durable medical equipment; to the Committee on Finance.

By Mr. McCLURE (for himself and Mr. WEICKER):

S. 3480. A bill to provide representation in the Senate for the District of Columbia as if it were a part of the State of Maryland; to the Committee on the Judiciary.

S. 3481. A bill to retrocede to the State of Maryland all lands within the District of Columbia except lands owned by the United States; to the Committee on Governmental Affairs.

S.J. Res. 156. A joint resolution to provide representation in the Congress for the District of Columbia; to the Committee on the Judiciary.

S.J. Res. 157. A joint resolution proposing an amendment to the Constitution to retrocede to the State of Maryland all lands within the District of Columbia except lands owned by the United States; to the Committee on the Judiciary.

By Mr. WEICKER (for himself and Mr. McCLURE):

S.J. Res. 158. A joint resolution proposing an amendment to the Constitution to provide for Statehood for the District of Columbia; and for other purposes; to the Committee on the Judiciary.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STONE:

S. 3464. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax liability for increases in social security taxes resulting from increases in social security tax rates, and the contribution and benefit base effective after December 31, 1978; to the Committee on Finance.

### INCOME TAX CREDIT FOR SOCIAL SECURITY TAX INCREASES

● Mr. STONE. Mr. President, today I am introducing a bill which will provide much-needed tax relief to the American taxpayer. This bill would provide for a tax credit against Federal income tax liability of up to $200 for the amount of the upcoming increase in the social security tax for employees, employers, and the self-employed over what the taxpayer paid in 1978.

While the social security tax rate has increased by only 1.65 percentage points in the past 10 years, the taxable wage has increased by a whopping 227 percent in the same period. Under the 1977 amendments, effective January 1, 1979, the taxable wage base will rise to $47,100 by 1988, a 604 percent increase over the 20-year period 1969–88. By 1988, this wage base will include the entire salary of most of the work force.

I am limiting the time period of this credit to 3 years in the hope that Congress by then will be able to enact comprehensive legislation which will maintain the solvency of the social security program without placing an oppressive burden on the American wage earner as will be the case if the scheduled social security tax increases go into effect without modification.

Mr. President, in this time of spiraling inflation which eats away the hard-earned wages of the American worker, the scheduled social security tax increases must be ameliorated. My proposed tax credit, though not a final answer to the problem of social security financing, will insure against a further reduction of the American worker's spendable income. It will, at least, prevent most taxpayers from shouldering the additional social security tax increase scheduled to escalate on January 1, 1979.

As can be seen by the table, workers in the $10,000–$15,000 bracket will receive a credit for their entire social security tax increases over the next 3 years ($60 and $90 respectively in 1981). The worker in the $20,000-a-year bracket will be entitled to a tax credit for the entire amount of the scheduled increase in 1979 and 1980, and $200 of the $260 scheduled increase in 1981. Those in the higher level income brackets, $25,000 and up, will receive the maximum credit of $200 for each of the 3 years which will partially offset these increases in social security taxes.

Mr. President, there is no doubt about the fact that adequate social security funding is a necessity. The personal well-being of millions of our citizens depends on it. However, it is equally important that, in funding the social security program, we do not place an intolerable Federal tax burden on the American worker. While this proposal should not by any means be the extent of or only approach for tax relief adopted this year, it does address directly the problem of scheduled social security tax increases. I hope that the Senate Finance Committee will review this proposal carefully as it continues its consideration of a tax reduction bill this year.

Mr. President, I ask unanimous consent that the text of the bill, together with the table, be printed in the RECORD following my statement.

There being no objection, the bill and table were ordered to be printed in the RECORD, as follows:

S. 3464

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. ALLOWANCE OF CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of subchapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44B the following new section.

"SEC. 44C. POST–1978 INCREASES IN SOCIAL SECURITY TAX LIABILITY.

"(a) GENERAL RULE.—

'(1) EMPLOYEES AND SELF-EMPLOYED INDIVIDUALS.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the excess social security tax liability of the individual for the taxable year.

"(2) EMPLOYEES.—In the case of an employer, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the excess social security employer tax liability of the taxpayer for the taxable year.

"(b) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under a section of this part having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43.

"(c) DEFINITIONS, SPECIAL RULES.—

(1) EXCESS SOCIAL SECURITY TAX LIABILITY.—For purposes of this section, the term 'excess social security tax liability' means the amount by which—

"(A) the liability of the individual for taxes imposed under sections 1401 and 3101 for the taxable year, exceeds

"(B) the amount of such liability which would be determined for the taxable year if—

"(i) the rates of the taxes imposed under section 1401 totaled 8.1 percent,

"(ii) the rates of the taxes imposed under section 3101 totaled 6.05 percent, and

"(iii) the contribution and benefit base determined under section 230 of the Social Security Act were $17,700

"(2) SPECIAL RULE FOR STATE AND LOCAL GOVERNMENT EMPLOYEES.—For purposes of this section, any tax imposed on an employee of any State or political subdivision thereof—

"(a) which is paid by the State to the Federal Government under an agreement under section 218 of the Social Security Act, and

"(B) which, under such agreement, is equivalent to the tax imposed by section 3101, shall be treated as a tax imposed by section 3101.

"(3) EXCESS SOCIAL SECURITY EMPLOYER TAX LIABILITY.—The term 'excess social security employer tax liability' means the amount by which—

"(A) the liability of the taxpayer under subchapter B of chapter 21 for the taxable year exceeds

"(B) the amount of such liability which would be determined for the taxable year if—

"(i) the rates of tax imposed under section 3111 totaled 6.05 percent, and

"(ii) the contribution and benefit base determined under section 230 of the Social Security Act were $17,700.

(c) CLERICAL AMENDMENT.—The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44C. Post-1978 increases in social security tax liability.".

SEC. 2. EFFECTIVE DATE.

The amendments made by section 1 shall apply with respect to taxable years beginning after December 31, 1978, and before January 1, 1982.

INCREASE IN SOCIAL SECURITY TAX FROM 1968–78 (BROKEN DOWN BY INCOME BRACKETS)

| Income | Increase | Percent increase |
|---|---|---|
| $10,000 | $251.80 | 53.74 |
| 15,000 | 554.30 | 161.50 |
| 20,000+ | 727.65 | 212.00 |

INCREASE IN SOCIAL SECURITY TAX FROM 1978–81

| | | |
|---|---|---|
| $10,000 | $60.00 | 9.9 |
| 15,000 | 90.00 | 9.9 |
| 20,000 | 260.15 | 24.3 |
| 25,000 | 591.65 | 55.3 |
| 30,000+ | 904.20 | 84.4 |

AMOUNT OF TAX CREDIT GIVEN (BROKEN DOWN BY INCOME BRACKET AND YEAR)

| Income | 1979 | 1980 | 1981 |
|---|---|---|---|
| $10,000 | $8.00 | $8.00 | $60.00 |
| 15,000 | 12.00 | 12.00 | 90.00 |
| 20,000 | 155.15 | 155.15 | 200.00 |
| 25,000+ | 200.00 | 200.00 | 200.00 |

By Mr. DANFORTH:

S. 3465. A bill to amend the Internal Revenue Code of 1954 to treat as public charities certain institutions which operate libraries; to the Committee on Finance.

● Mr. DANFORTH. Mr. President, I am introducing a bill to provide that any tax-exempt institution that operates a bona fide library, as a permanent and principal part of its public services, that is organized by a special act of the United States of America, by any State or its predecessor government, by the District of Columbia, or by any possession of the United States, shall be treated as a public charity. Because the investment income from their endowments prevents them from obtaining "public status" under current law, many tax-exempt institutions which operate libraries as a part of their public services, including those created by legislative act, are classified as private operating foundations or as private foundations for Federal income tax purposes.

As a result, although these organizations are established and operate exclusively for educational purposes, they are subject to the complex private foundation rules, they must keep many detailed records, and they must pay a 4 percent excise tax based upon net investment income. It has been determined that certain of these institutions should be designated as "public charities" for Federal income tax purposes because of the benefits that the libraries of these institutions provide to the public. Private foundation rules are no more pertinent to them than to any other educational institution and effectively limit or inhibit organizations' use of their funds in the performance of tax-exempt activities. Furthermore, private foundation rules discourage grants of funds to such institutions by charitable foundations, and by private parties and corporations.

This bill would place these institutions in the same category as educational organizations described in section 170(b)(1)(A)(ii). To insure that only those institutions that operate libraries that are clearly organized to serve the public will benefit, this provision is limited to only those organizations that were organized by a special legislative act and that maintain permanent library facilities.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3465

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) clause (ii) of section 170(b)(1)(A) of the Internal Revenue Code of 1954 (relating to charitable, etc., contributions and gifts) is amended by adding at the end thereof "or any institution which operates a library which was established by State or Federal law and which is operated as a permanent and principal part of the public services of such institution.".

(b) Paragraph (1) of section 170(b) of such Code is amended by adding at the end thereof the following new subparagraph:

"(F) Libraries established by State or Federal law.—For purposes of subparagraph (A)(ii), a library shall be treated as established by State or Federal law if such library was established as a library—

"(i) by a law of a State, a law of the United States, a law of a possession of the United States, or a law of the District of Columbia, or

"(ii) before 1743 in the geographic area now comprising the United States."

(c)(1) The amendments made by this section shall apply to contributions made on or after the date of enactment of this Act, and to taxable years beginning after such date.

(2) For purposes of sections 509(b) and 507 of such Code, an organization which for its first taxable year beginning after the date of enactment of this Act is described in the amendment made by subsection (a) shall be treated as not having been a private foundation at any time before the first day of such first taxable year.

---

By Mr. TALMADGE (from the Committee on Agriculture, Nutrition, and Forestry):

S. 3467. A bill to designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station," and to designate the U.S. Department of Agriculture Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center". Original bill reported and placed on the calendar.

● Mr. BENTSEN. Mr. President, it is my privilege and my great pleasure to join as a cosponsor of S. 3647, a bill which would in part designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the W. R. "Bob" Poage Pecan Field Station.

Congressman W. R. "BOB" POAGE has given dedicated and outstanding service to the citizens of central Texas since 1925, as State representative, State senator, and as U.S. Congressman since 1936.

BOB POAGE has served with distinction on the House Agriculture Committee for the last 38 of his 42 years in Congress, serving as vice-chairman and chairman of the committee. His energy, talent and dedication to agriculture have earned him the title of "Mr. Agriculture" throughout his home State of Texas. He has been instrumental in shaping every major piece of agricultural legislation since the Roosevelt administration, and he has labored tirelessly for the "little man" in agriculture. BOB POAGE has been instrumental in passing legislation which has helped our family farmers to have electricity, telephones, rural water systems, flood control, soil conservation, adequate credit, and many other things which we consider basic necessities today.

Electricity and telephones are taken for granted by those who live in cities, but those who live in rural areas know that BOB POAGE has spent a lifetime working to defend the rights of those citizens who live on small farms and in rural communities to work and earn a decent and responsible living, and to enjoy the fruits of our modern technology which others take for granted.

Congressman BOB POAGE is just as much a unique part of central Texas as the stately and productive pecan trees which line its creeks and rivers. His retirement this year will leave a gap that those of us who have been privileged to serve as his colleagues know will not soon be filled.

It is only fitting that such a man as Congressman BOB POAGE should be honored by this body for his exemplary service to the citizens of central Texas and to the small farmers and ranchers who are the backbone of our most vital and viable industry—agriculture.

I urge the Senate to remember this unique dedication to agriculture and to the people of central Texas by designating the U.S. Department of Agriculture's Pecan Field Station in Brownwood, Tex., at the "W. R. 'BOB' POAGE Pecan Field Station".●

---

By Mr. MOYNIHAN (for himself, Mr. CRANSTON, and Mr. LONG):

S. 3470. A bill to amend the Social Security Act to improve the operation of the aid to families with dependent children program and thereby provide fiscal relief for State and local welfare costs; to the Committee on Finance.

STATE AND LOCAL WELFARE REFORM AND FISCAL RELIEF ACT OF 1978

● Mr. MOYNIHAN. Mr. President, the bill that Senators CRANSTON, LONG and I are introducing today takes a significant step toward the constructive reform of the American welfare system. It would move us toward acknowledgment of the principle that welfare is a national responsibility and the National Government should bear the primary burden of paying for it. The States should have the ability to design and administer appropriate programs and should retain a limited financial involvement. But as promised in the 1976 platform of the Democratic Party "local governments should no longer be required to bear the burden of welfare costs."

This measure would provide substantial fiscal relief to hard-pressed State and, especially, local governments, with proper emphasis on those jurisdictions whose fiscal burdens result in large measure from conscientious efforts to serve their dependent families adequately.

But much more than fiscal relief is involved. This bill would allow significant improvement in welfare benefits in States where they are presently low. In every State, it would allow benefit levels to keep pace with the rising cost of living. This is particularly important to me, because in New York City the benefits "freeze" occasioned by the city's severe fiscal problems has resulted in a 28 percent decline in the purchasing power of an AFDC recipient's grant during the past 4 years.

I would ask persons concerned, as I have been, with the welfare of welfare recipients to consider that in New York State this has meant that for the first

time in history we have cut our provision for the poor. Inflation has cut payments—by more than one-quarter—just as surely as the most punitive administrative or legislative measures might have done. Stalemate on welfare reform has punished the poor.

This bill offers an opportunity to break that impasse and to renew the momentum of welfare reform. For let me be clear: This bill does not contain all that I would like to see done. But it does contain worthwhile changes in the present system that the Congress is capable of making this year. And there is no reason again to allow "the best to become the enemy of the good" in the field of welfare reform. Let us do what we can do this year. And let us return to do more next year, and the year after that.

A word on the "block grant" approach, which is a major structural change from the current system of "matching payments." A familiar goal of most welfare reform proposals of the past decade, indeed one may fairly say part of the conventional wisdom about welfare reform, has been establishment of a uniform national program. Yet recent research, demonstration projects and experiments have led to widespread doubt that enough is known about the causes and remedies of dependency to permit us to move confidently toward a uniform national program. Instead, our bill would change the nature of the incentive structure so as to give the strongest encouragement for reforming welfare to the level of government that has the primary administrative role.

We propose to increase the current Federal share of AFDC costs by amounts sufficient to replace local expenditures in most jurisdictions that still require them. Over time we will seek further increases sufficient to make the Federal share equivalent to at least 75 percent of each State's AFDC outlays in the base period (adjusted for cost-of-living increases), thus entirely eliminating the "local share" in every jurisdiction; in States with lower benefits during the base period, the Federal share will approach 100 percent, thus permitting State funds to be used for improved benefit levels.

The eventual Federal assumption of all county AFDC costs will have a significant effect on the fiscal stability of local governments in the United States and on their ability to reduce taxes, particularly the onerous property tax. In New York, for example, if local governments choose to pass this relief through to taxpayers, most county property taxes could, in time, be cut by 10 to 20 percent. As early as fiscal 1980 there could be reductions of 4 to 8 percent.

We also propose to change the nature of the Federal commitment to AFDC financing from an open-ended matching grant to a block grant, initially set at a significantly increased amount and thereafter fixed, save for annual "cost of living" increases and legislated additions aimed at achieving the 75 percent floor and eliminating the local share. As a result, the level of government subject to the main variation in welfare costs will be the States. If expenditures rise faster than the Federal block grant, States must absorb the costs.

Similarly, if expenditures are reduced as the result of better management or an effective plan for dealing with dependency, States will realize the savings. There can be no stronger incentive than to pay the price for one's actions and to reap the reward. Our bill would, for the first time, place this incentive at the heart of our welfare policy. Its underlying assumption is the American federalism offers a constructive solution to contemporary doubts about how to reform welfare.

For the genius of a Federal system is that it permits a variety of approaches to resolving common problems. Perhaps Connecticut or Missouri, Tennessee or Oklahoma will discover a new and effective way of dealing with dependency; so long as they conform with minimum Federal standards they should be encouraged to try. The financing formula contained in our bill gives them a powerful incentive to do so. Far from taking the steam out of welfare reform, our bill should lead to a profusion of innovative efforts as States come to realize that their own self-interest lies in an efficient, humane and sensible program of assistance.

Perhaps in time one or another of these State programs will seem so clearly desirable that the manifold obstacles to national legislation will dissolve. The logjam on welfare reform has persisted for a decade now; our bill offers a real chance for ending it and setting in motion a process that will produce true solutions to the problems of poverty and dependency.●

WELFARE LEGISLATION

● Mr. CRANSTON. Mr. President, I am introducing today, along with the chairman of the Senate Finance Committee, the Senator from Louisiana (Mr. LONG), and the chairman of the Finance Committee's Public Assistance Subcommittee, the Senator from New York (Mr. MOYNIHAN), a bill to provide fiscal relief to States and localities, and to begin movement toward the type of welfare reforms that are so urgently needed throughout the country. I thank Senator Moynihan, who for so long has been a leader in the effort to achieve welfare reform, and Senator LONG, who has likewise played such a vital role in this field, for their cooperation in this mutual effort.

MODIFIED PROPOSAL

Mr. President, nearly 2 months ago, when it became apparent that it was no longer possible to enact comprehensive welfare reform legislation during this Congress, Senators MOYNIHAN and LONG and I announced a joint effort to sponsor a measure to provide fiscal relief to the States along with certain measures to achieve some reforms in the welfare system, as well as strengthen existing tax credits to encourage the employment of welfare recipients in the private sector and provide tax benefits to low-income workers.

Mr. President, we originally envisioned a more extensive measure than that which is being introduced today. In order to get started with legislation that can be enacted this year, we are introducing a more limited bill, but one that provides much needed fiscal relief and movement toward the reform greatly needed. The measure being introduced today would provide for a block grant to States based upon their current aid to families with dependent children—AFDC—costs with an additional $1.5 billion dollars to be distributed annually among the States through a three-part formula. This formula would provide for distribution of $1.32 billion based upon a State's current AFDC costs and a revenue sharing formula. This formula was adopted by Congress last year in a more modest welfare relief measure.

COST OF LIVING

The legislation also would provide for a cost-of-living increase each year on the State's block grant. This cost of living would be passed on to the recipients unless the State made a specific finding that such a cost-of-living increase was not necessary for the State to provide adequate benefit payments to welfare recipients.

TIMING OF FISCAL RELIEF

Mr. President, this legislation provides for the payment of additional Federal financial assistance to the States and localities beginning in the first quarter after June 30, 1979. Thus approximately $400 million of the total additional funding will be made available to the States and localities during fiscal year 1979, with the remainder of the additional funding with cost-of-living adjustments provided in the succeeding quarters.

The first year total additional Federal financial assistance—formula distribution plus cost of living—will be approximately $1.5 billion.

BLOCK GRANT APPROACH

Mr. President, under the block grant approach, a State would be able to retain any savings it achieved through reduction of welfare costs and implementation of welfare reform measures. States will thus have an incentive to eliminate error, fraud or abuse as well as help welfare recipients get work.

Mr. President, this bill would provide that funds received by States under the block grant would be restricted to social welfare programs. In other words, any savings achieved in the welfare program must be expended on other social welfare programs, not general governmental matters.

Mr. President, I know that many people are concerned about the possible adverse consequences of a block grant approach. Our original proposal envisioned a higher annual level of additional Federal financial assistance than the amounts proposed in the legislation being introduced today. This amount, however, was reduced in light of the indications we have received that the House will simply not accept fiscal relief on the scale we originally outlined.

While the reduction in the amount of fiscal relief may diminish the attractiveness of the block grant approach, I think that this approach still offers opportunities and incentives for some welfare reform movement on the State and local level. I believe that it is still useful to have this block grant approach considered this year. I know that the sponsors of this legislation certainly welcome the constructive modifications and refine-

ments which may be offered by other Members of the Senate who share our concern and interest in finding solutions to our welfare problems.

EMPLOYMENT TAX CREDITS

Mr. President, in our original proposal, we indicated that this legislation would provide for substantial increases in the existing welfare recipient/employer tax credit and the earned income tax credit. The measure being introduced today does not contain those provisions, but we fully intend to move ahead with these measures in separate tax legislation before this session of Congress adjourns.

CONTINUED MOVEMENT TOWARD COMPREHENSIVE WELFARE REFORM

Mr. President, I have previously indicated my continued support for a comprehensive reform of our current welfare system. At the same time, I believe it is essential that we take immediate steps to provide some fiscal relief to State and local taxpayers who are struggling under the current costs of our welfare system, as we begin—in this Congress—our efforts to provide incentives for more comprehensive welfare reform.

I do not believe that we can continue to hold this fiscal relief hostage for more comprehensive reforms. Indeed, continuation of the existing financial pressures upon States and localities to pay the costs of welfare programs may well result in a fiscal backlash to the ultimate detriment of welfare recipients. There is a desperate need to change a welfare system that no one likes—neither the taxpayer who foots the bill, nor the administrators who run the welfare programs, nor the recipients who supposedly benefit from them. This legislation is a start in that direction.●

---

By Mr. TOWER (for himself, Mr. MORGAN, Mr. HAYAKAWA, Mr. STONE, Mr. HATCH, and Mr. LUGAR):

S. 3471. A bill to postpone the increase in the minimum wage and the adjustment to the tip credit under the Fair Labor Standards Act of 1938; to the Committee on Human Resources.

INFLATION REDUCTION AND JOBS PROTECTION ACT

Mr. TOWER. Mr. President, less than a year ago, the Senate considered legislation which was subsequently enacted to amend the Fair Labor Standards Act. As a result of that law, the minimum wage rate of $2.30 was increased to $2.65 at the beginning of this year, and it will continue to rise to $2.90 in 1979, $3.10 in 1980, and $3.35 in 1981.

In addition, changes were made in the tip credit section of the law to reduce the amount of tip income which can be counted toward the minimum wage amount. These changes are scheduled to begin in January of 1979, when the tip credit will be reduced from 50 to 45 percent, and continue in 1980 with a further reduction to 40 percent.

During Senate debate on this bill, a number of us warned against this action, citing the bill's potential for increasing inflation and boosting unemployment. Unfortunately, our efforts did not prevail: And even more unfortunately, we find ourselves, less than 1 year into the scheduled rate increases, with the dubious honor of being able to say "I told you so."

Just look at the facts. We are quickly approaching double digit inflation in this country, and in fact by some economic calculations we are already there. The unemployment rate for youth, who are most immediately affected by changes in the minimum wage is 16.3 percent. And for young blacks, the jobless rate is a staggering 37 percent. The decline of the dollar in international markets has become a problem of major concern, and the threat this poses to financial markets and our economic well-being in general is creating an uneasy feeling among financial experts. If domestic inflationary problems continue unchecked, we can expect dire consequences in the world marketplace.

And if the statistics are not enough, listen to what the economic experts are saying. Men and women of all philosophical persuasions—from academia, the government, and the private sector—all cite the minimum wage as a tool of inflation, and many have advocated the sound judgment that we should slow down here: That we should postpone some of this action to give the economy a chance to revive.

For example, William Miller, Chairman of the Federal Reserve Board, said he "personally would welcome" a 2-year deferral of the minimum wage increase scheduled for January 1. Testifying before the House Budget Committee, Miller said:

> It seems appropriate to consider deferring the increase in the minimum wage that is scheduled for January 1, 1979, given its implications for costs and for youth employment opportunities. . . .

Others have echoed this thought. Arthur Okun, senior economist at the Brookings Institution and former Chairman of the Council of Economic Advisers under Lyndon Johnson, echoes this opinion. According to Okun:

> The country would be better off if we postponed both the minimum wage and the social security hikes. . . . It would be worth one-half a point on the Consumer Price Index and make the economy outlook for 1979 significantly better.

Mr. President, I could cite similar comments from a great many people here—Barry Bosworth of the Wage and Price Stability Council; Alice Rivlin, Director of the Congressional Budget Office; Secretary of the Treasury Michael Blumenthal; economist Milton Friedman; Joel Popkin of the National Bureau of Economic Research; economist Walter Williams from Temple University, and the list goes on and on.

In response to the realistic and widely held view that action should be taken, I am today introducing legislation to curb this agent of inflation in order to prevent even further weakening of our economic condition, at home and abroad. I am pleased to have as coauthors of my bill my distinguished colleague from North Carolina, Mr. MORGAN, from California, Mr. HAYAKAWA, from Florida, Mr. STONE, and from Utah, Mr. HATCH. I invite others to join us in this effort.

The provisions of our bill are simple and straightforward. We propose a 1-year moratorium on the scheduled minimum wage increases, as well as a 1-year postponement of the changes scheduled to take effect in the tip credit provisions.

I believe that Congress must take the initiative here and acknowledge the well-recognized fact that the size and the timing of last year's minimum wage increases, while undoubtedly a political plus among many sectors, was a serious economic mistake. And the brunt of this misguided policy will fall hardest on those very individuals whose earnings are most closely associated with the minimum wage level.

I am reminded here of an interesting commentary on this issue written by William Raspberry. The subjects of Mr. Raspberry's article are William and Willie May Clark, who run the Sparkle Car Wash right here in Washington. Commenting on the proposed wage increases, Mrs. Clark says:

> It would just about put us out of business . . . and not just us. A lot of blacks trying to make it in business would be hurt by this.

Today we are considering legislation here in the Senate to extend the Comprehensive Employment and Training Act, and I have been a supporter of CETA programs, particularly as they encourage private sector employment and job training. While I continue to support Federal efforts to provide meaningful employment assistance, I think we might be well advised to consider an interesting relationship between this CETA legislation, which I expect will pass today, and the minimum wage laws.

To the extent that these scheduled increases in the minimum wage will boost inflation, these inflated costs will be reflected in higher Federal spending. It is estimated the Government-sponsored jobs, such as those in this CETA bill, cost the taxpayers about $16,000 per job. Now here we are, passing one law which has already cost nearly $2.4 billion in terms of lost jobs just this year, and now we are about to pass another law costing over $8 billion in 1979, to create new jobs. Let us face it: There is a nice little racket going on here. On the one hand, Congress is throwing thousands of people out of work, only to turn right around and cite the resulting unemployment statistics as a basis for more Government make-work programs. Once again, the taxpayers are being taken for a ride.

Mr. President, it is time to put politics aside here and deal with the practicalities. Based on the cold, hard facts, and on the advice of a wide range of economic experts, I believe that the action we offer today constitutes a reasonable and effective approach to dealing with our economic problems.

Mr. President, I ask unanimous consent that our bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3471

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That this Act may be cited as the "Inflation Reduction and Jobs Protection Act".

SEC. 2. (a) Section 6(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206

(a)(1)) is amended by striking out "1979" and inserting in lieu thereof "1980" and by striking out "1980" each time it appears in such section and inserting in lieu thereof "1981" in each case.

(b)(1) Section 3(b)(1) of the Fair Labor Standards Amendments of 1977 is amended by striking out "1979" and inserting in lieu thereof "1980".

(2) Section 3(b)(2) of the Fair Labor Standards Amendments of 1977 is amended by striking out "1980" and inserting in lieu thereof "1981".

(c) The amendments made by this section shall take effect on the date of enactment of this section or on December 1, 1978, whichever first occurs.

Mr. MORGAN. Mr. President, the bill which I am introducing today along with Senator TOWER is a very serious piece of legislation. It is by no means an attempt to destroy the minimum wage legislation hammered out by the Senate last October.

Last year I voted against the minimum wage law. Primarily I was concerned about the cost of the measure to the economy and about the absence of a youth differential from the bill. I will not raise those issues here. The Congress expressed its will and the measure is now law.

Today, my concern is that much of what was predicted to result from increasing the minimum wage rate has come to be.

Our inflation rate is simply running at too high a level. During the first quarter of this year, inflation was eating away at our income at a rate of 9 to 10 percent. Predictions from the White House are that we may see an annual figure of 7.2 percent and the Congressional Budget Office has projected even higher figures.

This year the minimum wage went up 15 percent. Next year and through 1981, it will go up at a rate of 9 percent annually. While an increase in the minimum wage rate does not account for all inflation, it has been asserted that as much as ½ percent of our inflation rate can be seen to flow directly from the minimum wage increase.

What we are urging the Senate to do is to put a 1-year moratorium on the increase in the minimum wage. We are asking for a delay of 1 year. We are not attempting to undo what the Congress has seen fit to do. Again, we are simply seeking a delay in the next increase so as to ease the inflationary pressure on the economy.

William Miller of the Federal Reserve Board, Mr. Blumenthal, the Secretary of the Treasury, Mr. Barry Bosworth, head of the President's Council on Wage and Price Stability and Arthur Okun of the Brookings Institution have all endorsed this approach.

I will not touch on the impact the minimum wage increase has had on general unemployment, minority unemployment or on our youth employment. I do want to restate that this bill simply attempts to delay the increase in the wage rate for 1 year. A move which may help the inflation rate, may increase the number of jobs and give more confidence to our people in their economy and Government. I believe this to be a sound move for our people and for our economy.

Mr. HAYAKAWA. Mr. President, I wish to join my colleague, Senator TOWER, in support of his efforts to delay the next increment of the minimum wage increase scheduled to go into effect this January. I have, in the past, opposed raising the minimum wage levels. I have gone so far as to introduce legislation that would have allowed young people to work for less than the minimum wage, allowing them to get good apprentice jobs.

Mr. President, in October of 1977, the Senate considered and passed legislation to raise the minimum wage level gradually over a period of several years. At that time, I opposed this measure, and spoke in defense of the people who would be harmed by a rise in the minimum wage levels. I said it then and I say it again now—the unemployed and the young are the people most harmed by a rise in the minimum wage. Raising the minimum wage does nothing to help them. If anything, raising the wage level prices them out of the job market. How many businesses that you can think of, aside from big, big businesses, can afford to pay a 17 year old $2.65 an hour to learn a job? Not many, I think. If I were a small businessman, I, too, would hesitate to pay someone with so little job experience that much money.

I have in the past made serious efforts to pass legislation to enable young people to work for less than the minimum wage. This way an employer can hire a young, inexperienced, but willing worker to learn a trade while getting paid. I firmly believe that this must be done if we are to begin solving the youth unemployment problem. I do not have to tell any of you how important it is for people to have a sense of personal worth and financial independence. Jobs providing pocket money are a necessary part of growing up. The money gives a young man or woman the freedom to go on dates, buy lunch instead of carting a brown bag to school, and buy their own clothes. These are all things that are important to young people growing up today in America. This extra money that is earned by oneself is special money—money that was worked hard for, and which proves to the young person, and to society, that the youth is self-sufficient.

Look at your own children—or at yourself. Do you remember the first dollar you earned? It seemed so special because it was something that you earned by yourself without anyone's help. Earning money teaches the value of money. It also gives a person an exhilarating feeling—one that tells you that you can take care of yourself—that you are able to make it in the real world.

Those who favor increases in the minimum wage genuinely believe that they are helping people at the poverty level. Those who oppose raising the minimum wage, including myself, want to help the poor also. However, large increases in the minimum can be counterproductive, because although higher minimums may raise wages for some workers, they can bring others total unemployment. Increases in the minimum wage, by increasing the price of low-productivity labor, reduce the demand for that labor. As a result the number of young, poor, and other low-productivity workers declines. The very people who are supposed to be helped are hurt in a terrible way. Four out of every five black teenagers cannot find work. Is it better to be out of a job at $2.65 an hour or to have one at a lower wage? If you ask anyone who wants to, but cannot find a job, they will tell you it is better to have a job at any wage than none at all.

One argument in favor of raising the minimum is that the current level is not high enough to ensure a good standard of living for workers. They argue that the current minimum leaves some workers at the poverty level. But they do not see that raising the minimum wage leaves the problem unsolved. Not having enough money is related to income, not the level of the minimum wage. People who lose their jobs as the result of a minimum wage increase—because employers cannot afford employees at a higher wage—suffer a decline in income, not an increase.

Raising the minimum wage affects all parts of society. It has been debated whether or not the minimum wage adds to inflation. This debate is active now because two advisers to President Carter, Federal Reserve Board Chairman G. William Miller and Treasury Secretary W. Michael Blumenthal have recently suggested that the next scheduled increment in the minimum wage be delayed. I agree with this, and believe that we should postpone this next increase for 1 year. How are employers to make up for this mandated rise in wages? They must either raise the price of goods to cover the cost of these higher wages, or they lower the quality of the goods so that they do not raise prices. Either way, the effects of a higher minimum wage are felt by all of us. The average consumer today squawks about the high cost of living—an increase in the minimum wage would only aggravate the situation.

I recall a phrase that many of us use quite frequently—the "American work ethic." Minimum wage laws, union demands and other factors have all but made this phrase meaningless. It used to mean hard, honest, fair work. No more. Our work ethic has become something altogether different. We have even taken away the incentive to look for jobs. Now those people we have kept from gaining work because of the minimum wage get jobs paid for by the taxpayer. I believe that most people who take public service jobs do so simply because they were priced out of others. We would not need all of these public service programs if we did all in our power to enable people to get jobs in the private sector.

Business and industry would prefer to decrease unemployment through the action of a free-market private sector rather than through Federal make-work programs. However, if Congress continues to increase the minimum wage, the unemployment problem will continue to grow. Business wants to grow and absorb the young and capable worker who wants a job; we cannot deny business the right to have a good worker at an affordable price, and we must not deny

those willing to work their freedom to do so.

I say let us listen to the wise advice of Reserve Board Chairman Miller and delay the next increment in the minimum wage. Our economy and the level of inflation need our help and good sense now. In the face of the declining U.S. dollar abroad, we must do everything we can to help ourselves and the country return to a sound economic base.

I ask my colleagues to join with me to support a postponement of the next minimum wage rise. Those who are skeptical, just take a look at the growing inflation and interest rates. We must do something now. This is not a time for the Government to add to inflation. Let us do what we can to control it; we have a choice—I ask for your support.

---

By Mr. HART (by request):

S. 3472. A bill to amend the Atomic Energy Act of 1954, as amended, to provide for the protection from unauthorized disclosure of safeguards information, and for other purposes; to the Committee on Environment and Public Works.

NUCLEAR SAFEGUARDS INFORMATION PROTECTION ACT

● Mr. HART. Mr. President, by request, I am introducing legislation proposed by the Nuclear Regulatory Commission to provide for the protection from unauthorized disclosure of safeguards information. While I am not prepared to endorse the provisions in this legislation, the bill does address an important issue that warrants thorough consideration by the Congress.

In the months ahead the Senate Committee on Environment and Public Works Subcommittee on Nuclear Regulation will meet to address this issue. Though there will not be time for the subcommittee to complete its work before the end of the session, I fully anticipate that our work this fall will enable the committee to act early next year.

Mr. President, so that my colleagues and their staff might have the opportunity to review this proposal, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3472

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That Chapter 12 of the Atomic Energy Act of 1954, as amended, is amended by adding at the end thereof a new section 147 to read as follows:

SEC. 147. SAFEGUARDS INFORMATION.

a. In addition to any other authority or requirement regarding protection or disclosure of information and notwithstanding Section 552 of Title 5, United States Code, relating to the availability of records, the Commission shall prescribe such regulations or orders as it may deem necessary to prohibit the unauthorized disclosure of:

(1) safeguards information which identifies a licensee's or applicant's detailed—

(a) control and accounting procedures, security measures, including security plans, procedures and equipment, for the physical protection of special nuclear material in quantities determined by the Commission to be significant to the public health and safety or the common defense and security from the standpoint of theft, diversion or sabotage, by whomever possessed, whether in transit or at fixed sites;

(b) security measures, including security plans, procedures and equipment, for the physical protection of source material or by-product material in quantities determined by the Commission to be significant to the public health and safety or the common defense and security from the standpoint of theft, diversion or sabotage, by whomever possessed, whether in transit or at fixed sites; or

(c) security measures, including security plans, procedures and equipment, for the physical protection of, and the location of certain plant equipment vital to the safety of, production or utilization facilities involving nuclear materials covered by (a) and (b) in this paragraph; and

(2) studies, reports and analyses which are conducted by or on behalf of the Commission, its licensees, or applicants for Commission licenses and which concern the safeguarding of nuclear materials or facilities against theft, diversion or sabotage.

The Commission shall exercise the authority in this subsection so as to apply the minimum restrictions needed to achieve the objectives of protecting the health and safety of the public or the common defense and security, and upon a determination that the unauthorized disclosure of such information could have a significant adverse effect on the health and safety of the public or the common defense and security by facilitating theft, diversion or sabotage of such material or such facility. Any person, whether or not a licensee of the Commission, who violates any regulation adopted under this section shall be subject to the civil monetary penalties of Section 234 of this Act. Nothing in this section shall be construed to authorize the withholding of information from the duly authorized Committees of the Congress.

SEC. 2. Section 181 of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

GENERAL

"SEC. 181. The provisions of the Administrative Procedure Act (Public Law 404, Seventy-ninth Congress, approved June 11, 1946) shall apply to all agency action taken under this Act, and the terms 'agency' and 'agency action' shall have the meaning specified in the Administrative Procedure Act: *Provided, however,* That in the case of agency proceedings or actions which involve Restricted Data, defense information, or safeguards information protected from disclosure under the authority of Section 147 of this Act, the Commission shall provide by regulation for such parallel procedures as will effectively safeguard and prevent disclosure of Restricted Data, defense information, or such protected safeguards information to unauthorized persons with minimum impairment of the procedural rights which would be available if Restricted Data, defense information or such protected information were not involved.".

---

By Mr. TOWER (for himself and Mr. CRANSTON):

S. 3473. A bill to permit Federal savings and loan associations to raise additional capital through the issuance of mutual capital certificates, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

SAVINGS AND LOAN ASSOCIATIONS MUTUAL CAPITAL CERTIFICATE ACT

● Mr. TOWER. Mr. President, I am introducing legislation today, on behalf of Senator CRANSTON and myself, that will increase the availability of funds for housing. This legislation will allow savings and loan associations to increase their capital by issuing mutual capital certificates. This, in turn, will increase the lending capacity of savings and loan associations and permit them to make more home loans. The same bill was introduced in the House by Representative GARRY BROWN on June 12 of this year and by Banking Committee Chairman REUSS on August 12.

This legislation is needed to help savings and loan associations meet the increasing demand for housing. The savings and loan industry is the major source of funds for housing in this country. But, many savings and loan associations are finding it difficult to increase their capital, and the lack of sufficient capital has limited their ability to make mortgage loans.

Overall, the savings and loan industry has experienced a substantial decline in its capital position since the early 1950's, as shown in the accompanying table. Many savings and loans have experienced an even more dramatic decline in their capital position than the industry as a whole. The result has been a serious limitation on the ability of many savings and loan associations to finance homeownership.

The savings and loan industry is not the only industry that needs to increase capital. Many industries in our economy are experiencing a capital shortage and need to increase their capital if they are to continue growing and providing the opportunity for meaningful and productive employment. The availability of sufficient capital is important to our Nation's financial system if it is to continue to meet the increasing demand for credit. But, the lack of sufficient capital poses a special problem to the savings and loan industry. Most savings and loan associations are mutual institutions and cannot raise capital by issuing stock. The only way they can increase their capital is through retained earnings.

One approach to solving this problem has been to allow mutual savings and loans to convert to a stock form of ownership. Stock savings and loans can raise capital by issuing stock. However, the conversion of mutual savings and loans to stock savings and loans has been surrounded by a great deal of controversy, particularly in the case of mutual savings and loan associations converting to a stock form of institution at the Federal level. There are only about 750 stock savings and loan associations in existence in this country, accounting for roughly 16 percent of the total. Hopefully, more conversions will be allowed in the future.

An alternative approach is to allow savings and loan associations to issue mutual capital certificates as a substitute for equity capital. Funds raised through the issuance of these certificates will allow savings and loan associations to expand their lending capacity and provide more funds for housing.

The issuance of these certificates would be particularly helpful in solving a problem faced by many savings and loan associations whose deposits are insured by the Federal Savings and Loan Insurance Corporation (FSLIC). Federally insured savings and loan associations are required by the FSLIC to hold reserves equal to 5 percent of their savings accounts. Many associations are operating

at or near that required ratio, and cannot seek new deposits to make mortgage loans. These reserves are required for the purpose of protecting against losses, and there is reluctance to reduce this ratio sufficiently to permit a more aggressive acquisition of savings accounts by these savings and loan associations.

Yet, new savings accounts are the life blood of an association and are needed if savings and loans are to meet the rising demand for financing homeownership. This problem would be alleviated through the issuance of mutual capital certificates. Funds obtained through issuance of these certificates could be used to meet the FSLIC's reserve requirements, thereby expanding the deposit-taking capacity of these savings and loan associations. The end result would be more funds for housing.

Savings and loan associations would issue these certificates under rules and regulations adopted by the Federal Home Loan Bank Board. They could be issued and sold directly to subscribers or through underwriters, and they would be subordinated to all savings accounts, savings certificates and debt obligations. In the case of liquidation, they would constitute a claim on an association's net worth only after the payment in full of all savings accounts, savings certificates, and other debt obligations. These certificates could be issued with either a variable or fixed rate of interest. In order to make these certificates attractive to investors, capital losses may be charged against these certificates only after all other reserve and net worth accounts have been exhausted. However, if an association does not maintain the reserve ratio required by the FSLIC, it may not pay interest on those certificates without the approval of the FSLIC.

This bill will not solve all of the problems facing the savings and loan industry or the Nation's housing market. It does not solve the problem which the savings and loan industry faces in losing funds whenever market interest rates rise. But, it would go a long way toward addressing the problem of insufficient capital faced by many savings and loan associations and it would help provide additional funds for housing.

I ask unanimous consent that the bill and table be printed in the RECORD.

There being no objection, the bill and table were ordered to be printed in the RECORD, as follows:

S. 3473

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Savings and Loan Associations Mutual Capital Certificate Act".

SEC. 2. Section 5(b) of the Homeowners' Loan Act of 1933 is amended by deleting paragraph (2) and substituting the following new provisions:

"(2) To such extent as the Board may authorize by regulation or advice in writing, an association may borrow, may give security, may be surety as defined by the Board and may issue such notes, bonds, debentures, mutual capital certificates, or other obligations, or other securities as the Board may so authorize.

"(3) In accordance with rules and regulations issued by the Board, mutual capital certificates may be issued and sold directly to subscribers or through underwriters, and said certificates shall constitute part of the general reserve and net worth of the association.

"(4) The Board in its rules and regulations authorizing the issuance and sale of mutual capital certificates shall provide that said certificates:

"(i) be subordinate to all savings accounts, savings certificates, and debt obligations,

"(ii) shall constitute a claim in liquidation on the general reserves, surplus, and undivided profits of the association remaining after the payment in full of all savings accounts, savings certificates, and debt obligations,

"(iii) shall be entitled to the payment of interest prior to the allocation of income to reserve and net worth accounts, and

"(iv) may have a fixed or variable rate of interest.

"(5) The Board shall provide in its rules and regulations that in the event losses are charged to reserve or other net worth accounts such losses shall be charged against mutual capital certificates only after other reserve and net worth accounts have been exhausted.".

SEC. 3. Section 403(b) of the National Housing Act, as amended, 12 U.S.C. 1726(b), is hereby amended by adding at the end thereof the following paragraph:

"Mutual capital certificates and debentures, subordinate to the rights of holders of savings accounts, savings certificates, and the Corporation, shall be deemed to be reserves for the purposes of this subsection (b) in accordance with rules and regulations made by the Corporation. In the event losses are charged to reserve or other net worth accounts such losses shall be charged against mutual capital certificates and subordinated debentures only after other reserve and net worth accounts have been exhausted. In the event an insured institution fails to maintain the reserves required by this Act, no payment of interest on said certificates or said debentures shall be made except with the approval of the Corporation.".

*Ratio of net worth to savings deposits and assets at savings & loan associations, 1950–77*

| Year | Ratio of net worth to— Savings deposits | Total assets |
|---|---|---|
| 1950 | 9.15 | 7.58 |
| 1955 | 7.96 | 6.79 |
| 1960 | 8.02 | 6.97 |
| 1965 | 7.89 | 6.72 |
| 1966 | 8.29 | 7.05 |
| 1967 | 7.97 | 6.91 |
| 1968 | 8.12 | 6.99 |
| 1969 | 8.57 | 7.17 |
| 1970 | 8.47 | 7.04 |
| 1971 | 7.80 | 6.60 |
| 1972 | 7.37 | 6.27 |
| 1973 | 7.51 | 6.27 |
| 1974 | 7.59 | 6.24 |
| 1975 | 6.92 | 5.85 |
| 1976 | 6.55 | 5.61 |
| 1977 | 6.51 | 5.48 |

● Mr. CRANSTON. Mr. President, I join with Senator TOWER in introducing a bill to allow Federal savings and loan associations to increase their capital by issuing mutual capital certificates. Savings and loan associations along with other deposit institutions have, over the last decade, consistently experienced a decline in their ratio of permanent capital to total assets.

Savings and loan associations are required to hold reserves at or about 5 percent of their savings accounts. Retained earnings essentially are the only source of permanent capital for a mutual association. By law, when an institution cannot satisfy the 5-percent ratio requirement, it is prohibited from seeking new savings depositors and future growth is curtailed until the ratio requirements are met. Money for housing, because lack of sufficient capital is simultaneously restricted. In this instance, a regular corporation would sell stock to raise equity to support future growth. However, the only option a savings and loan association has when this situation occurs is to convert from a mutual to a stock institution, as savings and loans are not legally able to issue stock to raise capital as other corporations. The conversion from mutual form to a stock association is presently still a very controversial idea and restricted by the Congress for Federal savings and loan associations.

This bill will provide a new tool for those savings and loans that are experiencing rapid growth such as in my home State, California, in halting the deterioration in their capital ratios. It is by no means the answer to capital adequacy problems for depository institutions. I would hope that the FHLBB would immediately review the need for the 5-percent Federal insurance requirement for it is clearly evident that depository institutions will need larger sums of capital if they are to hold their own in the competitive battle with an increasing number of nontraditional, nondeposit, and unregulated institutions in a fast growing marketplace involving a host of new and expensive financial services.

The only true solution to the capital problem is larger retained earnings and greater profitability. This will be possible only when major financial reform occurs and savings and loans have all the tools needed to compete fully in the marketplace. This bill will provide some measure of relief while the Congress and the Federal Home Loan Bank Board continue to study the broader question of capital adequacy and financial reform for the savings and loan industry.●

By Mr. HART:

S. 3474. A bill to amend the Clean Air Act to require vehicles sold at high altitudes to comply with emission standards; to the Committee on Environment and Public Works.

AUTO EMISSION STANDARDS

● Mr. HART. Mr. President, I am today introducing a bill to amend the Clean Air Act to require automobiles which are sold in high altitude areas to meet the emission standards of the Act.

The original Clean Air Act simply required all cars to meet Federal standards on the amount of pollution they emit. In practice, however, the Environmental Protection Agency just checked the cars as they came off the production lines in Michigan. Because autos operate differently at different altitudes, the cars that EPA certified in Michigan did not meet the standards when they were shipped to high-altitude areas. The cars in Denver, for instance, emitted about 50 percent more pollution than allowed by the Federal standards.

To address this failure of high altitude cars to comply with the Federal standards, EPA in 1974 issued regulations requiring cars sold at high altitudes to be certified to meet the Federal standards at an elevation of 5,200 feet above sea level (the elevation of the high altitude testing facility). These regulations went into effect in model year 1977.

As part of the comprehensive amendments to the Clean Air Act, Congress last year overturned these regulations, in effect exempting high-altitude cars from the Federal pollution standards, until model year 1984. Beginning that year, each car will have to meet the Federal standards regardless of the elevation.

Mr. President, the Federal emission standards are designed to protect the health of our citizens. People living in high altitude areas have as much right to these health-protecting standards as everybody else in the country.

Therefore, I am introducing legislation to end the exemption of high altitude areas from the Federal emission standards of the Clean Air Act. I ask permission that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3474

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 202(f) of the Clean Air Act is amended to read:

"(f) The Administrator shall issue regulations requiring new motor vehicles manufactured in model years 1980 through 1983, inclusive, for initial sale to ultimate purchasers by dealers located in any county with an average elevation of 4,000 feet or more above sea level to comply at an altitude of 5,200 feet above sea level with the emission standards established under this section. The regulations shall prohibit manufacturers from discriminating against dealers and ultimate purchasers in high altitude areas either by increasing the price of new motor vehicles provided to such dealers or by restricting the models available to such dealers because of the manufacturers' compliance with the regulations. A certificate of conformity may be issued under section 206 of this Act only for a model of motor vehicle or motor vehicle engine for which has been issued a certificate of conformity with the regulations under this subsection.".

---

By Mr. DECONCINI (for himself and Mr. KENNEDY:)

S. 3475. A bill to provide for the reform of class action litigation procedures; to the Committee on the Judiciary.

REFORM OF CLASS ACTION LITIGATION PROCEDURES

● Mr. DECONCINI. Mr. President, on behalf of Senator KENNEDY and myself, I am introducing legislation to revise and reform the rules and procedures under which class actions are litigated in the Federal courts. Dissatisfaction with the current situation is widespread, and I believe the need for change is compelling. The proposal we are introducing, which was drafted in close consultation with the Department of Justice, contains some interesting and challenging departures from present practice. If implemented, it may go far toward rationalizing class action litigation. At the same time, I recognize that this is a subject matter of great complexity and great interest to many diverse groups. While this bill was prepared in consultation with a wide variety of interests, it is only a first step, not the last. Neither Senator KENNEDY nor I are wedded to its provisions. The Subcommittee on Improvements in Judicial Machinery plans extensive hearings on the measure beginning this fall and continuing into the 96th Congress. Those hearings will focus on the broader questions associated with class actions; The need for revision of the class action rule; the legitimate purposes which class action litigation should serve; the extent to which our society should devote judicial resources to class actions; and the actual and potential abuses of this instrument.

The bill which I am introducing repeals Federal rule 23(b)(3) and replaces it with two new procedures: First, a public action for redress of small monetary injuries (less than $300), and second, a class compensatory action for substantial monetary injuries (more than $300). In addition, the bill provides the courts with new tools to make cases under both procedures more manageable.

The statute created by this bill reflects the recognition that there are, in fact, two distinct types of class suits which are presently litigated under rule 23(b)(3). One type arises where the economic injury is small but widespread. In these cases, it is not economically feasible for the injured parties to initiate individual actions. Nevertheless, where there has been a violation of the law, the public has a strong interest in seeing that the wrongdoer does not profit from his illegal conduct. Thus, the primary purpose of bringing suit in these cases is to prevent unjust enrichment and to deter illegal conduct rather than to compensate the injured parties. In contrast, the second type of suit arises from situations where the economic injury is more substantial and it is assumed that the parties will have sufficient incentive to form a class and secure adequate and representative counsel to assert their claims. In these cases, compensation of the parties remains the primary focus of the litigation.

The public action created by this bill vests a single claim in the United States against a wrongdoer where, first, 200 persons have each sustained injury less than $300; second, the combined damages exceed $60,000, and third, the injuries arise out of the same transaction or occurrence and present a substantial common question of law or fact. The policy behind the public action is, as I mentioned earlier, the public interest in preventing unjust enrichment and deterring unlawful conduct.

The public action can be brought by the United States, or on its behalf, by one or more injured persons, thereby providing a role for private enforcement of the public interest. If an action is brought by a private person, he must promptly serve notice on the Attorney General and the local U.S. attorney and provide them with all evidence in his possession supporting the claim. The United States may then either assume control of the action, permit the action to be prosecuted by the private party, refer the action to a State attorney general, or recommend to the court that the public interest would not be served by allowing the action to continue as a public action. If the United States assumes control of and prevails in an action brought initially by a private party, the party is entitled to an incentive fee. The public action thus accommodates public and private interests.

The public action procedure also provides for a preliminary hearing, after strictly controlled discovery, within 4 months from the filing of the complaint. The court, at that time, decides if the prerequisites of the public action have been met and makes a preliminary assessment of the merits of the case. The preliminary hearing thus serves to protect all parties from open-ended discovery fishing expeditions and to screen out frivolous strike suits. It will also give the plaintiff a preliminary indication of his chances of prevailing before he invests substantial resources in pursuing the action. If a defendant is found liable, the judgment is calculated in an amount equal to either the total benefits realized by the defendant by this illegal conduct or the total damages caused by the defendant. This calculation can be made by any reasonable means.

Judgments in public actions will be transferred to the Administrative Office of the U.S. Courts where they will be deposited into a public recovery fund. The Administrative Office is charged with the responsibility of giving notice of the judgment, processing claims and distributing the fund. A claim must be greater than $15 and submitted within 1 year. The transfer of this responsibility from the courts to the Administrative Office serves to conserve judicial resources.

The compensatory action created by this bill is patterned on the present rule, but includes significant changes which are intended to increase the fairness of the procedure and to make it less expensive and time consuming. The compensatory action is to be used where 40 persons suffer injury exceeding $300 and the injuries arise out of the same transaction or occurrence and present a substantial common question of law or fact. The theory here is that persons injured in excess of $300 will have sufficient incentive to form a class and vindicate their claims.

As in the public action, the trial judge in a compensatory action must hold a preliminary hearing, after strictly controlled discovery, within 4 months of the filing of the complaint. At this hearing, the court decides whether the class requirements have been met, makes a preliminary assessment of the merits, and also decided the content and the means of giving notice to the class. Where notice and proof of individual damage will be difficult and time-consuming, the court is given discretion to try the issues of liability and damage separately. If the defendant is found liable, then the cost of notice will shift to him. This provision, like many others in the bill, allows the court to divide complex cases into more manageable steps.

Both the public action and the compensatory action would be subject to new management techniques which are intended to promote stronger judicial stewardship of these actions. For example, the bill provides for, first, the regulation of settlements; second, supervision by the circuit judicial councils of overdelayed district court rulings; and third, a precise method for computing an award of attorney fees based on hourly rates, but with provision for risk adjustments.

This bill is by no means perfect. However, it does address in an innovative manner the problems inherent in present practice. And, unless we begin to act, the basic credibility of our justice system and access to our Federal courts will be called into question. To arbitrarily close the doors of the courts on class action claims gives the appearance of condoning illegal conduct. As Vice President MONDALE has pointed out:

Nothing is more destructive to a sense of justice than the widespread belief that it is much more risky for an ordinary citizen to take five dollars from one person at the point of a gun than it is for a corporation to take five dollars each from a million customers at the point of a pen.

At the same time, however, we must protect honest and legitimate business interests from unwarranted attacks. The challenge is there, and I look forward to developing and further exploring the potential of the new concepts embodied in this legislation.

Mr. President, I ask unanimous consent that a commentary on the bill be printed in the RECORD.

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

PROPOSED REVISIONS IN FEDERAL CLASS DAMAGE PROCEDURES—BILL COMMENTARY

I. INTRODUCTION

*A. Need for legislation*

Few aspects of federal procedural law have given rise to as much critical comment and dissatisfaction as Rule 23(b)(3) of the Federal Rules of Civil Procedure, which governs the conduct of most class damage actions in the federal district courts. This memorandum describes a proposal developed in the Office for Improvements in the Administration of Justice of the Department of Justice. It has not yet been formally approved by the Department of Justice and it continues under study there. The proposal would repeal Rule 23(b)(3) through legislation, and replace it with two separate statutory procedures designed to improve access to justice. The proposal also attempts to lessen the severe problems of cost and management which have created thousands of pages of overly-complex, contradictory precedent.

Class damage actions may also be brought under Rules 23(b)(1), 23(b)(2), and 23.1. However, these actions have presented many fewer problems than those brought under Rule 23(b)(3) and they are unaffected by the proposed bill.

There is widespread support from both plaintiff and defendant perspectives for comprehensive revision of Rule 23(b)(3). In the 12 years since amendment of the Rule [1] several judicial decisions interpreting and applying its terms have done much to inhibit access to federal courts for class relief by requiring expensive individual notice to all reasonably identifiable class members [2] and by emphasizing the difficulties of management.[3] At the same time, defendants in class damage actions have claimed that the high costs of litigation and the accompanying risk of overwhelming financial liability have forced them into unwarranted settlements.[4] These problems and others have resulted in great dissatisfaction among practitioners,[5] including members of the public interest community.[6]

The business community has also taken strong exception to the operation of the present Rule. The Times Mirror Corporation through counsel has commended attempts "to reform present class [damage] action procedures which have clogged the courts, fostered strike suits and resulted in other abuses of the judicial system. * * *"[7] Also the class damage action's proliferation and cumbersomeness has been cited as one reason for rapidly escalating business legal expenses.[8]

President Carter has stressed his desire to "expand the opportunity for responsible class actions" and Vice President Mondale has said that the Administration "is committed to the principle that no American should suffer injustice because the price of justice is too high."[9] During his confirmation hearings, Attorney General Bell affirmed the Administration's commitment to work with the Congress in an effort to secure passage of fair legislation which would improve the management of class actions and reduce the costs of such litigation.[10] The need for a workable, collective judicial procedure is highlighted by the Vice President:

"[A]ccess to federal court is often the only way the [ordinary person] * * * can effectively challenge the massive power of a modern corporation or the far-reaching power of government itself. Closing the courthouse door leaves them no other place to go.

"Nothing is more destructive to a sense of justice than the widespread belief that it is much more risky for an ordinary citizen to take $5 from one person at the point of a gun than it is for a corporation to take $5 each from a million customers at the point of a pen."[11]

There is support for revision of class action procedures in the legislative branch. For example, Senator Edward M. Kennedy has recently pointed out:

[I]t is easy to sympathize with the courts' motivation for limiting class actions, but in a larger sense such [course] appears misguided. Although class actions are more complex and time consuming than the average civil case, they can also be a most efficient way of disposing of controversies. In one proceeding—however lengthy and time consuming it may be—a judge can adjudicate the rights of thousands of persons. The class action also makes the courts accessible to those who simply could not pursue their claims individually."[12]

Also a substantial portion of the federal judiciary believes that Rule 3(b)(3) procedures should be changed. In response to a recent inquiry by the Advisory Committee on Civil Rules, 50 percent of 145 district judges indicated that they favored prompt amendment of rule 23.[13] The same percentage found that the present rule "wastes judicial resources through cumbersome, expensive, time-consuming procedures."[14] Judge Henry J. Friendly, in his 1973 Carpentier Lecturers, expressed the view that the mass small claim action needed "urgent attention."[15] Not surprisingly, lack of effective management tools has led courts to take the serious step of limiting important substantive rights normally effectuated through the class damage action.[16]

Finally, several recent academic surveys and empirical studies have called for (1) more sensitivity to the interaction between class damage procedures and the substantive law [17]; (2) greater attention to management problems associated with the mass, small-claim action [18]; (3) closer settlement scrutiny; [19] and (4) reliance on the parens patriae concept to better effectuate policy in the small claim context.[20]

Given this clear need for comprehensive reform, revision of class damage procedures should be accomplished by direct legislative enactment rather than through the rule-making process. This view is based on the perception that such revision would have a significant impact on public policy. The deterrence of widespread injury is of substantial public interest, and Congress should devote extensive consideration to any proposal. Also, revision of class damage procedures would have significant economic ramifications, which raise serious questions as to whether such revision is appropriately within the scope of the rule-making authority granted by the Rules Enabling Act.[21]

In March 1978, the Judicial Conference of the United States adopted a resolution which "approve[d] in principle the revision of Rule 23(b)(3) . . . by direct legislative enactment, rather than by the rule-making authority."[22]

*B. Consultation process*

In June 1977, the Office for Improvements in the Administration of Justice mailed over 250 copies of a discussion memorandum to members of the bar familiar with the issues in class damage actions. The memorandum catalogued many Rule 23(b)(3) difficulties and suggested possible remedies. A cross-section of legal analysts, commentators, judges, and practicing attorneys of diverse views were invited to Washington by the Attorney General to review the memorandum and suggest alternative approaches. More than 30 smaller consultation sessions were also held with other interested parties. The information derived from these meetings was supplemented by the responses to a questionnaire on class actions circulated to 1,800 judges, practitioners, and law professors by the Supreme Court's Advisory Committee on Civil Rules.[23]

In December 1977, approximately 1,000 copies of a draft statute were widely circulated with an accompanying summary prepared especially for nonlawyers. The draft reached an even larger audience when it was published by the Bureau of National Affairs.[24] Nearly 2,000 pages of comment were received in response. The December draft was also the subject of numerous informal discussions with congressional staff, trade associations, public interest counsel, and academic commentators. Following extensive analysis of the comments, the December draft was substantially revised to produce this bill.

*C. Controlling premises*

The proposed statute is based on several major premises. First, there are basically two types of class suits now litigated under Rule 23(b)(3) and to a significant degree the problems encountered with them stem from a failure of the current procedure to distinguish them. The two types of suits are: (1) a class damage action brought where individual economic injury is small and where the primary purpose of the suit is to prevent unjust enrichment and deter illegal conduct rather than to compensate individuals for minor economic harm; and (2) a class action brought where individual economic injury is more substantial and the primary purpose of the suit is to compensate the injured individuals.

Recognizing that basic distinction, the proposed statute creates two separate procedures to replace Rule 23(b)(3): one is designed for the situation in which illegal conduct is alleged to have caused widespread harm to individuals in small amounts each (not exceeding $300) [25] and where it is not economically feasible for the injured to initiate individual actions; the other is designed to provide more effective, less cumbersome procedures for compensatory class actions (where individual injury

Footnotes at end of article.

exceeds $300).[26] In the first situation the proposed statute recognizes the interest of the United States[27] in preventing unjust enrichment and deterring illegal conduct by creating a public action which provides a close meshing of public and private interests[28] and encourages private detection[29] as well as responsible initiation of actions by the bar.[30]

Another major premise underlying the proposed statute is that some of the major problems encountered in class damage actions have stemmed from ineffective judicial management. The bill includes provisions designed to provide the courts with the necessary tools[31] to manage these actions more effectively. The bill could reduce much of the judicial work load created by (1) the unnecessary complexity of these actions; (2) the lack of congressional guidance on fundamental procedural question[32]; and (3) the absence of salutary management procedures. The bill breaks class damage actions into discrete, manageable phases.[33] It also contains a provision to expedite the filing of judicial rulings.[34]

The proposed statute has three major parts: Subchapter A deals with the public action for widespread injury in small amounts; Subchapter B contains procedures for a class compensatory action involving larger individual claims; and Subchapter C sets forth several management procedures pertinent to both types of actions. The last section of the bill establishes a uniform procedure for interlocutory appeals from orders denying or granting public or class compensatory action status.

II. PUBLIC ACTION FOR WIDESPREAD SMALL INJURY

Subchapter A creates a public action which may be brought in federal district courts by the United States directly or in the name of the United States by a person injured by unlawful conduct ("upon relation").[35] It also provides that the United States may take control of any action originally brought by a realtor, or inform the court that, in its view, the action is not in the public interest.[36] In order for a realtor, or the United States, to bring an action, at least 200 persons named or unnamed must each sustain injury not exceeding $300 as a consequence of a violation which otherwise would give rise to a civil private right of action for damages under any existing Act of Congress regulating commercial conduct.[37] The aggregate of all harm must be $60,000 or more. No new substantive rights of action are created. Most mass, small claim injuries will arise in the commercial context. Also, the commercial limitation on coverage minimizes the number of instances where a public action on behalf of the United States could be brought against the United States.[38]

The public action is intended to prevent unjust enrichment by divesting wrongdoers of fruits gained through a violation of federal law and to deter others from similar conduct. Compensation of the injured is a secondary purpose. Use of a collective procedure in this context has been widely advocated.[39]

*A. Need for public action procedure*

The public action provides a vehicle for a collective civil suit where the injured would not otherwise have the ability or incentive to sue. As Judge Weinstein has put it, "[w]hen the organization of a modern society such as ours affords the possibility of illegal behavior accompanied by widespread, diffuse consequences, some procedural means must exist to remedy—or at least deter—that conduct."[40]

The bill reflects the view that present procedures are ineffective where deterrence and prevention of unjust enrichment are the primary objectives. The bill substitutes, for the widespread small injury case, procedures designed to enable those objectives to be more effectively realized.

Sufficiently increased deterrence cannot be achieved solely by replacing the current compensatory procedure (in small claim context) with expanded enforcement initiated by federal or state agencies. Even if bureaucratic expansion to augment civil and criminal enforcement were feasible, privately initiated and publicly supervised civil enforcement is preferable. It tends to be more innovative and effective in disgorging ill-gotten gain.

1. Ineffectiveness of Current Procedure to Prevent Unjust Enrichment and to Deter Unlawful Conduct

The use of the Rule 23(b)(3) compensation-oriented procedures for actions brought to remedy pervasive small harm has posed major problems for plaintiffs, defendants and the courts.

First, current procedures do not place sufficient emphasis on the problems of detection in the small claim context. Because the injury is so small and so widely diffused throughout the economy, it may not be brought to the attention of private or public counsel. Yet sociologists, government officials and businessmen agree that illegal conduct is most efficiently deterred by the probability that the offense will be detected and some redress ensue.[41] The deterrent interest of the United States can be best advanced by modification of class damage procedures in a manner which increases the probability that the laws will be enforced whenever broken, even though the resulting injury to each consumer is small.

Second, deterrence also relies upon the expectation that, not only will there be detection, but rapid redress as well. Procedures are needed to assure swift judgments. The present notice requirement of Rule 23(c)(2) and certification prerequisites of Rule 23(b)(3) are designed for actions brought predominantly for compensatory, rather than deterrent purposes. The burden of these requirements can thwart entirely the maintenance of an action where the individual injury is small, even though the case may be meritorious and the harm widespread. The problem is magnified when cross-claims, counter-claims, and pendent claims further delay and obfuscate the core issues.

Third, even if detection occurs today, current procedures, employed in the small injury context can create pressures for settlement which undermine deterrence policy. Because these actions create potential large scale liability and legal costs, and because the existence of the lawsuit alone, even if frivolous, could unfairly damage a defendant's reputation, defendants may feel forced to settle early regardless of the merits.[42] There is insufficient incentive for injured persons to work closely with counsel and counsel tends to reap more from these actions than the client, because counsel often receives a percentage of a large aggregate recovery. The plaintiff attorney is likely to be the real party in interest, and may reach a settlement that does not fully effectuate deterrence policy. The settlement may reflect counsel's interests, rather than those of the absentee injured.[43] In sum, the current situation, which seems to defendants to encourage overdeterrence, tends ultimately to result in pervasive underdeterrence.

Fourth, present procedures do not necessarily prevent a wrong-doing defendant from retaining monetary benefits derived from the wrong-doing. It is unconscionable to permit a defendant who has profited from the violation of a federal statute to enjoy those illegally gotten gains.[44] The bill deals effectively with this problem by providing for the single public recovery calculated by the totality of such profits.

Fifth, present practice imposes significant and inappropriate administrative duties on the courts. It is apparent that the anticipation of potential difficulties in the computation and distribution of class recovery has created some judicial hostility toward small claim class actions, which impedes or eliminates deterrence oriented suits.[45]

Finally, noticeably lacking in current procedures is any provision for executive branch involvement to represent the United States' interest in deterrence and prevention of unjust enrichment.

Available data support the conclusion that, in light of the above, present public enforcement and compensation oriented procedures have not deterred large scale, small claim illegality. Consumer fraud, including illegal competition and deceptive practices, is estimated by the United States Chamber of Commerce to cause direct injury of $21 billion annually.[46] Conservative estimates also place the cost of price-fixing "and other antitrust violations" to American consumers at more than $150 billion a year.[47] Recently the Middle Atlantic Office of the Antitrust Division set up a toll-free hotline service, by which disgruntled consumers, retailers and employees could report suspected price-fixing violations. Twenty-five of sixty-seven calls led to initial investigations. Of these investigations, twelve have already been deemed to be sufficiently substantial to merit further examination and these probes are still in progress. All these Chamber, Congress, and the Antitrust Division data suggest that current private and public enforcement has not provided sufficient deterrence.

2. Limited Impact of Recent Federal Antitrust and Consumer Protection Legislation

Recent federal legislation such as the Magnuson-Moss Warranty—Federal Trade Commission Improvements Act[48] and the Truth-in-Lending Act[49] are designed to mesh with a compensation oriented procedure which, as has been shown, is ill-suited in the mass, small injury context.

The recent parens patriae innovations of the Hart-Scott-Rodino Antitrust Improvements Act of 1976[50] does augment federal resources with State aid of a limited sort. However, the coverage of this statute is not broad. It authorizes State attorneys general to represent natural persons residing in their states in suits for monetary damages suffered due to trade practices undertaken in violation of the Sherman Act.[51] These attorneys general may only sue under the Sherman Act.[52] The statute's benefits do not accrue to many current class action plaintiffs, *e.g.*, those seeking redress for violations of the securities, truth-in-lending and consumer protection laws. Furthermore, many antitrust violations which cause great damage to the public, such as violations of the Clayton[53] and Robinson-Patman Acts,[54] are similarly excluded from the coverage of the bill.

The parens patriae bill also authorizes State attorneys general to act only on behalf of "natural persons."[55] Thus, this procedure will be of no use to the small business victim of Sherman Act violation, although many businesses, such as distributors and retailers, are obviously damaged by price-fixing as much as the ultimate consumer.

Although the Hart-Scott-Rodino statute permits use of aggregation techniques to compute and distribute damages, the Act provides that these techniques may only be used in price-fixing cases.[56] The State attorney general will still face the considerable obstacle of proving small, individual damages in some of the actions brought under the legislation.[57]

Finally, the parens patriae bill is dependent upon the activization of a large bureaucracy. The injured consumer must trust in the State attorney general to bring suit. Because of the obvious restraints posed by the limited budgets of these State officials, some clearly meritorious suits will have to be foregone in the interests of sound fiscal

Footnotes at end of article.

policy. For all these reasons the public action is needed to expand the role of the State attorneys general beyond that permitted by the parens patriae statute and to mesh their efforts with private initiative.

In addition to the parens patriae legislation, the Antitrust Procedures and Penalty Act was passed in 1974. It could be argued that, at least in the antitrust area, the Act is a potent deterrent and there is no need for the public action. However, the provisions of this statute allowing fines are inadequate to deter illegal conduct where the potential profit is great. As Attorney General Chauncey Browning of West Virginia, President of the National Association of Attorneys General, has noted, corporate antitrust conspirators:

"may be fined $1,000,000 on an $18 million conspiracy. They may serve 10 or 30 days in jail on . . . a $100 million conspiracy [like] the tetracycline case. I suspect that those corporate conspirators would be happy to trade a $1,000 fine, or a million dollar fine, for a $100 million price-fixing profit. The other $99 million they can stick in their pocket." [58]

In the two-year period after the Act's passage, fines imposed against 294 entities amounted to nearly $7 million, an average of just over $23,000 each. Forty-one corporate defendants have been sentenced in felony cases to date with total fines of approximately $5.5 million, an average of $35,000.[59] These numbers should be compared to the estimated *annual* injury from consumer fraud and price fixing *alone* of $171 billion.

3. Reliance on Private Initiative Rather Than Bureaucracy

All the impediments to deterrent policy plus the insufficiency of recent federal statutes, make it highly unlikely that adequate deterrence or prevention of unjust enrichment are being achieved in the mass small injury context. However, it might be argued that, rather than replace maladroit compensatory procedures, enforcement bureaucracies should be expanded to pursue civil enforcement of the laws where prevention of unjust enrichment and deterrence are the primary goals. This argument, which has been made long and often, has not been accepted for two reasons: (1) the amount of bureaucratic expansion required by the federal or state governments necessary to achieve these goals effectively is unacceptable; and (2) enforcement by meshing private and agency initiative under proper procedures is more efficient and effective.

In contemplating the amount of agency expansion required for expanded bureaucratic enforcement, it should be noted that the current budgets of the Federal Trade Commission, the Securities and Exchange Commission, and the Department of Justice Antitrust Division collectively are approximately 1/1000 of the estimated consumer fraud and antitrust injury noted above; [60] and, of course, these budgets are not entirely enforcement oriented. Willard Mueller, former director of the FTC Bureau of Economics, argued as early as 1970 that antitrust enforcement funding levels are so insufficient that "antitrust policy has never been given a fair test." [61] Another commentator has characterized the Antitrust division's budget as "absurdly low" and suggested that proper enforcement would require a budget nearly four times larger.[62]

Although the public action does require expenditure of public resources because a privately initiated action must be assumed or supervised by the United States or by a State, the public action will not require enormous expansion of agency budgets because of its reliance on private initiative. In fact, implementation of the procedure may result in a substantial net gain to the Treasury,[63] a gain that can be used to better implement the public action and expand deterence.

Even if purely public civil enforcement were financially feasible, it still would not be desirable. As the Senate Judiciary Committee has recently noted in the context of antitrust enforcement "[m]any legal commentators . . . believe that private enforcement of the antitrust laws has been more innovative and effective than federal enforcement." [64]

Because of the possibility of the client achieving substantial recoveries [65] and counsel a significant, but fair fee,[66] private citizens are encouraged to undertake vigorous and innovative enforcement. Such enforcement is pursued by the injured, who are those most likely to detect violations. Augmentation of the client's incentive to report violations in the small claim context [67] harnesses a great enforcement potential while preserving public oversight to assure adequate deterrence and small claim compensation.

Thus, the public action procedure, described below, has been designed because (1) compensation oriented procedures have been ineffective in preventing unjust enrichment or in deterring illegal conduct in the small claim context; (2) recent federal legislation does not sufficiently achieve those goals; and (3) the meshing of private initiative and public enforcement is more desirable than the expanding of the federal bureaucracy to pursue those ends.

*B. Prerequisites*

The public action is not a "class action." Rather it is a procedure for litigating a single collective claim in the name of the United States.[68] At least 200 persons must be alleged to have been injured not exceeding $300 each; the combined total of all injuries must be at least $60,000, and the injuries must arise out of the same transaction or occurrence with the action containing at least one substantial question of law or fact common to all injured persons.[69] The factual basis for pleading these prerequisites must be shown with specificity in the complaint.[70]

The same "transaction or occurrence" and "common question" tests in the proposed statute are similar to those found elsewhere in the federal rules.[71] The only modification in the common question language is the requirement that the question be "substantial." [72] This emphasizes that a common question must be more than incidental or peripheral.

The proposed statute does not carry forward the requirement in Rule 23(b)(3) that the common issues "predominate" over all other issues. Courts which have attempted to articulate a practical test of predominance have failed.[73] Indeed, if applied literally predominance would prevent all Rule 23(b)(3) damage actions because, by their nature, these actions aways involve many different impact and damage issues, while at the same time displaying some issues capable of combined treatment.[74] A literal application of predominance could completely insulate violators from liability. As one court put it:

"On one hand, the defendants [contend] that individual proof of damages at trial would require so much time and create such complexities for the parties, the court and jury, that the action would be unmanageable. On the other hand, they [contend] that any other method of proving this issue at trial would substantially prejudice them and violate their rights to a jury trial and due process." [75]

Furthermore, literal predominance rewards costly legal research and discovery by the defense to unearth as many uncommon issues as possible and shifts the litigation focus from potentially important common violation issues.[76]

Because of these difficulties, the courts have discarded literal predominance and have used the test to determine pragmatically whether there is a significant common issue [77] and to force counsel to articulate their theories of recovery early in the lawsuit.[78] Both of these are useful endeavors and they are retained in the proposed statute by the same transaction and substantial common question formulas, as well as other provisions in the bill.

The proposed bill mandates, after a preliminary hearing and limited discovery, the entry of an early scope-of-action order including a description of the transaction and the substantial common question (or questions). This procedure is aided by the factual pleading-with-particularity requirement of section 3001(d). In the unlikely event, given several provisions in the bill,[79] that management of damage calculation may prove difficult, then separate trials, or even separate actions, can be had under section 3028(b). Skillful use of these techniques would assure that at least common issues can be tried together with resulting economies.

A number of requirements in Rule 23(b)(3) which have also proved troublesome and unproductive in compensatory class actions are eliminated or modified. For example:

The impracticability of joinder test contained in Rule 23(a) is replaced by the requirement of a specific minimum number of injured persons (200).

The requirement that the claim of the class representative be typical of the claims of the class is deleted because it has tended to be a duplicative standing test.[80]

Certification and prejudgment notice requirements are omitted and other means provided to assure that injured persons' interests are adequately represented as noted below.[81]

The method-superiority test, which has been given no form under existing law, is eliminated.[82]

Proof of individual damages as an element of liability is deleted and other means for establishing damages are provided.[83]

*C. Preliminary hearing*

The bill requires that a preliminary hearing be held within 120 days of the filing of the complaint.[84] In order for the action to continue thereafter the court must determine at or immediately following the hearing that all of the prerequisites are met and that there are "sufficiently serious questions going to the merits to make them fair grounds for litigation."

This early evaluation provides needed defendant protection from the costs of extensive and unnecessary discovery (and motion practice) in cases not presenting serious issues. It provides realtors and the United States with an early, tentative judicial determination on the merits so they are better able to assess the wisdom of pursuing the action. Also given the present potential for over-discovery and undue motion practice by both sides, the preliminary hearing requires the court to take firm control of the action at the first opportunity.[85]

The "serious-question" merits language forms a portion of a preliminary injunction test employed in the Second Circuit.[86] This test is considered not as demanding as the "reasonable likelihood of success" on the merits standard.[87] It is sufficient that " 'vast and intricate problems of fact and law [are involved] . . . which cannot be fairly resolved short of . . . a trial . . ." [88] The "serious-questions" test can be met with limited discovery.[89] The idea of a preliminary look at the worthiness of a lawsuit has wide support.[90]

In conformance with his regulations, at or prior to the preliminary hearing, the Attorney General of the United States may (a) assume the action; (b) decline to enter an appearance and allow the relator to conduct

Footnotes at end of article.

the action [91]; (c) refer the matter to a State attorney general who may assume or make a showing that the action is not in the public interest [92]; or (d) recommend that a public action be dismissed if it is not found to serve the public interest.[93] If there has been assumption, the relator attorney may continue to participate in the action at the attorney general's option.[94]

It is anticipated that where a statute covers a substantive area which is the concern of a federal agency with its own litigation authority, the Department of Justice, pursuant to the regulations provided for in section 3002 (b), will either cede control of the assumption and litigation decisions to that agency or seek their cooperation in making these decisions.

As the ability to make a public interest showing is vested in the federal and State attorneys general, the court cannot dismiss a public action as contrary to the "public interest" if such attorney general has not made a specific recommendation. However, such a recommendation requires a dismissal, unless the relator can convince the court that the action is in the public interest.

Prior to dismissal for failure to satisfy the public action prerequisites, the court must allow amendment of the complaint if the action would otherwise meet the prerequisites of the class compensatory action as set out in section 3011(a).[95]

If there is no dismissal at the preliminary hearing, the court must enter a conditional order describing the scope of possible injury, including a description of the transaction and the substantial question of law or fact common to all injured persons. This conditional order serves to define, early in the action, the parameters of the lawsuit for both the parties and for the court. It also provides the defendant with a tentative insight into the probable scope of liability and the breadth of potential res judicata. The court is also empowered to establish litigation timetables, including schedules for discovery, to govern the subsequent course of the action.[96]

*D. Discovery*

Both plaintiffs and defendants have the opportunity for limited discovery prior to the preliminary hearing, including ten depositions per side, interrogatories to identify documents and locate persons to be deposed, and document production.[97] The limits on numbers of depositions and the types of interrogatories permitted prior to the preliminary hearing can be modified upon leave of the court for good cause shown.

There is an explicit prohibition—both before and after the preliminary hearing—on discovery of unnamed injured persons without leave of court after a showing that there is a "substantial need of the materials" and that there is an inability "without undue hardship to obtain the substantial equivalent of the material by other means."[98] The latter exception, borrowed from precedent applicable to discovery of work product,[99] is designed to be a narrow one.

Under current law [100] there is an incentive for defendants to request discovery of absent class members to winnow-down the class, to exclude by means of discovery sanctions those who do not respond, and to circumvent the normal "opt-out" mechanisms of the class action.[101] Of course there is no class as such to reduce in the public action and individual proof of claim is not required before judgment.[102] However, there is still the danger that a litigant may use this discovery to harass or to delay.

*E. Adequacy of representation*

Prejudgment notice of any sort to injured persons is not required. While the public eliminates the expense of the notice and opt-out procedures now available under Rule 23(b)(3), it provides at the same time for a more effective means to assure that interests of injured persons are adequately represented.

An early requirement of notice delays the action and undermines swiftness of judgment and deterrent impact. Furthermore, when small, widely spread claims are at stake, notice does very little to protect the interests of absent class members. On the one hand, if notice is attempted, courts and counsel are lured into believing representation of those interests has been assured. On the other hand, the expense of notice creates a significant roadblock to advancing the interests of injured persons and indeed encourages those interests to be ignored in favor of an early settlement benefiting only the named class representatives and plaintiff counsel.[103] The public action represents a marked advance in representation of the interests of injured persons in small claim cases. For the first time, those suffering a small injury would in fact, rather than in theory, have a "day in court", with the United States as their legal representative.

Some of the several facets of the bill that would advance adequacy of representation are:

The United States may bring or assume control of these actions or maintain oversight of a settlement or withdrawal executed by a relator.

The court is required to make inquiry as to the legal competence of the relator's counsel, guided by statutory criteria,[104] when assumption has not occurred.

The relator attorney's compensation is regulated to avoid conflicts of interest between the attorney and the injured [105]; these conflicts may have caused the interests of injured persons to suffer in the past.[106]

An incentive fee of up to $10,000 is paid to a relator [107] who initiates an action that is ultimately successful, thus encouraging closer relator cooperation and supervision of the litigation.

While the public action eliminates the necessity of notice to injured persons prior to the preliminary hearing, it specifies that the claims of those whose injuries do not exceed $300 will be foreclosed by any final judgment on the merits.[108] If the final judgment results in a recovery by the United States, a public recovery fund is created. Persons injured will then be given notice and the right to receive compensation for their injuries from the United States.[109] Care has been taken to assure that the compensatory interests of the injured are adequately represented by the United States during the public action, in order that the foreclosure of claims is fair.

Recently there has been considerable scholarly discussion of whether judgment in a class action may, consistent with the due process clause of the Fifth Amendment, bind the members of a class absent some form of notification to them of the pending action. Every United States Court of Appeals which has considered the question has ruled that the due process clause does not require that notice be given to class members in all cases. An analysis of these opinions has been prepared by the Department of Justice Office of Legal Counsel which strongly supports the view that more effective means than notice of the pending action exist to achieve adequacy of representation and compensation.[110]

*F. Incentive fee*

Section 3005(a) provides a direct monetary incentive for injured persons to detect and report violations of federal law. A major purpose of Subchapter A is to make the incentive not run only to attorneys—now often the only beneficiaries of class settlements.[111] A modest increase is made in the incentive for injured persons, those best able to detect violations who otherwise stand to gain only a maximum of $300. An active, informed citizenry is the best means to assure that there is widespread compliance with the law without the creation of a massive new bureaucracy.[112]

Under present law persons with small injuries have little incentive to become a named plaintiff in a Rule 23(b)(3) damage action. Nor do they possess any significant incentive to control or contribute to the litigation on their behalf.[113] The plaintiff attorney who stands to win a large fee becomes something more than a representative of their interests: counsel must also represent himself, which presents an inherent conflict.[114]

Under section 3005(a) if the United States prevails in a public action brought by a relator, the defendant shall pay to the relator taxable costs, reasonable expenses (including attorney's fees where otherwise authorized by law), and an incentive fee equal to 20 percent of the first $25,000 of public recovery plus 10 percent of the next $50,000 of public recovery. The maximum incentive fee is $10,000 [115] and is not to be paid to the relator's attorney, either directly or indirectly.

*G. Calculation of public recovery*

Under section 3006 the United States or the relator may seek to recover a judgment for an amount equal to the value of the benefit or profit accruing to the defendant as a consequence of a violation of Federal law; or one or the other may seek the combined value of all damages found to have been inflicted on persons individually injured not in excess of $300 each. The court may provide injunctive relief if there has been a monetary judgment.

Both these standards advance the primary purposes of the public action—deterrence and prevention of unjust enrichment. The most expeditious mode of recovery calculation can be selected by the court.[116] In this selection the court may also wish to consult the dictates of the underlying substantive law.[117] If the damage test is selected by the court as the appropriate measure of recovery, "separate proof of individual damage shall not be required." [118] This does not foreclose court-regulated sampling of injured persons in order to measure the combined damages.

The recovery is owed to the United States, not to the injured persons upon whose claims it may be calculated. Such persons, however, will be entitled to compensation from the United States under section 3007 in any action in which the United States prevails. The amount of the United States' recovery would be increased by any multiple provided for in the underlying statute.[119]

As to the Constitutional issue whether the United States can retain damages unclaimed by the injured under section 3007(a), the Congress has recently addressed the matter and approved a similar procedure in the Hart-Scott-Rodino Act of 1976.[120]

*H. Claims administration*

Section 3007 removes the burden of administering the public recovery from the district court and places it in the Administrative Office of the United States Courts. That Office would administer the new Public Recovery Fund and supervise notice to injured persons following a judgment. Notice of the recovery can be made in any manner reasonably "likely to inform" persons eligible for compensation and shall be financed out of the fund.

Those who have injuries of $300 or under file claims with the fund, or receive without filing a claim a distribution based on business or other similar records if these records permit "reasonably accurate" claim calculation. When individual claim forms are required, it is anticipated that the forms will provide a simple and inexpensive means of payment. The Director must pay all claims thought valid within a reasonable time.[121] Claims under $15 will not be reimbursed

Footnotes at end of article.

because the cost of paying and administering claims of that size is likely to exceed the value of the claim.

The Director may pay claims exceeding $300 arising from the same transaction or occurrence from the judgment or settlement funds remaining after all smaller claims are paid. Those receiving such compensation must execute a release of any right to bring a civil action under any Act of Congress based on the same transaction.

*I. Involvement of State attorneys general*

Section 3002(b)(3) allows the Attorney General of the United States to refer a public action to a State attorney general, pursuant to regulations established by the Department of Justice. The State attorney general must be found to have the capacity to adequately represent the United States' interests and "a substantial number of persons alleged to be injured" must reside in the State.

State participation provides a decentralized means of regionally addressing injury covered by the public action. Only a relatively small percentage of "national" public actions will be assumed by the Attorney General of the United States.[122] "Regional" violations can best be handled by State attorneys general in the affected area. As Assistant Attorney General John Shenefield recently pointed out:

"[I]direct impact on the lives and pocketbooks and the citizens of local conspiracies in any particular State are probably as much of a problem as nationwide conspiracies. We frequently uncover violations involving a few communities and a few million dollars of commerce annnually. Such businesses as dairies, bakeries, building contractors, retail women's stores, and others have been subject to prosecutions for engaging in local conspiracies that may be small by national standards, but dig deeply into the pockets of local residents. . . .

"The unfortunate truth is that this kind of conduct is still far too prevalent in our society—and may be hardest of all for the federal government to prosecute when it occurs on a local basis, away from national scrutiny.

"[M]assive expansion [of enforcement] at the federal level [should not continue]. Where problems can be handled locally they should be." [123]

Under section 3030(d), nothing in Chapter 176 is to affect the right of a State attorney general to bring a Hart-Scott-Rodino parens patriae action, save application of the normal rules of estoppel.

*J. Impact of public action on U.S. resources*

Public actions assumed by the Attorney General of the United States will be conducted by officers of the Department of Justice, or litigated by the relator under close United States supervision. The Department of Justice commissioned a study by Arthur Young and Company, which is available on request, to determine the impact of this proposed statute on the Department's work load. Under the most plausible assumptions it projects that, when the full force of the bill is felt, approximately 22 cases would be assumed annually, requiring 46 attorneys and $3.1 in new resources. The United States may recoup much of this expense from recoveries unclaimed by the injured. In two recent cases alone, the amount of unclaimed damages totaled $6,678,426.[124]

III. CLASS COMPENSATORY ACTION

When individual injury is more substantial, private compensation becomes the paramount concern. Subchapter B establishes (1) prerequisites for the class compensatory procedure; (2) early judicial review of the action before major judicial and litigant resources are committed; and (3) better management of damage calculation.

*A. Prerequisites*

Under Subchapter B, the class compensatory action is available where federal statutes create any civil private right of action for damages. Its application to federal statutes is thus considerably broader than that of the public action.[125] The action is designed to be the exclusive collective damage remedy for violation of federal statute.[126] For a compensatory action to arise, at least 40 persons named or unnamed must suffer injury exceeding $300 or be alleged to be liable for damages exceeding $300. As in the public action,[127] each injury must: (1) arise out of the same transaction or occurrence, or series of transactions or occurrences; and (2) present a substantial question of law or fact common to the class. There must also be a representative party who, with counsel, adequately represents the class interests.[128]

As in the public action, the bill substitutes a class size requirement for the impracticability of joinder test of Rule 23(a) to avoid unnecessary litigation. Other unnecessary prerequisite complexity is also reduced substantially and the common transaction and adequacy of representation aspects of private initiated, collective relief are emphasized.[129]

*B. Preliminary hearing*

Section 3013 sets out a preliminary hearing procedure also similar to that in the public action.[130] After the same limited discovery the court must determine that the class representative has shown that the prerequisites have been met and that there are "sufficiently serious questions going to the merits to make them fair grounds for litigation." If an action does not fulfill the compensatory action prerequisites, but would otherwise meet the requirements of a public action, the plaintiff shall have leave to amend the complaint.[131]

Failure of an injured person to respond to discovery—prior to or following the preliminary hearing—may not be grounds for excluding him from the class.[132]

*C. Adequacy of representation*

If the action continues following the preliminary hearing, the court must direct notice "reasonably necessary to assure adequacy of representation" and "fairness" to all persons included in the class.[133] Since individual amounts in controversy are substantially greater in compensatory actions, individual notice may sometimes be justified despite its additional complexity and cost. The revised standard for notice supersedes the present language of Rule 23(c)(2).[134]

A person so apprised may be required either to opt out or into the action by notifying the court of his preference.[135] Before imposing an opt-out or opt-in requirement the court must determine the likelihood that the size or kind of individual interests held by such persons would make it "feasible for them to pursue their interests separately," and whether the persons are likely to have the business sophistication and resources to conduct their own litigation.[136] This determination is discretionary with the trial court in each case.

Only individuals with large stakes, in the neighborhood of $10,000, or unusual claims or defenses, should be required to opt-in. These persons should be accorded greater protection from inadequate representation than an opt-out procedure provides. The larger or more unique the interest the greater the impetus to pursue a separate, more adequate remedy and perhaps a different litigation course. Such persons are also more likely to consult counsel and to reach a more fully informed decision than those with smaller claims.

*D. Amount of class recovery*

Section 3014 takes a large step toward making present Rule 23(b)(3) compensatory actions triable and settles current-procedural disputes as to the management of damage calculation.[137] The amount of actual damages to each person may be "proven by any method permitted or required by law." Damages often cannot be proven expeditiously if the court finds that each class member's proof of damage must be made at trial [138] for reasons of statutory or constitutional policy. If this is so, the court is mandated to take three steps.

First, if it does not impair the Constitutional rights of any party,[139] the court shall try liability issues separately from actual damage issues. Second, if liability is found, the defendant is required to identify from his business records, or any other reasonably available source, persons likely to have been injured and the extent of their injury. Third, individual notice is to be sent to these persons. Additional notice shall be sent to those who are likely to have been injured, but have not been identified from the business records or similar sources.[140] All these steps are to be undertaken at defendant's expense.

IV. MANAGEMENT OF PUBLIC AND CLASS COMPENSATORY ACTIONS

*A. Management of concurrent actions*

Public and class compensatory actions are complementary procedures rather than mutually-exclusive choices, and not infrequently the overlapping statutory coverages of sections 3001(a) and 3011(a) will mean that both will be brought simultaneously.

Where overlapping or multiple claims are brought separately in different districts, and by separate relators or representative parties, section 3021 provides notwithstanding present law [141] for mandatory transfer to and consolidation in any district court of all public and class compensatory actions arising out of the same transaction or occurrence, to the extent "feasible." Unlike the temporary transfer procedures for pretrial now available in multidistrict litigation under section 1407 of title 28, transfer and consolidation under section 3021 is of the entire action and is permanent. Mandatory notice to the judicial panel on multidistrict litigation of the filing of public and class compensatory actions is required, as well as notice of a "civil action that the court believes could be consolidated with a public action or a class compensatory action."

Also, where public and class compensatory actions are not brought simultaneously a public action cannot be dismissed at the preliminary hearing for failure to meet the prerequisites of that action if it meets the prerequisites of the compensatory action unless the plaintiff has had leave to amend the complaint. This procedure also applies to the dismissal of a compensatory action.[142]

If simultaneous pursuit of a public and a class compensatory action is desirable, a person may seek alternative forms of relief under Rule 8(a), Fed. R. Civ. P., by initiating a public action as relator on behalf of the United States while simultaneously seeking class compensatory relief as a representative party. These alternative claims may be present in the original pleading, or may appear later by amendment, when injury estimates become better defined.[143] The preliminary discovery authorized by sections 3003 and 3012 provides a means to reconcile possibly discrepant injury claims between the actions. In its order describing the scope of each action following the preliminary hearing, the court may direct appropriate changes in the alignment of relators or representative parties to avoid inconsistent findings in the two actions.

After the preliminary hearing the court may prescribe schedules to govern discovery, and simultaneous or coordinated proceedings following that discovery. It may in its preliminary order describing the scope of

Footnotes at end of article.

each action provide for consolidated or coordinated trial of each. Although multiple and overlapping actions are required to be consolidated in a single district, there is no requirement that they be tried in a single proceeding.

Section 3028(b) authorizes the district court to order that either a public or class compensatory action be divided into two or more separate actions as may be required in the interest of case management, provided that each of the resulting action continues to meet the prerequisites of section 3001(a) or 3011(a).

A person who claims injury not exceeding $300 may not intervene in a public action, whether or not it overlaps a class compensatory action. That person's compensatory interests are preserved by the subsequent right of compensation from the United States in any action where the United States prevails and intervention would not, in any event, be likely in view of the relatively small size of such individual claims.

A person who claims injury exceeding $300 may either claim compensation under section 3007(f)—and waive further rights of federal action—or pursue any other remedy available.

Judgment on the merits in a public action is conclusive against the defendant against whom the judgment was entered; the United States, any person injured not exceeding $300; and any other person who has received or been denied payment under section 3007(f) regardless of the size of their claim. Otherwise, the judgment will not impair or impede the interests of persons with claims exceeding $300 who retain the right of individual or class compensatory relief. Consequently they will seldom be entitled to intervention of right in the public action. The court may, however, allow permissive intervention, based upon a common question of law or fact between such persons' compensatory claims and those of the United States in the public action.[144]

A judgment on the merits in a class compensatory action is conclusive against the defendant for whom or against whom the judgment was entered, and any injured person who remained in or entered the action pursuant to section 3013(e).

*B. Adequacy of representation*

The key to effective handling of complex actions is responsible counsel and judicial management. The adequacy of counsel's performance has not received sufficient attention under present law. Although federal courts have had to confront the question of adequacy of representation on a regular basis, the doctrine which has developed under Rule 23 "hardly extends beyond an often empty requirement that . . . attorneys be competent and an unfocused hostility to classes whose members are in disagreement or in different situations." [145] This inquiry normally focuses on subclassing and intervention to cure conflicts.[146] It does not necessarily examine the attorney's past class or complex litigation performance.

The primary focus of section 3022 is on counsel, rather than on the named parties, for counsel is the officer of the court and, as Professor Dam has pointed out, there is normally no real client supervision in a class action.[147]

In a public action by relation or in a class compensatory action, section 3022(a) requires that the court consider the training, experience, and past performance of counsel in past public or class compensatory actions or other complex litigation. This section should be read in conjunction with the public interest representations permitted attorneys general under sections 3002(b)(3)(c) and 3002(b)(4).

The court must also examine the extent to which the representative party in a class compensatory action has interests common to those of the class or any fundamental interests antagonistic to those of the class.

Initially the court is to make these adequacy of representation determinations on its own motion without the benefit of oral or written argument or motion by the parties.[148] Affidavits [149] requested by the court are to be filed. Thereafter, the court may request the parties to brief or argue particular issues. This approach gives absolute judicial control over an essential [150] policy evaluation. It also curbs harassing motion practice [151], and moots the question of whether denials of disqualification motions are appealable.[152]

*C. Aids to judicial management*

1. Litigation Timetables

Section 3024 requires the use of litigation timetables in both public and compensatory actions. Suggested timetables must be submitted by the parties within 10 days of the preliminary hearing determination. By this point the parties' sense of the time requirements of the action should be accurate. After considering the suggestions, the court shall promulgate a timetable within 30 days which may be amended thereafter.

2. Expediting Judicial Rulings

Section 3025 provides that the Judicial Council of each circuit shall prescribe guidelines pertinent to judicial rulings or opinions pending beyond a reasonable time. Under the proposed statute the clerk of the court shall within 10 days notify the Judicial Council of the appropriate circuit of any rulings or motions pending longer than Council guidelines. The circuit executive must inquire as to the causes for delay and report the response "promptly" to the Council. The Council is to expedite these filings using any resource available.

Unfortunately, little empirical data exist to define the extent by which class damage motions and opinions are delayed.[153] However, lawyers frequently noted during the consultation that it was not uncommon for the court to postpone rulings and orders in the hope that settlement would make the expenditure of judge time unnecessary. Judicial officers hostile to the class action will tend to delay class certification determinations.[154]

Expeditious rulings, especially during the pretrial period, are essential to the efficient and fair conduct of litigation. "Failure by the judge to so [rule], leads to disappointment, confusion, inordinate delay, and injustice." [155] The preliminary hearing determination is of particular importance in the proposed statute as is made clear by the Manual for Complex Litigation:

"[I]f the determination whether the action proceeds as a class action is delayed, serious injustices may result, and avoidable procedural difficulties of great magnitude may ensue . . . [For example,] [i]f discovery proceeds in the action while the class action request remains undetermined, and the court later determines that the action may be so maintained, the discovery may be unusable because of the absence of parties and absence of representation of the members of the class." [156]

*D. Settlement*

Section 3026 expands the present Rule 23 (e) settlement requirements as they apply to the compensatory or public actions.[157] It explicitly requires that, if settlement is reached prior to the entry of the preliminary hearing pretrial order, the court shall assure that the judgment entered after settlement describes both the common transaction or occurrence out of which the action arose and the scope of the action. It also requires that parties favoring settlement demonstrate the fairness of settlement.

Recent empirical studies demonstrate that present class settlements are often not adequately supervised by the court: "[a] factor in the poor level of success of plaintiff antitrust complaints . . . has been the willingness of plaintiff attorneys to enter, and courts to approve, settlements that benefit the attorneys rather more than the class or the public." [158] A recent study of security actions in the Northern Distrrict of Texas shows that many settlements result in no recorded judgment and may be used to leverage an attorney fee or recovery for class representatives alone. If there is a recorded judgment, the order often is uninformative.[159]

The plaintiff attorney can be too willing to accord the defendant a broad class definition (and broad *res judicata* protection) as an incentive for early settlement benefitting the named representative and the attorney. The court should assure that settlement proceedings do not unfairly prejudice the interests of absentee class members.[160]

Section 3026(a) does not require class certification prior to settlement in a compensatory action. However, it does recognize some of the valid objections to the practice of forming tentative settlement classes which may not represent all interests.[161]

Before any settlement is approved in a compensatory action, the court must first determine the likely scope of the action based on such settlement discovery as it may order or which the parties have undertaken. At the settlement hearing the court should encourage representation of diverse interests. It is not appropriate that the court merely present the settlement to the class and give them an opt-out or opt-in privilege alone.[162] Parties dissatisfied should be encouraged to participate in the settlement hearing. This procedure addresses the major concern of those opposed to tentative settlement classes,[163] without requiring prior formal certification.

Similar steps to assure fairness are to be taken in the public action settlements. Any public action settlement must have the approval of the United States.

*E. Attorney's fees*

Section 3027 provides a framework for calculating attorney's fees awarded in public and class compensatory actions. Under existing law, [164] calculation of attorney's fees has been the source of considerable litigation: [165]

"Given the frequency with which the courts are confronted with the task of fee setting and the impact it has upon the allocation of legal resources, one would expect a general consensus to have emerged on the manner in which reasonable attorneys' fees should be determined. On the contrary, there are nearly as many approaches as there are judges. The Supreme Court has never addressed the question, and many of the courts of appeals have left the matter substantially to the discretion of the district court. As a result, many lower courts have confronted the problem with little or no analysis; those courts that have been more analytical have adopted widely varying approaches. To a great extent, the outcome of these cases depended upon 'the throw of the dice'—from court to court and from case to case." [166]

Of particular concern is the possibly arbitrary use of such factors as "contingent nature of success" or "quality of attorney's work" to multiply awards based on hourly charges. " 'The widespread adoption of [the hours and risk factor award method] has not meant insurance against abuses of the class action.' " [167]

Under section 3027(a) attorney's fees awarded in a public or class compensatory action must be based solely upon the nonduplicative time found to have been "reasonably spent" on the action by the attorney.[168] The court must encourage attorneys to use less-expensive administrative personnel by allocating hours to them—instead of to attorneys—if this personnel could reasonably have performed the task.

Footnotes at end of article.

Subsection (b) directs the court to value the hours reasonably expended at an "hourly rate most commonly billed by the attorney for similar services at that time such services were provided." If counsel does not normally conduct hourly billing, the court shall examine the fair market value of the hours based on rates charged by others. Time of administrative personnel must be valued at market value, rather than at cost. A cost-based formula would encourage law firms to use attorneys rather than administrative personnel against the interests of efficient low-cost adjudication.[169]

Subsection 3027(c) authorizes the court to measure the amount of attorney's fees awarded by multiplying the hourly rate determined under subsection (b) by factors which reflect the varying risk of committing possibly uncompensated time at each stage of litigation.[170] The result is not to be further altered by any allowance for the perceived quality and ability of counsel, since these factors are reflected in the hourly billing rate itself.[171] The total compensation achieved shall not exceed a reasonable portion of the recovery.[172]

The premise underlying these risk multiples is that the degree of risk varies directly with the relative uncertainty of success at each major stage of the lawsuit. Section 3027 (c) sets out a range within which the court may apply a risk multiple to counsel's fee. Lower risk factors would be applied to a case which carried a high likelihood of success or in which counsel relied to a "substantial extent" on the products of prior litigation. Higher risk multiples would reward attorneys who brought more risky meritorious lawsuits or who had not relied on products of a prior proceeding. Also, in actions where there had been no substantial reliance on a prior litigation, section 3027(c) allows a higher risk factor range before the preliminary hearing because assessment of uncertainty is more difficult and risk higher due to lack of information.

Minimum and maximum risk multiples are specified to prevent arbitrary swings in risk factor application and to guard against creating "an uneasy tension between the attorneys' duty to press their clients interests vigorously . . . and the fear that . . . they may literally pay the price at the close of the lawsuit." [173] Or more generally, attorney ardor can be cooled if it is known that a particular district is hostile to class damage actions,[174] and manifests this hostility by employing abnormally low risk factors.

Subsection (e) "addresses an important current question" [175] by mandating that total compensation paid counsel for a litigation can be no greater than authorized by section 3027. In view of the generous risk multiples authorized, there is no justification for an attorney to receive a private percentage-of-recovery contingency compensation greater than the fee award to his client. There is even less justification for an attorney to receive such compensation in addition to the fee award, if, by arrangement, the fee award is passed to an attorney by the client.

*F. Miscellaneous provisions*

Section 3028 makes it clear that all the management options available to the courts under the Federal Rules of Civil Procedure apply in a public or class compensatory action. Because it is of special importance, the trial court is given the explicit authority to order separate trials of liability and damage issues to expedite the proceedings.

Section 3029 would assure that the $300 injury line between the public and class compensatory actions, as well as dollar amounts pertinent to the incentive fee, and to the payment of exceptionally small claims under the public action, will be adjusted periodically to reflect the economic realities of inflation and deflation.

Sections 3030(b) and 3030(e) harmonize the application of the proposed statute with specialized class damage provisions in other statutes, *e.g.*, the Magnuson-Moss-Warranty—Federal Trade Commishsion Improvement Act, 15 U.S.C. § 2310(d)(3)(c) and (b) and the Fair Labor Standards Act, 29 U.S.C. 216(b).[176]

Subsection 3030(c) assures that certain limitations on aggregate liability contained in recent enactments will be maintained in the public and class compensatory actions. Subsection (d) preserves the parens patriae actions authorized by the Hart-Scott-Rodino Antitrust Improvements Act of 1976 as they apply to public and class compensatory action procedures. However, special management provisions concerning preliminary hearings, calculation of damages in the compensatory actions, transfer and consolidation, effect of judgments, litigation timetables, expediting of judicial rulings, settlement, attorney's fee awards, and separate trial of issues in public and compensatory actions will apply to the extent not inconsistent with that Act.

Section 4 of the bill establishes a uniform federal procedure for the appeal of orders of the district courts which either permit or refuse to permit actions to go forward as public or class compensatory suits pursuant to sections 3004(c) and 3013(c). Either party may petition the circuit for leave to appeal within 20 days of the entry of the preliminary hearing order. In so doing the bill responds to the recent invitation by the Supreme Court [177] to seek special appeal procedures where it is likely that a denial of public or class compensatory action status will end litigation of possible meritorious underlying claims.[178] An order allowing an action to continue under section 3004(c) or 3013(c) significantly increases the defendant's litigation burden and adds substantially to the costs of litigation, the risks of potential classwide liability, and the pressures for an early settlement on terms favorable to the relator or class representative. Its impact on the class opponent is fully as heavy as a denial would be on the class, or the United States in a public action. In view of these major consequences, it is appropriate to allow either party an early appellate test of this limited, but important, issue under expedited and discretionary procedures.

Mr. KENNEDY. Mr. President, there is widespread agreement among lawyers and judges, consumers and business people, that better procedures are required to alleviate the critical problem which have been encountered in the litigation of class damage actions. This comprehensive bill, developed after a year of intensive inquiry by the Department of Justice, will begin the debate on revision of one of our most important procedural rules. The application of rule 23(b)(3) of the Federal Rules of Civil Procedure has profound implication for effective consumer and small-business redress in areas that have held my interest for a number of years—antitrust, civil rights, and consumer rights, to name a few.

The introduction of this bill is significant because it marks the beginning of a comprehensive congressional inquiry into how present damage procedures, all too often, fail to function. My mind is still open on specific details of the bill pending hearings, but I commend the Department of Justice for a useful beginning toward passage of legislation in the 96th Congress.

This bill recognizes that the "consumer" class action—the mass, small-claim action—needs to be analyzed separately from other class actions. Until we learn to manage the mass, small-claim class action, we will in all likelihood continue to see courts erode by narrow construction substantive rights simply because the courts perceive these lawsuits as burdensome and inconvenient. The present debate over the ability of indirect purchasers to sue under the antitrust laws is an excellent example of the unacceptable and pernicious side-effects that the failure to manage the consumer class action has had.

It is easy to sympathize with the courts' motivation for limiting class actions, but in a larger sense this course appears misguided. Although class actions are more complex and time consuming than the average civil case, they can also be a most efficient way of disposing of controversies. In one proceeding—however lengthy and time consuming it may be—a judge can adjudicate the rights of thousands of persons. The class action also makes the courts accessible to those who simply could not pursue their claims individually. A defendant who has the cunning to harm a large number of people, only a small amount each should not get off the hook because of the complexities of class action lawsuits.

To achieve effective management we must look to the present application of contradictory and overly complex legal doctrines to the class damage action—doctrines which are unrelated to the efficiency-of-adjudication rationale for this procedure. In fact, they create enormous litigation inefficiencies, to the advantage to the party with the most resources, not the best case. Because of the expensive motion and discovery practices created, the litigants become emeshed in a duel of dollars until one decides the costs are too great to continue the battle.

The overwhelming advantage present class procedures give to the deep-pocket litigant undermines the procedure's role in equalizing the power of the consumer and the small businessman to deal in our courts with large public and private institutions.

The sad fact is that today small companies and private citizens are Davids without slingshots, competing against corporate and governmental Goliaths in wars of attrition which have become increasingly difficult to win.

With delaying tactics, huge legal costs, and complex litigation, large companies can effectively force small adversaries to forego any effort to vindicate their rights in court. It may be as simple as outspending smaller opponents. As Warren Avis has wisely pointed out, "small may very well be better—but not in the courts. We have reached a point in this country where, in many instances, power has become more important than justice—not the matter of who is right, but of who has the most money, time, and the largest battery of lawyers to drag a case through the courts."

Rather than face extended delays and enormous costs, the small litigants are likely under present class damage procedures to hoist the white flag of unconditional surrender, or settle a claim for much less than they are otherwise entitled. We must find ways to reduce the burdens and delays associated with class litigation—which inevitably work the greatest hardship on promising individuals and small business. The introduction of this bill assures full consideration of these issues this Congress and next.

---

By Mr. MATSUNAGA:

S. 3476. A bill to amend the Internal Revenue Code of 1954 to provide the same treatment, with respect to determination of sources of income, for interest paid by foreign branches of domestic banks and interest paid by foreign branches of domestic savings and loan institutions; to the Committee on Finance.

● Mr. MATSUNAGA. Mr. President, at the present time, interest on deposits, which qualify as "possession source investment income," in commercial banks in Puerto Rico is not subject to Federal tax. It recently has been determined that this exemption does not extend to similar deposits in savings and loan associations.

The disparate treatment of deposits in banks and deposits in savings and loan associations is contrary to the expressed will of Congress which is found in the Senate Committee report on Public Law 89–809—Foreign Investors Tax Act of 1966, report No. 1707, amending section 861 (a)(1) and (c) of the Internal Revenue Code.

Unfortunately, the language of the Code does not implement the congressional intent. Section 861(a)(1)(F) provides for foreign source status for "interest on deposits with a foreign branch of a domestic corporation or a domestic partnership, if such branch is engaged in the commercial banking business." Savings and loan associations are not considered to be in the commercial banking business for purposes of the Code.

The Office of Tax Legislative Counsel at the Department of Treasury has examined the problem and agrees that the anomally resulted from legislative oversight. It cannot be cured by Treasury regulation, but requires legislative action.

Today I am introducing a bill to correct this drafting oversight.●

---

By Mr. PROXMIRE (by request):

S. 3478. A bill to amend the One Bank Holding Company Act of 1970; to the Committee on Banking, Housing, and Urban Affairs.

CARSON CITY SILVER DOLLARS

Mr. PROXMIRE. Mr. President, at the request of the administration I am introducing legislation to amend the Bank Holding Company Act Amendments of 1970. Section 205(a) of this legislation (P.L. 91–607) authorized the public sale of approximately 3 million rare silver dollars by the Administrator of General Services under procedures recommended by the now defunct Joint Commission on the Coinage. These coins represent the last of the U.S. Government's holdings of 90 percent silver dollars. For only 13 years the Carson City Mint in Nevada produced these silver dollars. In the early 1900's, the demands for silver to support our war efforts in World War I resulted in massive coin melts, and the stored Carson City Silver dollars were thought to have been melted to meet these demands. However, in 1964 when silver was no longer used in coinage or for the redemption of silver certificates, the General Accounting Office made an audit of the Treasury's silver dollars and discovered in a Treasury vault nearly 3 million coins, most of which were uncirculated silver dollars from the long-closed Carson City Mint.

Mr. President, while receipts to the Treasury from the sale of these coins total $55.3 million, it is the administration's opinion that the guidelines set down by the Joint Commission are no longer an effective method of marketing the remaining coin inventory of approximately 1 million coins. Accordingly, the proposed amendment to section 205(a) of the Bank Holding Company Act Amendments of 1970 would allow the Administrator of General Services to conduct future sales in a less cumbersome manner than the currently authorized procedure. If enacted, the legisla-

tion would bring an estimated $24 million into the U.S. Treasury, and our committee will be happy to hold hearings on it.

---

By Mr. CHURCH:

S. 3479. A bill to amend title XVIII of the Social Security Act to prevent the imposition, under part B thereof, of more than one deductible with respect to expenses incurred for the purchase or rental of any particular piece of durable medical equipment; to the Committee on Finance.

ELIMINATE DOUBLE DEDUCTIBLE FOR DURABLE EQUIPMENT

● Mr. CHURCH. Mr. President, I introduce for appropriate reference a bill to correct an inequity in medicare relating to payment of a "double deductible" for the purchase of durable medical equipment.

My proposal would eliminate the possibility that a medicare beneficiary be required to meet the annual part B $60 deductible twice on the purchase of a single piece of medical equipment. Under existing law, this "double deductible" charge must be made when installment payments for the purchase or rental of equipment—such as a wheelchair—extend into more than one deductible period, or calendar year.

This inequity in existing law first came to my attention a few years ago when an Idaho resident purchased a wheelchair for cash payment in the middle of the year. She submitted a claim to medicare under part B, and it was her only claim for that year. She was notified that her deductible had been met for that year, then at $50. Under normal circumstances, she would then expect to receive reimbursement for 80 percent of the remaining "reasonable" charge for the wheelchair.

However, she did not begin receiving her installment payments from medicare until the next calendar year. She did not submit any additional part B claims the second year, and when she received a notification of an amount being applied to her second year deductible she realized that she was being charged a deductible twice on the same wheelchair.

The Department of Health, Education, and Welfare assures me that this requirement is not actually imposed on many beneficiaries, as the second year deductible is most often met through claims for other services. However, when no other claims are submitted—or claims in an insufficient amount to meet the full deductible—the additional amount would be subtracted from payments still due on the medical equipment claim previously submitted.

To my way of thinking, a medicare amount would be subtracted from pay- a deductible twice for one purchase of durable equipment.

The Department of Health, Education, and Welfare assures me that my proposal would result in only negligible additional costs to the medicare program. I am also assured that it need not impose a significant additional administrative or paperwork burden on the Medicare Bureau.

For these reasons, I urge approval of my bill.

Mr. President, I ask unanimous consent to have my bill printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3479

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) the first sentence of section 1833(b) of the Social Security Act is amended by inserting "(subject to subsection (f)(5)" immediately after are determinable) shall".

(b) Section 1833(f) of such Act is amended by adding at the end thereof the following new paragraph:

"(5) The deductible imposed by subsection (b) shall, insofar as such deductible relates to expenses incurred by an individual for the purchase of rental of any piece of durable medical equipment included under section 1861(s)(6), be deemed to have been met for any calendar year, if, for such calendar year and any preceding calendar years, there have been imposed, under subsection (b), reductions with respect to the purchase or rental of such piece of equipment, the aggregate of which equals $60. In determining, for purposes of the preceding sentence, the amount of the reduction under subsection (b) for any calendar year with respect to the purchase or rental of any such piece of equipment, there shall not be taken into account any expenses incurred with respect to such piece of equipment until account has first been taken of all other expenses to which the deductible imposed by subsection (b) is applicable.".

(c) The amendments made by subsections (a) and (b) shall be applicable in the case of durable medical equipment purchased or rented after December 31, 1978.

---

By Mr. McCLURE (for himself and Mr. WEICKER):

S. 3480. A bill to provide representation in the Senate for the District of Columbia as if it were a part of the State of Maryland; to the Committee on the Judiciary.

S. 3481. A bill to retrocede to the State of Maryland all lands within the District of Columbia except lands owned by the United States; to the Committee on Governmental Affairs.

S.J. Res. 156. A joint resolution to provide representation in the Congress for the District of Columbia; to the Committee on the Judiciary.

S.J. Res. 157. A joint resolution proposing an amendment to the Constitution to retrocede to the State of Maryland all lands within the District of Columbia except lands owned by the United States; to the Committee on the Judiciary.

THE DISTRICT OF COLUMBIA

● Mr. McCLURE. Mr. President, I am pleased to join the Senator from Connecticut in introducing a bill that would grant statehood to the District of Columbia. In my opinion, this provides a fair solution to the issue of extending full rights of political participation to all citizens of the District, and at the same time avoids the insurmountable constitutional objections that mar other proposals, including the recently approved House Joint Resolution 554.

Granting statehood to the District would not only guarantee to District of Columbia residents voting representation in both Houses of Congress, under article I of the Constitution. They would also be able to participate in the process of ratification of proposed amendments to the Constitution, article V; they would be entitled to as many electors for President and Vice President as they have Senators and Representatives, article 2, section 1; they would be assured of territorial integrity and protection against absorption into other States, article I, section 3; and they would have complete legislative control over internal matters, free of congressional veto. All congressional authority over the District now provided in article I, section 8, clause 17 would be effectively turned over to the people of the District acting through their elected representatives in a State legislature.

This amendment would not only assure to District of Columbia residents equal citizenship rights with other Americans; it would grant to the District complete self-government according to the wishes of its own people, without Federal interference. It would free the Federal Government of the responsibility of providing special treatment for the District at a tremendous expense to other U.S. citizens. The people of the District would not only enjoy the rights and powers of statehood. They would also assume the full burdens and responsibilities of citizens of a State of the Union. No longer would District citizens be considered second-class Americans or be victims of "taxation without representation."

It is dangerous to argue for granting full voting rights to American citizens without also providing for commensurate voting responsibilities. The effort to establish in any group of people rights unassociated with responsibilities has been proven throughout history to be destructive of individual fiber and freedom, and it is certainly harmful to government as well.

Full representation is consistent with the principles of democracy upon which our Nation was founded. This would end the myth which is both dangerous and unfair that the District of Columbia should be guaranteed representation as though it were a State without being a State. The Federal principle is far too important to be sacrificed on the basis of political expediency.

I am pleased to cosponsor this legislation and in light of recent congressional approval of a proposed constitutional amendment providing for voting representation in both the House and the Senate, I hope for speedy consideration of this measure.

In addition to the statehood idea, I am also introducing two other proposals, both as proposed amendments to the Constitution or in the alternative, as legislative enactments.

The first, gives full voting rights to the citizens of Washington by retrocession of the residental sections of the city to Maryland. This, of course, is based on the historic precedent which occurred when the Virginia portion of the District was returned to that State.

The second proposal provides that the District of Columbia be treated as though it were part of Maryland for purposes of representation in the Senate.

These suggestions, unlike the resolution passed earlier this week, are consistent with the mandates of the Constitution. They preserve the Federal nature of our Republic. We are all familiar with the history of the Constitutional Convention and the great compromise by which the conflict between the large and small States was resolved.

Madison, in the Federalist Papers wrote of our system as a "compound republic" of "independent and sovereign States. . . . In this spirit it may be remarked that the equal vote allowed to each State is at once a constitutional recognition of the portion of sovereignty remaining in the individual States and an instrument for preserving that residuary sovereignty."

I quote from the Federalist Papers to show how fundamental to the American system is the idea that the Senate represents States. The proposals I am offering today can be achieved either through legislation or constitutional amendment, and I offer them in both forms. Each of these proposals is more consistent with the American political tradition than House Joint Resolution 554, and we should not tamper with the basic principals of our systems when our goals can be achieved within that system.

Mr. President, my argument is best summed up in the very name of our country. We are not the republic of America, nor the federation of various political entities of America, we are the United States of America.

Mr. President, I ask unanimous consent that the resolution and bills be printed in the RECORD following my statement.

There being no objection, the bills and joint resolutions were ordered to be printed in the RECORD, as follows:

S. 3480

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

For purposes of representation in the Senate, the District constituting the seat of the government of the United States shall be treated as though it were part of the State of Maryland.

---

S. 3481

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. Upon acceptance by the State of Maryland, and except as provided in section 2, the lands comprising the District constituting the seat of the government of the United States on the day before the day on which this article is ratified are retroceded to the State of Maryland.

SEC. 2. Section 1 shall not apply to lands owned by the United States on the day before the day on which this article is ratified and such lands shall, on and after the day on which this article is ratified, comprise the District constituting the seat of the government of the United States.

---

S.J. RES. 156

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)* That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. For purposes of representation in the Senate, the District constituting the seat of the government of the United States shall be treated as though it were part of the State of Maryland.

"SEC. 2. For purposes of representation in the House of Representatives, the District constituting the seat of the government of the United States shall be treated as though it were a state."

---

S.J. RES. 157

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. Except as provided in section 2 the lands comprising the District constituting the seat of the government of the United States on the day before the day on which this article is ratified are retroceded to the State of Maryland.

SEC. 2 Section 1 shall not apply to lands owned by the United States on the day before the day on which this article is ratified and such lands shall on and after the day on which the article is ratified, comprise the District constituting the seat of the Government of the United States.

SEC. 3. The twenty-third article of amendment to the Constitution of the United States is hereby repealed.

---

By Mr. WEICKER (for himself and Mr. MCCLURE):

S.J. Res. 158. A joint resolution proposing an amendment to the Constitution to provide for Statehood for the District of Columbia; and for other purposes; to the Committee on the Judiciary.

STATEHOOD FOR THE DISTRICT OF COLUMBIA

● Mr. WEICKER. Mr. President, I join with my distinguished colleague from Idaho, Senator MCCLURE, in introducing a constitutional amendment to provide for statehood for the District of Columbia.

Earlier this week, I voted in favor of House Joint Resolution 554, a constitutional amendment providing voting representation for the District of Columbia. At that time, I expressed concern that Congress was not facing the central issue in the debate over representation: Whether the District of Columbia should be a State.

What the Congress has done in voting representation without statehood is the politically expedient thing—not the right thing.

Congress must face up to the issue before us—granting full rights to the District of Columbia. It does not do this by carving out another exception to the Constitution and amending the Constitution each time it is politically expedient to grant piecemeal rights to District citizens. It would do this by granting statehood to the District, with all the benefits (including full representation) and burdens that come with statehood.

Mr. President, I urge my colleagues to address the issue of full rights for the District of Columbia by acting expeditiously to provide for statehood by this constitutional amendment.

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 158

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled* (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. The District constituting the seat of government of the United States is hereby admitted into the Union as a State of the United States on an equal footing with the other States in all respects, except that the Congress shall exercise exclusive legislation over all lands and property owned by the United States.

"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 3. The twenty-third article of amendment to the Constitution of the United States is hereby repealed.

"SEC. 4. This article shall be inoperative, unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission."

---

## ADDITIONAL COSPONSORS

S. 835

At the request of Mr. CHURCH, the Senator from Colorado (Mr. HASKELL) was added as a cosponsor of S. 835, a bill to provide a program of income tax counseling for elderly individuals.

S. 1967

At the request of Mr. ROBERT C. BYRD, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 1967, a bill to amend section 218 of the Social Security Act to require that States having agreements entered into thereunder will continue to make social security payments and reports on a calendar-quarter basis.

S. 2843

At the request of Mr. HELMS, the Senator from Utah (Mr. GARN) and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 2843, a bill to provide for the issuance of gold medallions, and for other purposes.

S. 2920

At the request of Mr. THURMOND, the Senator from North Dakota (Mr. YOUNG), the Senator from Utah (Mr. GARN), the Senator from Nebraska (Mr. CURTIS), the Senator from Vermont (Mr. STAFFORD), the Senator from Kansas (Mr. DOLE), the Senator from Virginia (Mr. SCOTT), the Senator from Wyoming (Mr. WALLOP), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of S. 2920, a bill to amend the Trade Act of 1974.

S. 3111

At the request of Mr. MOYNIHAN, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 3111, a bill to amend the Internal Revenue Code of

1954 to allow the charitable deduction to taxpayers whether or not they itemize their personal deductions.

S. 3414

At the request of Mr. WALLOP, the Senator from Alaska (Mr. STEVENS) and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 3414, a bill to amend the Internal Revenue Code of 1954 to provide that nonresident aliens are taxable on gain from the sale or exchange of farming property and underdeveloped real property at capital gains rates.

S. 3453

At the request of Mr. WALLOP, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 3453, a bill to limit imports of feeder and slaughter cattle and to authorize a trade agreement for that purpose.

S. 3467

At the request of Mr. TALMADGE, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 3467, a bill to designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station," and to designate the U.S. Department of Agriculture Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center."

AMENDMENT NO. 3241

At the request of Mr. FORD, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of amendment No. 3241 intended to be proposed to S. 3229, a bill to amend title 39 of the United States Code to improve the organizational structure of the U.S. Postal Service, to provide authorizations for funds to maintain the public service function of the U.S. Postal Service, to provide a reduced rate for certain individuals, and for other purposes.

AMENDMENT NO. 3419

At the request of Mr. TOWER, the Senator from Texas (Mr. BENTSEN) and the Senator from Wyoming (Mr. WALLOP) were added as cosponsors of amendment No. 3419 intended to be proposed to S. 3077, a bill to amend and extend the Export-Import Bank Act.

AMENDMENT NO. 3477

At the request of Mr. KENNEDY, the Senator from New York (Mr. JAVITS) was added as a cosponsor of amendment No. 3477 intended to be proposed to H.R. 5285, an act to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastics or rubber.

## SENATE RESOLUTION 548—ORIGINAL RESOLUTION REPORTED TO PAY A GRATUITY

Mr. PELL, from the Committee on Rules and Administration, reported the following original resolution:

S. RES. 548

*Resolved*, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Valerie E. Kalt and Marguerite E. Gill, daughters, and George E. Gill, son, of Helen Gill, an employee of the Senate at the time of her death, a sum to each equal to one third of seven months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

## SENATE RESOLUTION 549—ORIGINAL RESOLUTION REPORTED WAIVING THE CONGRESSIONAL BUDGET ACT

Mr. RANDOLPH, from the Committee on Environment and Public Works, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES 549

*Resolved*, that pursuant to Section 402(c) of the Congressional Budget Act of 1974, the provisions of Section 402(a) of such Act are waived with respect to considerations of S. 2083, a bill to establish a uniform and comprehensive legal regime governing liability and compensation for damages and clean up costs caused by the discharge of oil and hazardous substances, and for other purposes.

Such waiver is necessary to permit consideration of S. 2083. The position of the Administration on a key issue (the question of coverage of hazardous substances) was not available until June 1. Hearings were held on April 17 and 18 and May 24, 1978.

This legislation creates a self-funding mechanism which covers its own costs and does not require funding from the U.S. Treasury. A separate Fund is created, with payments to the Fund collected from oil received at terminals and refineries. This Fund is then available to pay for clean up costs and damages associated with spills. Clean up costs and damage claims are to be paid directly from the Fund. Administrative, research, and equipment costs are to be paid from the Fund, subject to such amounts as are provided in appropriations Acts. There are no requirements for funds to be appropriated from general revenues.

## AMENDMENTS SUBMITTED FOR PRINTING

### DEPARTMENTS OF LABOR-HEW APROPRIATIONS—H.R. 12929

AMENDMENTS NOS. 3540 THROUGH 3562

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted 23 amendments intended to be proposed by him to H.R. 12929, an act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1979, and for other purposes.

### PACIFIC NORTHWEST ELECTRIC POWER PLANNING AND CONSERVATION ACT—S. 3418

AMENDMENTS NOS. 3563 THROUGH 3576

(Ordered to be printed and referred to the Committee on Energy and Natural Resources.)

Mr. PACKWOOD submitted 14 amendments intended to be proposed by him to S. 3418, a bill to assist the electrical consumers of the Pacific Northwest through use of the Federal Columbia River Power System to achieve cost-effective energy conservation, to encourage the development of renewable energy resources, to establish a representative regional power planning process, to assure the region of an efficient and adequate power supply, and for other purposes.

● Mr. PACKWOOD. Mr. President, today, I testified before the Senate Energy and Natural Resources Committee on the Pacific Northwest Electric Power Planning and Conservation Act (S. 3418), a bill dealing with the Bonneville Power Administration.

While the bill is of primary concern to the people of the Northwest, I feel the obligation to give the public and my colleagues in Congress full access to information on the bill as it proceeds through committee and the Senate.

For this purpose, I ask unanimous consent that my testimony be printed in the RECORD. And since my testimony urged the adoption of several amendments to S. 3418, I ask unanimous consent that the amendments I offered appear at the end of my remarks.

There being no objection, the statement and amendments were ordered to be printed in the RECORD, as follows:

TESTIMONY BY SENATOR PACKWOOD

INTRODUCTION

Mr. Chairman, Members of the Committee, I appear before you today to offer my complete support for the Pacific Northwest Electric Power Planning and Conservation Act (S. 3418).

I am a cosponsor of this measure. It may be the most beneficial legislation to Oregon consumers of this decade. Monthly electricity bills of the typical Oregon rate payer will be between 10 and 20 percent less than if this legislation is not enacted. For this reason alone I would support and work toward early passage of this bill, but it has many other benefits as well.

I see the emphasis on conservation and renewable sources of energy as a most encouraging development. The public, under this bill, would participate in energy decisions more than ever before in the Northwest.

AMENDMENTS

I do, however, ask the Committee members and staff to consider the adoption of sixteen amendments I have prepared. I will vote for the bill if none of my amendments are adopted and I will retract any amendments that might slow the bill's passage. On the other hand, I feel strongly that the changes I am recommending will improve the bill and without any delay. Several of the changes I am offering simply build on concepts already in the bill. Others, I think, will be noncontroversial but necessary nonetheless. I have attached to my testimony suggested language for each of the sixteen amendments proposed.

PASS THROUGH OF BENEFITS

The direct economic benefits of this bill should go to ultimate consumers. While I believe this is the clear intention of all persons involved in the drafting of this bill, I see no reason why we should not include actual language in its text to that effect. The Administrator of BPA should be required to insure, by contract or otherwise, that rates charged ultimate consumers reflect the wholesale rate benefits received by the utilities under this act.

PROTECT EXISTING ORGANIZATIONS

Second, five of my amendments are intended to protect existing institutions in the region.

The first would simply state in the findings that one purpose for the bill is to provide technical assistance to existing and emerging businesses already engaged in energy conservation and renewable resource development.

Frankly, I find that many individuals in these businesses and research organizations in Oregon are way ahead of BPA and Congress in recognizing the benefits of conservation and renewables. Forcing these people to jump through our Federal hoops could be a set back to them which we cannot afford. Also, these individuals have shown the initiative to demonstrate and develop small scale projects Federal agencies tend to ignore. These groups deserve encouragement and assistance. They should be consulted and cooperated with, not pushed around by us or BPA.

For these reasons, I suggest the Administrator be required to include in his 20 year plan those measures he deems appropriate to utilize and protect the region's small business community and research entities. In addition, BPA should develop the means of recognizing local communities which achieve relatively high amounts of energy conservation and conversion to renewable energy sources. Also, construction undertaken by BPA should proceed only after a determination that similar efforts by other groups will not be jeopardized. BPA should be required to maximize the use of local talent, materials and financial institutions wherever it is possible.

Finally, in order to protect existing institutions, the autonomy of state governments, and the public interest, I urge that the governors, the Bonneville Consumers Council and the Bonneville Utilities Council be required to approve, by majority vote, the 20 year plan established by the BPA Administrator before its implementation.

RATES FOR STATES AND LOCAL GOVERNMENTS

Next, I find it frustrating that the rates charged local governments served by private utilities remain extremely high under this plan. For example, the city of Portland would be required to pay rates equivalent to those charged industrial loads. Federal agencies, on the other hand, benefit greatly by this bill.

I urge the adoption of three amendments that would bring the rates charged municipalities and states down to the same level charged residential consumers. This rate would, of course, not be available to such governments for power resold to an ultimate consumer. Only electricity actually used by the municipality or state would qualify.

CONSERVATION AND RENEWABLE RESOURCES CLARIFICATION AND GRANT PROGRAM

Further, I recommend that the definition for "Conservation" should include investigations and studies to determine energy efficiency. I also recommend clarifying the definition for "Renewable resources." Does it, for example, include the direct application of solar collectors by ultimate consumers? Would BPA finance such projects? Conversion to natural gas heat will reduce electricity requirements. Does that mean it is renewable?

Probably the biggest departure from the bill I propose is a $10 million grant program to fund individuals and groups with demonstrated excellence in the energy field to develop creative conservation measures and renewable energy resources. Applicants, under my proposal, would be given preference if they could show (1) the project would have a beneficial economic impact on the ultimate energy consumer, (2) the project and its end result would make maximum use of the region's small businesses and existing labor force, (3) the project would not duplicate other efforts, (4) their willingness to match the grant with an equivalent amount from other sources, (5) a lack of additional funding from other sources, (6) they are requesting less than $30,000, and (7) they are based in the Pacific Northwest.

I am recommending this grant program because of the constant stream of excellent research projects which cross my desk from Oregon and which are not receiving cooperation or funding from the Department of Energy.

In addition, BPA has consistently been charged with ignoring small scale and exotic energy projects. This grant program would permit an investment by BPA in the widest possible search for these energy alternatives.

WATER CONSERVATION

Finally, I urge that the Administrator be required to project the use of the region's water resources as a part of his 20-year plan. Use of water for hydroelectricity precludes its use for several other uses, such as irrigation. We simply must know what BPA intends to use for the generation of energy so that other uses might be planned accordingly.

CONCLUSION

As I stated at the outset, I do not want to hold up passage of this bill. I intend to cooperate fully with you as Members of the Energy Committee and with the Committee staff.

I believe you have before you a very good bill. It could be better and I feel it could be better without jeopardizing its successful passage this year. I look forward to working with you. Thank you.

---

BASIC THRUST OF PACKWOOD AMENDMENTS TO S. 3418

A. Amendment 16 would insure that wholesale rate benefits to the region's utilities would be passed along to the ultimate consumers of electricity.

B. Amendments 1, 6, 7, 8, 12 and 13 are intended to protect the efforts of existing institutions, small businesses and existing community labor forces.

C. Amendments 10, 11 and 15 would provide state and local governments electricity for their own use at the same rates as residential consumers, instead of those rates charged industrial loads.

D. Amendments 2 and 3 would clarify the definitions of conservation and renewable resources. Amendment 14 would set up a BPA grant program to investigate the feasibility and cost-effectiveness of creative conservation measures and renewable energy sources.

E. Amendment 9 would insure that the region is made aware of the projected use of water by hydroelectric dams.

---

AMENDMENT NO. 3563

On page 2, insert the following between lines 15 and 16:

(d) The current interest of Pacific Northwest consumers and many existing and emerging businesses to conserve energy and use renewable sources of energy is not receiving enough federal technical assistance and encouragement.

---

AMENDMENT NO. 3564

On page 14, insert the following between lines 22 and 23:

(g) The Administrator shall insure, by contract clause or otherwise, that rates charged the ultimate residential and local government consumers shall directly reflect the benefits received by any sale of power to a Pacific Northwest utility under this Act.

AMENDMENT NO. 3565

On page 12, line 21, insert "and State and local government" after "residential".

---

AMENDMENT NO. 3566

On page 11, insert the following between lines 16 and 17:

(i) In order to assist in the determination of the feasibility and cost effectiveness of conservation measures for the purposes of resource acquisition under section 6(a) and waste heat, cogeneration or renewable resources acquisition under subsection (b), the Administrator with consultation with the region's governors, the Bonneville Consumers Council and the Bonneville Utilities Council, is authorized to establish and carry out a program of contracts with, or grants-in-aid to, groups, or, in appropriate cases, individuals with exceptional talent and expertise engaged in research and development of creative energy alternatives. Preference shall be given to—

(1) projects having greatest beneficial economic impact on the ultimate energy consumer;

(2) projects having as an end result the maximum use of a community's small businesses and labor force;

(3) projects minimizing duplication of research or demonstrations being carried on by other entities either Federal or non-Federal;

(4) applicants offering to match the grant with an equivalent amount from other sources;

(5) applicants demonstrating a lack of funding from other sources;

(6) applicants requesting not more than $30,000; and

(7) applicants from Pacific Northwest.

The contracts or grants-in-aid provided under this subsection shall be further regulated under such rules as the Administrator deems necessary and appropriate but shall, in no event, exceed a total annual outlay of $10,000,000.

---

AMENDMENT NO. 3567

On page 10, strike lines 5 through 9 and substitute the following:

(e) To the extent conservation or acquisition of resources under this Act require direct arrangements with the ultimate consumers of electric power, the Administrator shall make maximum practicable use of existing local institutions able to supply credit, materials or expertise to such consumers.

---

AMENDMENT NO. 3568

On page 10, strike line 4, and substitute the following: reliability: *Provided*, That, prior to taking any action pursuant to this section, the Administrator shall determine that his proposed actions will not jeopardize other, similar efforts being initiated by current institutions or utilities in the region.

---

AMENDMENT NO. 3569

On page 7, line 11, insert "and State and local government" after "residential".

On page 7, line 15, insert "and State and local government" after "residential".

---

AMENDMENT NO. 3570

On page 7, line 5, insert "and State and local governments for their own use, not for resale," after "agencies,".

---

AMENDMENT NO. 3571

On page 6, line 16, insert the following new sentences after the period: Such program must also include those measures the Administrator deems appropriate to utilize and protect the region's small business community, especially those emerging businesses and other entities engaged in energy conservation and the use of renewable sources of energy. Such program must include the measures the Administrator intends to take in order to give added economic recognition for the greater achievement of conservation and conversion to renewable resources by certain local communities beyond that of other communities in the region.

---

AMENDMENT NO. 3572

On page 6, line 12, insert "projections of monthly water use," after "forecast,".

---

AMENDMENT NO. 3573

On page 6, line 10, insert the following new sentence after the period: Before such pro-

gram is implemented it must be approved by a single majority of (1) the regions' governors, (2) the Bonneville Consumers Council and (3) the Bonneville Utilities Council.

AMENDMENT No. 3574

On page 4, insert the following between lines 19 and 20:

(k) "Utility" means unless otherwise indicated, either a publicly owned or investor owned entity dedicated in whole or in part to providing electricity or other energy to ultimate consumers.

AMENDMENT No. 3575

On page 4, strike lines 7 through 11 and substitute the following:

(h) "Renewable resources" means a source of energy which recurs in the natural environment such that tapping its force does not diminish its future availability. Such resources include, solar, wind, hydro, geothermal, and biomass, which is used for electrical generation or which will reduce the electrical requirements of a consumer by direct application.

AMENDMENT No. 3576

On page 2, strike lines 20 through 22 and substitute the following:

(b) "Conservation" means any appropriate improvements in the power system or investment which increases the efficiency of energy production or use, including investigations and studies carried out to determine the feasibility and cost-effectiveness of various means to achieve efficiency of energy production or use.

## NUCLEAR REGULATORY COMMISSION AUTHORIZATIONS—S. 2584

AMENDMENT NO. 3577

(Ordered to be printed and to lie on the table.)

Mr. HART (for himself, Mr. DOMENICI, Mr. STAFFORD, and Mr. RANDOLPH) submitted an amendment intended to be proposed by them, jointly, to S. 2594, a bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with sec. 261 of the Atomic Energy Act of 1952, as amended, and sec. 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes.

● Mr. HART. Mr. President, over the past several months, the Environment and Public Works Subcommittee on Nuclear Regulation has been actively studying the nuclear waste problem confronting this country. The subcommittee has held 5 days of hearings devoted exclusively to the consideration of nuclear waste issues. In addition, the subcommittee has held a total of 8 days of hearings on NRC's fiscal year 1979 authorization and on nuclear licensing reform where nuclear waste issues were tangentially addressed. In all, the Committee has heard from over 20 witnesses who are deeply concerned with the nuclear waste issue.

Mr. President, it is on the basis of this record, that I intend to offer an amendment to S. 2584 which would address several important issues of nuclear waste management. This amendment which has the support of the Full Environment and Public Works Committee would add two new provisions to S. 2584. The first provision would expand the Nuclear Regulatory Commission's licensing and regulatory authority over the disposal of uranium mill tailings—an authority which the Commission does not now have. The second provision directs the Nuclear Regulatory Commission to study the relative costs and benefits of extending the Commission's licensing and regulatory authority over the storage and disposal of all nuclear wastes.

Both of these provisions can be fairly characterized as addressing nuclear waste management issues. While this amendment cannot provide this country with the total answer to our nuclear waste dilemma, it does address the immediate and serious problem of mill tailings disposal. Furthermore, it provides for the gathering of information necessary for Congress to answer legislative questions on nuclear waste disposal which will be considered next year.

Mr. President, so that my colleagues and their staff may have the full opportunity to review this amendment before it is considered by the Senate, I ask unanimous consent that the full text of the amendment and a section-by-section analysis be printed in the RECORD.

There being no objection, the amendment and analysis were ordered to be printed in the RECORD, as follows:

AMENDMENT No. 3577

On page 15, after line 23, insert the following new sections:

SEC. 12. Section 11 e. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"e. The term 'byproduct material' means (1) any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material, and (2) any radioactive material resulting from the processing of ores primarily for the extraction of source material.".

SEC. 13. Section 81 of the Atomic Energy Act of 1954, as amended, is amended by adding a new sentence at the end thereof as follows: "No license shall be required by the Commission for the transfer, receipt, acquisition, ownership, or possession of byproduct material as defined by section 11 e. (2) of this Act until three years from the date of enactment of this sentence.".

SEC. 14. Section 161 g. of the Atomic Energy Act of 1954, as amended, is amended by adding at the end thereof the following:

"The Department of Energy may accept donations of reclaimed land used for the disposal of byproduct material as defined in section 11 e. (2) of this Act. Land donated under this section shall not be subject to the provisions of Title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, nor to disposal under the Federal Property and Administrative Services Act of 1949, as amended. The President shall assign custody of such land to any agency authorized by law to manage land title to which is held by the United States.".

SEC. 15. Section 161 of the Atomic Energy Act of 1954, as amended, is further amended by adding at the end thereof a new subsection x. as follows:

"x. establish by rule, regulation, or order, in accordance with the requirements of section 181 of this Act, such standards and instructions as the Commission may deem necessary or desirable to ensure that funds will be made available by a licensee to permit the timely completion of all requirements established by the Commission for the decommissioning, decontamination, and reclamation and long term maintenance and monitoring where necessary of sites, structures, and equipment used in connection with the generation or disposal of byproduct material as defined in section 11 e. (2) of this Act.".

SEC. 16. Section 274 b. of the Atomic Energy Act of 1954, as amended, is amended by adding "as defined in section 11 e. (1) of this Act" after the words "byproduct materials" in paragraph (1); by adding a new paragraph (2) to read as follows: "(2) byproduct materials as defined in section 11 e. (2) of this Act."; and by renumbering existing paragraphs (2) and (3) accordingly.

SEC. 17. Section 274 d. (2) of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"(2) the Commission finds that the State program is in accord with subsection o. of this section and is in all other respects compatible with the Commission's program for the regulation of the materials covered by the proposed agreement, and that the State program is adequate to protect the public health and safety with respect to such materials.".

SEC. 18. Section 274 e. of the Atomic Energy Act of 1954, as amended, is amended by adding a new paragraph (3) to read as follows:

"(3) Prior to the expiration of three years from the date of enactment of this paragraph, nothing in this Act shall preclude the exercise of State authority over byproduct material as defined by section 11 e. (2) of this Act. Except as otherwise permitted by Federal law, on or after three years from such date, a State may exercise authority for protection of the public health and safety from radiation hazards associated with such byproduct material only pursuant to an agreement or an amendment thereto entered into with the Commission in accordance with subsection b. of this section. Amendments to existing agreements to provide for the continuation of State authority over such byproduct material shall be subject to paragraphs (1) and (2) of this subsection and to subsection d. of this section.".

SEC. 19. Section 274 j. of the Atomic Energy Act of 1954, as amended, is amended by inserting after the words "with the State" the following: ", or that part of an agreement respecting any of the materials enumerated in subsection b. of this section,".

SEC. 20. Section 274 of the Atomic Energy Act of 1954, as amended, is further amended by adding at the end thereof the following new subsection:

"o. In the licensing and regulation of byproduct material as defined by section 11 e. (2) of this Act pursuant to an agreement entered into in accordance with subsection b. of this section, a State shall adopt and enforce substantive standards for the protection of the public health and safety from radiation hazards which are equivalent to, or more stringent than, standards adopted and enforced by the Commission for the same purpose, including requirements, standards, and criteria promulgated by the Commission and the Administrator of the Environmental Protection Agency pursuant to sections 84, 85 and 275 of this Act.".

SEC. 21. Chapter 8 of the Atomic Energy Act of 1954, as amended, is amended by adding a new section 83 to read as follows:

"SEC. 83. REMEDIAL ACTION, EXEMPTION AND ENFORCEMENT.

a. Persons otherwise subject to the requirement of a license by section 81 of this Act shall be exempt from such requirement with respect to the ownership and possession of byproduct material as defined in section 11 e. (2) of this Act which is covered by a remedial action program conducted or approved by the Department of Energy.

b. The Commission may require, by rule, regulation, or order, the Department of Energy or persons exempted by subsection a. of this section or section 81 of this Act from the requirement of a license for the ownership or possession of byproduct material as defined in section 11 e. (2) of this

Act to conduct monitoring, perform remedial work or comply with such other measures as the Commission deems necessary or desirable to protect health or minimize danger to life or property in connection with the disposal and storage of such byproduct material.

c. The Commission may make such studies and conduct such inspections as it may deem necessary or desirable to ensure compliance with rules, regulations, and orders issued pursuant to subsection b. of this section. Persons violating any such rule, regulation, or order, and persons refusing to permit inspections conducted pursuant to this subsection, shall be subject to a civil penalty in an amount equal to that provided by section 234 a. of this Act. Notification and enforcement of such penalty shall be in accordance with sections 234 b. and c. of this Act.".

SEC. 22. (a) Chapter 8 of the Atomic Energy Act of 1954, as amended, is amended by adding at the end thereof a new section 84 to read as follows:

"SEC. 84. AUTHORITIES OF COMMISSION RESPECTING CERTAIN BYPRODUCT MATERIAL—

The Commission shall ensure that the management of any byproduct material as defined in section 11 e. (2) of this Act is carried out in such a manner as—

(1) the Commission deems appropriate to protect the public health, safety, and environment from radiological and nonradiological hazards associated with the processing and with the possession and transfer of such material;

(2) conforms with the applicable standards and criteria promulgated by the Administrator of the Environmental Protection Agency under section 275 of this Act; and

(3) conforms to general requirements, established by the Commission, with the concurrence of the Administrator of the Environmental Protection Agency, which are at least comparable to requirements applicable to the possession, transfer, and disposal of similar hazardous material under the Solid Waste Disposal Act, as amended.".

(b) The table of contents for such chapter 8 is amended by inserting the following new item after the item relating to section 83:

"SEC. 84. AUTHORITIES OF COMMISSION RESPECTING CERTAIN BYPRODUCT MATERIAL.".

SEC. 23. (a) Chapter 19 of the Atomic Energy Act of 1954 as amended, is amended by inserting after section 274 the following new section:

"SEC. 275. HEALTH AND ENVIRONMENTAL STANDARDS FOR URANIUM MILL TAILINGS.—

a. As soon as its practicable, but not later than eighteen months after the date of enactment of this section, the Administrator of the Environmental Protection Agency (hereinafter in this section referred to as the Administrator) shall, by rule, promulgate standards and criteria of general application for the protection of the public health, safety, and the environment from radiological and non-radiological hazards associated with the processing and with the possession and transfer of byproduct material, as defined in section 11 e.(2) of this Act at sites where ores are processed primarily for their source material content, or at sites which are used for the disposal of such byproduct material.

b. Such generally applicable standards and criteria promulgated pursuant to this section for nonradiological hazards shall provide for the protection of human health and the environment as required by subtitle C of the Solid Waste Disposal Act, as amended: *Provided, however,* That no permit issued by the Administrator is required under this Act or the Solid Waste Disposal Act, as amended, for the processing, possession, transfer or disposal of byproduct material, as defined in section 11 e.(2) of this Act.

c. The Administrator may periodically revise any standard or criterion promulgated pursuant to subsection a. of this section. Any such revision shall be applied upon license renewal to persons holding on the date of promulgation of such revision a license for byproduct material as defined in section 11 e.(2) of this Act issued by the Commission or by a State exercising authority pursuant to section 274 b.(2) of this Act: *Provided, however,* That in no event shall such a revision be applied later than five years from the date of promulgation thereof.

d. Implementation and enforcement of the standards and criteria promulgated pursuant to subsection a. of this section shall be the responsibility of the Commission in the conduct of its licensing activities under this Act. States exercising authority pursuant to section 274 b. (2) of this Act shall implement and enforce such standards and criteria in accordance with subsection o. of such section.

e. Nothing in this Act applicable to byproduct material as defined in section 11 e. (2) of this Act shall affect the authority of the Administrator under the Clean Air Act of 1970, as amended, or the Federal Water Pollution Control Act, as amended.".

(b) The table of contents for chapter 19 of the Atomic Energy Act of 1954, as amended, is amended by inserting the following new item after the item relating to section 274:

"Sec. 275. Health and environmental standards for uranium mill tailings."

SEC. 24. Chapter 8 of the Atomic Energy Act of 1954, as amended, is amended by adding a new section 85 to read as follows:

"SEC. 85 The Commission may require by rule, regulation, or order, in accordance with the requirements of section 181 of this Act, that byproduct material as defined by section 11 e.(2) of this Act be disposed of on land to which title has been transferred to the State or the United States at the time of termination of any license for the generation or possession of such material upon finding that such action is necessary or desirable to protect health or minimize danger to life or property in connection with the disposal of such byproduct material. Any such rule, regulation, or order shall specify standards for the transfer of title to such land to the State or the United States, including: (1) standards to assure the completion, prior to the transfer of title, of all requirements established by the Commission for the decommissioning, decontamination and reclamation of sites, structures and equipment on the land which are used in connection with the generation or disposal of byproduct material as defined in section 11 e.(2) of this Act; (2) standards to minimize the need for future remedial work; (3) standards to minimize the cost, including the cost to the State or the United States, for any long-term care; and (4) standards to permit the reservation of rights by the transfer to the future reprocessing of byproduct material, as defined in section 11 e. (2) of this Act, and to the future use of the surface or subsurface estate, consistent with any standards or requirements promulgated by the Commission which are applicable to the generation, possession of transfer of byproduct material, as defined in section 11 e. (2) of this Act. This section shall not be construed as authorizing or requiring the transfer of title to Indian land.".

SEC. 25. (a) The Commission, in cooperation with the Department of Energy, is authorized and directed to conduct a study of extending the Commission's licensing or regulatory authority to include categories of existing and future Federal radioactive waste storage and disposal activities not presently subject to such authority.

(b) Each Federal agency, subject to the provisions of existing law, shall cooperate with the Commission in the conduct of the study. Such cooperation shall include providing any necessary access to existing facilities and sites and providing any information needed to conduct the study which the agency may have or be reasonably able to acquire.

(c) On or before March 1, 1979, the Commission shall submit a report to the Congress containing the results of the study. The report shall include:

(1) a complete listing and inventory of all radioactive waste storage and disposal activities now being conducted or planned by Federal agencies;

(2) an assessment of the benefits of extending the Commission's licensing or regulatory authority to include categories of existing and future Federal radioactive waste storage and disposal activities not presently subject to such authority;

(3) an evaluation of the relative potential risk to the public health and safety and the environment from such categories of existing and future Federal radioactive waste storage and disposal activities;

(4) an evaluation of the feasibility and cost of extending the Commission's licensing or regulatory authority to include such categories of existing and future Federal radioactive waste storage and disposal activities, including the technical and other data requirements for licensing or regulation and the likely characteristics of the Commission's licensing or regulatory program;

(5) an evaluation of the national security implications of extending the Commission's licensing or regulatory authority to include such categories of existing and future Federal radioactive waste storage and disposal activities; and

(6) the Commission's recommendations concerning the categories of existing and future Federal radioactive waste storage and disposal activities, if any, which should be made subject to the Commission's licensing or regulatory authority and the type of authority which the Commission should be granted.

---

SECTION-BY-SECTION ANALYSIS COMMITTEE AMENDMENT TO S. 2584

Sec. 12. Section 12 adds a new class of byproduct material to the definition of byproduct material now contained in section 11 e. of the Atomic Energy Act of 1954. As presently defined, byproduct material does not include uranium mill tailings. These tailings are a waste product resulting from uranium milling. Under the expanded definition, mill tailings would become a licensable material because they contain radium, radon and other radioactive isotopes. The revised definition would in effect bring mill tailings within the licensing and regulatory framework of the Atomic Energy Act. The revised definition is not intended, however, to make mine wastes subject to NRC licensing or regulation.

Sec. 13. Section 13 amends section 81 of the Atomic Energy Act of 1954 to defer until three years from enactment the authority of the Nuclear Regulatory Commission to license this new class of byproduct material. During this transition period, standards and regulations would be developed and agreements with states conducting their own regulatory program would be amended to cover the new class of byproduct material.

Sec. 14. Section 14 adds to section 161 g. of the Atomic Energy Act of 1954 a provision to authorize the Department of Energy to accept donations of land used as mill tailings disposal areas. Donations would be without cost to the United States and would not be eligible for subsequent sale by the United States as surplus property. The President is directed to assign custody of donated land to any agency authorized to manage land owned by the United States. This provision does not require a licensee of the Nuclear Regulatory Commission to transfer a tailings disposal area to the United States, but rather empowers the Department of Energy to accept voluntary donations of such areas. Such a direct licensee has the option of retaining ownership under Federal licensing.

Sec. 15. Section 15 adds a new subsection x. to section 161 of the Atomic Energy Act of

1954 to provide the Commission with explicit authority to require licensees to provide financial arrangements to ensure the proper decommissioning, decontamination, reclamation and long-term maintenance and monitoring if necessary, of sites, structures, and equipment used in connection with activities or materials licensed under the Atomic Energy Act of 1954. This provision affords a clear legal basis for the dedication of funds prior to the termination of the milling license for any long-term maintenance and monitoring which may be required. Such authority now exists only under the more general language of section 161 b.

Sec. 16. Section 16 gives states entering into new agreements under section 274 b. of the Atomic Energy Act of 1954 the option of assuming, or declining to assume, licensing and regulatory authority over mill tailings.

Sec. 17. Section 17 amends section 274 d. of the Atomic Energy Act of 1954 to condition the acceptability of a new or amended agreement upon a state program that is at least equivalent to the Commission's program for substantive regulation of tailings disposal areas. The standard of compatibility remains in effect for all other aspects of an agreement state program.

Sec. 18. Section 18 adds a new paragraph to Section 274 e. of the Atomic Energy Act of 1954 to make clear that existing agreements with states under section 274 must be amended for states to assume licensing and regulatory authority over the new class of byproduct material after three years from enactment. In the interim, states may continue to exercise their police power to regulate mill tailings. If an agreement state fails to amend its agreement on or after three years from enactment the Commission will license and regulate the byproduct material in tailings disposal areas.

Sec. 19. Section 19 amends section 274 j. of the Atomic Energy Act of 1954, to empower the Commission, after notice and opportunity for hearing, to terminate or suspend the exercise of an argeement state's authority pertaining to any of the materials enumerated in section 274 b. which are eligible for state licensing and regulation, including mill tailings. Present law permits termination or suspension only of the entire agreement. The standard for such action would remain the adequacy of protection of the public health and safety.

Sec. 20. Section 20 adds new subsection o. to section 274 of the Atomic Energy Act of 1954. Subsection o. requires agreement states to incorporate in their licensing and regulation of mill tailings standards which are equivalent to, or more stringent than, requirements, standards, and criteria promulgated by the Commission and the Administrator of the Environmental Protection Agency in the degree of protection from radiation hazards afforded the public health and safety.

Sec. 21. Section 21 adds a new section 83 to the Atomic Energy Act of 1954 to provide an exemption from licensing for that portion of a mill tailings disposal site where the Department of Energy has conducted or approved a remedial action. Legislation to permit the Department of Energy to conduct a remedial action program for certain existing mill tailings is now pending before other committees of the Congress. This provision is intended to exempt from Commission licensing any mill tailings covered by a Department of Energy remedial program pursuant to that or similar legislation.

The Commission may, however, require persons so exempted, or the Department of Energy, to monitor such sites, perform remedial work, or take other measures to protect health or minimize danger to life or property. The Commission is authorized to inspect, as necessary, and persons found to be in violation of rules or orders may be subject to a civil penalty even though not licensed. These provisions also apply to persons in possession of mill tailings who have been exempted from licensing in the Commission's discretion under section 81 of the Atomic Energy Act.

Sec. 22. Section 22 adds a new section 84 to the Atomic Energy Act of 1954 which directs the Commission to ensure the protection of the public health, safety and the environment from radiological and nonradiological hazards associated with the processing, possession, and transfer of mill tailings by requiring conformity with both the applicable standards and criteria promulgated by the Administrator of the Environmental Protection Agency and the general requirements established by the Commission, with concurrence of the Administrator, which are at least comparable to requirements for similar hazardous material under the Solid Waste Disposal Act, as amended.

Sec. 23. Section 23 adds new section 275 to the Atomic Energy Act of 1954 to delineate the responsibilities of the Administrator of the Environmental Protection Agency in the regulation of mill tailings. The Administrator is given up to 18 months to promulgate general standards and criteria to protect the public health, safety, and the environment from the radiological and nonradiological hazards associated with the processing, possession, and transfer of mill tailings at sites where ores are processed for their uranium content and at sites used for mill tailings disposal. These standards and criteria are intended to prescribe general standards of performance rather than to impose specific management requirements, including particular techniques or technologies for meeting the general standards. These general standards are not intended to be site specific.

For radiological hazards, the section would preserve the authority of the Administrator under the Atomic Energy Act of 1954, as amended, to set generally applicable standards for mill tailings. Generally applicable standards and criteria promulgated for nonradiological hazards must provide for the protection of human health and the environment as required by subtitle C of the Solid Waste Disposal Act, as amended. In the promulgation of such standards and criteria for nonradiological hazards, it is expected that the Administrator will take into account the degree to which human health and the environment are already protected by requirements established by the Commission pursuant to section 84 of the Atomic Energy Act. Any revision of the standards and criteria respecting either type of hazard may be applied to current licenses only upon license renewal but in no event later than five years from the promulgation of the revision.

The section expressly precludes any requirement, either under this Act or the Solid Waste Disposal Act, as amended, for a permit issued by the Administrator for the processing, possession, transfer or disposal of uranium mill tailings, Licensing responsibilities under this Act for the processing, possession, transfer or disposal of uranium mill tailings are assigned to the Commission, and this provision is intended to eliminate any requirement for a duplicate permit by the Administrator for those activities.

Responsibility for implementation and enforcement of the standards and criteria is vested in the Commission in the conduct of its licensing activities. However, agreement states that have elected to license mill tailings would have to incorporate standards at least equivalent to these standards and criteria. Finally, no provision of the Atomic Energy Act of 1954 relating to the new class of byproduct material is intended to affect the authority of the Administrator of the Environmental Protection Agency under the Clean Air Act, as amended, or the Federal Water Pollution Control Act, as amended.

Sec. 24. Section 24 adds a new section 85 to the Atomic Energy Act of 1954 to empower the Commission to require that mill tailings be disposed of on land which is transferred to State or Federal ownership on the termination of the original milling license for possession of source material. Any rule, regulation or order imposing such a requirement must be supported by a finding that it is necessary or desirable to protect health or minimize danger to life or property.

Such a requirement must include: (1) standards to ensure completion prior to the transfer of title of all Commission decommissioning, decontamination, and reclamation requirements; (2) standards to minimize the need for future remedial work; (3) standards to minimize the cost, including the cost to the State or to the United States, for any long term care; and (4) standards to permit the transferor to reserve surface or subsurface rights.

Sec. 25. Section 25 authorizes and directs the Commission, in cooperation with the Department of Energy to conduct a study and report to the Congress by March 1, 1979 on the following elements:

1. Complete listing and inventory of all radioactive waste storage and disposal activities now being conducted or now being planned by agencies of the Federal Government, including long and short-term storage and disposal activities, research and development activities, and decommissioned facilities, for high-level radioactive wastes, transuranic wastes, low-level wastes, and spent fuel.

2. An assessment of the benefits of extending Commission regulatory authority to such wastes, to the extent that they are not now covered, including an evaluation of the potential risk to the public health and the environment from the various categories of radioactive wastes now or planned to be in the custody of the Federal Government, together with a comparison of those risks.

3. An evaluation of the feasibility and cost of extending NRC licensing or regulatory authority to include such existing and future activities. This evaluation would cover such factors as the information and data needed by the Commission for licensing or regulation, the impact of licensing on project schedules, and the likely characteristics of a Commission licensing or regulatory program for the various categories of Federal waste storage and disposal activities.

4. An evaluation of the national security implications of extending Commission licensing or regulatory authority to cover the various categories of Federal waste storage and disposal activities.

5. Recommendations by the Commission, as to which categories of existing and future Federal nuclear waste storage and disposal activities should be made to subject to NRC authority. and the type of authority (licensing, safety review and concurrence, etc.) which the Commission should be given.●

## NOTICES OF HEARINGS

COMMITTEE ON HUMAN RESOURCES

● Mr. WILLIAMS. Mr. President, the Committee on Human Resources will hold a hearing on the nomination of Howard Jenkins, Jr., to be a member of the National Labor Relations Board on Thursday, September 7, 1978, at 9:30 a.m. in room 4232 of the Dirksen Senate Office Building.●

COMMITTEE ON GOVERNMENTAL AFFAIRS

● Mr. RIBICOFF. Mr. President, the Governmental Affairs Committee will hold 1 day of hearings on Thursday, September 7, 1978, on Reorganization Plan No. 4 of 1978, relating to the Em-

ployment Income Security Act of 1974. The hearing will commence at 9 a.m. in room 3302 of the Dirksen Senate Office Building. Testimony will be received from both administration and outside witnesses.●

SUBCOMMITTEE ON ADMINISTRATIVE PRACTICE AND PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, for Mr. ABOUREZK, I wish to announce that the hearings scheduled by the Subcommittee on Administrative Practice and Procedure on the FBI Charter, for August 28 and 29, have been canceled.●

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. PROXMIRE. Mr. President, I wish to announce that the oversight hearings on the use of export controls and export credits for foreign policy purposes scheduled for Thursday, September 21 and Friday, September 22, will be held by the full Committee on Banking, Housing, and Urban Affairs, not the Subcommittee on International Finance as previously announced. The distinguished chairman of the subcommittee, Senator STEVENSON, and I have agreed to make this change because we feel strongly that the subject of the hearings is of such importance to the Nation that it should be addressed at the highest levels of government.

A general description of the hearings appeared in the RECORD on August 17 at pages 26712–26713. The hearings will begin at 10 a.m. each day in room 5302 of the Dirksen Senate Office Building. Persons interested in testifying or desiring additional information concerning the hearings should contact Robert W. Russell, counsel to the Subcommittee on International Finance at (202) 224–0819.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate today to hold a markup session on S. 2053, legislation regarding the exploration of hard mineral resources of the deep sea bed.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate today to consider the nomination of John W. McGarry as a member of the Federal Election Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate today to consider S. 3418, the Pacific Northwest Electric Power Planning and Conservation Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON MERCHANT MARINE AND TOURISM

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Subcommittee on Merchant Marine and Tourism of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Wednesday, September 6, to conduct a hearing on S. 2873, a bill to provide for the regulation of rates or charges by certain State-owned carriers in the foreign commerce of the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### "LET THEM EAT CAKE": THE HUMPHREY-HAWKINS SOLUTION TO UNEMPLOYMENT

● Mr. GARN. Mr. President, the Humphrey-Hawkins approach to unemployment reminds me of the situation in France in the late 1780's. Rather than unemployment the great worry at that time was inflation of the price of bread. Bread had become nearly unaffordable by the people generally. Many were suffering. The problem, due in some part to a bad harvest, appeared intractable. The story is told, perhaps apocryphal, that Marie Antoinette, in response to the information that the people of Paris had no bread, proposed in solution, "Then let them eat cake."

Mr. President, unemployment is like the bread problems of France 200 years ago. The Humphrey-Hawkins bill re-echoes the words of Marie Antoinette. It is an excuse for inaction, a pushing away of the problem. The problem and suffering are real, the Humphrey-Hawkins "solution" vacuous. It sanctimoniously well-wishes that the problem be solved but proposes nothing that will effectively bring about its promised result. As in France then, Humphrey-Hawkins today would add the frustration of unfeeling and ineffective government to the suffering of the economically hardshipped.

Positive, meaningful steps must be taken to alleviate the problems of unemployment, rather than the rhetorical banalities puffing up all of the present versions of Humphrey-Hawkins. We all know that unemployment is bad, and full employment good. We do not need to pass a bill to tell us that. We might just as well pass a bill making crime illegal, and claim that it will solve the problems of law and order.

Humphrey-Hawkins has the Congress set economic goals—goals that no one would deny would be fine to realize—and then leaves it up to the President to figure out how to achieve them. Humphrey-Hawkins says, "Let them eat cake," and then leaves it up to the President to discover the recipe and bake it.

A major cause of unemployment today is the lack of sufficient capital formation in the United States. Yet no version of the Humphrey-Hawkins bill adequately addresses itself to this need. I have supported and will continue to support measures to facilitate investment and other forms of capital formation in the United States, which is essential for the creation of jobs and the improvement of the competitive position of U.S. industry vis-a-vis that of other nations. This will lead to the creation of new, meaningful jobs at home and reduce the flight of jobs abroad.

Mr. President, these and similar measures will lead to the alleviation of unemployment. These are specific, concrete measures addressed directly to the problem. They are not glamorous. Neither, however, are they empty rhetoric. I am firmly opposed to promising people cake when they need jobs.●

### RESIDENTIAL SOLAR AND CONSERVATION TAX CREDITS

● Mr. HART. Mr. President, during consideration of H.R. 112 on the floor of the Senate on Wednesday, I offered, with a number of my colleagues, an amendment which would extricate the residential solar and conservation tax credits from the more controversial provisions of the energy tax bill, which has not been acted upon by a Senate-House conference committee. In light of the lengthy debate on my amendment and on an amendment offered subsequently by the distinguished Senator from Alaska (Mr. GRAVEL), I feel it is important that I clarify my intentions in taking this initiative.

As chairman of the Subcommittee on Energy and Foundations of the Senate Finance Committee, Senator GRAVEL is to be commended for his work on H.R. 112, a bill to reduce the excise tax on the investment income of private foundations from 4 to 2 percent. Private foundations serve a vital role in American society by providing a broad range of essential services, from improved health care to greater educational opportunities.

After extensive hearings before Senator GRAVEL's subcommittee, it was determined that the 4 percent excise tax enacted by Congress in 1969 to cover the auditing costs of foundations was excessive and unduly hampered their ability to provide desirable public services. The Finance Committee acted prudently to reduce this excise tax from 4 to 2 percent, and I joined 50 of my colleagues in cosponsoring this amendment when it was brought to the floor of the Senate.

Because this bill had been strongly supported in both the Senate and the House of Representatives, as well as by the administration, it was my judgment and that of those Members of Congress who form the solar coalition that this would be the appropriate vehicle to insure expeditious consideration of our amendment by both Houses of the Congress.

I am deeply appreciative of Senator GRAVEL's commitment to support this amendment in conference. During deliberation on this amendment, the Senator from Alaska attempted to carry it one step further, to provide additional incentives for other new energy tech-

nologies and applications, such as the production of geothermal energy, gasohol, low-head hydro, cogeneration and investment tax credits for businesses which he also felt deserve expeditious action I either sponsored or actively supported many of the provisions included in the Gravel amendment when the original energy tax bill was considered on the Senate floor.

However, tentative agreement on these provisions had not been reached by in the Senate and House energy tax conference during their meetings last fall. This is an important distinction. In constructing the Hart amendment, it was our considered judgment that the inclusion of provisions which had not been at least tentatively agreed to in conference would create the same confused state of affairs which has prevented the tax conferees from reporting a bill for full Senate and House consideration. Consequently, provisions of the energy tax bill which were either controversial or had not been at least tentatively agreed to in the energy tax conference were intentionally excluded from my amendment.

It was this line of reasoning—and not disagreement with the substance of the Gravel amendment—which necessitated that I oppose its addition to my amendment during the debate on Wednesday. My motion to table the Gravel amendment merely reflected an attempt to focus Senate consideration on the solar and energy conservation tax credits alone. I know a large number of my colleagues shared this view and were not addressing the appropriateness of the Gravel amendment.

Mr. President, the Senator from Alaska (Mr. GRAVEL) has distinguished himself as an ardent and effective advocate of energy conservation and development of renewable energy technologies. Senator GRAVEL'S efforts to promote new sources of energy and conservation, exercised through his work on the Energy and Foundations Subcommittee and other actions, pre-dates the recent surge of congressional interest in this area. I believe he should be commended for his leadership in developing these sources of energy.●

## PANAMA CANAL: EVOLUTION OF A PLAN

● Mr. HELMS. Mr. President, although public discussions related to the vital subject of the Panama Canal during recent months have been extensive, relatively little has been published regarding its fundamental planning and the leaders involved.

The Isthmus of Panama is a narrow neck of land about 50 miles wide from deep water in the Atlantic to deep water in the Pacific. It is located in one of the heavier rainfall areas of the world and has one of the most treacherous geological formations with which engineers ever had to deal. A mountain range, paralleling the Pacific coastline about 10 miles away, forms the Continental Divide; a secondary divide is near the Atlantic coast.

There are two tropical rivers with their head waters near the Continental Divide: the Obispo-Chagres flowing into the Atlantic and the Rio Grande into the Pacific, with both of them subject to heavy flooding during wet seasons. The drainage area of the Chagres River valley is about 1,320 square miles; that for the Rio Grande is 37.4 square miles.

In 1879, Ferdinand de Lusseps, the hero of the Suez Canal, chaired a congress of 135 leaders in Paris to decide upon the crucial questions of site and type of canal to be constructed across the Central American Isthmus and let the full force of his tremendous prestige and genius to bring about a recommendation by that congress for a canal of the "sea level" design at Panama.

Long before this congress met one of its members had made a "brilliant engineering evaluation" of the topographical, geological, and hydrological problems involved. When he saw what was taking place he rose in strong protest saying that rather than have his name associated with what he knew would be a great disaster he voted no but added that there is a "practical plan" for constructing the Panama Canal:

> Build a dam at Gatun and another at Miraflores, or as close to the seas as the configuration of the land permits. Let the waters rise to form two lakes about 80 feet high, join the lakes thus formed wfith a channel cut through the Continental divide, and connect the lakes with the oceans by locks. This is not only the best plan for engineering but also best for navigation. *U.S. Nav. Inst. Proc.*, March 1955, p. 264.)

The one who conceived this plan was the eminent French engineer, Adolph Godin de Lepinay, by so doing, won lasting fame as the precursor of the Panama Canal.

In 1905, after acquisition of the Canal Zone by the United States, President Theodore Roosevelt appointed the greatest railroad builder of our country as Chief Engineer of the Isthmian Canal Commission—John F. Stevens of West Gardiner, Maine.

Qualified by his long experience in undeveloped western mountainous areas of the United States and Canada, iron ore excavation in the Mesabi Range in Minnesota, and extensive study of Panama Canal history, Stevens was eminently to make valid decisions that assured ultimate success. Moreover, he was a determined fighter for causes he felt were right and not overawed by high authority.

Crossing the Isthmus on foot and interpreting the terrain in the light of both engineering and operational needs, he recognized the merits of the De Lepinay concept for the lake and lock type canal, gave full support to Dr. William C. Gorgas in matters of health and sanitation, convinced Secretary of War, W. H. Taft, President Roosevelt and the Congress of the soundness of the plan and, against strong opposition, brought about the great decision in 1906 for the high-level-lake and lock type—Miles P. DuVal, Jr., "And the Mountains Will Move," Stanford University Press, 1947, pages 206–21.

He acquired a major part of the plant for canal construction, created the organization required, brought the project to a point where success was a certainty with an estimated date of completion in January 1915, and resigned to seek other challenging assignments. His contributions during 1905–07 won him appointment by President Roosevelt as the first Chairman and Chief Engineer of the Isthmian Canal Commission and great fame as the basic architect of the Panama Canal.

Stevens was succeeded by Col. George W. Goethals, one of the ablest Army engineers of that time, under whose direction—1907–14—the project was completed under the Stevens plan and organization until it was ready for opening to traffic; and, as the first Governor of the Panama Canal—1914–16—he launched it into the era of operation. For all this Goethals won an outstanding reputation as the builder of the Panama Canal. Nevertheless, he always gave full credit to Stevens whose monument in Stevens Circle in Balboa bears this inscription: "The Canal is his monument." Goethals.

In 1943, as the result of extensive studies of the marine operational problems of the existing Panama Canal during both peace and war, before and after the suspension of construction on the 1939 third locks project, including an operational evaluation of the "sea-level" design, Commander Miles P. DuVal, Jr., then captain of the port, Balboa, in charge of marine operations in the Pacific sector of the canal, developed the Terminal Lake-Third Locks Plan for the future canal. Publicly presented by him on May 20, 1943, before a most knowledgeable gathering of Army, Navy, and Panama Canal officials, engineers and pilots, it caused an immediate sensation on the Isthmus, winning strong support among experienced canal engineers and navigators, including canal pilots—A.S.C.E. Proceedings, February 1947, pages 161–74 gives text of this address.

Because experience at the Atlantic end of the canal with a convenient summit level anchorage just south of the Gatun Locks demonstrated the flexible canal operations there, Commander DuVal recognized the location of the bottleneck Pedro Miguel Locks directly in the south end of Gaillard Cut as the major cause for serious operational problems in the Pacific sector and the necessity for having an "expansion chamber" for traffic in the summit level at the Pacific end to match the layout at Gatun on the Atlantic end and to enable uninterrupted navigation on that level.

Recognized as the "first comprehensive plan for fundamental improvement of the canal based on actual marine operating experience," responsible engineers felt that with the terminal lake concept established it would be possible to "plan further improvements with every assurance of success," attain the "best canal for the future," and that "all engineering considerations associated with the plan are favorable to it"—Principal Engineer E. Sydney Randolph,

Memorandum to the Governor, March 26, 1943.

The plan received the approval in principle by two experienced Governors of the Panama Canal for the major modernization of the existing canal: in 1944, by Gov. Glen E. Edgerton, who recommended it to the Secretary of War for comprehensive investigation; and in 1945, by Gov. J. C. Mehaffey in testimony before the House Committee on Merchant Marine and Fisheries.

From the foregoing summation, the key figures in the evolution of the plan for the future Panama Canal were:

Adolphe Godin de Lepinay who, in 1879 presented the fundamental plan for its construction.

John F. Stevens who, by bringing about the great decision of the President and the Congress for the high-level-lake and lock type, was its "basic architect."

George W. Goethals who, by completing the canal according to the Stevens Plan, won a place in history as the builder of the Panama Canal.

Miles P. DuVal, Jr., who as the result of experience during both peace and war, developed the Terminal Lake-Third Locks Plan—a work that in the opinion of experienced engineers will make its author the architect of the future Panama Canal.

In notable testimony illustrated with schematic operational and data diagrams on June 28, 1978, before the Subcommittee on the Panama Canal, House Committee on Merchant Marine and Fisheries, Captain DuVal strongly supported the major modernization of the existing Panama Canal along the lines provided in the Flood-Murphy-Snyder bill—H.R. 1587, 95th Congress—and opposed further studies of the sea level proposal.

Mr. President, to make the June 28, 1978, statement by Captain DuVal and the introduction of him by Chairman JOHN M. MURPHY of New York available to the Congress and the Nation at large, I ask unanimous consent for both to be printed in the RECORD.

The items follow:

INTRODUCTION OF CAPTAIN DUVAL, JUNE 28, 1978

Mr. MURPHY. The acquisition of the U.S. Canal Zone territory in 1904 and the construction of the Panama Canal, 1904–1914, form a highly important chapter in American history. Our witness today has had an extensive naval career, including service in the Canal Zone during the canal's most crucial period, 1941–1944, when he was in charge of marine operations in the Pacific half of the canal.

As the author of two authoritative books, (1) "Cadiz to Cathay: The Story of the Long Diplomatic Struggle for the Panama Canal"; and (2) "And the Mountains Will Move: The Story of the Building of the Panama Canal," as well as contributor to the Encyclopedia Britannica, and professional magazines on canal history and problems, he combines the qualifications of the experienced navigator, a peace and war canal operating official, and scholar.

As a former Secretary of the Navy Department Shore Station Development Board, it was only natural that he should have evolved, while in the Panama Canal organization, what proved to be the first comprehensive proposal for the future canal derived from marine experience known as the terminal lake-third locks plan. This proposal was submitted to higher authorities and finally to President Franklin D. Roosevelt, who expressed his approval of it as a post-war project.

Today is not the first time that our witness has appeared before this committee. On March 14, 1947, on invitation of Secretary of the Navy, James Forrestal, the entire committee visited the Navy Department and heard an extensive presentation by our witness. He will not speak as an engineer but solely as a former canal operating official and historian.

I now introduce Captain Miles P. Duval, Jr., who will describe certain features in the formulation of our Isthmian canal policy with special reference to the third locks project and the development during World War II of the terminal lake-third locks solution for the future Panama Canal.

---

THE MARINE OPERATIONAL PROBLEMS, PANAMA CANAL, AND THEIR SOLUTION

(Statement by Capt. Miles P. Duval, Jr., U.S. Navy, retired)

Mr. Chairman, members of the Committee on Merchant Marine and Fisheries, and guests: At the outset, I dedicate my testimony today to the great American leaders who formulated our Isthmian Canal policies in the early 20th century and are thus mainly responsible for giving the world its maritime gateway to the Pacific.

The main purposes of this statement are to make four important points:

First, that the Panama Canal needs major modernization;

Second, that an attempt toward such improvement was started in 1939 but suspended in 1942;

Third, that there is a tested plan for major modernization on which $171,000,000 has been expended; and

Fourth, that this plan will provide the best operational canal practicable of achievement, including proposals for a canal of sea level design.

Because certain documents supply important information for the study of canal history and problems, I request that the following be appended to my statement:

(1) Roosevelt, President Theodore. Message to the Congress transmitting the report of the Board of Consulting Engineers for the Panama Canal, February 19, 1906.

(6) Randolph, E. Sydney. "An Engineer's Evaluation of Isthmian Canal Policy," *U.S. Nav. Inst. Proceedings*, vol. 82 (Apr. 1956), pp 395–99.

(7) ———. "Panama Canal—Proposed Improvement of Operating Conditions and Increasing Capacity," Memorandum for the Governor, March 26, 1943 (unpublished manuscript.)

As historically evolved, U.S. Isthmian policy has had two prime objectives: (1) the best canal site; and (2) the best type of canal.

The decision as to site was made by the Congress in 1902 following a dramatic struggle known as the "battle of the routes." The decision as to type was made in 1906 after another sharp contest known as the "battle of the levels." The three key leaders for the last were chief engineer John F. Stevens of the Isthmian Canal Commission, Secretary of War William H. Taft, and President Theodore Roosevelt.

The first major improvement for the Panama Canal after opening to traffic was the construction of the Madden dam and power project completed in 1935. That work increased the reserve water supply for maintaining channel depths in Gatun Lake during dry seasons, supplied additional power for canal operations and reduced the danger of floods from the Upper Chagres River. In addition to this project, canal engineers had long foreseen that the next step in canal improvement would be additional lock capacity and planned accordingly.

When World War II approached, the Congress, on administrative recommendations, authorized the construction of the 1939 third locks project at a cost not to exceed $277,000,000. An undisclosed objective in that project was "conversion" of the existing Panama Canal to "sea level," which had not been specifically authorized in the statute.

Hurriedly considered during those pre-world war II days of hectic activity without adequate consideration of the operational aspects of the problem at a time when there was fear of bombing attacks, this project provided for an additional set of larger locks a short distance away from the existing locks and joining them with existing channels by means of new bypass channels.

It is important to realize that this authorization was not enacted until after the ratification in 1939 of the 1936 Hull-Alfaro Treaty. That treaty provides for "expansion and new construction" for the existing canal (Cong. Record, July 24, 1939, p. 9834). The 1977 Panama Canal Treaty provides for construction of a sea level canal or a third lane of locks". (Cong. Record, Feb. 8, 1978, p. 2704.)

Construction on the third locks project, then hailed as the greatest single engineering work in the world, started in 1940 and was pushed vigorously until suspended in May 1942 because of more urgent war needs for ships, material and manpower. More than $76,000,000 was expended, largely on huge lock site excavations near Gatun and Miraflores, a roadbed for relocating the Panama railroad near Gatun, and a rail-vehicular bridge cross the Miraflores locks, all of which can be used in completing major modernization. Fortunately, no excavation was undertaken at Pedro Miguel.

As a direct consequence of the publication in 1940 of my first book, *Cadiz to Cathay*, I was ordered to the Canal Zone for duty on the eve of U.S. involvement in World War II. When arriving on the Isthmus in February 1941, the Canal Zone was the scene of tremendous activities in connection with the third locks project and vast preparations for defending the canal.

My assignment was as Captain of the Port of Balboa with supervision over marine operations in the Pacific sector of the canal. This area included the southern part of Gatun Lake, Gaillard Cut, the two sets of Pacific locks, Miraflores Lake, and the Pacific Sea level section to deep water, the most hazardous part of the Canal.

Soon after arrival two marine accidents in the canal followed by the suspension of construction on the third locks project led to the study of the problems of marine operations, of which I shall discuss seven crucial ones:

(1) The dangerous bottleneck at Pedro Miguel caused by placing the locks there squarely across the south end of Gaillard Cut thereby forcing southbound vessels to slow in the restricted cut channel and thus to lose rudder force under hazardous conditions.

(2) The double handling of vessels at the Pacific locks, with resulting inconvenience, increased numbers of accidents, and loss of time.

(3) The adverse effect of night fogs in Gaillard Cut on canal capacity and operation.

(4) The surges of 3' maximum amplitude in the Gaillard Cut water level caused by the operation of the locks at Pedro Miguel.

(5) The limited operating range of Gatun Lake water level from a high of 87' to a low of 82'.

(6) The navigation hazards of Gaillard Cut restricted channels, then of 300' minimum bottom width.

(7) The limited dimensions of the present locks, 1000' × 110' × 41'.

To secure the best canal for the transit of vessels, the only practical solution, as demonstrated by more than half a century of operations, is as follows:

(1) The physical removal of the bottleneck Pedro Miguel locks from their position in the south end of Gaillard Cut to enable vessels to leave the cut without stopping.

(2) The consolidation of all Pacific locks in new structures of continuous lifts south of Miraflores near Aguadulce as they are at Gatun.

(3&4) The elevation of the intermediate Miraflores Lake, 54' above mean sea level, to that of Gatun Lake to provide uninterrupted summit navigation from the Atlantic locks to the Pacific locks, create a summit level lake anchorage at the Pacific end of the canal in the Miraflores basin, mitigate the effect of fog on canal capacity and operations, eliminate lockage surges in Gaillard Cut, save transit time, and simplify canal operations.

(5) Raising the summit water level, now 87' maximum, to its optimum height of 92' (report of the governor of the Panama Canal under Public Law 280, 79th Congress, summarized in A.S.C.E. *Transactions*, Vol. 114 (1949), P. 619.)

(6) Continued enlargement of Gaillard Cut as demonstrated by experience to be needed. Widening the cut from 300' to 500' and correlated channel improvements were completed on August 15, 1970, at a cost of $95,000,000.

(7) Construction of one set of larger locks, 1200' × 140' × not less than 45'.

This action program, known as the terminal lake-third locks plan, can be accomplished under the "maintenance" factor in existing treaty proivsions. It would provide a two-way ship channel in the summit level from the Atlantic locks to the Pacific locks with adequate and logically arranged locks at each end of the canal.

Moreover, any major modernization plan that fails to provide for the elimination of the Pedro Miguel Locks is fatally deficient and should be summarily dismissed as being without sufficient merit to warrant any consideration except to refute it. In this connection, proposals for a surge basin, mooring stations, and certain other projects are not realistic solutions of the crucial marine operational problems but mere symptomatic treatments that can only serve to delay or confuse. Besides, the Terminal Lake-Third Locks solution is the proposal fully supported by Panama Canal pilots who have the responsibility for the navigation and movement of vessels in Canal Zone waters and thus know the navigational problems involved at first hand. When these problems are evaluated from all significant angles the Terminal Lake proposal provides the best solution at least cost and can be accomplished with every assurance of success.

A part of the Terminal Lake proposal was the widening of Gaillard Cut from 300' to 500', completed in 1970 at a cost of some $95,000,000. When added to the $76,000,000 previously expended on the Third Locks project, the total is over $171,000,000 already invested toward major Canal modernization.

Many have asked why the Terminal Lake concept was not developed previously. It was.

In 1908, it was proposed by Colonel William L. Sibert but not adopted because it would have caused a delay in opening the Canal. In 1906 it was recommended by William Gerig. Prior to Gerig, it was urged on the Congress as a desirable change in approved plans by Chief Engineer Stevens. Perhaps the inability to secure its adoption was the failure to have facts that could be derived only from actual Marine experience in operating the Canal.

The Terminal Lake solution is so obvious, simple and logical that many have wondered why it was not proposed at the start of the French effort. It was.

At the Paris Congress of 1879, called by Ferdinand De Lesseps to consider the issues of site and type, De Lesseps, relying upon his experience in constructing the Suez Canal, applied the full force of his genius and prestige to securing the approval by that body of 134 distinguished leaders for a canal at the Panama site of the sea level type.

When he saw what was taking place, one member rose in protest. His words, here summarized, were: Of all then present, he was the only one who had studied this subject. Rather than have his name associated with what he knew would be a great disaster, he voted no, but stated there is a "practical plan" for constructing the Panama Canal. "Build a dam at Gatun and another at Miraflores, or as close to the seas as the configuration of the land permits. Let the waters rise to form two lakes about 80 feet high, join the lakes thus formed with a channel cut through the Continental Divide, and connect the lakes with the oceans by locks. This is not only the best plan for engineering but also best for navigation." (U.S. Nav. Inst. Proc., Mar. 1955, P. 264).

Essentially, this was the plan eventually adopted by the United States in 1906 through the leadership of John F. Stevens. The originating genius who conceived it was the eminent French engineer, Adolphe Godin De Lepinay, who, by so doing, won a lasting fame as the precursor of the Panama Canal.

The Terminal Lake proposal now before the Congress has been described by experienced engineers as the most fundamental proposal since the 1906 relocation of the Atlantic Locks and Dam from Bohio to Gatun. Its adoption will complete the De Lepinay-Stevens conceptions and, by providing a balanced lake waterway, will give the world the best canal for navigation practicable of achievement.

As to the "sea-level" canal proposal, this is not a new idea but an ancient one. Studied in 1905–06, it was opposed by Chief Engineer Stevens and President Theodore Roosevelt. Later, in 1924, former Governor of the Panama Canal Jay J. Morrow described it as a "hardy perennial" and that apparently there would always be "someone to argue for it, no matter how often the impossibility of realizing any such scheme within practicable limits of time and cost may be demonstrated." (Jay J. Morrow, personal letter to John F. Stevens, May 31, 1924.)

In 1929–31, it was examined by a U.S. Army Interoceanic Canal Board but opposed by Governor Harry Burgess who stated: "As the experience in operating the canal has proved that vessels of the largest size can transit a lock canal safely and expeditiously, there appears to be no necessity for converting it into a sea-level canal, so far as can now be foreseen." This reference was to the transits in 1928 of the *Lexington-Saratoga* class of aircraft carriers, the overall dimensions of which were 888' by 106'. The report failed to receive the support of the chief of engineers who merely recommended its publication. (Ho. Doc. No. 139, 72nd Congress.) The Congress took no action thereon but in 1939 authorized the construction of a third set of locks. (Ho. Doc. No. 210 and Pub. Law 391, 76th Congress.)

In 1942, because of the congestion in Balboa Harbor of vessels loaded with ammunition, canal authorities became concerned about a potential Halifax disaster, which was a factor leading to the enlargement of the harbor. Today, super tankers and liquified natural gas (LNG) vessels create grave dangers. The record of super tanker disasters, even in ocean spaces, (Nat. Geo., July 1978, pp. 102–24) and possible calamitous explosions of LNG vessels (Lib. Cong. LNG Safety, siting and policy concerns, 1978, pp. xi–xiii) raise serious questions as to the wisdom of permitting such vessels to navigate in restricted waters of populated areas, including any type of interoceanic canal.

In regard to the capacity of an isthmian canal to handle naval vessels, the modernized existing canal would be able to transit efficiently and expeditiously the entire U.S. Navy except 13 large aircraft carriers.

In 1943, as the result of experience in World War II, extensive studies of marine operations in the Panama Canal from 1914 through 1942, and an operational evaluation of the then projected "sea-level" plan, there was developed in the canal organization the well known terminal lake-third locks plan as offering the best solution for increased capacity and operational improvement of trans-isthmian transit facilities. This plan was submitted on February 25, 1943, to higher canal authority, publicly presented in Balboa, C.Z., on May 20, 1943, before the Panama section of the American Society of Civil Engineers, high army, navy and canal officials, and published by the society after World War II under the title of "the marine operating problems, Panama Canal, and the solution." (*A.S.C.E. Proceedings*, Feb. 1947, pp. 161–74.)

In 1944, after completing his preliminary studies of the plan on January 17, Governor Glen E. Edgerton recommended it to the Secretary of War (now Army) for comprehensive investigation but warned the secretary that it was possible that "advocates of a sea-level canal would oppose *unjustifiably* (emphasis supplied) any expensive change in present plans on the grounds that it would defer the time when the conversion of the existing canal to sea level might otherwise be authorized." (*Congressional Record*, June 21, 1956, pp. 10756–66 contains the full text of the Edgerton report preceded by a summary of its significant points.)

In 1945 after the advent of the atomic bomb, during testimony on November 15 before the Committee on Merchant Marine and Fisheries, Governor Joseph C. Mehaffey, in response to questions, approved the terminal lake-third locks plan in principle for completing the third locks but did not commit himself as to type of canal. (Executive hearings on H.R. 4480, 79th Congress, November 15, 1945, p. 9.)

In 1947, the voluminous report under public 280, 79th Congress, recommended only the sea level project in the canal zone with a much improved operational channel alignment for major canal construction (A.S.C.E. transactions, vol. 114 (1949), p. 608). That report failed to receive executive approval and President Truman transmitted it without comment or recommendation to the Congress, which did not act upon its major objective.

Also in 1947, the National Assembly of Panama, on December 22, amidst scenes of unexpected mob violence rejected the defense base treaty and the United States promptly evacuated all military bases in that country. Those events served as warnings against hasty action by the Congress and the 1945–47 sea-level drive lost its momentum.

In 1960, an independent engineering inquiry under the direction of the Committee

on Merchant Marine and Fisheries opposed the construction of a sea-level canal in the Canal Zone because of possible "slides of the first magnitude" with "serious danger of a long interruption of traffic." (HO. Rept. No. 1960, 86th Congress, p. 5.)

In 1970, the report under Public No. 88-609, 88th Congress, as amended, recommended construction of a "sea-level" canal located about 10 miles west of the existing canal.

In 1973, Panama Canal pilots strongly supported the terminal lake-third locks plan and opposed the "sea-level" proposal as "needlessly expensive, diplomatically hazardous, ecologically dangerous and less satisfactory operationally than the existing canal." (Congressional Record, Nov. 15, 1973, p. 37176, copy of pilots' supporting resolution attached.)

In 1974, Governor David S. Parker (1971-75), in a notable address on the canal problem, made this significant statement when comparing the "sea-level" proposal with the existing canal as improved: "Navigation through such a (modernized lock) canal would be relatively simple because it would make use of the existing Gatun Lake, avoiding the currents and initially narrow chanels of a sea level canal." (David S. Parker, "The Panama Canal" circa 1974.)

In regard to the comparative operational characteristics of the types of canal, it is self-evident that the unrestricted channels in the lakes of a modernized high-level-lock canal enable better navigation than the necessarily restricted and much longer narrow channels of any sea-level project wherever located. The advantages of unrestricted navigation in the lakes outweigh the minor hazards and time lost by passage through the locks. Furthermore, the terminal lake-third locks solution is not only the most economical plan but, as previously stated, can be accomplished with every assurance of operational success for it has been tested for more than 60 years at Gatun and found eminently satisfactory.

Thus, when the more significant aspects of the canal question are evaluated objectively, the solution is not a sea-level project but the major modernization of the existing canal by completing the suspended third locks project adapted to the principles of the terminal lake-third locks solution as set forth in the Flood-Murphy-Snyder bill (H.R. 1587, 95th Congress.)

This bill provides for the elimination of the bottleneck locks at Pedro Miguel, the consolidation of all Pacific locks in new structures just south of Miraflores at Aguadulce, raising the summit water level from 87 to 92 feet, the construction of one channel of larger locks, and the formation of a summit level terminal lake in the Pacific end of the canal to correspond with the layout at Gatun. (Vital speeches, September 1, 1977, p. 689.) As previously stated, a total of more than $171,000,000 has been expended toward such major modernization.

The foregoing record shows that the major increase of capacity and navigational improvement of the existing canal has been under intermittent consideration by the Congress since 1939. With the exception of the widening of Gaillard Cut all other improvements have been mere symptomatic treatments that do not solve the major marine problems.

In regard to proposals for a "sea-level" canal, there has been no stronger statement than the January 2, 1973, report of this committee that it is "irrelevant and should not be allowed to confuse (the question) of the canal's major needs, i.e., its increase of capacity and operational improvements." (HO. Rept. No. 92-1629, p. 36.) The meeting of these requirements as outlined in H.R. 1587 will provide the best conditions for the transit of vessels.

In view of all the above history, the availability of a tested plan for major modernization derived from actual experience in both peace and war that can be constructed with every assurance of success, and the expenditure of $26,600,000 on the last two "sea-level" studies ($4,600,000 for the 1947 report and $22,000,000 for the 1970 report), there is no valid reason for further studies of such type, which would be less satisfactory operationally than the existing canal. Far better use could be found for the funds required for such studies that would only serve to delay further the canal's long needed major increase of capacity and operational improvement.

---

[From the CONGRESSIONAL RECORD, Nov. 15, 1973]

PANAMA CANAL PILOTS ASSOCIATION,
*Washington, D.C., October 25, 1973.*

Re Panama Canal—Third Locks-Terminal Lake Plan.

DEAR CONGRESSMAN: The Panama Canal Pilots Association strongly supports the Thurmond-Flood bills regarding major modernization of the Panama Canal.

We have given much thought and study to this matter. Furthermore, in our work of transiting vessels through the Canal we constantly observe the operations and are, of course, thoroughly familiar with the physical features of the Canal.

The original engineering and construction were magnificant. The engineers involved were very farseeing and the Canal has essentially met the needs of world shipping for over 60 years. However, time and progress are fast catching up with and will soon overwhelm the Panama Canal as now structured.

Attached hereto, is a copy of a Resolution which was passed unanimously at a very well attended General Meeting of our Association held on October 15, 1973.

We hope that you will be able to support the Thurmond-Flood bills.

Sincerely yours,

Capt. W. H. VANTINE,
*President.*

---

PANAMA CANAL MAJOR MODERNIZATION—OCTOBER 15, 1973

Whereas, since 1914 the pilots of the Panama Canal have accumulated a vast knowledge concerning its marine operations through thousands of transits on all types of vessels; and

Whereas, during World War II extensive studies in the Canal organization of marine operations conclusively established the location of the bottleneck at Pedro Miguel Locks in the south end of Gaillard Cut as the fundamental operational error in constructing the Canal; and

Whereas, as a result of those World War II studies, there was developed in the Canal organization and approved by a committee of our most distinguished senior pilots what is now known as the Terminal Lake-Third Locks Plan; and

Whereas, this plan has been consistently recognized by various responsible independent navigation interests as providing the best operational canal practicable of achievement; and

Whereas, more than $171,000,000, has been expended toward the major modernization of the Canal, $76,357,405 on the suspended Third Locks Project and some $95,000,000 on the enlargement of Gaillard Cut; and

Whereas, the several items in the 1969 Improvement Program for the Panama Canal, though important, are non-basic in character and no solution for the Canal's major marine operational problems; and

Whereas, the Thurmond-Flood bills for the major modernization of the Canal now before the Congress will provide increased lock capacity for larger vessels, greater transit capacity, and eliminate the Pedro Miguel bottleneck locks; and

Whereas, the plan provided for in these bills would preserve the existing fresh water barrier between the oceans and thus continue to protect them from the biological hazards feared by respected scientists in any sea level undertaking; and

Whereas, responsible organizations and informed experts oppose the construction of any sea level canal as needlessly expensive, diplomatically hazardous, ecologically dangerous and less satisfactory operationally than the existing canal; now therefore, be it

Resolved, by the Panama Canal Pilots Association that it supports the Terminal Lake-Third Lock solution as provided in the Thurmond-Flood bills; and

Resolved, that the Panama Canal Pilots Association urges the Governor of the Canal Zone to use the full force of his office to support prompt enactment of the pending legislation for major canal modernization; and

Resolved, that the Panama Canal Pilots Association opposes the construction of a new canal of so-called sea level design; and

Resolved, that the Panama Canal Pilots Association directs that copies of this resolution be sent to the following:

President of the United States.
Vice President of the United States.
Secretary of State.
Secretary of Defense.
Secretary of the Army.
Secretary of the Navy.
All Members of the Congress.
Leading Marine Organizations and Periodicals.
American Society of Civil Engineers.
Society of American Military Engineers.
American Legion.
Veterans of Foreign Wars.

Capt. W. H. VANTINE,
*President, Panama Canal Pilots Association.*

---

Mr. Chairman, two former members of the Congress who made significant contributions to increased understanding of elemental Canal issues were Representative Willis W. Bradley of California, a retired naval officer and ordnance expert and a member of the Committee on Merchant Marine and Fisheries; and Representative (later Senator) Thomas E. Martin of Iowa, a retired Army officer. Both of them were close students of interoceanic canal problems.

In a comprehensive discussion of the Panama Canal in 1948, which was soon after the advent of the atomic bomb, Representative Bradley summarized his views on crucial canal security as follows:

"As far as I can ascertain, the greatest authorities on modern weapons of war who have given this subject serious attention hold uniformly that any canal would be critically vulnerable to the atomic bomb regardless of type; that a sea-level canal would be in the same security class as a lake canal; that a sea-level canal could be closed for prolonged periods of time beyond any hope of speedy restoration; and that a sea-level canal cannot be considered secure in an atomic war. These same authorities also agree that the atomic bomb is irrelevant as a controlling factor in the planning of operational improvements for the Panama Canal." (*Cong. Record*, April 21, 1948, p. A2449).

Congressman Martin, on many occasions, expressed similiar views regarding canal security and cited the authorities upon which he based them.

Because the crucial parts of their conclusions of both of these two distinguished leaders are still applicable, some with even greater force, I request that the following list of their statements be included at this point in the hearing record:

Bradley, Honorable Willis W. "What of

the Panama Canal?" Address before the Cosmos Club of Washington, D.C., April 19, 1948. *Congressional Record* (80th Congress, 2nd Session), Vol. 94, Pt. 10 (April 21, 1948), p. A2449.

## REBUILDING OUR NAVY

● Mr. HARRY F. BYRD, JR. Mr. President, the September issue of the Harvard Journal of Law and Public Policy will feature an article by former Secretary of the Navy, J. William Middendorf, entitled "We Must Rebuild Our Navy Now."

Secretary Middendorf was Secretary of the Navy from 1974 to 1977, and is now president of Financial General Bankshares. His interest in national security affairs has been long and serious. He is well qualified to comment on such matters.

The article is not a pleasant one, for it raises concerns that human nature often tries to ignore.

I have read the article, and it has left a firm impression. It reminds one of the late 1930's when many responsible people refused to read the warning signals of war.

Adolf Hitler had begun the remilitarization of Germany and had sent many signals of his intended aggression.

Many refused to accept those signals for what they were.

The result was a catastrophe—a catastrophe that cost millions of lives—a catastrophe that could have been prevented.

Secretary Middendorf's article points to many of the same kinds of warning signals that are in evidence today and urges the reader to take heed.

I urge my colleagues to read this article and ponder its relevance.

I ask that the article be printed in the RECORD.

The article follows:

WE MUST REBUILD OUR NAVY NOW

(By J. William Middendorf II)

Since retiring as Secretary of the Navy in 1977, I am, of course, no longer responsible for trying to see to it that the Navy gets its share of the defense budget. I do not own stock in the Navy. I am just another American citizen who feels that we should insist that we maintain a military posture strong enough to deter war, and to insure we would prevail if our vital interests and freedoms were threatened in an actual war situation. I believe that all wars have come about primarily from one side perceiving weakness in the other, and that true peace is maintained only from a perception of at least roughly equal strengths. For most of the post-war period, our position of strength was undisputed but in recent years there has been a very serious decline in our real or perceived strength relative to the one potential adversary who can threaten us, the Soviet Union. In fact, this relative decline has been rapid and we are approaching a period in which four or five years from now, we may find ourselves dealing from weakness in a number of areas. Should we end up in this position, we would be forced when threatened to back away one at a time from our vital interests around the world, and when finally pushed to the wall, we would then attempt something desperate which would be destabilizing in the extreme.

How much better to rebuild our strengths now during the precious moments of freedom we are still enjoying.

The warning signals are up all over. To confine it to my own area of expertise, consider some of the dramatic events that have been occurring for years on the world's oceans: just after the outbreak of hostilities during the Middle East War in 1973, the Soviet Navy massed 96 ships on station in the Mediterranean, nearly doubling the size of its normal fleet there; a force that included a powerful array of cruisers, frigates, destroyers, and escort ships, amphibious ships, fast, well-armed offshore patrol boats, intelligence collectors and approximately 25 submarines, some of the latter nuclear-powered. We were able to reinforce our Sixth Fleet to a strength of 66 units, including three carrier task forces. Along with a full complement of more or less conventional weaponry, Soviet combatants were armed with deadly anti-ship cruise missiles, a weapon not then—and not yet—in our own inventory. The Soviets closely shadowed our carrier forces. In turn we kept airpower over them, ready to shoot down on them in the extremely short interval between the telltale lighting off of their missiles and the time they are actually fired. The Soviets had no airpower in the area, but airfields were available in the Crimea and Egypt and Libya to their sizable force of land-based naval bombers. It was "High Noon" in the Mediterranean. When the Israelis trapped the Egyptian Third Army in the Sinai Desert and were threatening its destruction, the Kremlin delivered a tough ultimatum to Washington: call off the Israelis or we're going in—and indeed the Red Army was preparing to drop airborne troops in the Sinai. To underline the seriousness of the situation and perhaps to send the Russians a signal, the President placed our Armed Forces on alert (Def. Con III) one of the few times since World War II.

I vividly recall following from my office the great drama that took place that long night downstairs in the "tank" (the situation room in the basement of the Pentagon), and over at the White House as the members of our Joint Chiefs of Staff, the National Security Council and the President wrestled with their momentous decisions. I felt the tension on our great naval leaders as they debated our chances for victory (or even survival) in that far away duckpond against the greatest array of potentially hostile forces our Navy or any navy had ever faced. I am personally convinced that World War III, and thus the survival of mankind, hung in the balance that night. Our Navy, I am proud to say; was the only substantial force in being—and on the spot, as it so often is—that permitted us to negotiate from strength. The next morning as a result of negotiations, the Soviets began to withdraw their ships, and the crisis passed.

Perhaps it was just as well, but I noted how little press coverage was given to this, my candidate for the most significant event, or non-event, since World War II.

Many differ as to the outcome should trouble have come. Some believe that the Soviets would have decisively defeated us because they had us outgunned on the surface and in the subsurface, and could have added massive airpower at any time. Others dispute that, insisting that we would have had ample warning had the Soviets begun to move airpower, that we could have taken appropriate counter action, and that we would have in any case retained air superiority—which, along with our ability to jam the electronics systems that guide Soviet anti-ship cruise missiles and our superior anti-submarine warfare capability would have given us the edge. Fortunately, we didn't have to find out, for what is not debatable is that, regardless of who had prevailed, it would have been exceedingly costly for us in terms of men, ships and aircraft, and half of the carriers assigned to defend our entire East Coast would have been bottled up in the Mediterranean Sea.

But the important point is that the Soviets felt confident enough nearly five years ago to boldly move strong naval forces into a volatile situation in what for a generation had been regarded as an American lake and to issue Washington an ultimatum. The U.S.-Soviet naval face-off during the October 1973 War was full of ominous meaning for the future.

Equally ominous for the future were the Soviet's navy war games held in 1970 and again in 1975. These were "Okean (Ocean) 70" and "Okean 75". In these vast maneuvers, the Soviets set about evaluating for themselves, and, no doubt, to show us their newly developed threatening worldwide capabilities. On a signal, hundreds of air surface and underwater combatants were spread out over the world's oceans accompanied by merchant convoys, intelligence collectors, repair ships and oilers, and engaged in remarkably complex maneuvers. Advanced communications systems enabled missile-armed surface ships, submarines and aircraft rapidly to trade targeting information and team up in imaginatively conceived and well-coordinated simulated attacks on submarine and surface ship targets. Soviet naval air armadas simultaneously attacked "enemy" warships in both the Atlantic and Pacific. In Moscow, the Navy Commander-in-Chief maintained instantaneous communications with his major units all over the world, was kept advised in "real" (instant) time as to the status of his air, surface and undersea units and "the enemy's" posture, and was thus able to rate the performance of his individuad commanders. In the Atlantic, the exercise stretched from Norway's North Cape to the Azores under an umbrella of U.S.S.R.-based airpower. Forces in the Caribbean operated under Soviet air cover flying out of Cuba. Soviet Navy bombers based in the Guinea patrolled Africa's West Coast. Two missile-armed cruisers led anti-carrier operations between Sicily and Italy in the Mediterranean. Bombers based in Soviet Central Asia and near Berbera, Somalia, covered a strong Indian Ocean force. Four potent task groups worked in the Western Pacific. Extensive maneuvers were conducted in the Black Sea. Everywhere, the Soviets were "at war". It was mind-boggling, the greatest show of naval strength in world history!

More recently, the Soviets just last April 1977 suddenly flooded 89 attack (anti-shipping) submarines into the North Atlantic in a spine-chilling exercise of unprecedented scope that all but overwhelmed NATOs surveillance systems. NATO had to concentrate primarily on the U.S.S.R.'s strategic (long-range nuclear ballistic missile-carrying) submarines, keeping its most effective tracking systems—submarines—assigned to them, but at the same time mount an intensive tracking effort against the Soviet attack submarines with less effective systems: surface ships and aircraft. Not easy, especially since the Soviet attack fleet was accompanied by powerful surface and air forces. Imagine what such a Soviet submarine force could do in the event of real war! Nazi Germany, which began World War II with 57 submarines—perhaps only a quarter of them fully operational, and all of them primitive by today's standard—very nearly succeeded in severing our Atlantic supply lines, sinking some 14,-000,000 tons of shipping. Clearly, the lesson was not lost on the Soviets.

Secretary of Navy Claytor said recently: "Today the submarine poses the single most dangerous threat to our life lines at sea. Covert by design, a modern submarine contains the power to cripple these life lines quicker and mcre effectively than any other threat."

The events described above signal an alarming and accelerating shift in the balance of naval power The Soviet Navy's ability to perform its particular mission has been increasing; the U.S Navy's ability to perform its mission has been decreasing. Let's understand what those missions are or should be: The United States really is an island nation. Our industrial output, our way of life, is dependent on the unimpeded flow to us of essential raw materials and energy—46 of the 47 critical raw materials, including half of our oil, vital to American industry are wholly or partially imported. Some 99 percent of our overseas trade is carried by ship. That's one reason we have security treaties and agreements with 43 nations, 41 of them overseas. Such accords are in our own vital interest. I believe very strongly that essential to our survival as the island nation that we are is that we have a navy capable of posing a believable deterrent in case of a war and capable of keeping our sea lanes open.

The Soviets by contrast are relatively self-sufficient in energy and raw materials and can supply most of the Warsaw Pact allies with military and economic support over a contiguous land mass. The Soviet Union is the opposite of an island nation—a truly peaceful Soviet Government without expansionist motives would find little need for the highly expansive global-capable Navy it has built and is still building. It would be content with adequate coastal defense forces it maintained a decade and a half ago.

How does one explain the recent Soviet buildup? The masters of the Kremlin have always wanted to be masters of the world.

The Committee on The Present Danger describes Soviet Russia today "as a country in which a ruling elite and those whom it designates live comfortably, while the remaining two hundred fifty million citizens not only have few material advantages but are deprived of basic human liberties. This elite can enjoy its monopoly of advantages only so long as it is able to keep the deprived population under effective control—a significant relaxation of that control could spell the end of its favored status and advantages. The elite, however, is not guided merely by self-serving motives. The Soviet leadership asserts that it is the vanguard of a revolutionary society which has discovered the fundamental laws of history. The openly stated ultimate Soviet objective is the worldwide triumph of Communism. This triumph would give the Soviet elite ready access to the world's resources, both human and material; it would also do away with all external challenges to its privileged position by eliminating once and for all alternate political and social systems."

The Soviets became aware in the early 1960s that they could not influence world events without a blue water navy. Powerless to act in the 1956 British and French Naval expedition that invaded Suez, and again powerless in 1958 when the United States Navy moved strong forces into the Eastern Mediterranean to abort a communist takeover of Lebanon; finally the Cuban missile crisis was the last straw when an American Naval blockade combined with the threat of nuclear retaliation forced the Soviets to remove nuclear missiles they were installing in Cuba. That was the watershed, after which begin the U.S.S.R. arms buildup, the greatest in world history, and the naval component has not been shortchanged.

For openers, the U.S.S.R. now has the world's largest strategic submarine fleet, 60 having been launched in the last decade, 8 in 1976 alone, an extraordinary feat which bespeaks a well-organized industry humming with momentum, and they are continuing to add to that fleet. The new Delta-class submarine of which they already have 27 operational is capable of firing a missile from the U.S.R.R.'s relatively protected home waters to reach every significant target or city in the United States. Its 4200 mile range missiles exceed by 1700 miles the range of our most advanced submarine-based missile, the Poseidon. Our Trident I missile, not yet operational, will approximate the range of the Delta class missile when we can produce it.

The fact that their missiles can reach our home land from their own waters enormously complicates matters for our anti-submarine warfare (ASW) forces. In addition, the Soviets have 34 Yankee-class submarines with 1300 mile missiles and 30 older submarines capable of carrying 350 to 650 mile nuclear missiles. The latter probably are for theater use—i.e., for use within a specific battle area—to pose a presence and capability meant to neutralize our stronger allies. Last year, six of the diesel-powered boats were transferred from the Northern Fleet to the Baltic; it's the first time ballistic missile submarines have been stationed in the Baltic.

Thus, the Soviets have approximately 90 ballistic missile-firing submarines prowling the depths, and are still building. About 35 percent of all Soviet strategic missiles are now aboard submarines, and the percentage will rise as new boats keep coming out of the U.S.S.R.'s busy shipyards. The Soviets also currently have two new missiles in advanced stages of developemnt for their Delta and Yankee-class fleets which will have even longer ranges, greater accuracies and increased explosive power.

In contrast to this expanded Soviet submarine threat, our own Navy has a ballistic missile firing submarine fleet of 41 Polaris and Poseidon submarines, all relatively old. Our first Trident boat, which will be roughly the equivalent of the Soviet's Delta-class won't reach the water until almost 1980, by which time the Soviets will have nearly 30 Deltas at sea. The American plan is to keep adding Tridents at the rate of one or two a year until we have a total force of ten or more, and eventually each will carry 24 longer range Trident II missiles—when the latter is developed in the still distant future.

Meanwhile, the Soviets recently have been engaged in a massive civil defense effort that is designed to protect a significant portion of their war-making capability and civilian population in the event of a nuclear exchange. The fact that we lay virtually naked in this area opens us up more and more to nuclear blackmail, because we and they know in advance that our losses would vastly exceed theirs.

Nevertheless, I don't believe that the rapid buildup of the Soviet strategic submarine force means that a nuclear assault against us is imminent. We still could deliver a lot of destruction upon the U.S.S.R., and I doubt the Kremlin wants that. Rather, I am convinced that the entire Soviet nuclear building is intended as a deterrent, to neutralize the American nuclear arsenal and free the Kremlin to employ its conventional naval forces in support of an ambitious foreign

policy designed to subvert the world's raw materials and oil, with the obvious implications to the free world of those actions.

Which gets us to the Soviet Navy's mission: its architect and Commander-in-Chief, Fleet Admiral Sergei Gorshkov, insists that "the Soviet navy is the only armed force capable of supporting state interest on peacetime." To that end, Gorshkov has stated that the Kremlin will have a navy that is "second to none," that contributes importantly to the cancelling out of the American nuclear threat, that can help assure victory if deterrence fails, that can cut our vital supply lines to our sources of raw materials and energy, that can separate us from our allies, that can dominate the seas, and, finally, that can function worldwide as an effective instrument of state policy.

How close is Gorshkov to achieving his "second-to-none" navy? Not long ago, Admiral James L. Holloway, III, our recently retired former Chief of Naval Operations, who served brilliantly in that role, gave the Congress the following sober assessment: in the event of conflict involving the most vital American interests, we retain "a slim margin of superiority today." We could hold open the North Atlantic sea lanes to Europe, but would suffer heavy losses in the early stages. In the Eastern Mediterranean, our ability to operate would be "uncertain at best". In the Pacific, we could hold open the sea lanes to Hawaii and Alaska—but we "would have difficulty protecting our sea lanes of communication into the Western Pacific." Holloway made it clear that he was talking about today. The way the trends are going now, would the Chief of Naval Operations in the early 1980s be able to report any margin of superiority? What would be the result if he had to report major weaknesses relative to the Soviets while the Soviets were threatening, or were acquiring through one of their proxies such as the Cubans, raw materials vital to our own interests?

It takes up to five years to build a major warship, more for an aircraft carrier, so the profile of our Navy of 1981 and 1982 is already set, for better or for worse.

With our worldwide interests and commitments, we can't afford not to be superior at sea. That "slim margin" with which Admiral Holloway credits us now is represented by our 13 aircraft carriers. We normally have two operating in the Mediterranean two in the Atlantic, two in the Eastern Pacific, two to three in the Far West Pacific or for occasional deployments to the Indian Ocean, and up to four in overhaul or change of station situations. Considering our far-flung needs, that is not an over-abundance of seagoing airpower; when the Soviets started their naval buildup, we had 26 carriers deployed around the world. More than any other naval power, we ourselves demonstrated what an effective weapon system the carrier is. Two years ago, ironically, in one of naval history's most significant events, the Soviets deployed their first carrier, the *Kiev*. At 45,000 tons, she's designed to raise havoc with our submarine forces, but could also mount a fleet air defense, launch attacks on surface vessels and support an amphibious landing force (the Soviets also are increasing the size of their "infantry", or Marine Corps). The *Kiev* carries 35 V STOL (Vertical/Short Takeoff and Landing) aircraft and helicopters; two sonars for finding submarines; a nuclear-capable anti-submarine missile launcher; anti-submarine rockets and torpedoes; eight large surface-to-surface missile launchers; two twin 76mm guns; eight small caliber Gatling guns. She is also extensively equipped with communications gear and electronics systems for jamming enemy communications radars and weapons guidance systems.

Second and third *Kiev*-class carriers are under construction or nearing completion. In the 1980s, we probably will see larger carriers joining the Soviet fleet. Along with an expanding amphibious force, a large fleet of surface combatant ships, a large and growing merchant fleet and an improving ability to replenish while underway, Gorshkov's development of carrier forces indicates a determination to challenge the United States seriously for sea control and to project Soviet power into distant areas. Indeed, Gorshkov says he wants to be able to do everything from showing the flag to sending naval infantry ashore. His carriers do not yet give him the long-range striking powers ours provide; but he has 1250 land-based naval bombers. Some 30 of them are the new supersonic *Backfires*. These can range far into the Western Pacific, can cover the Atlantic approaches to Europe, the Persian Gulf, the northern reaches of the Indian Ocean, the Sea of Japan, much of Africa, and the entire Mediterranean—*Backfire* squadrons in the Crimea pose a terrible threat to our Sixth Fleet.

The Russians have tried to offset our superiority in aircraft carriers with an arsenal of deadly anti-surface ship cruise missiles, arming scores of their surface ships and submarines with them.

To counter the Soviet cruise missile, our Navy has developed the Aegis anti-missile defense, and we must move ahead with Aegis to ensure that in the event of conflict we are going to retain a navy and merchant fleet. A few platforms have been planned for the Aegis but we need many more. Even with work beginning immediately, it will be 1981–82 before the system can be built and deployed.

The trends have favored the Russians. In addition to their large and growing strategic submarine force, which now outnumbers by almost twice the size of ours, they also have the world's largest "attack" submarine fleet, used for anti-submarine and anti-shipping purposes, numbering 200 submarines, all are torpedo-armed, and nearly 70 are additionally armed with anti-surface ship cruise missiles. That force will improve—in capabilities if not numbers (which is also possible). The technology required to yield a new generation of nuclear-powered attack boats has been several years in development, and construction is expected to begin as quickly as the Soviets complete their strategic submarine force.

In contrast, we have a total of 77 torpedo-armed submarines.

But that's only the beginning. The Soviets have more than all kinds of surface combatants than we have, more cruisers, more destroyers and other escort types—they outnumber us by something as absurd as 850 to 15 in "small" (less than 1000-ton) attack boats. Although a carrier in the area not otherwise engaged could deal effectively with most such smaller vessels, there is nothing unimportant about them—they are fast, maneuverable, and hard to hit, and they pack a lethal wallop. During the 1967 Arab-Israeli War, a single missile from such a Soviet-supplied Egyptian boat sank the Israeli destroyer *Eilat*. During a 1971 conflict, missiles from a Soviet-supplied Indian boat sank one Pakistani destroyer, badly damaged another and are believed to have sunk several merchant ships. By the time of the 1973 Middle East War, the Soviets were confident enough to keep a small guided missile boat stationed close to our big carrier the *John F. Kennedy*. It gave us something else to think about!

In another vital area, amphibious ships used to carry tanks and landing forces into beach areas, they now have over 100 of these. We would need 48 of our force of 63 to embark a single marine division and its associated air wings. Even that would take some doing, since our amphibious ships are scattered all over the Atlantic and Pacific—we would be pressed to completely respond to a major strike order in less than two months' time. Our Marines, under the leadership of Medal of Honor winner General "Lou" Wilson, are the best in the world and they are, as always, ready for combat "at any time in any climate," but from an amphibious transport standpoint alone it can hardly be said that we, the nation, are battle-ready!

The list is endless. The Soviets have now built the largest naval mine warfare force. It has the world's largest fleet of intelligence collectors (so-called "spy ships"); 50 are spread across the world's oceans. Some are always on station near our Polaris-Poseidon submarine bases at Holy Loch, Scotland; Rota, Spain; and Guam; in the Pacific. Others monitor the ship traffic that passes through the world's strategic waterways, such as the Strait of Gibraltar. Others keep positions off the Southeastern United States, where they can keep watch on our submarine base at Charleston, S.C., and our Cape Canaveral, Florida, missile test center. Others are always close to all NATO and American naval exercises. They are, in effect, everywhere our Navy moves. (Some press reports still indicate that Soviet intelligence collectors are disguised as fishing trawlers. Not so. Some are of modified trawler design, but most are of relatively recent construction. All fly the Soviet naval ensign and there is no attempt any more to hide their capabilities or purpose.)

We have no such intelligence collection force. We once had a group of old, converted World War II cargo ships on the job. Then, after the North Koreans seized one, the U.S.S. *Pueblo*, and the Israelis shot up another, the U.S.S. *Liberty*, we opted out of the business.

All new Soviet ships are built for chemical, biological and radiological (CBR) warfare and are regularly put through highly sophisticated CBR exercises.

A key role for an expanded imperialistic nation like the Soviets is to show the flag in more and more places, hoping to influence events. They now cruise in the world's major seas. Every American maneuver that I have ever attended in the Mediterranean was accompanied by Soviet "tattle tales", usually a destroyer. Soviet task forces have circled one of our states, Hawaii. Another has entered the Gulf of Mexico. They now enjoy extensive port facilities along the vital oil routes from the Middle East, in the Mediterranean, the Caribbean, and on the West Coast of Africa. As their proxies, in the push for the raw materials of the world, the Cubans have expanded their activities in Angola, in the Horn of Africa, and in South Yemen, with Soviet naval units never far away. The proximity of the Cubans to oil rich Saudi Arabia upon which the West depends is of ominous importance.

To stay modern and at full strength at sea, the Soviets are engaged in a continuing intensive naval research and development program. They are concentrating on such fields as anti-submarine warfare, missile technology, satellite systems, surface effect ships,* and electronics. The fruits of their vigorous program are being realized in five major shipyards that produce submarines, six more that build major surface combatants and a number of others that are producing minor combatants and support ships. The major yards all have been expanded and modernized within the past five years. A steady progression of newer, larger, more versatile, more capable ships are being designed and built.

Admiral Holloway put it in the clearest terms in presenting the Navy's budget to Congress last year.

"The primary threat facing the United

*See *"Here Comes the 100-mile-an-hour Navy"*, The Reader's Digest, August 1977.

States and its allies comes from the Soviet Union. The Soviet Navy today has capabilities in all naval warfare areas and continues to grow in capability, especially in its ability to conduct multi-dimensional naval warfare in Okean (ocean) areas remote from the Soviet Union."

Despite a strong and growing Soviet presence on virtually all waters of the globe, despite the existence of a potential Achilles' heel in our dependence on foreign sources of liquid fuel, and despite the necessity to maintain two virtually independent navies—a strategic deterrent ballistic missile submarine force and the larger force of tactical ships, aircraft and submarines—there remains a very real demand, in Congress and elsewhere, to reduce expenditures on the Armed Forces. The result, insofar as the current U.S. Navy budget is concerned, seems to be an emphasis on Army-related expenditures to bolster the central front of NATO. Unfortunately, this justified emphasis comes at the expense of the Navy, which has equally crucial NATO roles.

Still these questions persist:

What are the roles in the international arena—especially the NATO arena—of a U.S. Navy force at peace?

Does the Navy today have sufficient resources to carry out these roles now and in the future?

The United States Navy has three main roles: strategic deterrence—carried out by the ballistic missile submarine force; projection of power in support of U.S. interests and allies; and maintaining the freedom of the traditional ocean routes of commerce, referred to today as the sea lanes of communication (SLOC). The latter two roles overlap to a great degree in wartime. Yet, there is an even more crucial international role of the U.S. Navy—more crucial because of its continuing importance in international commerce. This is, of course, U.S. support of and, hence, U.S. Navy involvement in, NATO. The U.S. as a country is historically and politically committed to a strong and effective Atlantic alliance. This fact has been reemphasized by the current United States government. Less obvious to the Administration's system analysts, however, has been the fact that the North Atlantic Treaty Organization is also very much a maritime affair. Allied naval strength is the cornerstone to integrity of the sea lanes between America and Europe and, hence, very much one of the principal tenets of NATO's strength. While the U.S. Navy cannot alone guarantee the security of NATO, it is the mainspring among an integrally functioning community of naval powers. Into this tenuous situation is interjected the suggestion, reportedly attributed to some U.S. Defense Department analysts, that in a NATO war U.S. aircraft and carriers and supporting ships should be withdrawn from the Mediterranean. Imagine what political mischief such a policy, if adopted and enunciated, would do to the southern flank of the alliance! Similarly, the thought reportedly put forward by U.S. Defense Department analysts that the Norwegian sea should be conceded to the Soviets in a NATO war is an example of the sheer lack of understanding of the uses of naval forces. In a NATO war, U.S. Naval forces should have as their mission, controlling the seas, not conceding them! They should be used to hit the Soviets where they would be the most effective—on the northern and southern flank.

Further, I, like many Americans, am concerned about a purported Defense Department plan to down grade the role of Navy-Marine forces in U.S. Global strategy. The need for supporting our allies around the world as widespread as Norway, Greece, Turkey, and Israel on the flanks of NATO, and Japan, and our raw material rich friends in the Middle East and Africa outweigh any cost savings that may come from the source of cutting.

With security of the North Atlantic traffic lanes so crucial to NATO's capability to reinforce and supply a sustained military effort on the continent, the readiness status of the U.S. Atlantic Fleet and the counterpart European navies remains critical.

Yet, the question remains: How will the forces of the U.S. Navy be used in a NATO war? This is of crucial importance to the alliance, and the early decisions of the present administration are not reassuring: the five-year shipbuilding plan to rebuild the Navy has been cut in half, F-14 procurement was to be closed down. No nuclear-powered cruiser was requested, and no aircraft carrier (conventionally powered or nuclear) was in the budget presented to Congress. On the latter issue, powerful forces in Congress have moved to restore a carrier to this year's budget but as of this writing, the situation is still in doubt.

These signals would seem to be urgent warnings to our European allies who understand the importance of maritime strength. The NATO defense ministers have created a maritime posture task force that is specifically charged with increasing the capability of allied navies to operate as a joint, collective fighting force. It is also apparent that the NATO defense ministers should address themselves—hurriedly, it seems—to the question of the role of that the U.S. Navy will play in a NATO conflict. NATO should also take a long hard look at their lifeline, looking beyond the Mediterranean to the Indian Ocean and not to conclude that their responsibilities end at the borders of their members.

Currently, our Navy has fewer ships than at any time since two years before Pearl Harbor. Some people discount the "numbers game" approach, insisting that it is capability that counts, not numbers. I can only answer that geography doesn't change, that the size of the world doesn't change, that one ship can be in only one place at one time and that our Navy does not have the numbers of ships and types of weaponry it must have to perform its numerous worldwide missions. We need both capability and numbers.

What to do? We simply must rebuild the Navy, just as we did before World War II (and that doesn't mean we are building for war, but to prevent war). Rebuilding does not mean refurbishing obsolete ships. The Navy can't perform its mission today with old World War II and Korean War vintage ships pulled out of mothballs—even if they still existed in any quantity, which they don't. It's sheer nonsense to think the old ships can accommodate the kind of weaponry and provide the capabilities we must have to cope with the naval challenge the Soviets are continuing to mount. Some of our older ships wouldn't last a quarter of an hour in the hostile environment of today's warfare technology. We need a modern, self-sufficient navy, one that can operate in distant areas without having to rely on bases in those areas—overseas bases help enormously, but enemies can seize them, and even allies may sometimes find it politically expedient to deny us their use (for example, most of our NATO allies denied us bases in our support of Israel during the 1973 Middle East War). So our naval forces must be self-contained, must carry their own airpower and Marine landing forces, must be able to defend themselves against any kind of attack, must be able to keep open the sea lanes to our raw materials sources and allies.

We must understand certain fundamentals of the age in which we are trying to survive: development time for new weapons systems is enormously lengthened today—from the time of preparation of the initial plans that must be presented for Congressional approval, it takes five years to get an Aegis anti-cruise missile system to sea, for example; eight years for a Trident system, the years for an aircraft carrier. At the same time, weapons technologies are accelerating to rapidly that time-to-obsolescence is short. Prior to World War II, a major weapon systems' lifespan ranged to 30–40 years. Following World War II, that time frame was reduced to about 20 years. Today, when we build certain new systems, we have to hope that the state of the art won't overtake them in ten years!

But if we are to survive in freedom we have no choice. The rebuilding of our Navy is mandatory, and if we can afford anything as a nation we certainly can, and must, still afford to defend ourselves. The will of the American people surely demands that we stay as a free people. Thinking Americans no longer believe that it's preordained that without a strong defense we can remain free. Our overall economic resources are still enormous and we can see to *all* our defense needs for no greater a percentage of our Gross National Product than we were investing *before* the Vietnam War—nothing even approaching the stupendous percent the Kremlin has been spending for years on its military posture.

There is not a moment to lose—in fact, so much time has been lost already that even if we start now we probably are in for a time of testing in the years directly ahead. Still, when presented with the facts, the American people throughout our history always have done what had to be done, and I am confident that we shall do so again.

I, like so many others, pray that future historians, looking back on this great two hundred and two year old experiment in freedom conceived so optimistically, will never be able to record its demise. May "The Great Nightfall" that has come to so many once-free nations unable to defend themselves, never come here.●

## THE FALLACY OF BONN

● Mr. JAVITS. Mr. President, Euromoney is a highly sophisticated monthly journal which focuses on the issues relating to and the problems facing the world capital markets. Quite often its tough editorial positions reflect the views of the world banking community on major financial and economic questions.

In the August 1978, issue, Euromoney's editors analyzed the results of the Bonn Economic Summit in an editorial entitled "The Fallacy of Bonn." Although I do not agree with all the points made in the editorial, I urge consideration of its main conclusion: that the Bonn Summit and the macroeconomic policies that the major industrialized countries will be pursuing do not get at the primary causes of inadequate world growth.

The Euromoney editors perceptibly point out that—

The failure of private investment is the cause of slow world growth.

The editors argue that the business sectors of the industrialized countries will not be able to take advantage of the excess demand that will be generated by the macroeconomic policies adopted at Bonn, because of their unwillingness in these precarious times to take the risk to invest to expand capacity. So instead, the editors write:

Much of the extra demand pumped into their economies leaks out on imports, causing trade balances to deteriorate and exchange rates to fall. Inflation gets worse.

The solution proposed by the editors is to transfer the excess savings from the trade surplus countries of Germany and Japan to investment in countries which now have comparative cost advantages through the encouragement of overseas investment.

The solution proposed by Euromoney parallels very closely my views in urging the President and his colleagues at the Bonn Summit to undertake a growth development fund for productive investment in the developing countries. In addition, we must follow policies in the United States that specifically encourage capital formation to produce jobs, not just generate extra overall demand to produce inflation. This is the heart of Danforth-Javits tax package, which focuses on capital formation as the way of dealing with inflation and encouraging productivity.

Mr. President, I commend the article to my colleagues and ask that it be printed in the RECORD.

The article follows:

THE FALLACY OF BONN

The Bonn summit was a fraud based on a fallacy that the world will live to regret it. The fraud was that Bonn purported to produce agreement between world leaders on a coherent and "comprehensive strategy" to pull the world out of stagnation. It was nothing of the sort. Seven national political leaders, several of whom face early elections, agreed to let each do his own thing for reasons of national and domestic political self-interest. Almost everything promised at Bonn would have been done anyway.

President Carter promised to cut oil imports and raise American oil prices to world levels by 1980, with or without Congressional approval. The US yawning trade deficit and the dollar's drop forced his hand, not his trip to Bonn. Chancellor Helmut Schmidt promised to cut taxes and increase public spending up to 1% of Germany's GNP. This was to bolster a sagging growth rate caused by the Deutschemark's climb. Prime Minister Fukuda of Japan promised reflation and to hold the volume of exports in fiscal 1978 to their 1977 level. He acted to prevent other countries starting a trade war. James Callaghan was perhaps the most honest. He promised nothing new and merely suggested that Britain's pre-election budget boost was in some way a pre-paid contribution to the international deal.

The fallacy at Bonn was that these national policies, when put together, amounted to a strategy to steer the world economy out of stagnation. They are more likely to increase world inflation in 1979, increase the risk of a new world slump in 1980, or add to pressures for trade protection everywhere.

The failure of private investment is the cause of slow world growth. In weak currency countries, investment is deterred by the fact and fear of inflation. Increased public sector deficits do more harm, through their monetary and inflationary consequences, than any good they may do by temporarily boosting demand. Businessmen will not borrow money, install new capacity, build up stocks, employ extra labour or raise production schedules to meet a bubble in demand, which they expect to burst. They had enough trouble with debts, overcapacity, and overmanning from the 1974–75 slump to risk being caught once again. So instead, much of the extra demand pumped into their economies leaks out on imports, causing trade balances to deteriorate and exchange rates to fall. Inflation gets worse. The US, Britain, France, Italy and Canada are close to the end of this road of fiscal reflation. That's why they look to others, Germany and Japan, to take up the running.

Sluggish investment in these countries is not caused by excessive inflation nor by inadequate domestic aggregate demand. It is structural, inevitable and desirable. German and Japanese industry is overblown, a legacy of a past age of cheap energy and undervalued currencies. In 1973, for instance, Japanese industrial production accounted for nearly 48.3% of Japan's GNP and 70% of its output was of investment goods or exports; Germany's was 52.1%, of which 60% was investment on export goods; in the US industrial production was 33.9% of GNP, of which 30% for the production of investment goods and exports. Investment in Germany and Japan will remain depressed until resources have been transferred out of industry and into services, distribution and agriculture. The mechanism causing depressed investment and a transfer of resources is the appreciation of the Deutschemark and yen which is squeezing industrial profits. The German and Japanese current account surpluses are the reflection of excess domestic savings geared to finance a level of investment no longer appropriate to today's international comparative costs.

Reflation in Japan, by tax cuts and public spending increases, cannot expand the 30% of Japanese industrial output serving the home consumer enough to offset the fall in demand for the 70% which was devoted to investment and now-to-be-frozen exports. That's why Japan can't get both 7% growth and a smaller trade surplus at the same time. The Japanese family will not buy two new cars a year instead of one. Nor does expenditure on schools create demand for computerized machine tools. The extra money pumped into the economy will either be saved, or will go on things like sewers, which cannot be imported and where the supply is inelastic until resources are transferred out of industry into their production. This process cannot be hurried. So Japanese reflation will either fail or lead to demand inflation.

The Japanese and German trade surpluses will only decline as excess savings over investment is reduced. This will only happen at the pace dictated by the transfer of resources out of industry. While this transfer occurs Japan and Germany will experience slow growth. The only way their surpluses can be rapidly and substantially reduced is through inflation causing a run out of monetary savings.

The Bonn strategy can be summed up as a policy to encourage demand inflation in stable-price, trade-surplus, strong-currency countries, because nobody has found a way to cut cost inflation in rising-price, trade-deficit, weak-currency countries. Savings in Germany and Japan must be cut, because investment in America, Britain, France, Italy and Canada cannot be expanded. If the strategy succeeds, the result will be accelerated world inflation leading to slump. If it fails, the German and Japanese surpluses will remain objectionably large and the result will be a slide into world protection.

What was needed at Bonn was a comprehensive strategy to reduce cost inflation in weak currency countries, coupled with measures to transfer excess saving from Germany and Japan to investment in countries which now have a comparative cost advantage. The only move in the right direction was Japan's promise to open its capital markets to foreign borrowers and to encourage overseas investment.●

## THE DELINKAGE OF SALT

● Mr. KENNEDY. Mr. President, in the current issue of Arms Control Today our friend and colleague, Senator CHURCH, has written an article entitled "SALT II, Linkage and National Security" which perceptively examines and accurately responds to the questions and arguments surrounding the continuing strategic arms limitation talks with the Soviet Union. In this article, Senator CHURCH, with his extensive expertise and experience in the field of foreign affairs, welcomes a new SALT agreement as "the only realistic alternative to a senseless nuclear arms race which neither side can win" and the "only practical way to achieve stability (and) enhance national security".

I join with Senator CHURCH in his strong support of a SALT II agreement, and in his opposition to linking the vital SALT negotiations with other issues between the United States and the U.S.S.R. A new SALT treaty is an essential element of our foreign policy which will strengthen, not compromise, our national security. It is too important to be held hostage to a fluctuating political climate.

Linkage, as the Senator from Idaho suggests, presumes not only that SALT II holds more benefits for one side than the other, but that either side can afford a renewed and even more costly deadly arms race. Neither presumption is correct or wise for the foreign and defense policies of the United States. As Senator CHURCH notes at the beginning of his article, the SALT process is now under attack at a time when we are on the verge of an agreement. I would hope that the clear and concise analysis presented in this article will help to stem these attacks and help convince the Senate and the American people of the pressing need for SALT II.

I ask that Senator CHURCH's article be printed in the RECORD.

The article follows:

[From the Arms Control Today. Aug./Sept. 1978]

SALT II, LINKAGE AND NATIONAL SECURITY

(By Senator FRANK CHURCH)

Since 1973, the United States and the Soviet Union have been endeavoring, slowly and haltingly, to achieve a new treaty limiting strategic offensive arms. Now, on the verge of agreement, the SALT process itself is under attack.

The strategic arms limitation effort has been caught up in the maelstrom of our stormy relationship with the Soviet Union. As a result, no one knows whether a new agreement will emerge in weeks, in months, or at all.

PROBLEM OF LINKAGE

Some of my Senate colleagues have suggested that the United States should unilaterally break off the SALT negotiations to protest the political trials of Soviet dissidents, Anatoly Scharansky and Aleksandr Ginzburg. The Carter Administration says it is opposed to using the SALT talks as a tool for pressuring the Kremlin on its internal human rights policies. However, the President, himself, may have opened the door to this kind of linkage, when he suggested that the successful conclusion of SALT II could be jeopardized by Soviet and Cuban activities in Africa. Once the concept of linkage between strategic arms negotiations and other extraneous political developments has been legitimized, it is inevitable that this same principle will be invoked by others to argue in favor of suspending the arms control talks for a myriad of other reasons. In the process, the hope of ever negotiating an

end to the nuclear arms race may fade altogether.

If we persist in tying SALT to Russian behavior in the Horn of Africa, in Central Africa, or even in Moscow, we are quite unlikely to find that perfect moment in the flow of events at which we can say, "At last, our persistent competitor, the Soviet Union, is comporting itself to our complete satisfaction. Now, we should discuss the conclusion of a SALT agreement."

And if we hold the Kremlin responsible for Castro's every move in Angola or Ethiopia, then what is to stop the Russians from arguing that SALT cannot proceed until our allies, the French and Belgians, pull out of Zaire or Chad? Once you espouse the theory or linkage, where do you break the chain?

Finally, the notion that SALT II can be held hostage for changes in Soviet behavior in other areas flies in the face of the fundamental precept that makes the arms limitation talks possible at all; that is, that an agreement to limit strategic arms equally serves the vital interests of both powers, and further, is mutually perceived to do so. The linkage theory presumes that an agreement is more in the interest of the Soviets than of the United States, and we can therefore "punish" the Kremlin by delaying conclusion of the talks. But if the SALT talks are more in the interest of the Soviet Union than our own country, why are we engaging in them?

I agree wholeheartedly with Secretary of State Vance that this issue must be treated differently from others:

"The imperatives to go to Geneva now are that we are dealing with negotiations that affect the national security of our nation and the security and well-being of the world in general.... It is a question which deals with the prospect of mutual annihilation...."

THE NEED FOR A STRATEGIC ARMS LIMITATION AGREEMENT

SALT is the only realistic alternative to a senseless nuclear arms race which neither side can win. We have already assembled a nuclear arsenal of such staggering proportions that the United States could destroy the Soviet Union several times over, even after enduring an attack upon itself. This ability to strike back devastatingly if attacked—an ability the Soviet Union also possesses—has brought the two sides to a state of mutual deterrence, and a suicidal holocaust has thus far been averted.

But we are on the verge of a new, even more dangerous stage of the arms race. The United States and the Soviet Union are developing new counterforce weapons which could enable each side to destroy the other's ICBM's. If these weapons are deployed, each nation's fear of a first strike will be dramatically increased. The psychology of the arms race is such that without a mutual agreement between the U.S. and the U.S.S.R. to limit these new weapons developments, the race will escalate—even though it is obvious that we would never reach a point through competition at which we would feel secure enough to stop. In fact, a new counterforce competition would make us feel less secure, because the stability of mutual deterrence would be weakened. In short, the only practical way to achieve stability, enhance our national security and, simply put, keep the lid on, is through strategic arms limitation agreements.

Secretary of Defense Harold Brown said in his presentation this year to the Senate Arms Services Committee:

"We want mutual deterrence to be so stable that it cannot be upset in a crisis. We want it to be so well designed that neither side will be tempted to try to upset it over the longer term. These are the two essential types of strategic stability that we seek."

There is no question in my mind that strategic arms limitation agreements are indispensible if we are ever to achieve this kind of strategic stability.

The value of arms limitation is much more obvious when we consider how indefatigably we and the Soviets have pursued the other path—only to secure a stalemate. We kicked off the nuclear weapons age in 1945 and outdistanced the Soviets throughout the 1950s. We maintained both a quantitative and qualitative lead in the 1960s, and we still hold a qualitative lead. But from the start, the Soviet catch-up has only been a matter of time.

In 1966, the Soviet Union had 244 Intercontinental Ballistic Missiles (ICBMs). We were then approaching our present total of 1,054 land-based ICBM's. The Russians had 29 Submarine-Launched Ballistic Missiles (SLBMs) and we had almost finished our program of 656 such missiles.

In the late 1960s, with forces more than adequate for deterrence, we decided to stick with our missile totals, at least for the near future. Meanwhile, the Soviet Union was coming from behind, and its land-based missile force exceeded ours by the end of the decade. Their submarine force grew larger than ours a few years ago.

But we were not idle while the Soviet Union was increasing its missile totals. In 1970, we began installing multiple independently targetable re-entry vehicles (MIRVs)—a technical name for strategic warheads—atop both our land-based Minuteman missiles and our submarine-based Poseidon missiles. (We also installed less sophisticated multiple warheads on our Polaris submarine missiles.) The Soviet Union did not start MIRVing its land-based missiles until 1975, and only recently acquired the ability to deploy MIRVs on submarine-based missiles. By comparison, every one of our submarine-based ballistic missiles boasts a multiple warhead.

As a result of our earlier start and better technology, we presently possess more than twice as many deliverable strategic nuclear warheads as the Soviet Union. Our analysts tell us that we will maintain a warhead lead for the foreseeable future.

Some discount this lead by pointing out that the Soviets have developed generally larger ICBMs and more of them—about 1,500 compared to our 1,054. They have also installed more submarine-launched ballistic missiles, although we have built more bombers. The total forces, as measured by the number of strategic delivery systems, compare at more than 2,500 for the Soviets to about 2,100 for us. But the numerical disparity is not in itself a cause for concern, since our current forces are capable of hitting twice as many targets as theirs, with a punch many times larger than the blasts which destroyed Nagasaki and Hiroshima.

A BETTER ALTERNATIVE

To understand why we should welcome the prospective new treaty now being negotiated, we should look at some of the contemplated controls and limitations. We should also consider both the added cost and uncertainty that would face us without a new treaty.

The basic element of a new SALT package will be a treaty to last until 1985, which will establish certain ceilings on overall strategic delivery systems, as well as sub-limits on missiles with MIRVs, upon heavy bombers carrying cruise missiles, and upon land-based MIRVed ICBMs. The second component will be a protocol applying temporary additional limitations until around the end of 1980. The third component will be a statement of principles and guidelines for SALT III.

The emerging three-part SALT agreement would hold many benefits for the national security interests of the United States:

—The maximum limit of 2,250 on strategic delivery systems will force the Soviet Union to dismantle about 300 of its missiles and/or bombers. This reduction is even more striking by comparison with what the Soviets might add without SALT. The Department of Defense projects more than 3,000 Soviet strategic weapons by 1985, without a treaty. If so, then we can correctly credit SALT II with removing the threat an additional 800 Soviet intercontinental bombers and/or ballistic missiles would pose. By contrast, the ceiling will not force us to make any reductions in the number of our strategic weapons. Indeed, if we choose to do so, we can add new weapons in sufficient number to equate our total force with that of the Russians.

—The ceiling of about 1,200 on missiles with MIRVs will constrain the United States only slightly. However, it will hold the Soviet side to a total hundreds below what we believe they would otherwise install.

—We benefit most immediately from the expected allowance above the MIRV ceiling of 120 heavy bombers equipped with air-launched cruise missiles (ALCMs), as we are well along with our cruise missile program.

—Since a far smaller proportion of our forces are on land, the Soviet side will be most affected by the limit of 820 on land-based ICBMs with MIRVs. Our intelligence believes that the Russians would deploy hundreds more land-based missiles with MIRVs by 1985 without a treaty.

—The treaty limitations may cause the Soviets to give greater emphasis to seabased forces at the expense of landbased forces, a move which will be inherently less threatening and more stabilizing.

—The mobile missile provisions in the protocol are decidely in our interest. A Soviet mobile missile now ready to be deployed, the SS–16, would be banned for the period of the protocol, while the development of our own mobile missile, the M–X, would not be constrained, should we decide to proceed with it.

—The cruise missile provisions in the protocol will allow us to proceed as quickly as we are able with cruise missile development and deployment. The Soviets will not derive similar benefits, since they have no comparable program.

Against this background, one might ask, what is in this package for the Soviet Union that does not increase the danger to us?

First, the land-based missile forces of the Soviet Union possess greater throw-weight in megatonnage than the comparable forces of the United States. This will compensate them for the threat posed by us of our far superior submarine missiles and our larger force of penetration bombers with ALCMs. Second, SALT II, by incorporating the principle of equal aggregates, will acknowledge the fact that the Soviet Union has become the relative equal of the United States in strategic nuclear arms. Third, the new agreement will save the Russians—as it will us—the heavy financial burden and the needless diversion of resources which would be entailed in an unrestrained continued competition.

To sum up, in no case will SALT II cause the United States to yield any advantage whatever to the Soviet Union in strategic nuclear arms. On the contrary, SALT II will leave the United States relatively better off, for the life of the treaty, than it would be if there were no treaty and each side continued to proceed through 1985 according to current plans.

Obviously, if there were no SALT II agreement, the United States would not sit still, militarily. If the Russians continued to expand their strategic force at the current rate, we could expect upward revisions in our own military budget.

Even if the Russians did not step up their own strategic program in the event of a SALT breakdown, the United States would have to spend an extra $20 billion, at the very least, between now and 1985, just to main-

tain the relative force strength that would be guaranteed by SALT II. This amount would cover the construction of 100 FB-111 bombers and modernization of existing ones, the deployment of additional sea-launched cruise missiles, the replacement of the remaining 450 Minuteman IIs, with MIRVed Minuteman IIIs, and the installation of more ICBMs.

If, in addition, we were to speed up development of the M-X mobile missile by two years and restart the B-1 bomber program, we would have to pile on another $24 billion over the next 10 years. The Senate Budget Committee staff has estimated that over 13 years, the incremental cost to the United States of building a maximum force reasonably envisioned in the absence of a SALT agreement could be $90 to $100 billion!

The willingness of the American people to bear whatever cost is necessary is not in doubt, nor is the ability of our military to keep pace with the Russians. The question is, why should we pour additional billions of dollars for defense into a federal budget already deep in deficit and further inflame inflationary pressures, when precisely the same measure of security can be achieved by concluding a sensible arms agreement with the U.S.S.R.?

(Senator Frank Church (D-Idaho) has played an active role in foreign affairs since coming to the Senate in 1957. In 1970 he authored the Cooper-Church Amendment cutting off funds for the war in Indo-China. He is the second-ranking Democrat on the Senate Foreign Relations Committee).●

## ERA

● Mr. GARN. Mr. President, one of the documents that will be often cited during the debate on extending the time for ratification of the equal rights amendment is "Hearings on House Joint Resolution 638 Before the Subcommittee on Civil and Constitutional Rights of the House Committee on the Judiciary," 95th Cong., 1st and 2d sess., Ser. No. 41 (1977 and 1978). The Senate has also held hearings and I hope that the Senate hearings will be published before debate in the Senate begins. It would be unfortunate if Senators could not avail themselves of the Senate hearing record during the Senate debate.

Of course, one of the first things that one will notice about the hearings is that there is a wide divergence of opinion regarding questions which are basic to the issue of extension and related matters. Constitutional authorities, other witnesses, and members of the committees disagreed about the meaning of the constitutional language itself, the framers' intentions, judicial interpretations, and congressional policy. Although opinions are broadly scattered about the constitutional field, one of the most thoughtful analyses was done by Prof. Charles L. Black, Jr., Sterling professor of law at the Yale Law School.

Professor Black is, of course, one of this country's most distinguished lawyers and we are fortunate to have the benefit of his wisdom on this matter. I will submit at the end of these brief remarks Professor Black's two short statements presented to the House committee. Professor Black's testimony begins on page 69 of the House hearings I think Professor Black may be wrong in one or two of his conclusions, but I find them thought provoking as will many of our colleagues, I am sure.

In addition to Professor Black's written remarks which will appear below, I wish to give a portion of his oral remarks on the subject of rescission (see, pages 72 and 73 of House hearings):

The simple thing about rescission is that it would make it possible for an amendment to go into effect with a majority of the States on record against it, if you don't allow rescission. You could have ratification by 37 States, rescission by 20 of them, ratification by one more, and an amendment going into effect which had been actually approved by only 18 States, in fact, rather than in the kind of constructive "contemplation of law" which comes about from what I call the "lobster-trap theory," where a State that enters the lobster trap is forever caught therein.

I can't believe that that is good constitutional law, and the 14th amendment precedent is so thin that it would break if a cat walked on it.

They knew in the House of Representatives the day that that proposal passed that Georgia had already ratified and that they were voting on a moot question. They had a telegram, as the Congressional Globe shows, which was correct, that on July 21, 1868, Georgia had ratified, and you had the 28 states whether or not Ohio and New Jersey rescissions were valid.

This was a totally moot question, as everybody know. And when Seward actually proclaimed the amendment, it was, of course, entirely so, and known to everybody.

If that is a precedent to rule the future and produce a mathematical absurdity of the kind that the no rescission rule would produce, then I really want to go into some other business than constitutional law. That is not my kind of constitutional law.

Mr. President, I ask that Professor Black's written remarks be printed in the RECORD. I believe our colleagues will find his views on rescission, two-thirds vote, Presidential signature, and other matters of great interest.

The remarks follow:

YALE LAW SCHOOL,
*New Haven, Conn., October 28, 1977.*

STATEMENT ON EXTENSION OF TIME FOR ACTION ON AMENDMENTS FOR THE STATES

(For House Judiciary Subcommittee, in connection with November 4 Hearing)

It is my view that, in the entire silence of the Constitution on the subject Congress has the power to extend time for the ratification of an amendment. I see no reason at all why the body which set the time in the first place should not have this power. There certainly is a limit on what could be looked on as a "reasonable time," but a few more years would probably not raise any serious question on this.

I have three other opinions directly connected with this:

1. If the original resolution combined the proposal of the amendment and the setting of the time, the integral package being then passed by 2/3 vote (and I understand this to have been true of the Equal Rights Amendment) then it seems to me plainly right that a 2/3 vote of each House of Congress should be required for an extension. It may easily happen, in any given case, that a vote for the original resolution is cast partly on the ground that, in the view of the caster of the vote, the time is suitably limited. If this is not possible then that must be because the limitation of time in the first instance was utterly meaningless—an impermissible assumption. It is impermissible to assume that this question of time never matters to anybody: if that were so, why put it in? It cannot therefore be assumed that the original would surely have passed by the requisite 2/3 majorities if the time had been longer. On a constitutional question of this kind one cannot afford to guess, as to a particular amendment, what might have happened; one must rather follow a procedure which would always be suitable and fair.

2. I firmly believe that a proposal extending time ought to be submitted to the President for his signature. Article I, Section 7, is unmistakeably clear on this point, and the case of *Hollingsworth* v. *Virginia*, 3 Dallas 378, which held that the vote on the substance of an amendment need not be submitted to the President, was decided in the teeth of the plain language of the Constitution, and was (to understate the position inadequately reasoned, as anyone who reads it can see. This holding has been accepted in practice since 1798, and I would not therefore want to disturb the case on its own facts. But it should not be extended one inch beyond those facts, since every such extension is a plain violation of the Constitution.

3. It seems to me that it would be entirely impermissible to extend the time for ratification without also extending the time for rescission. Extension of time, in my view, must be for action on the amendment, and not simply for one kind of action on the amendment. The concept of "contemporaneous consensus" is more and more stretched and violated as more and more time passes with States having actually changed their minds on the merits of an amendment proposal.

The extension of time for ratification but not for rescission would be so grotesque that I should think that one would not have to reach the constitutional question, but if the question is reached I am firmly of the opinion that lopsided extension would be unconstitutional and that an amendment adopted in that fashion would be invalidly adopted. The right to rescind, in my view, arises by operation of law, and cannot be taken away by Congress.

Respectfully,

CHARLES L. BLACK, JR.,
*Sterling Professor of Law, Yale University.*

YALE LAW SCHOOL,
*New Haven, Conn., November 1, 1977.*

SUPPLEMENTARY STATEMENT ON EXTENSION OF TIME FOR ACTION ON AMENDMENTS FOR THE STATES

I have only today seen a copy of the proposed extension bill, and have, in addition, only just now received certain information on the legislative history of ERA, relevant to one of the points in my statement dated October 28. Apologizing for the unavoidable fragmentation, I add the following points.

1. The language setting a time limit, both in the original and in the new bill, is the operative language providing for the actual going into effect of the amendment. This furnishes some purely technical support, though I doubt any is needed, for the requirement that two-thirds of each House consent to the presently proposed extension.

2. The legislative history seems to furnish support for the proposition that, as to this particular amendment, the time-limitation was seriously considered as a significant part of the "proposal" being voted on; this supports, again, the contention that extension should require a two-thirds vote in each House, since evidence of serious attention to the seven-year limit makes it quite plausible, in this very case, that some affirmative votes may have been influenced by the time-limit.

3. Until I saw the bill, I had not known that a seven-year extension was proposed; I had (perhaps without reason) thought that one had to do with a slight extension to meet possible state-legislative convenience. A doubling of the time, to fourteen years, seems

to me to raise serious constitutional questions, for I find it hard to apply the concept of "contemporaneous consensus" to such a period. It may be that a judicial court would hold this to be a "political question," in the sense of its being finally committed to Congress. But the anticipation of such a holding ought to increase, rather than to diminish, Congress' own sense of responsibility to the spirit as well as the letter of the Constitution. To call a question of this kind "political" is not to say, one fervently hopes, that anything goes.

In any case, a doubling of the period, to fourteen years, seems to me to make even more clearly visible the strength of the case for the validity of rescissions. How could it be right that States that had for, say, ten years been on record as being against an amendment be counted as being for it?

Very respectfully,

CHARLES L. BLACK, Jr.,
*Sterling Professor of Law, Yale University.*●

## MAJOR SAVINGS BY INDUSTRY

● Mr. KENNEDY. Mr. President, a year ago the Subcommittee on Energy of the Joint Economic Committee which I chair held hearings on industrial energy conservation which clearly identified the huge savings that can be made by industry.

Now the August 21 Time magazine points out the dramatic energy savings that have been achieved by corporations taking the initiative in the fight to save energy.

For example, Time points out that:

In the last five years Ma Bell's business has grown by 44 percent, but its energy usage has dropped 10 percent." . . . "Since 1973 Raytheon's business has grown 75 percent, to 2.8 billion, but its use of fuel oil, natural gas and electricity has been cut by about 25 percent."

Industry has focused on this important issue and made substantial savings where substantial waste existed before. The question is whether industry can keep up and maintain this pace. I have encouraged greater Government attention to this opportunity for reducing our oil imports and I urge the Department of Energy to increase its support for industrial conservation to continue progress made in the last 2 years.

Mr. President, I ask that "Reaching For Fuel-Saving Ideas" be printed in the RECORD.

The article follows:

REACHING FOR FUEL-SAVING IDEAS

The initials B.T.U. stand for British thermal unit, the basic measurement of heat in a given amount of energy. But to more and more business people, the letters are coming to mean something else—Better Tighten Up.

Much of the public continues to behave as if there were a constitutional mandate to expend energy; the nation will burn nearly 4 percent more oil this year than in 1977. But this trend is being countered in a notable way by some corporate consumers, who are discovering that saving fuel is just about the simplest way to cut costs and boost profits.

While conservation alone cannot solve the nation's energy problems, it is essential to any solution, and the experience of industry is dramatic evidence of just how much can be done. Ever since the 1973 oil embargo, companies have been not only determinedly turning off lights and turning down thermostats but also redesigning buildings, installing energy-saving devices on assembly lines and driving the conservation message home to employees. The economical use of power at the plant or office is bound to carry over to a heightened energy consciousness for workers at home. Last year, when the economy grew at a rate of nearly 5 percent, industrial use of energy increased only 1 percent.

The saving to business, which Department of Energy officials estimate to be nearly $3 billion since 1974, is the result of a variety of conservation ideas. While some companies have been experimenting with various alternative sources of energy, most of the immediate gains have come from simple conservation steps or the application of proven available technology. Some of the measures taken have been as sophisticated as the elaborate computer system that Burlington Industries, the big textile firm, has installed to regulate the use of electricity in 20 of its 99 plants. Others are as uncomplicated as the discovery by General Motors that it could save $1,576 a year in electricity bills merely by removing the fluorescent bulbs in its shop-floor vending machines. North Carolina's Sanford Brick and Tile Co. (350 employees) is taking advantage of the mountains of sawdust discarded by nearby furniture factories: it is combining the sawdust with either natural gas or diesel fuel to cut the cost of firing its baking kilns.

In a number of companies, energy consciousness has practically become a corporate religion. Three examples:

AT & T

In the past five years Ma Bell's business has grown by 44 percent, but its energy use has dropped 10 percent. Tiny electronic devices known as microprocessors, which are being installed to replace mechanical switching devices throughout the system, are proving to be considerable energy savers. To cut heating costs, the ceilings of office buildings are being fitted with special ducts that capture and then recycle the heat thrown off from electric typewriters, copying machines and even office workers (who radiate as much heat as 100-watt light bulbs). Though there are 7 percent more phone-company cars and trucks (total: 177,000) on the road than in 1973, gasoline consumption has been cut by 3 percent, in large part simply by teaching employees to use economical driving skills.

RAYTHEON CO.

Since 1973, the electronic company's business has grown 75 percent, to $2.8 billion annually, but its use of fuel oil, natural gas and electricity has been cut by about 25 percent. Automatic shutoff timers have been installed on everything from coffee makers to light switches in corridors. Any worker who wanders off leaving a piece of factory machinery running gets a large Day-Glo orange "energy conservation ticket" slapped on his equipment by company inspectors, who are constantly on the prowl for offenses.

TRW INC.

Sales of the diversified Cleveland-based maker of auto components, electronic and electrical equipment have nearly doubled since 1972, to $3.3 billion, but energy consumption has declined by 19 percent. Unnecessary machine runs have been eliminated; the number of ventilating fans cut by a quarter; and air conditioning is now reduced an hour before some plants close. Workers are rewarded financially for energy-saving ideas and division managers now have to make quarterly "energy use forecasts," just as they do for sales, profits and capital-spending projections. Says Vice President Pierce Angell: "Energy accounted for 4 percent of our company's production costs in 1972, but by 1985 it could be as high as 15 percent. That's a damned critical thing."

Industry's new energy stinginess is one of the few bright spots in the nation's struggle to adjust to a world of rising petroleum costs. Although oil imports were down 13 percent in the first half of 1978, that was only the temporary result of some special factors, including the start of the flow of Alaskan oil. Imports are expected to pick up rapidly during the rest of this year and reach new records in 1979, above last year's peak of 8.7 million bbl. a day. These projections have not been lost on the OPEC nations. Although they agreed to continue the cost of crude oil at its present $13 per bbl. when they last met in June, there have been signals from OPEC oil ministers that they may meet again as early as next month to jack up the price about 5 percent. To the present $42 billion cost of the U.S.'s annual oil imports, that would add $2 billion.●

## THE DOLLAR CRISIS

● Mr. THURMOND. Mr. President, I have watched with growing concern the rapidly deteriorating value of the dollar on the world's currency markets. The situation has become so critical in recent months that further delay toward major, positive and aggressive action to aid the dollar cannot be tolerated.

The administration and the Federal Reserve Board have made some efforts in recent weeks to bolster the sagging dollar, but these efforts have been extremely timid and thus largely ineffective. The stakes in this dollar crisis are extremely high—for both the American economy and the world economy.

Mr. President, I am sure that all of us are aware that this is a complex problem with no simple and easy solution. We know that, in addition to the actions needed in the foreign exchange markets, we need to tighten our belts sharply on inflation and to put much more stringent controls on our own Government spending.

We, as leaders in the world community, have faced difficult and complex problems before and handled them well. Certainly we can, and must, meet this current challenge that will allow us to continue our leadership position in the world's economic community.

An editorial titled, "The Sliding Dollar", in the Washington Post on August 21, 1978, provides an introspective statement concerning this critical problem.

Mr. President, I ask that the attached editorial from the Washington Post be printed in the RECORD for the benefit of my colleagues.

The editorial follows:

[From the Washington Post, Aug. 21, 1978]

THE SLIDING DOLLAR

The rise in interest rates Friday was the right opening move. In the past several weeks, the fall of the dollar's value on the world's currency markets has suddenly become much more dangerous. It was urgent that the Carter administration and the Federal Reserve Board respond. The Fed has increased its discount rate—the rate at which it lends to commercial banks—by half a percentage point. That's a necessary remedy, but it's not sufficient. What comes next?

Over the winter and spring, the administration's posture of benign neglect of the exchange rates was perfectly reasonable. Most of the movement was modest. The principal exception was the rise of the yen, resulting from Japan's huge and persistent trade surpluses. But since the beginning of July, things have changed sharply for the worse. Now the dollar is falling against most of the world's major currencies, the weak as well as

the strong. The reason for this ominous change is a spreading impression, among currency traders and bankers, that the U.S. government either can't or won't reduce the level of inflation here.

Exchange rates are swayed by people who have to gamble on the values of currencies months and years ahead. If they think that the dollar is going to depreciate faster than other kinds of money, they sell—and the prediction quickly tends to become self-fulfilling. When people sell dollars, the exchange rates fall. That increases inflation in two ways. Imports into the United States become more expensive and some of the domestic industries—steel, for example—happily raise their own prices as the competing foreign products get more expensive. At the same time, American goods become cheaper to foreign buyers who bid up prices for Americans. Inflation and exchange rates are not separate issues.

How do the financial markets make up their collective minds about American intentions? The last two months provide a good illustration. At the end of June, the Secretary of the Treasury, W. Michael Blumenthal, said at the National Press Club that the Federal Reserve Board's high interest rates were forcing the administration to lower its estimates for economic growth.

On the same day the Fed voted to raise the discount rate by a quarter of 1 percent. But it was a split vote, and the Fed's new chairman, G. William Miller, had dissented. Currency dealers concluded that the administration was putting pressure on the Fed not to interfere with growth, and it had won over Mr. Miller. In July, Mr. Miller seemed to confirm that assessment when he began saying that interest rates would peak soon, he hoped, and begin to decline before the end of the year.

Meanwhile, the administration's energy program was in endless trouble in Congress. Financial experts, here and abroad, took that as a clear indication that the United States would do nothing about its inordinate imports of oil. They are contributing, of course, to inflation and the weakness of the dollar.

In late July, the government published the usual statistics on the nation's economic performance in the previous three months. They showed an inflation rate over 10 percent a year. It meant that inflation was rising here, while falling in most other major economies. It also meant that the Carter administration had underestimated the speed with which prices were rising. The decline of the dollar began to accelerate.

Last week Mr. Carter summoned Mr. Blumenthal and Mr. Miller to discuss the dollar. The White House subsequently put out a statement to the effect that they would consider what to do. But, when you say that you will have to consider what to do, you inevitably leave the impression that you have no clear line of action in mind. The currency markets began to bounce around wildly. Then, on Friday, the Fed raised the discount rate again.

The conventional objection to higher interest rates is that they threaten to choke off business expansion and tip the country into a recession. But there is no simple choice between inflation and recession. Inflation at the present level will produce a recession—and, to judge from the 1974–75 experience, it can be a recession of great severity.

To bring down the inflation rate will require further increases in interest rates. It will require firm decisions to hold down oil imports. It will require a federal budget of great stringency. It is not a pleasant prospect. But if it seems to you excessively harsh, think for a minute about the alternative.●

## SALT

● Mr. HART. Mr. President, I would like to call the attention of my colleagues to an editorial which appeared in the Denver Post on Wednesday, August 16, entitled "The Importance of SALT." It makes a point with which I totally agree.

We must judge the final SALT II agreements, when they are submitted to the Senate, solely on the basis of national security criteria. It would be a tragic—and potentially dangerous—mistake to tie ratification of SALT II to Soviet compliance with our wishes on the range of issues from the treatment of Soviet political dissidents to the adventurism of its forces in Africa. These issues are obviously important and merit our continued concern. But they are peripheral to the central issue at stake in these talks—nuclear security.

Linkage of SALT and Soviet behavior in general implies that SALT is somehow a "favor" we grant the Russians. SALT is not a favor we grant anybody. It is in our own best interests to conclude an agreement that serves our national security objectives, and is comprehensively verifiable. For, in the words of the editorial—

> . . . both nations have a compelling interest in the success of these talks. A new and ruinously expensive arms race could move the world even closer to nuclear Armageddon at worst and bankruptcy at best.
>
> That's why the issue of SALT II needs to be contained within the field of national security—period.

Mr. President, I ask that the full text of the Denver Post editorial of August 16, entitled "The Importance of SALT," be printed in the RECORD.

The editorial follows:

THE IMPORTANCE OF SALT

As the November elections approach, it may be time to dust off the old diplomatic principle of "containment" and apply it to political rhetoric relating to U.S.-Soviet relations.

There is rising, and justified, anger in the United States at the behavior of the Russian government in matters both international and internal.

Responding to that, office-seekers are now demanding everything from U.S. withdrawal from the 1980 Olympics to breaking off the Strategic Arms Limitation Talks (SALT).

Well, whatever the merits of the Olympics in general and of Moscow in particular, world history will hardly turn over the issue of who wins the hammer throw in the shadow of the Krelim.

The upcoming SALT II treaty is quite another matter. It has been six years in the making and the final text is still both secret and incomplete.

Obviously, this is not the time, therefore, to praise or damn the negotiations upon which so much of our national future rests.

But it is appropriate to remind the politicians of just what they're calling for when they demand use of SALT as a pawn to influence Soviet policy in matters unrelated to national security.

Just suppose we try and the Soviets agree to release dissidents Anatoly Scharansky and Aleksandr Ginzburg. Do we then "reward" the Soviets by giving them another thousand nuclear-tipped rockets aimed at us?

Do we agree to scrap our cruise missiles if they increase Jewish emigration?

If they rein in the Cubans in Africa, can we safely drop the MX missile program?

Oviously, such folly would leave the American people defenseless against an ascendant Soviet military machine—and even those modest Soviet concessions would then doubtless be revoked.

The Soviets, of course, would be equally sure to reject proposals that would "punish" them in terms of strategic weapons inventory because of our displeasure at peripheral matters. Thus, the talks would be doomed to failure in Geneva or rejection in the Senate.

That would be tragic, for both nations have compelling interest in the success of these talks. A new and ruinously expensive arms race could move the world even closer to nuclear Armageddon at worst and bankruptcy at best.

That's why the issue of SALT II needs to be contained within the field of national security—period.

If from that vital perspective the final draft of the treaty is found wanting, then the Senate should reject it, come what may.

But to needlessly doom SALT II, in advance, for unrelated issues of whatever merit, would be a tragedy for mankind.●

## CAPPER-VOLSTEAD ACT

● Mr. BURDICK. Mr. President, recently Reuben L. Johnson, director of legislative services of the National Farmers Union, addressed the National Commission for the Review of Antitrust Laws and Procedures in Washington, D.C.

Mr. Johnson's remarks are very instructive as to the proposed review and appraisal being made of the Capper-Volstead Act. I request that Mr. Johnson's remarks be printed in the RECORD and I commend them to my colleagues attention as the views expressed are important and deserving of attention.

The statement follows:

STATEMENT OF REUBEN L. JOHNSON

In its 76-year history, the National Farmers Union has been actively involved in the propagation, extension, promotion, and occasionally, the defense of farmer cooperatives.

As is noted in the attached Exhibit I, "Genesis of the Capper-Volstead Act," our organization has been involved in the development of a basic cooperative statute from as early as 1906.

The Capper-Volstead Act, and succeeding cooperative statutes have been of distinct importance to American farmers, their industry and their communities. Farmers have used the institutions, which have become possible as a result of these cooperative statutes, to overcome to an extent, the weakness of their situations as individuals in the market place.

But, while the cooperative instrumentality has improved the situation of farmers, it has not enabled farmers to achieve a desired and deserved status of income equity and stability. As a matter of fact over the past 45 years, farm price and income stabilization measures of a substantial and comprehensive nature have become necessary.

Even the combined effect of farm programs and cooperative marketing has not raised farmers generally to a situation in which their prices and income afford them a condition of parity.

As a matter of record, farm prices and purchasing power last reached the 100% of parity level in the year 1952. As of June 30, 1978, farm prices were averaging 73% of parity, 27% less than the level needed for a return fair in terms of production and living costs.

It seems quite obvious that, from what can be observed in Exhibit II, farm prices and income are normally well below parity levels.

In the past year, farm prices on virtually all commodities have also been well below the full cost of production.

To make a further comparison, Exhibit III indicates the average return to farm equity and the ratio of profits to stockholders' equities for the years 1973 and 1977.

Even in the relatively favorable agricultural year of 1973, the farm return was below most other major enterprises.

For 1977, the return to farm equity was only 2.1%.

As regards this hearing, we have no objection to a review and appraisal being made of the Capper-Volstead Act.

Any fair and objective review of the law and the extent and impact of its use by farmers and their cooperatives will, we are confident, result in a positive finding that the Capper-Volstead Act has been and is in the public interest.

Members of the National Farmers Union, at their most recent annual convention (March 4–8, Salt Lake City, Utah) acted to "reaffirm our support of the Capper-Volstead Act" which allows agricultural producers to act together collectively to market their products.

Over the years, Farmers Union has felt that a more comprehensive and effective marketing and bargaining statute is needed.

At our March, 1978 convention, Farmers Union delegates mandated the creation of a special marketing research task force and this group has now begun the task of developing recommendations.

Our attitude therefore is that Capper-Volstead should be retained in its present form and that rather than consider amendments to change the nature and content of that law, the strategy should be to develop a comprehensive marketing and bargaining law.

In a somewhat parallel effort, Farmers Union and other major general farm organizations and the National Council of Farmer Cooperatives, have already reached a consensus on a bill to replace the Agricultural Fair Practices Act. That bill will be introduced early in the next Congress.

We are aware, of course, of the charges of monopoly, abuse and predatory pricing leveled against farmer cooperatives in 1975 Federal Trade Commission Staff Report on Agricultural Cooperatives and U.S. Department of Justice Report on Milk Marketing in 1976.

These accusations, largely based on a misunderstanding of the nature of cooperatives and agricultural marketing and ignorance of the facts or misinterpretation of them, have been time and time again, patiently, thoroughly and factually refuted—verse by verse, point by point.

We are not inclined to belabor the record with a comprehensive rebuttal of the mistaken judgments made by the FTC and the Department of Justice.

However, the unfounded allegations and biased statements continue to persist and some general observations are therefore in order.

There are recurring questions about when a cooperative is "too big."

One member of the 94th Congress proposed that a $5 million limit be placed upon the volume that any cooperative could handle. This limitation on size would not only have affected virtually all regional cooperatives in the nation, but some local associations as well.

Those who use the term "mega-cooperatives" to describe the larger farm cooperatives seem to be intimating that these institutions are a million times too big.

As a matter of legislative history, there is nothing in the Capper-Volstead Act or in Section 6 of the Clayton Act to suggest the desirability of a limit on the size of a cooperative entity.

What is important, in the opinion of Farmers Union, is not sheer size, but what one does with the size.

In Exhibit IV, we show a comparison of cooperative and other firm share of selected farm product marketings and input purchases for the year 1975.

In only one of these sectors, do the cooperatives have a dominant share—dairying at 77 percent. But this market share figure is misleading, because the 77 percent share represents the activities of 630 separate companies.

Likewise, the market share of cooperatives generally appears larger than it is because many of the major cooperatives are federations. Of the ten largest U.S. farm cooperatives, six are federations and in turn are owned by 3,700 local cooperatives. In fertilizer, the 30 percent market share is dispersed among 3,865 separate local associations.

Second, the fact that farm cooperatives handle the bulk of a particular commodity as it comes from the producers' hands does not mean that the cooperatives control a like proportion of that commodity through to the ultimate consumer. In dairy products, cooperatives handle 77 percent of the milk sold by farmers, but process only 28 percent of it. In grain and soybeans, cooperatives handle 40 percent of the grain sold by producers, but process only 16 percent of it and export only 8 percent of it.

Third, for most commodities, the current market share of cooperatives is little changed from earlier years. There are special reasons why the cooperative share has increased significantly for three types of products. The cooperative share of petroleum products sold to farmers has risen for the principal cause that some major oil companies withdrew from midwest markets early in the energy crisis, leaving the field by default to remaining dealers, for the most part the farm cooperatives. In the case of fertilizer, proprietary dealers chose, during a shortage situation in 1973 and 1974, to ship scarce supplies to lucrative export markets. The farm cooperatives resisted that temptation and kept their supplies for domestic customers, winning thereby a larger share of the market.

A significant comparison of the market shares of the four largest cooperatives and the four largest proprietary firms for the year 1975 is made in Exhibits V and VI.

As can be observed from Exhibit V, cooperative activity in these four sectors is small compared to that of the other firms.

Again, the cooperative share in the farm inputs is small compared to the four largest proprietary firms, as is indicated in Exhibit VI.

A 25-year comparison of the cooperative share in seven industries appears in Exhibit VII.

In three of the industries, the cooperative share is unchanged, or virtually so. These are feed, poultry and eggs and fruits and vegetables.

The cooperative share on grain and dairy products has advanced significantly in the 25 years. However, as noted earlier, these figures represent the cooperative share at the point of sale from the farmer's hands. But, the processing of both drops off sharply and the domestic retailing or export share becomes very small.

The cooperative share of petroleum and fertilizer markets has advanced in the past four years, as explained earlier, because of the abandonment of rural markets by some proprietary dealers following the energy crisis of 1973.

Finally, market shares of the cooperatives should not be assumed to be as susceptible of abuse as similar market shares of the for-profit firms. The key again, as with sheer size, is what is done with the market share. Not even where, in individual markets, a cooperative has a 100% market share, has abuse of that condition been demonstrated.

That the nation's farmers have not abused the privileges they have under the Capper-Volstead Act by extortionate pricing of their products can be conclusively determined by examining the levels of farm prices and income, generally and in specific commodities.

Authority exists under Section 2 of the Capper-Volstead Act for the Secretary of Agriculture to issue cease and desist orders when he determines that farmers have used the Capper-Volstead Act cooperatives to "unduly enhance" farm prices.

In the aforementioned FTC and Department of Justice studies, it has been charged that the monopoly dairy cooperatives have used their position to "rip-off" consumers to the extent of hundreds of millions a year.

"Why isn't someone charged with undue enhancement?" it is asked.

Amazement has been voiced that no Secretary of Agriculture has ever issued a cease and desist order on account of "undue enhancement." There should be no mystery about that. Over the years, investigations have been made on a number of occasions.

No evidence of "undue enhancement" was found because there was no undue enhancement.

Undue enhancement has never been specifically defined; however, there is nothing unclear about the concept.

Congress has often and repeatedly stated the goal of parity for American agriculture. It is the only legally constituted and defined yardstick for farm prices and income—the only officially recognized measurement of the fairness of farm prices.

Therefore, any action taken by producers to raise their prices and income to parity could in no way be construed as "undue enhancement."

Producers would have to act in concert through their cooperatives to raise their prices and income substantially above full parity levels before that enhancement could be construed as "undue."

A glance at Exhibit II shows that farm prices have been at full parity levels only for 11 years in the past 50. The highest parity average since Capper-Volstead was adopted in 1922 and the farm stabilization programs began in 1933 was the figure of 115% in 1947. Even this can scarcely be termed too high, but at any rate the price strength was attributable to market factors and the farm programs then in operation, and hardly attributable to Capper-Volstead machinations.

Even in the dairy sector, where the rip-off of consumers has been alleged, facts do not support a finding of undue enhancement.

One thing can be said for the dairy cooperatives and the dairy price support programs—there is somewhat less volatility in prices than in other major commodities. This is a definite plus.

The dairy statutes spell out a farm parity goal, as for other commodities, but USDA has authority to fix Class 1 prices at a higher level if costs justify such an action.

So, there is no possible finding that dairy prices have been unduly enhanced.

This has been corroborated in a thoroughgoing study made by a special Capper-Volstead task force in 1976. USDA made the "undue enhancement" investigation as a result of a petition filed by the National Consumers Congress.

The report found that there was no evidence that over-order prices obtained by the cooperatives in 1974–75 were too high for economic conditions. To the contrary, evidence indicated that the over-order prices were needed to compensate producers for a severe cost-price squeeze and to help them offset sharply rising feed prices.

Even with the higher prices, the investigation found that many farmers still had a "negative cash flow."

THE GENESIS OF THE CAPPER-VOLSTEAD ACT

In the late 1880's, the Nation's farmers were among the leading proponents of legislative proposals to control predatory actions of the trusts and assure fair competition. Some statutes were adopted in the states and most of these exempted farmers' associations or cooperatives from these laws.

When some of these state laws were set-aside by the courts and when the agricultural exemption was questioned, farmers supported adoption of the Sherman Anti-trust Act in 1890. But, because there was some fear that the Act might be turned against cooperatives, Senator Sherman accepted an amendment which declared:

*"Provided*, That this Act shall not be construed to apply to any arrangements, agreements, or combinations between laborers made with a view of lessening the number of hours of their labor or of increasing their wages; nor to any arrangements, agreements, associations, or combinations among persons engaged in horticulture or agriculture made with a view to enhancing the price of their own agricultural or horticultural products."

Subsequently, the agricultural exemption was considered to be unnecessary and it was dropped from the law in the final rewriting.

The earlier suspicions of farmers proved to be well founded in the 1890's and early 1900's when the Sherman Act was frequently used to challenge the development of large-scale cooperatives.

In 1906, the Farmers Educational and Coopertive Union of America (National Farmers Union) proposed adoption of a uniform law regarding the establishment of agricultural cooperative societies.

After several years of unsuccessful effort, the early farm organizations were able to obtain the inclusion of a rider in H.R. 28775, an appropriations bill, mandating "that no part of this appropriation shall be expended for the prosecution of producers of farm products and associations of farmers who cooperate and organize in an effort to and for the purpose to obtain a fair and reasonable price for their products."

H.R. 28775 was vetoed by President Taft on March 4, 1913, his last day in office.

Charles S. Barrett, president of National Farmers Union, then proposed legislation to exempt farmers and labor unions from the Sherman Anti-Trust Act.

The result eventually was the inclusion in the Clayton Act of 1914 of Section 6 which provided:

"That the labor of a human being is not a commodity, or article of commerce. Nothing contained in the anti-trust laws shall be construed to forbid the existence and operation of labor, agricultural or horticultural associations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organization, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the anti-trust laws."

Because Section 6 did not apply to cooperatives which issued stock and since it did not satisfy his desire for a broader statute, Barrett continued his efforts and, beginning in 1915, channelled them through the National Board of Farm Organizations (NBFO) which he helped form and which he headed as president. National Farmers Union and the National Milk Producers Federation were the moving forces in NBFO.

Barrett appointed a committee, which he chaired, to draft a new cooperative statute, and when this was achieved persuaded Senator Capper of Kansas and Rep. Hersman of California to become the chief sponsors.

Hearings of the Capper-Hersman bill, which was based on amendments to the anti-trust laws, were held in October, 1919, before the House Agriculture committee.

The name of Rep. Volstead of Minnesota was substituted on the bill for that of Rep. Hersman, when the former, the chairman of the House Judiciary committee, refused to move the bill unless it bore his name.

The legislation was approved by both House and Senate in 1920, but a House-Senate conference committee failed to resolve differences.

In 1921, the legislation was rewritten as a basic statute on its own and eventually approved in Febreuary, 1922, and signed into law by President Harding on February 18th.

In the course of the debate, Rep. Volstead made the following statement:

"It is objected in some quarters that this repeals the Sherman Anti-Trust Act as to farmers. This is not true."

Senator Capper observed:

"The Cooperative marketing bill as it was offered in both the Senate and House seeks simply to make definite the law relating to cooperative associations of farmers and to establish a basis on which these organizations may legally be formed. Its purpose is to give the farmer the same right to bargain collectively that is already enjoyed by corporations."

Basically, Capper-Volstead was designed to assure that the individual farmer would not be subject to prosecution for having joined and participated in a cooperative unit.

The legislation did not, as was subsequently clearly determined in court suits, empower farmers to engage in unlawful conduct, by themselves or with third parties.

President Barrett visualized agriculture as needing something far beyond Capper-Volstead and in the subsequent four years spearheaded introduction and discussion of proposals, such as the Curtis-Aswell and Capper-Haugen bills, which assigned to farmer cooperatievs the principal role in farm marketing. These bills proved to be too far-reaching and failed to get substantial support in the Congress. However, the failure of these measures to get action and the veto of the McNary-Haugen bills probably helped establish the climate for passage of the Cooperative Marketing Act of 1926 and the Agricultural Marketing Act of 1929.

One more significant statute was added in 1937 with approval of the Agricultural Marketing Agreements Act which enabled cooperatives to seek to stabilize agricultural markets for milk and specialty crops through marketing agreements and orders.

Thus, the fundamental right of farmers to organize cooperative organizations and act jointly through them was established but without any authority to engage in discriminatory or predatory conduct.●

## LEGAL ASPECTS OF NORMALIZING RELATIONS WITH THE PEOPLE'S REPUBLIC OF CHINA

Mr. KENNEDY. Mr. President, there has been some confusion about the legal implications of establishing normal diplomatic relations with the People's Republic of China—an objective which I strongly believe can and should be achieved by this administration.

In an article in the July issue of the American Bar Association Journal, Prof. Jerome A. Cohen of Harvard Law School effectivelv dispels the confusion.

First, he makes clear that the issues of normalization and sovereignty over Taiwan are separate ones.

Second, he cogently indicates why the 1954 treaty to defend Taiwan will lapse when we normalize relations with Peking, although this does not at all prevent us from providing for the future security of the island.

Third, he explains why termination of the defense treaty does not require formal consent of the Senate or the Congress, although it is clear that the executive and legislative branches will want to consult before this comes to pass.

I commend this article to my colleagues as a clear and convincing exposition of the legal implications of normalizing our relations with China. While Professor Cohen appreciates the political importance of consultation between the Congress and the administration, he concludes that "there can be no constitutional obstacle to normalization and its consequence—formal termination of the defense treaty."

I request that this important and timely analysis be printed in the RECORD.

The article follows:

NORMALIZING RELATIONS WITH THE PEOPLE'S REPUBLIC OF CHINA

(By Jerome Alan Cohen)

More than six years ago the Shanghai Communique committeed the United States and the People's Republic of China to the establishment of formal diplomatic relations. In April President Carter expressed the hope that the long overdue normalization of relations will be achieved in a matter of months. In May Zbigniew Brzezinski, the administration's national security adviser, visited the People's Republic. Although only global issues were on his agenda, he probably probed Peking's attitude toward normalization.

Yet in Washington confusion exists concerning the legal implications of normalization. This inhibits the president from accurately assessing its international and domestic costs. Three misconceptions cloud analysis.

The first is that normalization will mean our acceptance of Peking's sovereignty over Taiwan. If so, we would have no legal basis for continuing to defend Taiwan. But a recognizing state need not confirm the territorial claims of the government it recognizes, and the P.R.C. has established diplomatic relations with many states that have failed to acknowledge its sovereignty over Taiwan.

Although the 1943 Cairo Declaration committed the United States to restore Taiwan to China after World War II, Washington has never formally approved the restoration. Between mid 1945 and mid-1950 we treated Taiwan as part of China but anticipated that the island's de facto status would be confirmed de jure by the forthcoming peace treaties. Once the Korean conflict occurred, however, Washington announced, "The determination of the future status of Formosa must await the restoration of security in the Pacific, a peace settlement with Japan, or consideration by the United Nations." This implied the possibility of separating the island from China, and the peace treaties were artfully constructed to confirm Japan's renunciation of Taiwan without confirming China's title.

Yet at Shanghai in 1972 the United States declared that it "does not challenge" the claim of all Chinese on either side of the Taiwan Strait that Taiwan is a part of China. Although American officials argued that this language did not represent another shift in position, it did appear to eliminate the specter that Washington might permanently separate the island from China by failing to fulfill the Cairo Declaration's pledge. Never-

theless, the carefully chosen terminology did not formally confirm Taiwan's reincorporation into China. It simply renewed the hope that the pledge would be fulfilled at some future date.

Thus, if in the process of recognizing the P.R.C. as the government of China, Washington does nothing further to clarify Taiwan's status, it will not have undermined its legal basis for defending the island.

The second misconception is that normalization need not terminate the 1954 United States treaty to defend Taiwan. It has been argued that the treaty, made with the Republic of China, can survive recognition of the P.R.C. as the new government of China, since its terms are limited to territory controlled by the R.O.C. This would vastly complicate the normalization process.

Fortunately, the argument is wrong. The defense treaty was concluded with the R.O.C. as the government of the state of China. Once the United States meets Peking's first condition for normalization by formally acknowledging the P.R.C. rather than the R.O.C. as the government of that state, it will be for Peking, as well as Washington, to determine whether the treaty should be maintained. Whatever the consequence for the defense treaty might be if we were simply withdrawing recognition from Taipei, that is not the situation contemplated. By recognizing Peking, we will confer upon it the mantle of China for legal purposes, thereby enabling it to decide not to continue the treaty regardless of whether the treaty applies to only a specific area.

Termination of the treaty is the second of Peking's conditions for normalization. The P.R.C. has branded the treaty void since its negotiation. * * * an analogous example. The consent of the Senate is necessary for their appointment, but it is not required for their termination.

Thus, although the power of the president to terminate treaties is not entirely free from doubt, Louis Henkin, our leading commentator on foreign affairs and the Constitution, appears to be correct in concluding that neither the Senate nor the Congress is likely to be successful in asserting a plausible legal challenge to it, since it is the president who acts for the nation internationally. This does not mean, of course, that it would be politically wise for the president not to consult the Congress about his plans for normalization, only that there can be no constitutional obstacle to normalization and its consequence—formal termination of the defense treaty.●

## DR. GORI'S CRIME: TRUTH

● Mr. HUDDLESTON. Mr. President, last Monday I made a floor statement on the reaction of HEW Secretary Joseph Califano, Dr. Arthur Upton, head of the National Cancer Institute, and others to the research findings of Dr. Gio Batta Gori.

Dr. Gori is Deputy Director of Cancer Prevention for the National Cancer Institute. He recently reported that his research indicates that some of the new low tar and nicotine cigarettes can be smoked in moderate numbers with significantly less health hazard.

Secretary Califano, Dr. Upton and others launched a campaign of villification and slander in an effort to discredit Dr. Gori and his findings.

I said at the time that Dr. Gori's heresy was that he dared tell the truth in an environment that would not allow deviation from the party line—and that line is a prohibitionist attitude about tobacco that does not even allow consideration of research to produce a safer cigarette.

In yesterday's Washington Star syndicated columnist James J. Kilpatrick stated: "The gentleman committed truth. In the Washington Wonderland, this qualifies as a capital offense. Off with his head! The poor fellow is not long for this world."

Mr. Kilpatrick continues: "The denunciations heaped upon Dr. Gori have ugly, ominous overtones. Dissent from the official Califano-Nader line is not to be tolerated. The high priests of anti-smoking have staked out a monopoly on Truth. No competing ideas may apply."

Why, Mr. President, do Mr. Califano, Dr. Upton, and lie-minded people—who so loudly proclaim their commitment to the health of the American people—oppose research aimed at improving the health of millions of Americans who smoke?

Why are they afraid of the truth?

Why are they trying to fire or otherwise discipline a scientist who did nothing more than faithfully report the outcome of his research?

If the kind of attitude exhibited by Mr. Califano and Dr. Upton had prevailed down through the ages we would still be operating on the assumption that the Earth was flat.

This is not the first, nor will it be the last time that truth has been sacrificed in pursuit of some cause. Hopefully, however, it will not come to that if more people like Mr. Kilpatrick speak up and denounce the attitude that does not allow truth to be spoken unless it concurs with the party line or official Government policy.

I ask that Mr. Kilpatrick's column be printed in the RECORD.

The column follows:

DR. GORI'S CRIME: TRUTH

(By James J. Kilpatrick)

Let us heave a sigh for Gio Batta Gori. The gentleman committed truth. In the Washington Wonderland, this qualifies as a capital offense. Off with his head! The poor fellow is not long for this world.

Dr. Gori is deputy director of cancer prevention for the National Cancer Institute. Two weeks ago, he disclosed that he and his research associate, Dr. Cornelius Lynch, had completed a paper dealing with the phenomenal reductions that have been achieved in the tar and nicotine content of cigarettes.

"We can now begin to talk about 'tolerable' levels of smoking from an overall, public health standpoint," he said. He emphasized that he was not calling any cigarette safe. "The only cigarette that is safe is a cigarette that is unlit."

He surely was not endorsing cigarettes in any way. He was not talking in individual terms, but in average terms.

On the average, he explained, a smoker could now smoke 23 Carlton Menthols a day and suffer no more risk than he might have suffered with only two of the potent cigarettes of 1960. A smoker could smoke seven Decades, or five Kent Golden Lights, or three Merits a day on the same basis. Dr. Gori's point was that progress has in fact been made toward the production of less harmful cigarettes. He thought he was bringing us good news.

If there were any rationality left in this whole business of cigarettes and cancer, Dr. Gori's cheerful and sensible observations would have been received with equanimity and pleasure. But reason has fled the temples. The campaign against smoking has turned into a crusade, a jehad, a holy war. Zealotry is seldom pretty, and there was nothing pretty about the reaction to his statement.

Joseph A. Califano, Secretary of Health, Education and Welfare, was officially reported to be "upset." Unofficially, the word reaching the press was that Califano, a reformed smoker who metaphorically has become more Catholic than the pope, had blown his gussets.

Dr. Arthur Upton, head of the Cancer Institute, said Dr. Gori's "unfortunate" disclosures had "set back our cause." Dr. Sidney Wolfe, head of the Ralph Nader Health Research Group, favored the direct approach to heresy. Dr. Gori should be fired, said Dr. Wolfe, for "the most damaging statement that has been made about smoking in the past 10 years.

Let us get a few things straight. The cause is, or ought to be, Truth. Dr. Gori is no reckless, impulsive amateur in the field of cancer research. He is a highly respected scholar who two years ago won the Cancer Institute's superior service award. He has devoted 10 years to intensive research in the field of tobacco.

The paper he prepared in collaboration with Dr. Lynch is to appear in the Journal of the American Medical Association. The denunciations heaped upon Dr. Gori have ugly, ominous overtones. Dissent from the official Califano-Nader line is not to be tolerated. The high priests of anti-smoking have staked out a monopoly on Truth. No competing ideas may apply.

The reaction is both indefensible and contemptible. Surely scientists, no less than philosophers, should live by Milton's exhortation: Let Truth and Falsehood grapple! Whoever knew Truth put to the worst in a fair encounter? We do not yet know, finally and irreversibly, all the truths about tobacco and cancer. The best research is filled with puzzlements and contradictions.

Good scientists pursue Truth in the humble conviction that their pursuit may take 100 turns and may never capture its object. It is entirely conceivable that in some human beings, tobacco has a synergistic impact in combination with other substances thought to cause cancer.

We inquire about lung cancer victims: How many cigarettes did they smoke? Do we ask as assiduously: How much bacon did they eat? How much urban smog did they absorb? What kind of stressful people were they?

We never will have all the answers. But we will have many fewer right answers if the anti-smoking establishment persists in crucifying scientists whose findings fail to conform to the party line.●

## DROUGHT IN THE SAHEL

● Mr. KENNEDY. Mr. President, in recent years the Congress and the American people have responded generously and compassionately to humanitarian needs among the drought stricken men, women, and children of the Sahel region of West Africa. We all know the desperate plight of these people, and the important international effort which has been initiated over the past several years to assist them in coping with the drought, and developing their countries.

Recent reports from the field tell us what we should have known all along, that the critical problems the people of the Sahel face are not simply relief problems, but longer term developmental and rehabilitation problems.

Earlier this week, an editorial in the Washington Post served to remind us of this, by focusing on the critical and continuing needs of the Sahelian people, particularly now, during the recurrence of drought conditions in many areas.

In per capital income and infant mortality rate, the Sahelians suffer more than any other people in the world. The Arabic word "sahel" signifies the borderline between rain forest and desert. But when the rains fail, it becomes a tragic borderline between hunger and starvation for many, especially women and children.

The United States is a leading participant in not only providing necessary relief assistance, but also in collaborating with the international community in mounting a long-term effort to prevent the devastating consequences of future drought. This involves the irrigation of new lands, reforestation, dry land agricultural development, livestock production, and the provision of basic education and maternal/child health and population services.

The development assistance program in the Sahel represents a coordinated international effort to alleviate human suffering in an entire region of Africa. It is a rare example of donors collaborating to enhance efforts to meet human needs, and clearly deserves the strong and continuing support of the United States.

Mr. President, I ask that the text of the Washington Post editorial be printed in the RECORD.

The editorial follows:

[From the Washington Star, Aug. 21, 1978]

DROUGHT IN THE SAHEL

Part of the Sahel region of Africa is suffering drought and famine again. That is the band of eight sub-Saharan nations, from the Cape Verde Islands to Chad, which suffered a devastating six-year drought in the early 1970s. As many as 100,000 people and more than half the livestock of those basically agricultural countries perished from the resulting famine. This year's drought, though severe, has not had a catastrophic effect. That is because both the Sahelian nations and the international community have learned the costly lessons of the previous drought: Early warning and an efficient response to widespread food storages, plus a concerted regional and international-developmental effort can reduce the impact of recurring droughts.

The current drought and famine severely affects four Sahelian nations—the Cape Verde Islands, Gambia, Senegal and Mauritania. Those countries' appeals for emergency food supplies brought a quick international response. Led by the United States, other countries have shipped about 450,000 tons of food to the area. And, unlike the helter-skelter approach of five years ago, the food apparently is being distributed efficiently and equitably. Most important, the relief effort is part of a larger regional-development program sponsored by the Sahelian nations and a score of more advanced countries. Their aim is to reduce the region's vulnerability to droughts.

The goals of this unique international effort are as numerous as the needs of the Sahelian countries. They include: Increasing crop production in that generally arid region; building thousands of miles of roads and a communications system for the region, which is larger than Europe, but which has a population of only about 30 million people; and bringing modern educational and health services to a population that still lives largely as its ancestors did a century ago.

The host of African, Arabic, and Western nations that have pledged more than $1 billion annually to the Sahel development effort, in addition to various bilateral agreements, have done so for more than the obvious and laudable humanitarian reasons. They want to learn how to check "desertification"—the spread of desert land, which, in developing countries, is often caused by efforts to modernize rapidly. Because of where it is, the Sahel is especially vulnerable to the rapid growth of arid land. The widespread concern of developing and industrialized countries about this spurred the U.N.-sponsored conference on the subject held in Nairobi last year. The Sahel is the first area of the world where the various techniques discussed during that conference are to be put to the test. Thus, the Sahel has become, in effect, a laboratory for solutions to not only desertification, but a host of problems that affect developing nations—and, in one way or another, the developed nations too.●

## PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD the notification I have just received:

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., August 24, 1978.*

In reply refer to I-14228/77ct

Hon. JOHN J. SPARKMAN,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78-53, concerning the Department of the Navy's proposed Letter of Offer to Iran for defense articles and services estimated to cost $38 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
*Acting Director.*

[Transmittal No. 78-53]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Iran.

(ii) Total Estimated Value):

[In millions]

| | |
|---|---|
| Major Defense Equipment* | $0 |
| Other | 38 |
| Total | 38 |

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: One year spare parts to support the AH-1J/TOW helicopter.

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: August 24, 1978.●

## THE HIGH COST OF "MEDI-GAP"

● Mr. CHILES. Mr. President, the Senate Committee on Aging has long been concerned about unnecessary and sometimes unscrupulous drains on retirement income.

We on that committee emphatically believe that precious dollars needed to meet the necessities of life in the later years should be put to best possible effect.

Accordingly, we have looked into such issues as health care fraud—which often raises the costs that older persons must pay—questionable mail order land sales, and kickbacks in some prescription drug sales.

A recurring concern is high-pressure door-to-door salesmanship of "medi-gap" policies, often sold by scare arguments to older persons who are concerned about the very real inadequacies of medicare coverage.

Earlier, this year, I chaired two hearings for the Committee on Aging to check into reports about such operations. The testimony revealed shocking and intolerable situations in at least three States; the committee is continuing its investigation.

One already heartening sign is the positive response by Federal Trade Commissioner Elizabeth Hanford Dole, who said at our hearing that the FTC is seeking broad cooperative efforts to explore medi-gap issues more intensively. Health, Education, and Welfare Secretary Califano has since assured the Committee on Aging that he will assign HEW officials to work with the FTC. In addition, the National Association of Insurance Commissioners has assured the committee of its cooperation and interest.

One tangible result of the mounting concern about medi-gap is a new staff report issued by the Federal Trade Commission within recent days. I ask to have printed in the RECORD a Los Angeles Times article by Penny Girard, who gives a lucid summary of its major points, many of which are similar to those already expressed to the Committee on Aging.

In addition, I would like to request insertion of an article which was neatly juxtaposed to Ms. Girard's article. It dramatically documents the daily struggle that many retired couples and individuals are having with inflation's steady rise in essential items.

Faced with this grim situation, the last thing that older Americans need is to fall prey to the empty promises of the seller of worthless "medi-scare" policies, as several witnesses have called those policies sold by what is probably a minority of companies or salesmen.

Lastly, I ask consent to have printed a news release issued by Committee on Aging Chairman CHURCH, ranking minority member DOMENICI, and by me commenting on the FTC staff report.

The material follows:

[From the Los Angeles Times, Aug. 13, 1978]

AGED BUY UNNEEDED INSURANCE TO FILL MEDICARE GAP, STUDY SAYS

(By Penny Girard)

WASHINGTON.—A Federal Trade Commission report says that one-quarter of the elderly Americans who annually spend $1 billion for extra insurance to cover Medicare gaps actually buy unnecessary, costly and overlapping coverage.

The report, released here today, said a lack of consumer information, unscrupulous sales tactics by some firms and a lack of uniformity in policies had created considerable confusion among consumers and caused higher health costs for many elderly persons living on fixed incomes.

The government eventually may have to act to correct the situation, the commission staff said, "because its own Medicare program created the problem." Many of these policies evolved as a byproduct of the Medicare program.

"The lack of consumer information in the Medicare supplement market is so great that it is almost impossible to make rational purchase decisions. Very few people understand the complexities of Medicare and its gaps," the study said.

The staff planning paper was delivered Friday to the Senate Special Committee on Aging, which had held hearings this spring on the problem of "Medigap" insurance.

Health care coverage is a major expense and a constant concern for many citizens over age 65. Such persons spend an average of $1,300 on health care each year, three times what the rest of the adult population spends, one commission official said recently.

According to the commission's report, in 1976 Medicare covered only 38% of the health care costs for the elderly. Even with Medicare coverage, recipients are required to pay certain deductions and share other costs. Medicare does not cover such items as prescriptions, dental care, eye glasses, hearing aids, routine examinations and some nursing home care.

Because of rising medical costs and limited income, millions of elderly persons have purchased extra insurance, hoping to have complete health coverage. More than 50% have at least one additional policy, the commission said.

But lack of standardization among policies and poor consumer education mean that the aged often buy duplicate policies and some that fall short of their needs, as well as policies which mix services with indemnity plans.

Even with Medicare and private insurance, the study said, elderly individuals paid an average of more than $400 each for out-of-pocket health care expenses in 1976.

The FTC report reflects the testimony of Federal Trade Commissioner Elizabeth Dole, who told the Senate committee in June that "elderly persons who live on fixed incomes can ill afford to spend their money on worthless duplications."

"There is a need for coverage outside Medicare," a Senate committee staff member said. "Nobody is going to want to say that supplemental insurance is bad. It's just that a number of plans are aggressively sold that don't offer much return."

Th Federal Trade Commission report recommended conducting a study with the Department of Health, Education, and Welfare and the National Assn. of Insurance Commissioners to evaluate current state insurance laws.

Insurance generally is regulated by the states. Federal antitrust laws prevent the government from interferring and, in some cases from taking any action.

Some states, including California, already have begun setting standards for private insurance.

COST OF LIVING INCREASES 7 PERCENT FOR RETIRED COUPLES

(By Robert A. Rosenblatt)

WASHINGTON.—Rising medical costs played a major role in driving the cost of living up 7 percent for retired couples during 12 months of 1976 and 1977, the Labor Department reported Saturday.

A hypothetical intermediate-level budget for a retired urban couple required $7,198 during the year ended in autumn 1977, the department said in its annual survey.

That national-average budget figure compared with these figures for retired couples living in California: $7,403 in the Los Angeles-Long Beach area; $7,089 in San Diego; $6,727 in Bakersfield and $8,014 in San Francisco-Oakland.

The government study is based on a hypothetical husband over age 65 and retired, and his wife. "They are assumed to be self-supporting and living in an urban area; they are in reasonably good health and able to take care of themselves," said the Bureau of Labor Statistics, which released the study.

Inflation is getting worse for retired persons, the report makes clear. A cost of living increase of 4.5 percent in 1975–76 accelerated to 7 percent in 1976–77.

The biggest inflationary pressure on retired persons were medical care, which rose 10.1 percent in the intermediate level budget during the year, and housing, which climbed 7.9 percent. Food prices advanced 6.3 percent.

Monthly expenses for the hypothetical couple living on an intermediate budget included $169 for food, $52 for medical expenses, $30 for clothing and $54 for transportation. For renters, rent, heating and electricity bills average $131 a month. Homeowners had monthly expenses of $138, which paid for property taxes, heating and electricity. The study assumed that the retired homeowners had full ownership of their property, with no remaining mortgage payments.

The budgets "generally are lowest in nonmetropolitan areas and in the Southeastern cities and highest in Anchorage, Honolulu, Northeastern and Western cities," the study said.

The Bureau of Labor Statistics prepared three hypothetical annual budgets for lower, intermediate and higher standards of living.

The lower budget does not represent poverty nor does the upper one reflect affluence. Rather, they cover different ranges of spending. For example, the lower budget allots $12 a month for restaurant or cafeteria meals. The intermediate budget is $18 a month and the higher one allows $33 a month for meals away from home.

---

FTC ISSUES STAFF REPORT ON MEDI-GAP INSURANCE

WASHINGTON, D.C., Augut 11, 1978.—"A new Federal Trade Commission staff report raises issues which point to the need for continuing Federal attention to Medicare supplemental health insurance sold to the elderly," said Senators Frank Church, Lawton Chiles, and Pete V. Domenici of the Senate Special Committee on Aging today.

The staff study on "Medi-Gap" insurance was promised to the Committee by Federal Trade Commissioner Elizabeth Hanford Dole when she testified before the Committee on June 29, 1978.

The hearings uncovered widespread instances of oversale and misrepresentation of benefits on health insurance policies sold to the elderly to supplement Medicare.

Chiles, who conducted the hearings, said: "The Federal Trade Commission staff report sheds additional light on the problems we found during our hearings. The report concludes that there is very little good information available to older consumers on any form of health insurance, whether it be Medicare or private policies. This was cited to the Committee by witness after witness as one of the major underlying causes of uniformed purchases and it creates a wide-open situation for abuse.

"The staff report also argues for a good hard look at the varying approaches States have taken to set standards for information disclosure and minimum policy benefits. Commission staff found virtually no standardization in Medicare supplemental insurance now, and the Committee has been concerned that this lack of standardization, as well as the very limited benefits offered in some policies, also contributes to duplications in coverage and unnecessary expenses.

"New questions are raised about the actual value of some types of policies commonly sold to older Americans and the report makes it clear that most policies specifically exclude protection for the very same areas not covered by Medicare."

Church, Committee Chairman, said the Committee is continuing its inquiry into Medicare supplemental insurance and that he expects the Committee to keep in touch with the Federal Trade Commission and the Department of Health, Education, and Welfare in a broad-based national evaluation of the approaches taken by States to regulate the sale of Medi-Gap insurance.

Domenici, the Committee's Ranking Minority Member, stressed "the need for reforms to protect the elderly from overlapping and inadequate 'medi-gap' coverage. Most of the reforms will have to be made at the State level and insurance companies will have to institute safeguards of their own."

The Federal Trade Commission staff report, titled "Private Health Insurance to Supplement Medicare," is available from the Federal Trade Commission's Office of Public Information.●

---

## SENATOR LEAHY'S WHISTLE-BLOWER AMENDMENT

● Mr. KENNEDY. Mr. President, I rise to express my strong support for the amendment offered by the distinguished Senator from Vermont. In doing so I would also like to commend Senators RIBICOFF and PERCY, as well as the Governmental Affairs Committee as a whole, for their work on this important and timely legislation.

The whistle-blower provisions of this bill, if coupled with the Leahy amendment, will be just what the public and the Congress want—and what the bureaucracy needs—for this proposal is clearly in line with the message that we have been receiving from an angry public: We have had too much waste in Government; we have had too much ineptitude in Government; we have had too much inefficiency in Government; and we have even had too much corruption in Government. And we do not need new ranks of bureaucrats to clean up what others have messed up. We merely need to provide protection and incentives, for those presently in public service, to bring to light—and to rectify—lawlessness and waste in Government.

For whistle-blowing will be amply staffed by our existing army of the conscientious and dedicated Government employees—those who are committed enough, professional enough, and patriotic enough to "blow the whistle" on corruption, waste or illegality that they see around them. That is why I express

strong support for S. 2640 and its protection for Government employee whistle-blowers.

But insuring that the alarm is sounded, and insuring that the employee is indeed protected, is only the first step in the process. For the true purpose of whistleblowing is not the public recognition of the dedicated employee, but the correction of Government wrongdoing, the saving of taxpayer's money, and the prosecution of the corrupt.

Some provision must therefore be made to follow up on substantial allegations of waste or wrongdoing, while screening out frivolous or unfounded accusations. This is exactly what our amendment accomplishes.

If after a period of 15 days, under this proposal, the Special Counsel finds a substantial likelihood that an allegation is true, he can require that the head of the relevant agency conduct an investigation and submit a report on that investigation within 60 days. To insure that an agency does not attempt to whitewash an in-house scandal, the amendment explicitly spells out what that report must include, including substantiation of the charges, corrective measures, disciplinary actions, et cetera.

Any report not deemed adequate will be transmitted to the Congress and the President, thereby opening further incentives for correction of any wrongdoing.

In turn, the Special Counsel would act as a filtering process that would screen out frivolous or self-serving accusations by eliminating cases during the initial 15-day investigatory period. The amendment goes further to provide an opportunity for the agency to exonerate itself of baseless charges and to correct and eliminate any internal waste or corruption within its own house. The amendment thus allows the agency the opportunity of an internal investigation. Only if the agency refuses to undertake an investigation, or their investigation proves inadequate, does the glare of publicity come into play. Of course, throughout this process the identity of the whistleblower is kept confidential, unless the Social Counsel determines that he has acted in bad faith.

I have been a firm believer in the benefits of "whistleblowers" since I introduced the first whistle-blower legislation in 1971. I chaired hearings before the Subcommittee on Administrative Practice and Procedure where we heard dozens of witnesses recount stories of transfer, demotion, harassment, and retaliation in return for telling the public the truth. I am more than happy to see the fruits of these efforts today.

All but the most simplistic of sloganeers know that our Federal agencies are not "faceless bureaucracies," but that they are instead made up of individuals who are professional, honest, and hard working. We must maximize the contributions that conscientious public servants can have to good government and increased economy. We must provide our civil servants with an impartial "dissent channel" to which they can direct reports of corruption or waste. We must provide them with the protection that they deserve for speaking out. And we must make the most of their courage and honesty by providing a follow-through mechanism that will correct the wrongs that are disclosed. Let us achieve all of these worthy purposes, by supporting S. 2640, the civil service reform bill, and Senator LEAHY's amendment.●

## ALASKA LEGISLATION REFLECTS DIVERSITY OF CONCERNS

● Mr. HART. Mr. President, before this session of Congress ends the Senate will have an opportunity to act upon one of the most important and far-reaching land preservation measures in the history of our Nation. I refer to the Alaska National Interest Lands Conservation Act (S. 1500/amendment 2176). I have endorsed this fair and balanced bill, which incorporates the concerns of a diversity of interests: conservationists, Alaska's Natives, the State of Alaska, and the commercial development sector. While no group will be entirely satisfied with this bill, it is an excellent compromise that will allow Alaska's economy to develop in a healthy manner while also preserving that State's highest quality scenic and wildlife resources. The Federal lands in Alaska are owned by all the citizens of this Nation, and we all have a stake in insuring that this great wilderness frontier receives strong protection from Congress.

The Alaska National Interest Lands Conservation Act is a measure that has deservedly won widespread public support. As evidence of this, I call the attention of my colleagues to editorials endorsing this legislation which appeared in the Los Angeles Times, the Atlanta Journal, the Salt Lake City Tribune, the Lancaster Intelligencer Journal, and the Anchorage Daily News.

Mr. President, I request that these editorials be printed in the RECORD:

[From the Los Angeles Times, May 23, 1978]

A VOTE FOR MAGNIFICENCE

Last week's overwhelming House vote of 277 to 31 for the ambitious Alaska land-preservation bill was an encouraging sign of strong nationwide support for restraint in the exploitation of Alaska's magnificent assets.

We hope that this message is not lost on Alaska's two senators, Democrat Mike Gravel and Republican Ted Stevens, who have opposed stiff controls and pushed for more development. We hope that it is not lost on Senate Majority Leader Robert C. Byrd (D-W. Va.), who has been inclined to go along with the Alaskan senators on the mistaken supposition that the legislation affects only their state.

The bill's effect on every American would be substantial and enduring. Known as the Alaska National Interest Lands Conservation Act, the legislation would allocate 102 million federally controlled acres, roughly one-third of Alaska's huge area, as wilderness areas, new national parks and monuments, wildlife refuges and national forests. They would become the country's most massive physicial investment in its own future.

Neither the nation's nor the state's immediate economic interests would be short-changed. Fully 70% of Alaska's rock minerals would still be accessible to miners, and some 95% of the state's petroleum reserves would remain within drillers' reach. Hunting and fishing areas would be far greater than what is needed to satisfy current need.

The lands that would be set aside in the Alaska bill will always be there if some materials crisis or strategic need develops. They will be in the bank, and they will be growing in value.

Seeing this bill through the Senate may require a long fight. The goal is worth the fight. President Carter and Interior Secretary Cecil D. Andrus have recognized the importance of this legislation. Byrd now should recognize it, too.

[From the Atlanta Journal, May 23, 1978]

UNLOCKING ALASKA

The overwhelming House vote on Friday, 277–31, to set aside 102 million acres in Alaska for national parks and wildlife refuges was a strong expression of commitment to both conservation and development.

Both conservationists and developers agreed that balance is the key issue in the bitter dispute. And both have suggested that the balance is not on their side.

That being the case, legislators obviously went along with Rep. Morris Udall of Arizona, chief sponsor in the House, who argued that what emerged from his committee was a good, balanced bill.

Whether the Senate will go along with the House is open to question, especially with talk of a threatened filibuster headed by Alaska senators Make Gravel and Ted Stevens.

The bill, S 1500, is currently in the Senate Energy and National Resources Committee where the chairman, Sen. Henry Jackson of Washington, has promised to clear the bill for floor action next month.

But Senate Majority Leader Robert Byrd says he will not schedule it for floor action as long as the Alaska senators intend to filibuster.

Senator Byrd is obviously paying due respect to the two senators. But the large margin of approval in the House demands that the Senate majority leader not avoid responsibility as a leader with a national constituency.

What the House-passed bill would do, in fact, is unlock land and establish clear management rules, spelling out what land will be permanently set aside, and what will be open for development.

Under the present conditions, no one knows what the rules are. That does not benefit either side. If, at a later date, there is a serious development need to go into an area the law can always be changed.

The important matter now is to take the issue out of limbo and let all concerned know where they stand.

[From the Anchorage Daily News, March 16, 1978]

TIME TO COME TO d-2 TERMS

H.R. 39, the Udall d-2 lands bill, passed a landmark Wednesday when the U.S. House committee that has been molding it into shape for more than a year finally completed its work.

The results of the Interior Committee work have left both sides with victories, and the reports from Washington are confirming a suspicion we've had: the Udall bill in its present form is not the environmental monster it is sometimes made out to be.

When it was first introduced in January of 1977 by U.S. Rep. Morris Udall and a number of co-sponsors, H.R. 39 did indeed appear to be an extreme position. But it has moved toward a much more moderate stance.

It would have taken 144 million acres of Alaska—more than one-fourth of all the land in the state—and seemingly indiscriminately declared the land to be wilderness.

With a broad sweep, 114 million acres of the state would have been added to the national parks, refuges, and wild and scenic rivers systems.

Many Alaskans were naturally alarmed. With federal influence already heavily felt in the state, another layer of restrictions encompassing so much of the state's wild country would not be welcomed.

But Alaskans, like it or not, must come to terms with some hard facts:

First, all of the land concerned in the d-2 debate belongs to the federal government, and the federal government will decide what to do with it, one way or another.

Second, there is broad sentiment afoot that many of the wildlands in the country's last frontier are worth preserving in their natural state. The question in Washington is not whether a d-2 bill should be enacted, but what sort of restrictions should be placed on the federal land included in the bill.

Since the Udall bill was introduced, it has undergone major surgery, influenced by hundreds of people testifying at public hearings, by years of resource studies done by the State of Alaska and the federal-state Land Use Planning Commission for Alaska, and by the well-researched position taken by the Carter administration.

Boundaries for parks and refuges have been reworked to accommodate mining, hunting and fishing interests. Subsistence hunting and fishing provisions have been worked out by state, Native and federal representatives in Washington. In an unprecedented action, the State of Alaska has been specifically designated to manage subsistence hunting and fishing on public lands covered by the bill.

The bill would cut through red tape holding up the transfer of land to Alaska Natives and to the State of Alaska, as well. Initially, the Udall bill would have swallowed up some state selections, but now the attitude in Washington is different.

At least the basics of cooperative land planning for the private, state and federal landholders in Alaska are now in the bill, after repeated prompting by Gov. Jay S. Hammond and the Land Use Planning Commission.

The bill is down to 95 million acres of parks, refuges and wild and scenic rivers, and the instant wilderness classification would apply to some 73 million acres instead of 144 million acres.

Most significantly, the "instant" wilderness in Southeast Alaska, where the controversy over timber jobs versus conservationist values rages strongest, has been cut in half.

There are still significant problems with the Udall proposal. Most notably, the provisions for permitting mining on non-wilderness areas of refuges and preserves seem cumbersome, requiring extensive "findings" by the Interior secretary and approval of both houses of Congress. And while some concessions have been made to accommodate State of Alaska interests in land selections, there seems to be a persistent attitude that any land in the hands of the state will automatically be open to development, and lost for wilderness. A less cynical approach to the state's interests would be helpful.

But the bill has been much improved so far, and will undergo more revisions when it passes on to the House Merchant Marine and Fisheries Committee.

On balance, we believe the Udall bill is moving toward a position that can do much to assure the attractive qualities of life in Alaska will survive. It could go far toward preserving the subsistence lifestyle in rural Alaska. And it could leave America with a last frontier far longer than might have been the case.

---

[From the Salt Lake Tribune, May 14, 1978]

BILL PROTECTS "CROWN JEWELS," WITHOUT TOSSING OUT "KEY"

When someone begins talking about land in Alaska they must deal in superlatives, there is so much of the stuff up there. The state's area totals some 375 million acres, the equivalent of a little bit more than 7 Utahs.

The House Interior Committee has reported out the Alaska Wilderness Bill that would place 95 million acres of the state into parks, preserves, wildlife refuges and forests. Of those acres the bill, HR 39, designates some 50 million acres as wilderness where mining would be prohibited. Additionally another 24 million acres in existing conservation units would be classified wilderness.

That would mean that nearly 20 percent of Alaska would be off limits to mining and timber harvesting. Or roughly the equivalent of about one and a half times the size of Utah.

But before anyone starts talking about "locking up" the state's mineral lands, they would be well advised to remember that 80 percent of Alaska would be eligible for mineral prospecting and development. Also, written into the Alaska Wilderness Bill are special provisions that permit oil and gas exploration in areas that would be denied to mineral exploitation.

As the committee's report says, "It (HR 39) will not 'lock up' the mineral and energy resources of this land, but will provide for their discovery and development in the national interest and subject to the control of Congress."

In drafting the legislation the committee members have been very deliberate in attempting to leave, whenever possible, potential oil and gas deposits and mineral veins outside the protected areas. About 70 percent of the hard rock mineral deposits in Alaska would be excluded, along with about 95 percent of the potential oil and gas deposits, according to the Interior Committee's report.

Also contained in the bill is a special mineral process which permits mineral and energy resource extraction within conservation areas if Congress determines there is a national need for these resources involved and if that need outweighs the potential adverse environmental impact of the development.

HR 39 is a carefully constructed mechanism for preserving what Secretary of the Interior Cecil Andrus has called the "crown jewels" of America's northernmost state—its spectacular scenic beauty—while assuring reasonably ready access to that land's equally precious mineral and energy resources.

The bill does this by making some 300 million Alaskan acres, an area equal to more than five and a half Utahs, still eligible for mineral leasing and other development. And even in that part of Alaska that might conceivably be "locked up," the House Interior Committee is not proposing to throw away the key.

---

[From the Intelligencer Journal, June 6, 1977]

THE EMBATTLED WILDERNESS

In this part of the country we think of a wilderness in terms of a few acres of timber in which there are no roads. In the West a wilderness is considered in larger figures. But in Alaska, where roadless timbered regions appear to be infinite, the consideration is in millions of acres.

Without having seen it, it is impossible to envision a million acres of wilderness with mountains, glaciers, cold, pure streams, towering trees as far as the eye can see, the whole place inhabited by a marvelous variety of wildlife.

Conservationists, specifically The Wilderness Society, are in a battle in Alaska. On the one hand is the Kennecott Copper Co.

On the other hand are the embattled Wilderness people. Somewhere in between stand the U.S. Dept. of the Interior and the U.S. Forest Service. The wilderness advocates are watching warily to make sure the government does not give away the heritage of the entire nation.

Kennecott wishes to whittle to 15 million acres The Wilderness Society's program that encompasses 110 million acres of protected wilderness. The company wishes to exploit whatever it can grab of 95 million acres.

The Alaskan government is on the edge of the war. It halfway agrees with the conservationists, but covets the taxes development of this vast area would bring.

The question is a difficult one. To allow exploitation is to ultimately obtain ore, metals and timber that may be converted into consumer goods. But once the land is denuded, thousands of years are required for it to come back to the primeval state in which it presently exists.

Although 110 million acres of forest appears to be more than anyone will ever be able to employ for recreational purposes, we must line up with The Wilderness Society.

As has been proven over and over again, specifically in the case of the American Indian whose holdings spanned an entire continent, once greed is permitted the tiniest wedge there is no stopping it. It runs like fire through a wilderness.●

---

## HOSPITAL COST CONTAINMENT

● Mr. NELSON. Mr. President, I would like to respond to allegations made by the American Hospital Association about an amendment to encourage hospital cost containment, which other Senators have joined me in offering to H.R. 5285, a medicare/medicaid reform bill. Hospital costs are a major inflationary item, rising at twice the rate of inflation for other items.

The amendment, very simply, says that hospitals should continue a voluntary effort to control costs, which they began early in 1977. The hospital industry itself has set a goal of reducing the rate of increase in hospital costs, on the national average, by 4 percentage points in 1979 through 1982 below the rate of increase in 1977. The American Hospital Association estimates that the 1977 rate of inflation was 15.6 percent. The amendment contains an additional factor: hospitals would not be required to reduce their rate of increase below a level that is 1½ times the rate of inflation for other items in the economy. Therefore, if the rate of general inflation—now about 7.2 percent, as measured by the GNP deflator, were to increase, the voluntary hospital cost containment goal would be adjusted upward to reflect 1½ times the general inflation rate.

If the voluntary effort failed to meet its goal by July 1, 1979 or thereafter, a system of cost containment would be triggered into effect, in which HEW would establish, on a hospital-by-hospital basis, maximum allowable increases. There would be no arbitrary "cap". States whose hospitals, on the aggregate, maintained rates of increase at or below either the voluntary or mandatory goals, would be exempt from any Federal program.

Hospital costs would be reduced by more than $30 billion over 5 years, if either the voluntary program succeeds, or the mandatory controls were triggered into effect.

I ask that, following my rebuttal, the AHA's assertions be printed in the RECORD, followed by a summary of the amendment and a table comparing cost savings of the Human Resources Committee bill (S. 1391), amendment No. 3478, and the Finance Committee bill (H.R. 5285).

The material follows:

REBUTTAL TO HOSPITAL INDUSTRY

On August 11, all Senators received a form letter over the signature of J. Alexander McMahon, President of the American Hospital Association (AHA), attaching a detailed list of criticisms about an amendment on hospital cost containment that I and other Senators introduced August 16 (Amendment number 3478 to H.R. 5285). Although the AHA letter purported to describe the amendment in detail, it was in fact written and distributed several days *before* the amendment was even completed and introduced in final form.

Perhaps partially as a result of its timing, the AHA letter contained numerous misconceptions and distortions concerning the amendment, and thus I feel it is necessary to take this opportunity to respond to several of its misleading assertions, as follows:

The AHA asserts that the Nelson amendment would "apply an arbitrary flat cap on hospital revenues". . . .

The truth is, the Nelson amendment is neither arbitrary nor a "flat cap". Rather, it builds upon the Talmadge bill (S. 1470 as it amends H.R. 5285) approach, which the hospitals support, and which compares the routine costs of hospitals only with other hospitals of similar size, type and location. Even if standby controls in the amendment trigger in, each hospital affected by those controls would have a different limit, based upon its own routine cost experience, and also upon the rate of inflation in the "market basket" of goods and services purchased by hospitals. As a result, efficient hospitals—those with lower routine costs—would be permitted a higher increase than inefficient hospitals—those with higher routine costs.

The AHA asserts that the Nelson amendment would "undermine the voluntary effort". . . .

The truth is, far from "undermining" that effort, the amendment probably presents the best opportunity for the voluntary effort to succeed. Unlike the original Administrative bill, the amendment recognizes and adopts the voluntary effort as its central element. There would be no mandatory controls if hospitals succeed—on either a national or statewide basis—in holding down their cost increases by 2 percentage points in 1978 and 4 percentage points in 1979 through 1982 below the rate of increase in 1977 (estimated by the American Hospital Association to have been 15.6%). This is the very goal set by the hospital industry itself, under the sponsorship of the American Hospital Association, the Federation of American Hospitals, and the American Medical Association.

Moreover, even as high as they already are, the voluntary goals could be adjusted upward under the amendment whenever the overall rate of inflation increases significantly. In other words, the voluntary goal need never be *less* than 1½ times the overall rate of inflation, as measured by the GNP. That seems as generous a legislative response as the hospitals have any reason to expect.

The AHA asserts the Nelson amendment would "establish a massive Federal bureaucracy for control". . . .

The truth is, while the current HEW bureaucracy is already "massive" by any standards, this program would actually add very little to current government personnel requirements. Indeed, for the most part, the day-to-day operations of the program would be in the hands of Medicare fiscal intermediaries—a group consisting of Blue Cross, Aetna and other carriers, not Federal employees. Such carriers would be expected to need just 276 additional employees on a nationwide basis to administer this program. And the total $11 million administration costs estimated for this program (of which over $5.5 million would go to intermediaries and nearly $2 million to a one-time cost of developing the hospital classification system) compared with the potential savings of $34 billion over 5 years may make it the single most cost effective regulatory effort in HEW history.

The AHA asserts that the Nelson amendment "disregards the needs and differences of individual hospitals" and "does not include any specific bases for exceptions" other than "the discretion of the Secretary" . . .

The truth is, this assertion fails to recognize a number of specific exceptions written into the amendment, including the outright exemption of hospitals with fewer than 4,000 admissions; of hospitals in which Health Maintenance Organizations account for more than 75% of the patients; and of psychiatric and tuberculosis hospitals. Although these exceptions account for more than half of all hospitals in the country, they account for less than 10% of total hospital costs. In addition, the amendment incorporates specific hospital-by-hospital exceptions (Sec. 2 of H.R. 5285), such as for underutilized hospitals if they are needed in underserved areas, or for hospitals with atypical case-mix, e.g., unusually elderly population. Nor does the AHA assertion account for the the extremely lenient State exceptions permitted, whereby even if the national voluntary effort fails, all hospitals in any State would be exempt either if the State meets the national voluntary goals or if the State has in effect a cost containment program of its own that meets or exceeds the national goal. Moreover, the amendment specifically exempts all new hospitals from the voluntary program, by defining "hospital" as a hospital which has had a Medicare agreement in effect in all calendar quarters since 1975; such hospitals are also exempt for at least two years from the standby, mandatory controls. Finally, giving the Secretary discretion to develop other exceptions, especially after the new Commission has analyzed the needs in this area, by no means indicates (as the AHA implies) that such authority would never be used.

The AHA asserts that the "wage pass through" in the Nelson amendment "could lead employees to expect wage increases which hospitals could not afford" . . .

The truth is, there is simply no such implication contained in the "wage pass-through" provisions of the amendment. In effect, these provisions remain absolutely neutral on the subject of potential wage increases—neither giving hospital workers a blank check to demand inflationary increases nor permitting hospitals to use the threat of controls to deny employees' legitimate requests. The amendment is neither pro-labor nor anti-labor—it simply leaves both parties in the same collective bargaining position they would be in in the absence of controls. The amendment does not include overtime wages or shift differentials in the pass through".

The AHA asserts that "the amendment grants additional, broad authority to the HEW Secretary (such as . . . imposition of the revenue 'cap' on hospitals even though the voluntary effort is successful" . . .

The truth is, mandatory controls could not be imposed unless the voluntary effort fails, on the national average.

The AHA asserts that it is improper to consider controls on "a single component of one industry in our economy" . . .

The truth is, this particular "single component" is significantly different from virtually every other "component" of the economy—in ways which basically require us to respond to them as a separate element. Hospitals account for far and away the largest and most inflationary component (over 40%) of health care costs, which themselves have been more than twice as inflation-prone as the rest of the economy. This sector is characterized by an almost complete absence of direct consumer responsibility for either the goods which are purchased or the price of those goods (91% of the bills are paid by someone other than the patient). Moreover, in no other industry not subject to tight regulatory controls does the government pay over 40% of the costs. Finally, it is simply not true that other isolated components of the economy are not also subject to serious scrutiny (and even controls)—many segments of the energy industry, freight and passenger transportation of all kinds, and telephone services and other utilities, spring immediately to mind.

The AHA asserts that the Nelson amendment (or any other controls) would force hospitals to "reduce or cut back needed health care services" . . .

The truth is, this assertion is perhaps the most misleading allegation in the whole AHA letter. Under the amendment, there would be no Federal controls at all if the hospital industry simply meets its own voluntary goals. I believe it is safe to assume that the AHA would not have set such goals—nor would the AMA have also endorsed them—if the "quality" of health care would suffer.

And finally, the AHA asserts that "most would agree" that standby controls such as in this amendment are "inherently inflationary", and would lead to "inflationary, anticipatory increases", and that the problem "already is being addressed through the voluntary efforts of the health care industry" . . .

The truth is, the most inflationary aspect of the amendment is that it never requires the "voluntary" effort to reduce hospital inflation more than 4 percentage points below the 1977 rate (15.6% according to AHA) in order to avoid mandatory Federal controls.

As for the notion that hospitals will artificially inflate their prices in anticipation of standby controls, I believe that the argument flies in the face of the very nature of the amendment. For it is only by *avoiding* unnecessary increases during the voluntary period that hospitals will guarantee that the standby controls will not trigger in. If some hospitals prove to be so irresponsible that they unnecessarily increase prices despite the threat of mandatory controls, however, limits under such controls would still be adjusted on a hospital-by-hospital basis in comparison with all other hospitals in the same category, meaning that some or all of any earlier unnecessary increases would simply not be factored into the limits. Moreover, under the stand-by controls, any hospital that exceeds the voluntary limit would have an additional penalty, which would be a reduction in their maximum allowable increase by 1 percentage point for every percentage point that the hospital had exceeded the voluntary goal. Finally, with regard to the assertion that the voluntary effort will be sufficient, one need only look at the claims made in 1974 by the hospital industry before economic stabilization controls were removed. At that time, the hospital industry asserted that it would keep the lid on costs without controls. However, as soon as controls were lifted, hospitals costs jumped to more than twice the rate of inflation in the rest of the economy. On March 20, 1974, for example, the same Alexander McMahon who signed the AHA letter mailed to Senators on August 11, told the Health Subcommitee of the (then) Labor and Public Welfare Committee that:

"We do not think the allegations that Dr. Dunlop has made about the health industry

are fair or supportive of the need for continuation of health controls, and that it (the termination of controls) will not lead, as he is suggesting, to huge mushrooming of prices and costs in the health industry."

"All responsible parts of the health industry, hospitals, doctors, and other providers of care, know that if we were to be irresponsible, as we will not be, we would bring down on your heads tremendous pressures for even more oppressive regulatory measures than we have suffered through under the economic stabilization program."

And in another hearing at that time before the Commitee on Banking, Housing, and Urban Affairs, Senator Johnston asked McMahon "What kind of bulge would you expect if we took controls off immediately?" McMahon replied:

"I have heard the answer to that given in various figures of the 2 to 3 percent area. I should think, because of the other controls that exist, it would be less than it would be in the rest of the economy, because the rest of the economy wouldn't be subject to these other constraints that come to bear on hospitals.

"Very clearly, being aware what has happened, what happened after Medicare and Medicaid enactment in 1965, the AHA, working through our system of State hospital associations, would be *doing everything that we could to bring to the attention of the hospitals the need to avoid certainly any unnecessary bulge* that would follow the elimination of controls." (Emphasis added.)

Despite the AHA's promises and predictions, total hospital costs rose by 17.6% in 1975, the first full year immediately following the lifting of controls. Only since the introduction of the Administration's cost containment bill early in 1977 has there been any downward trend at all in the rate of hospital inflation—which proves, directly contrary to the AHA's current assertion, that the only way any voluntary effort is going to work in this sector is if it is backed up by the threat of mandatory controls.

The overriding and incontrovertible fact, which the American Hospital Association does not address, is that the amendment guarantees that more than $30 billion in inflationary costs will be saved over five years—that this money which comes out of taxpayers' private and public pockets; and which impacts heavily on the overall rate of inflation and the ability of Federal, State and local governments to balance their budgets and reduce taxes.

---

AMERICAN HOSPITAL ASSOCIATION'S COMMENTS ON THE NELSON AMENDMENT TO H.R. 5285

The Nelson amendment, which will be offered to the Talmadge bill reported by the Senate Finance Committee as H.R. 5285 on August 3, has many basic and serious defects. Its most fundamental problems for hospitals would be the following:

1. The amendment would authorize wage and price controls on a single segment of one industry. Experience has shown that such controls are inequitable and counterproductive.

2. Wage/price controls, on a standby basis, are inherently inflationary because they lead to protective, anticipatory increases. Thus, they would undermine and be destructive of the Voluntary Effort to contain health care costs.

The Voluntary Effort, which has brought together physicians, hospitals, consumers, insurers and others, is succeeding. The latest American Hospital Association Hospital Panel Survey data show that, for the first five months of 1978, the rate of increase of hospital expenditures decreased 3.3 percentage points when compared to the same period in 1977.

3. Federal operation of the control structure required by the Nelson amendment would result in a massive new bureaucracy. Although a "cap" is a simplistic response to a complex problem, the mechanism for its implementation would be extremely complicated and would require the development of elaborate and costly methods based upon data and indices that do not presently exist.

4. The amendment promises wage increases to nonsupervisory personnel, but the wage increase pass-through would not include important elements of hospital wages such as shift differentials, overtime, and other fringe benefits. Thus, this promise could lead employees to expect wage increases which hospitals could not afford.

5. The amendment would impose a flat "cap" on all hospitals, thus ignoring the legitimate differences among institutions and their needs. Further, such a "cap" would most severely penalize efficiently managed institutions.

6. The amendment does not include specific bases for exceptions, but rather would leave the development of any exceptions criteria to the discretion of the Secretary of HEW. It even fails to recognize the grounds for exceptions that are identified in the Talmadge bill.

7. The amendment grants additional, broad authorities to the HEW Secretary on the strength of which he could make sweeping decisions without statutory limitation or guidance. Some examples of such authority are:

Imposition of the revenue "cap" on hospitals even though the Voluntary Effort is successful;

Determination of whether to recognize state-administered cost control programs without any opportunity for state appeal of such decisions if they were negative; and

Determination of what adjustments, if any, would be made in the revenue "cap" as a result of changes in the number of hospital admissions.

Further, there are numerous and serious technical defects in the Nelson amendment, including the following:

Although the amendment appears to establish an upper limit of payments at 115 percent of the average per diem routine costs for hospitals in each classification group, it would not, in fact, do so. The amendment provides that the computation of the group averages would exclude from consideration *all* costs in the previous year in excess of 115 percent. Under this methodology, it has been estimated that over 30 percent of all hospitals could be paid below their actual costs. Further, in the Western region of the United States, almost two-thirds of the hospitals could be reimbursed below their costs.

The amendment would retroactively apply a revenue "cap" if the mandatory program was initiated after 1979.

The evaluation of the success of the Voluntary Effort would not take into account the impact of unanticipated changes in the general rate of inflation.

The amendment requires that 50 percent of any hospital incentive payments be made to employees regardless of the reasons for the hospital's lowered costs.

---

SUMMARY OF NELSON AMENDMENT TO H.R. 5285

The proposed amendment is intended as a compromise between the mandatory, immediate Federal controls contained in the Human Resources Committee-reported bill, and the limited Medicare/Medicaid, routine cost, approach in H.R. 5285. Current estimates are that this amendment would save between $30 and $35 billion over the next five years, compared to $50 to $60 billion for the Administration/Human Resources bill and less than $500 million for the Talmadge bill approach. Basically, the amendment expands upon, rather than substitutes for, the Talmadge bill and consists of three major parts.

1. A New System for Reimbursing Hospitals. The amendment would not alter the general approach of the Talmadge bill for revising reimbursement for routine costs under Medicare/Medicaid. The new mechanism, to be effective July 1, 1979, would provide for incentive reimbursement—rewarding hospitals whose routine operating costs are below average, and penalizing hospitals whose routine operating costs are substantially above the average. Hospitals would be classified; and target rates for costs would be established for types of hospitals based on the "market-basket" cost of goods and services and on areawide wages. (See page 3, Report No. 95–1111 to accompany H.R. 5285.) Several minor modifications to Section 2 are included in the Nelson amendment that would result in increased cost savings (see items 5 through 8 in Section-by-Section Analysis, Congressional Record, p. 26422).

2. Recognition of Voluntary Effort. The amendment would statutorily recognize that the hospital industry itself may be able to bring overall hospital cost increases under control through voluntary efforts. The amendment adds a new subsection to Title XVIII of the Social Security Act, which sets out the voluntary goals as proposed by the industry. Those goals apply to hospitals in the national aggregate, rather than individually. They call for cost increases (other than those arising from increases in the average hourly wage rates for nonsupervisory employees) to be held to 2 percentage points less in 1978 and 4 percentage points less in 1979 through 1982 than the rate by which such expenses increased in 1977 (15.6%).* However, in order not to unfairly penalize hospitals for increases in inflation for which they aren't responsible, in no case would the goals need to be less than one and one-half times the increase in the GNP deflator.

A new Health Facilities Cost Commission created by the Talmadge bill would be expanded, and it would be charged with oversight of the voluntary effort, and with determining whether it has succeeded.

3. Mandatory Controls. If, in any year, the national voluntary effort fails to meet its announced goals, standby, mandatory controls would go into effect for the following year (except that if the voluntary effort fails for 1978, such controls would take effect July 1, 1979). Even if the national voluntary effort fails, however, hospitals would be exempt from controls in any State which, on the aggregate, meets the national goals, or which has in effect a State cost containment program at least as comprehensive and effective as the Federal program.

The standby controls would involve limitations applicable to all costs and all payors. They would limit the allowable rate of increase on a hospital-by-hospital basis to a percentage derived from: (1) the increase in routine costs allowable under the Talmadge bill; (2) the increase in general wages in the hospital's area; and (3) a "market basket" index of increases in the goods and services normally purchased by hospitals. No arbitrary or single "cap" would be imposed. Maximum allowable costs would vary by individual hospital. All hospitals with less than 4,000 annual admissions would be exempt from either voluntary or mandatory controls. (That represents slightly more than one-half of the nation's hospitals but affecting only about 12.4 percent of total hospital expenditures.)

Increases beyond the limits would not be paid by Medicare and Medicaid, for either ancillary or routine costs. With regard to private payors, any excess paid by such payors following the imposition of controls would be required to be held in escrow until returned to payors in the form of rate reductions.

The percentage limitation would be subject to adjustment to take into account excessive increases in the prior year, changes in the volume of admissions, and a manda-

*Estimate of 1977 hospital cost inflation

tory "pass-through" of increases in the wage rates of nonsupervisory employees. The wage "pass-through" would be at the option of States that had previously established cost containment programs and were exempted from any mandatory controls. It would be required of States that desired to start new cost containment programs and were exempt. The Secretary would be authorized to issue appropriate regulations to define terms, provide exceptions and guard against attempts to avoid the intent of the limits.

COMPARISON OF ESTIMATED SAVINGS UNDER VARIOUS HOSPITAL COST CONTAINMENT PLANS

| | | Estimated savings | | | | |
|---|---|---|---|---|---|---|
| | | | | Senator Nelson's amendment | | |
| | Hospital revenues under current law (billions) | Administration bill—If effective Jan. 1, 1979 (billions) | Senator Kennedy's bill.[1]—If effective Oct. 1, 1978 (billions) | Voluntary program (billions) | If voluntary program fails in 1979, standby program effective in 1980 (billions) | Sec. 2 of Senator Talmadge's bill (millions) |
| 1978 | $54.5 | | | −$0.4 | −$0.4 | |
| 1979 | 63.0 | −$2.2 | −$2.8 | −2.0 | −1.7 | |
| 1980 | 72.7 | −5.2 | −6.4 | −4.0 | −3.4 | −$6 |
| 1981 | 83.5 | −9.9 | −10.7 | −6.3 | −6.7 | −70 |
| 1982 | 95.2 | −15.9 | −16.5 | −8.4 | −9.5 | −122 |
| 1983 | 107.6 | −22.6 | −23.2 | −10.2 | −12.3 | −175 |
| Total | 476.5 | −55.8 | −59.6 | −31.3 | −34.0 | −373 |
| Total for medicare and Federal medicaid | 178.9 | −18.7 | −29.0 | −11.5 | −11.6 | −373 |

[1] Estimate of Senator Kennedy's bill done by the Congressional Budget Office, the estimate indicates a relatively higher savings under medicare and medicaid because the CBO projected higher current law growth rates for the Federal programs, resulting in greater savings upon application of the limit.●

## OPPORTUNITIES PRESENTED BY MEXICAN OIL

●Mr. KENNEDY. Mr. President, the lead editorial on the August 19th edition of "The New Republic" deserves special attention from Members of the Senate. The editorial comments on the probable existence in Mexico of enormous quantities of oil, perhaps as much as 150 to 200 billion barrels. It then discusses the question of whether administrator planners in fashioning the National Energy Plan in 1977, took this potential into account in telling us that the world might well run out of oil by 1985.

The editorial then going on to talk about the potential of Mexican oil breaking the "special hold" that the Saudis have on the United States and calls for the establishment of "something better than the small 'special relationship' that exists between the United States and Saudi Arabia—an 'extra special relationship' perhaps." I endorse this call for an effort to establish a policy which favors, if at all possible, Mexican oil over Saudi Arabian oil and makes possible a shift of our political and economical dependence upon one country at least to two or more when it comes to a resource so important as oil.

While not endorsing every part of the editorial, it contains a very clear statement of the problem and of the opportunities which await the United States as we seek to understand how to deal with the potential good that this oil resource can achieve for both the United States and Mexico. It concludes with the following thoughtful paragraph which I endorse:

There are obvious opportunities here for tradeoffs, but the negotiations will have to be conducted delicately and at a high level in both governments. President Carter should consider appointing an experienced and prestigious official to a special office for U.S.-Mexican relations. But, first the Administration should decide how it wants relations between the countries to proceed. One thing that U.S.-Mexican relations surely could use is a change in people's attitudes on both sides of the border. The United States cannot treat a rich Mexico with contempt. And Mexicans need no longer remain paranoid about the "colossus of the north." U.S. public attitudes toward Mexico are less likely to change, however, if the U.S. government persists in keeping Mexican oil wealth an official secret.

Mr. President, I ask that "The New Republic" editorial be printed in the RECORD.

The editorial follows:

[From the New Republic, Aug. 19, 1978]

OIL OF OLÉ

The U.S. government has been keeping a secret with enormous implications, but now it's out: Mexico apparently has petroleum reserves of 150 billion to 200 billion barrels, making it an oil power potentially greater than Saudi Arabia.

The CIA has known about Mexico's vast potential reserves since 1976, but two administrations have concealed this information from the American people and from Congress, apparently to avoid undermining energy policies premised on scarcity and foreign policies based on nuzzling the Arabs.

High officials in the departments of Energy, State and Treasury now confirm that Mexican potential reserves are huge, and some of them even admit the deception. But they claim that the Carter administration took Mexico's resources fully into account when fashioning its "moral equivalent of war" energy policy, which anticipates a world oil shortage by the mid-1980s or 1990.

Carter's foreign policy is designed to insure that Saudi Arabia will produce enough oil to overcome the shortages. But these high-level assurances are disputed by subordinate officials, who assert that Mexican reserves never were factored into Department of Energy computer studies of world oil supplies and prices until last month.

Apparently, the people who make policy in the Carter administration did "take account" of Mexican reserves—but quickly dismissed Mexico's potential production as being of minor importance to the world's energy outlook.

The administration seems to believe that Mexico and its state-owned oil company, PEMEX, lack the equipment, the technical ability and the political will to produce more than four or five million barrels of oil per day by 1985. Saudi Arabia, by comparison, is pumping 7.5 million barrels a day now and has the capacity to produce 11.5 million.

The administration is counting on the Saudis to increase their production capacity to at least 12 million or 14 million barrels a day. Some experts contend it will take 18 to 23 million barrels a day of Saudi oil to save the industrialized world from collapse in the mid-1980s or early 1990s.

We do not think that Mexico's reserves mean the administration can drop its conservationist energy policy or tell Saudi Arabia to go jump in the Persian Gulf. But there is evidence that Mexico's potential production in the next decade has been underrated. Conservation reserve-to-production ratios used in the oil industry suggest that Mexico might be able to produce 10 million barrels a day by 1985 or 1990.

Some Mexican government officials anticipate that production will indeed rise to these levels. If it does, Mexican petroleum could be an important factor in holding down world energy prices and in reducing the West's dependence on Saudi Arabia and other OPEC sources.

Right now there is an oil glut. If we play our cards right, there need never be a shortage. This means the special hold the Saudis have had over us can be broken. The United States should be doing what it can to encourage Mexican production. It has been doing so in some ways. But in other ways it has done just the opposite. The Department of Energy's veto of a major US-Mexican natural gas deal this year is a notable example.

The administration seems not to have thought very hard, at any very high level, about the opportunities that Mexican oil presents and about the implications for US-Mexican relations. Besides lowering oil prices and diversifying our sources of oil, development of Mexico's oil riches could help to alleviate the poverty in that country and reduce the flow of illegal immigration into the United States.

The opportunities, along with Mexico's proximity, suggest that Mexico and the US should develop something better than the "special relationship" that exists between the US and Saudi Arabia—an "extra-special relationship," perhaps.

There are plenty of problems in the way. The most serious is a climate of suspicion in Mexico fostered by years of US exploitation, discrimination and aggression. So far President Carter has not even ordered a "Presidential Review Memorandum" on US-Mexican relations, as he has done on other important foreign relations issues. We think the subject is worth at least that.

Critics of the Carter energy policy (including some within the government) contend that concealment of CIA data on Mexican reserves is part of some nefarious grand design. Some accuse the administration of being so obsessed with "neo-Malthusian" scarcity theories that it is driven to suppress evidence suggesting that the world really has abundant supplies of oil—not only in Mexico, but in Iraq (which also may possess reserves as big as the Saudis') and elsewhere in the third world.

Others charge that the administration is so intimidated by Saudi Arabia that it is afraid to explore rival energy possibilities. Still others see evidence of collusion with the major oil companies, which have no access to Mexico. The Mexican revolution nationalized oil production in 1938 and kicked foreign companies out. Still other critics say the administration is unwisely committed to a policy of higher, not lower, energy prices—possibly to encourage domestic production and bring on alternative sources like coal gas.

Without proof, we are not inclined to accept conspiracy theories, but it did nothing for our faith in the administration's credibility or its motives to be told by a high-ranking DOE official that CIA data on Mexican reserve were concealed from the public and the Congress because "these are areas where people can lose their lives." Getting energy data—even for the CIA—is not a high-risk occupation.

We sympathize up to a point with administration contentions that it would have been undiplomatic for the US government to publish figures on Mexican oil that would have been wildly different from the Mexican government's own figures, especially on a topic as uncertain as potential oil and gas reserves. Ever since it got caught making oil claims in the 1960s that didn't pan out, Mexico has been extremely cautious, even secretive, about its estimates. Even now, PEMEX's official statement of wealth includes "proved" reserves of 16 billion barrels (expected to be revised to 18 billion or 20 billion within a few months), plus "probable" reserves of 31 billion, for a total of only about 50 billion. By comparison the CIA puts Saudi Arabia's oil reserves—proved, probable and potential—at 150 billion barrels.

Officials at Treasury, DOE and State confirmed last week that the latest U.S. estimates of potential Mexican reserves are in the range of Saudi Arabia's proved reserves. One Treasury oil expert said it is commonly believed in the oil industry that Mexico's potential may run as high as 200 billion barrels, and some estimates go as high as 280 billion barrels.

A top official in DOE said he has seen upper-limit estimates for Mexico that run as high as 300 to 325 billion barrels, but that he considers estimates of 100 to 160 billion as reliable. He said that figures like these have appeared in secret government reports for at least two years. "There's no news in these numbers," he said. A former national security aide to President Ford confirmed that the CIA began reporting "enormous" Mexican reserves in 1975 or 1976.

The Mexican government has been speedily upgrading even its own cautious estimates. Before 1972, when PEMEX began exploring its Southeast oil fields, Mexico set its reserves at only 3.5 billion barrels. In the six years since then, the certified figures have risen by more than 360 percent. Alvaro Franco, an expert on PEMEX at the International Association of Drilling Contractors in Houston, says that all the Mexican figures are "extremely cautious and ultraconservative."

He explained that there are about 350 known oilbearing geological structures in two of Mexico's newly discovered petroleum areas in the Southeast. They are waiting to be drilled and tested. In the Bay of Campeche alone, there are 200 identified structures. Ten of these have been drilled and eight have turned out to be producers. He said the oil is being found in geologic pockets so thick that each one contains large quantities.

If the "tremendous success" the Mexicans have had in drilling since 1972 continues, he said, then the country has "way, way more" than the 100 billion to 120 billion barrels of petroleum that some Mexican officials privately acknowledge as their estimate of potential reserves.

Even if Mexico turned out to have only 60 billion barrels of oil, it could have a major impact on the world energy market. The oil industry considers it conservative to plan on producing one barrel of oil a year for every 20 barrels of estimated reserve. By that measure, Mexico could easily pump out eight million barrels a day—half a million more than Saudi Arabia produces right now. Mexico actually produces 1.3 million barrels a day, and is working to increase output to 2.2 million by 1980.

In spite of Mexico's potential, both the Ford and Carter administrations seem to have made deliberate decisions to discount Mexican oil in charting U.S. energy and foreign policy. Having made this decision, these planners seem to have decided to keep quiet about the Mexican reserves in order to avoid having the figures available to refute their judgment. Why did the energy planners decide to ignore Mexico?

A former Ford administration official said that the CIA information came in too late for the Republicans to do much with it. He said the policies of former Mexican president Luis Echeverria did not give much hope for expanded Mexican production or cooperation with the United States. President Carter has developed much warmer relations with Mexico's current president, José Lopez Portillo, who is regarded as a businesslike planner and administrator. But administration policymakers still seem convinced that Mexico can't or won't produce up to its potential.

The "Mexico can't" school prevails at high levels of DOE, where some officials believe that only a U.S.-style integrated oil company can move quickly to develop oil fields like those in Mexico. One DOE executive bluntly disparaged PEMEX's ability to manage the job. He spoke of the "Mexican theology of not allowing oil companies to meddle with the national patrimony." He said, "Given the limitations of PEMEX, to put it kindly . . . you're just not going to see the kind of dramatic impact that those reserves figures would indicate."

PEMEX does not have the managerial know-how, the "systems approach" and the new technology that the major companies have. The Chinese, this official said, are going about things more sensibly by inviting in Western companies as partners. The Mexicans, because of their stubborn hostility toward oil companies, probably will be able to produce no more than four or five million barrels a day by 1985. Needless to say, the major U.S. oil companies see things the same way.

Other U.S. officials belong to the "Mexico won't" school. They say there are powerful political pressures in Mexico to develop oil production slowly, even though 51 percent of Mexico's workers are unemployed at least some of the time and it takes 800,000 new jobs a year to keep the unemployment rate from rising.

The Mexican elite, which enjoys a share of national wealth as disproportionate as any in the world, is not interested in rapid, inflationary and socially dislocating growth. Leftists want to keep Mexico's oil riches in the ground, where they think it will increase in value over time. The leftists especially do not want Mexico to produce its oil to satisfy the appetite of the United States.

There is still another school in the administration, which holds that Mexico inevitably will produce up to its capacity—provided that the United States' actions do not create a Mexican political backlash. "It's like a fruit tree," said a State Department official. "If you don't shake it too hard or too fast, pretty soon you'll get nice fruit.

There is a natural symbiosis here. We are Mexico's natural market for oil. They are our natural supplier. If we play it cool, a nice relationship could develop naturally. But we could mess it up if we are too eager to tell them what to do."

Since it is obviously in the US national interest for Mexico to produce as much as possible, what should the United States do? We already are offering capital and such technical expertise as Mexican pride will permit it to accept. We also ought to avoid botches like last year's natural gas fiasco.

PEMEX and a group of American companies thought they had concluded a deal to build a pipeline across the Texas border and move Mexican natural gas into the US, only to have it aborted by the US Department of Energy. Administration officials acknowledge that domestic US considerations forced the action.

The American companies and PEMEX agreed on a price of $2.60 per thousand cubic feet, which is more than domestic US gas producers are paid and more than Canadian exporters get. If the deal had gone through, Congress certainly would have rejected President Carter's energy plan, which calls for US gas producers to get $1.90 per thousand cubic feet.

American officials claim that negotiations with Mexico will resume when—and if—Congress enacts an energy bill. But meanwhile, Mexico is offended and has decided to use its naural gas for domestic utilities, industries and even city buses.

If the United States wants more energy production from Mexico, there are things that Mexico wants from the United States. These include free immigration across the Rio Grande and lower trade barriers against Mexican agricultural commodities. There are obvious opportunities here for tradeoffs, but the negotiations will have to be conducted delicately and at a high level in both governments.

President Carter should consider appointing an experienced and prestigious official to a special office for US-Mexican relations. But, first the administration should decide how it wants relations between the countries to proceed. One thing that US-Mexican relations surely could use is a change in people's attitudes on both sides of the border.

The United States cannot treat a rich Mexico with contempt. And Mexicans need no longer remain paranoid about the "colossus of the north." US public attitudes toward Mexico are less likely to change, however, if the US government persists in keeping Mexican oil wealth an official secret.●

## "A NEIGHBORHOOD FAMILY IN MIAMI"

● Mr. CHILES. Mr. President, isolation, impaired mobility, growing health problems, distant and inadequate health services, lack of power and resources to improve substandard housing conditions, decreasing communications networks, loss of friends and family, decreasing opportunities for productive activities—and overall, financial resources too meager to make changes: These are just a few of the complicated and interacting problems which creep up on many older Americans until, one day, despair may begin to set in.

Without help, without resources, there is not much an older person can do.

And there are not many options available. In case of illness there is always the hospital or a nursing home. And there may also be a nursing home for those who cannot afford to live independently any more.

Some older Americans are a little luckier—there may be a special apartment available in a congregate housing program with assistance and services readily available. Or there may be a special day health center or multipurpose senior center close enough to serve as a contact point for friends and services.

It takes a concerted effort by many people and different services to make much of a difference. As a recent article appearing in Aging magazine puts it:

The phenomenal growth of the elderly population in the U.S., and particularly in Miami, Florida, has forced health professionals to face the reality that there will never be enough Federal dollars or professional personnel to effectively reach every elderly person requiring assistance.

I would like to share this article with my colleagues, because it also describes a unique solution in Miami.

A "neighborhood family" has been created in which elderly living close together have banded together to organize their own programs and provide assistance to each other. The "family" receives professional assistance and services from the Jackson Memorial Hospital and its community mental health service.

It is an example of a very direct attack on basic problems and it offers lessons for similar action elsewhere. I ask that the article from "Aging" magazine be printed in this RECORD.

The article follows:

THE NEIGHBORHOOD FAMILY

(By Hilda K. Ross and The Neighborhood Family)

The phenomenal growth of the elderly population in the U.S. and particularly in Miami, Fla., has forced health professionals to face the reality that there will never be enough Federal dollars or professional personnel to effectively reach every elderly person requiring assistance.

In 1974, the staff gerontologist of Jackson Memorial Hospital's Community Mental Health Service became interested in testing a new organization model—the Neighborhood Family. This would allow the elderly to identify their own personal and environmental problems, and then resolve them with a minimum of funds and professional staff. They believed that the elderly should act as both the planners and consumers, with the staff working as a liaison between The Neighborhood Family members and community agencies. Thus, the elderly would have a direct impact on the distribution of resources by letting agencies know what they, as a group, wanted for their community.

The program's objective was to educate a group of older people to be the primary agents in altering the negative social and environmental conditions in their community. Through the group learning process, other basic needs of the elderly would also be met: the need to be needed, to be part of a community group, and to be recognized as effective people.

The word "Neighborhood" was chosen in order to enlist individuals from an area which *they* defined geographically and psychologically as their neighborhood. The word "Family" was chosen because it implied a bond of similar values. It was felt that older people, most of whom have lost their relatives, would adopt a surrogate family and rely on it for reciprocal friendship and support.

The Neighborhood Family is staffed by the Community Mental Health Service (CMHS), but the Neighborhood Family itself is much more than the Jackson Memorial Hospital (JMH) Community Mental Health Clinic because it belongs to the people rather than to JMH. The Family developed within the JMH-CMHS framework, but the members choose to be autonomous.

The Northside Neighborhood Family Services was formed as a non-profit incorporated organization with its own Board of Directors drawn from the Neighborhood Family membership. The Board formulates the Family's policy and programs subject to approval by The Neighborhood Family membership. Staff advise and help the members to carry through on their decisions.

A WAREHOUSE BECOMES A CENTER

Selection of a site for The Neighborhood Family began with demographic surveys of neighborhoods in the inner-city areas of Miami and Dade County which had large concentrations of elderly persons. The most suitable site seemed to be a low-income trailer park development near a large shopping center. This area had the highest crime rate in Dade County, few services provided by agencies, limited recreational and educational facilities that were nearby, and minimal social interaction between the elderly beyond shopping. An informal survey also indicated a wide range of personal and environmental problems.

Since transportation was frequently mentioned as a problem, it was decided that a facility close to the target population was necessary. With no budget, the burden of housing rested on the community. The Northside Shopping Plaza had the most traffic. The management was approached, and within a month, a huge warehouse was offered with free rent and electricity. The Family cleaned, painted, and furnished it themselves.

One person carried out the initial contact with residents by knocking on each trailer door and explaining The Neighborhood Family concept of working together "as a Family confronting problems most older people seem to have." An interview was conducted to explore the needs of each individual and the community. By using this approach, a climate of positive expectation and individual involvement and commitment was created and continues to be a strategy for encouraging participation. In a period of 10 weeks, 27 elderly persons expressed an interest in the project and came to the first meeting.

Data from the Assessment of Needs survey were presented to the members at the first meeting in the facility.

The next six weeks involved learning the names, telephone numbers, and services provided by community agencies. Twice a week, some 25 other people met at the facility to plan for two panel discussion meetings involving various agency heads who would provide information on services available to The Neighborhood Family. Through this process, the elderly learned organizational skills as well as the selection and protocol techniques needed in contacting appropriate agencies.

It took 10 weeks from the first meeting for a group of elderly people to turn the warehouse into a Center, identify themselves and their purpose, plan and execute two large panel meetings, form an administrative body, and prepare a program for an Open House.

Although a staff was offered by the JMH-CMHS, the staff gerontologist chose to work alone at first. During the initial four months, no staff or agency personnel were there to impose preconceived notions of how to work with older people.

There were no agencies to extend services, no operating funds, and no administrative structure to contend with. It was important for the members to see themselves as the only participants who would transform the theoretical model into a functioning Family.

The Neighborhood Family continues to be understaffed. Aside from a full-time director, there are two part-time nurses, a full-time social worker, and secretary. Six hours of psychiatric time are available to The Neighborhood Family from the JMH-CMHS. The Family survives with the help of volunteers from the membership. Five volunteers each work 38 hours a week, and 20 volunteers work from 2 to 37 hours a week.

ALL RACES, ALL AGES BAND TOGETHER

Although the area defined as The Neighborhood was in the trailer parks area, we discovered at the end of the first year that only 70 percent lived in the trailer parks. Another 24 percent lived in small private homes in areas beyond the parks. Those 50–59 years of age represent 12 percent, while those 60–69 make up 31 percent of the membership. The 70–79 age group comprises 20 percent and the 80 and over group, 9 percent.

The youngest member is 28 years of age and the oldest is 93. Eighty-five percent are white Americans; 6 percent are Black. There are very few Spanish-speaking members. However, we are seeing an increase in the number of Black elderly women, both American Blacks and Bahamian, and in the number of Asians, particularly Filipinos.

Thirty-five percent of the members have lived in Miami for less than 10 years, but 54 percent have lived in the same neighborhood from 11 to 30 years. This large group represents the elderly who did not join the flight from the inner-city. The majority live alone, and 43 percent are married. Most of the members say they had "some high school," and 27 percent finished high school.

Originally 65 percent of the members had telephones; this dropped to 56 percent at the beginning of the second year and is still dropping. We are notified of telephone cutoffs each day. When The Neighborhood Family opened, 52 percent indicated that they had cars. This has dropped significantly as insurance rates have sky-rocketed in Dade County and as members can no longer afford to maintain a car.

A levelling off is occurring as more affluent residents choose to go elsewhere, leaving The Neighborhood Family to those "who really need it."

One of the major problems cited by the Family members is poor health. Sixty-eight percent indicate that health "prevents them from doing what they want to do." Sixty-six percent are under care for their medical problems. Eye problems, arthritis, heart trouble and hypertension are leading complaints. Reasons cited for not seeing a physician include: "It's not bothering me now," "finances," "can't find a suitable doctor," and "transportation."

In the first year, participants listed their major concerns in this order: health, money, and a desire for a better self-image. At the end of the second year they listed health, crime in the neighborhood, and finances.

DEALING WITH THE PROBLEMS

Residents who were helped with a problem usually became active in the Center and used it for social support as well. However, there were others who, for reasons of ill health or similar problems, could not come and yet supported the idea of working together "like a family." A network system was initiated in the trailer parks for these individuals. Its purpose was to keep a record of new people moving in, to communicate information quickly, to be in close contact with individuals needing services, and to

keep residents informed of center services and activities.

During the first year, weekly outdoor meetings were held on a member's patio in one of the four trailer parks. This laid the groundwork for dealing with larger environmental problems within the trailer park and provided a base for collective problem-solving. After a year the environmental problems were resolved, but residents continued to be in close contact with The Neighborhood Family. They were already in the habit of contacting The Neighborhood Family for help with everyday problems and crises, and for companionship and social activities.

This year, the network meetings have been reactivated in another trailer park which the entire Neighborhood Family membership, including policy and agency personnel, identified as one of the worst crime areas in the Neighborhood Family community. Their specific objective is to "Reclaim Your Neighborhood" and the project has the approval of the trailer park owner, manager, and many residents who were already Neighborhood Family members.

Elderly members are presently offering very young mothers help with child care. Their problem list for future action is long, including removal of a dope-peddling ring, drunkenness, noise, and finally, crime.

HEALTH SERVICES

The Neighborhood Family provides supportive and preventive community health care. With the aid of the nurses, social worker, and "the friendly Family place," crises in health care have been largely eliminated. The Well-Adult Health Program in The Neighborhood Family now includes screening, health interviews, lectures, blood pressure and weight checks, health counseling, home visits, and an exercise program.

Project members eagerly talk to the nurses and look forward to the health interview and blood pressure reading. However, only half of them comply with instructions or referrals. Some noncompliers voice the fear of a disability being discovered, believing that they will be rejected and forced into isolation if people knew they were not well. Some have had unsatisfactory experiences with clinic services. Others say they just want "to go it alone." In some instances, it took a year and many interviews to identify the salient problems. Eroding the resistance of noncompliers is a continuing effort.

The nurses make home visits and hospital calls. Their persistence after two years is finally paying off. Members have begun a regular exercise program at the center, and they urge others to "see the nurse," "to go to your doctor," or "take care of yourself." There are lines for blood pressure checks. Members accompany one another to a nearby primary health care facility. Healthy older members look out for the sick.

SOCIAL SERVICES AND COUNSELING

The Neighborhood Family provides direct and referral services involving personal economic and environmental assistance. These include food stamps, the Senior Companion Program, SSI, housing, counseling, and legal aid. Hot meals are served daily at the Neighborhood Family Center and to the nonambulatory at home.

Individual and group therapy are provided by Family members and professional staff, along with continuing evaluation by the psychiatrist and nurses.

Social activities include discussion groups on the development of mutually supportive activities. Thursday morning membership meetings, neighborhood improvement meetings, network systems meetings, bi-monthly trips, parties, and bingo sessions. Nothing is superimposed from above. Members continue to hold weekly meetings and to express their ideas and desires. The Board of Directors plans programs based on these ideas and members vote on the programs.

One idea which has been carried through to completion was the Italian Day, which was such a success that a Middle East Day was planned.

Public officials have also been brought in to address the Neighborhood Family group on concerns voiced in the Thursday membership meetings and on such issues as garbage fees, insurance rates, and crime. This has led to feelings of personal worth and effectiveness among the members.

The scheduling of events or programs reflects the interest and energy level of the members. The members, director, social worker, or nurses may contribute ideas for activities, but the development of a program is a mutual effort. The Family paces the "life" of an event whether it is an hour, a day, a week, or a month.

BUDGET

Based on the staff-service ratio of The Neighborhood Family, this community-based program offers a structure for serving large numbers of individuals at minimal costs. Direct care services, that is, medical, psychiatric, and social services, were given to 650 people from July 1975 to July 1976.

This number generated 2,500 encounters per month at a cost of $24 per member per year. This figure does not include 1,440 people who came into the Center for recreational, educational, and special events. Contributing to the low cost is the volunteer labor of 27 members and the rent-free, electricity-free facility.

SUMMARY

We have described what can be accomplished in a two-year period in a low-income neighborhood composed of residents with multiple physical, psychological, social, environmental, and economic problems. Quasi-familial bonds and community action have developed in an area of social decay, mutual suspicion, apathy, and hopelessness.

The Neighborhood Family differs in the most fundamental sense from other service providers because it is not under the aegis of an agency extending its services to its constituents. It is free to develop its own services.

The Neighborhood Family is a community-based and community-administered body which utilizes the services of professional personnel working as members of the Family, not apart from its "staff." The elderly participants are the decision-makers who function as peers with the professionals.

The Neighborhood Family can supplement programs in senior centers, in churches, and in community mental health centers. It warrants replication in rural areas, and with other ethnic groups.

In its third year, The Neighborhood Family model continues to prove the hypothesis that older people living in the community can work together as a Family to reduce stress from personal problems and environmental conditions.●

## CONTROVERSIAL NUCLEAR DEAL

● Mr. PELL. Mr. President, all Americans concerned about the dangers of nuclear proliferation should be encouraged by the reported termination of the arrangement under which France would provide a nuclear reprocessing plant to Pakistan.

While I can appreciate the frustration of Pakistan's leader, Gen. Mohammed Zia al Haq, in having this major program stopped by France, I hope that the leadership of Pakistan can understand how so many people believe that this decision was the right one for Pakistan and will be of major importance in efforts to control nuclear proliferation elsewhere. It would be very unfortunate if Pakistan were to react by maintaining a determination somehow to go ahead with a reprocessing plant through some other means. As testimony given to the Committee on Foreign Relations has made clear, a national nuclear fuel reprocessing plant simply does not make economic sense for Pakistan.

Much of the credit for this reported outcome should go to a former colleague, Senator Stuart Symington, who sponsored in 1976 an amendment to the Foreign Assistance Act of 1961. The Symington amendment required termination of all military and most economic assistance to any state delivering or receiving nuclear enrichment or reprocessing equipment, materials, or technology, unless multilateral auspices and international management were applied when available and a recipient country entered into a full-scope safeguards agreement with the International Atomic Energy Agency. As my fellow Members are aware, enrichment and reprocessing under national auspices under unsafeguarded conditions are key to the development of nuclear explosive devices.

The amendment was accepted by the Committee on Foreign Relations and the Senate. With the strong support of other Senators, including our late colleague, Senator Hubert H. Humphrey, the Senator from New York (Mr. JAVITS), and the Senator from Ohio, (Mr. GLENN), who argued strongly for the Symington amendment, the amendment was accepted in conference.

The Symington amendment was a key initial effort to control the spread of nuclear proliferation. Since then, the Congress has approved the Glenn amendment to the Foreign Assistance Act of 1961 which expands the scope of the Symington amendment. The Congress earlier this year passed the comprehensive Nuclear Non-Proliferation Act of 1978.

The countries most immediately concerned with the effects of the Symington amendment were Pakistan and Brazil. As chairman following Senator SYMINGTON of the Arms Control Subcommittee of the Senate Committee on Foreign Relations, I have made it a particular point to follow closely developments in Pakistan and Brazil. Clearly, at some point, the provisions of the Symington amendment would have been triggered and Pakistan would have faced a formal cutoff of U.S. military and economic assistance.

No one, of course, desired such a disruptive event in the relations between Pakistan and the United States. On the other hand, the threat of nuclear proliferation is so severe that it was clear that the Symington amendment would have to be enforced if the deal between France and Pakistan were not stopped.

Fortunately, the deal is off, according to General Zia, and it will be possible to resume normal aid relations with Pakistan.

Mr. President, I ask unanimous consent that the full text of the August 24 Washington Post article on this matter be paneled in the RECORD following my remarks.

The article follows:

[From the Washington Post, Aug. 24, 1978]

PAKISTAN SAYS FRANCE KILLING CONTROVERSIAL NUCLEAR DEAL

(By Milton R. Benjamin)

Pakistan announced yesterday that France has backed out of an agreement to provide it with a nuclear reprocessng plant that would produce plutonium suitable for use in manufacturing an atomic bomb.

The announcement, made by Pakistani ruler Gen. Mohammed Zia al Haq at a press conference in Rawalpindi, represents a major triumph for the Carter administration's nuclear nonproliferation policy.

The administration hoping for an additional piece of good news in the next couple of weeks in the form of a decision by South Africa to sign the nuclear nonproliferation treaty.

France's decision not to go through with the Pakistani deal is also expected to bring new pressure on West Germany, which has sold a pilot nuclear reprocessing facility to Brazil.

West Germany is now the only country still planning to go ahead with plans to provide a nuclear reprocessing facility to a Third World nation.

Officials in Bonn insist they have no intention of cancelling the Brazilian sale, but U.S. sources feel Germany may in the end decide to proceed "as slowly as possible" in providing the reprocessing equipment.

Gen. Zia, in announcing the French decision said, he had been informed that France was backing out of the agreement in a "very polite" letter from President Valery Giscard d'Estaing.

"In military terms, we would say that although it was full of sentiment, it was a lemon," Zia said.

In Paris, the government confirmed last night that Giscard had sent a letter to Zia concerning the deal but suggested that the French president had once again offered to amend the original deal to provide Pakistan with a nuclear co-processing plant.

Both types of plant take the spent fuel from nuclear power stations and produce fuel that can be used again. But while a reprocessing plant yields plutonium suitable for weapons, a co-processing facility would not separate the plutonium from the uranium. This mix could not be used in fashioning a nuclear bomb.

Pakistan, while insisting that it has no intention of developing a nuclear weapons capability, has adamantly rejected France's efforts to substitute the co-processing facility and has insisted that Paris honor the contract signed in 1976.

This insistence has led many observers to conclude that Pakistan's primary motivation is to gain the capability to join subcontinent rival India—which exploded an underground atomic device in 1974—as a nuclear power.

These suspicions are buttressed by the fact that few experts in nuclear energy accept Pakistan's arguments that it needs the facility to supply a network of nuclear power plants.

At present, Pakistan has only one atomic power plant in operation, and one other plant in the works. It seems unlikely to have the dozen or more required to make a reprocessing facility economically viable until at least the middle of the 21st century.

The French decision not to go through with the sale to Pakistan marks a final turnabout from the course undertaken by the government of former Prime Minister Jacques Chirac, which also had negotiated to sell a reprocessing facility to South Korea. U.S. pressure on the Korean government was a major factor in aborting that deal.

France and West Germany later announced that while they intended to honor their contracts with Pakistan and Brazil respectively, they would not sell additional reprocessing facilities to Third World nations.

French officials say that since Chirac's departure, France has taken a much more serious view of the nonproliferation implications of the spread of nuclear technology. Giscard has been trying to gracefully back out of the Pakistani deal for some time.

But the Carter administration, with its emphasis on nuclear nonproliferation, certainly deserves "considerable credit for the whole major change that has taken place in world sensitivity" to this issue, one U.S. expert outside the government noted yesterday.

The administration official who has led the nonproliferation effort, Deputy Undersecretary of State for Security Assistance Joseph Nye, took pains to emphasize yesterday that the reprocessing deal is "a matter between France and Pakistan."

But both the United States and Canada have brought pressure on Pakistan in an effort to persuade it to cancel the deal.

The Carter administration last October informally cut off all but food aid to Pakistan, and has not signed any new aid agreements with it since that time.

Canada, which built Pakistan's only operating power plant outside Karachi, also announced in late 1976 that it was ending its nuclear cooperation with Islamabad and would not supply uranium fuel for the facility. As a result, the plant has been operating at less than 70 percent of capacity.

Canadian officials hailed news of the French decision yesterday.

The Carter administration's hopes that South Africa will shortly agree to sign the nuclear nonproliferation treaty grow out of a visit to Pretoria by top U.S. nuclear negotiator Gerard Smith earlier this summer.

Smith, according to informed sources, outlined to the Pretoria government a proposed method for international inspection of uranium enrichment facilities that could be used in safeguarding South Africa's pilot enrichment plant at Valindaba.

South Africa has long expressed concern that subjecting the Valindaba plant to inspection would result in piracy of its secret uranium enrichment process.

The United States, in an effort to persuade Pretoria to sign the treaty, has been holding up a shipment of highly enriched fuel needed to operate a South African research reactor. South Africa also is seeking U.S. fuel for two nuclear power reactors scheduled to go into operation in the early 1980s.●

## THE RAFSHOON TORPEDO

● Mr. GARN. Mr. President, because the Congress has the constitutional authority and responsibility to restructure the priorities of the executive branch and to pass legislation as they see fit, President Carter has reacted with a temper tantrum in vetoing the defense authorization bill, primarily stemming from bad White House advice. Coming at a time when the Soviets are underway to be a Navy second to none, our President has cut back on our naval shipbuilding program while promising to have naval forces at sea to support important American goals and objectives.

The President's veto of the defense procurement bill follows extensive work by both the Senate and House Armed Services Committees and expanded testimony by both civilian and military experts. His allegation of irresponsibly voted money for a carrier that was supported at the expense of NATO is yet another distortion of the truth. In fact, this bill would have:

First, added to the number of tanks to be modernized for the Army;

Second, added funds for an infantry fighting vehicle;

Third, added funds for the Army tank gun program done in cooperation with the German Government; and

Fourth, added study funds for a theater mobile ballistic missile to counter the ominous Soviet SS–20.

There still remains the confusion of the President apparently not knowing the difference between the authorization bill, which sets programs, and the appropriation bill which expends money.

The Soviet Navy today outnumbers the U.S. Navy in ocean-going surface ships, nuclear and strategic missile submarines, as well as other vital categories of surface elements. In addition, the Soviets have recently completed their second aircraft carrier and a 20,000-ton nuclear-propelled battle cruiser. To complete this measure of threat, the Soviets are presently allocating more than half of their supersonic Backfire jet bombers to the Red navy.

It is difficult to ascertain all the reasons for our sad decline in naval sea power, but in the pursuit of a strong national defense, President Carter's recent salvo at the Navy based on superficial or specious facts points once again to consistent bad advice.

The Wall Street Journal of August 24, 1978, presents a thoughtful profile as to the reasons why the President vetoed the defense procurement authorization bill, and I ask that it be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Aug. 24, 1978]

THE RAFSHOON VETO

President Carter's veto of the defense procurement authorization is everywhere interpreted as part of a new "get tough" act, the practical incarnation of media adviser Gerald Rafshoon's efforts to massage the President's sagging poll ratings. The veto would have helped Mr. Carter's competency rating more if he had not clouded the issue in monumental confusion, including confusion about what the bill he vetoed actually contained.

To cut through the clouds, it's necessary to keep in mind two simple facts. First: while Mr. Carter objects to the congressional decision to spend $2 billion on a nuclear aircraft carrier, his administration has already announced plans to include a large oil-burning carrier in its next budget request. The whole issue is, merely, this year or next year, and conventional or nuclear? Second: There is a difference between authorization bills, which set programs, and appropriations bills, which spend money. Mr. Carter vetoed the defense procurement authorization. The Pentagon appropriations bill has not yet been completed by Congress.

This elemental parliamentary distinction was entirely overlooked in Mr. Carter's charge that Congress is building the carrier by "diverting funds away from far more important defense needs." Among the congressional items to which he objected, for example, was a supposed cut of $500 million in military operational funds. But operational funds are not dealt with in the defense procurement bill; if this was the President's problem, he vetoed the wrong bill.

Doing the President one better, Defense Secretary Brown complained that Congress had killed three anti-submarine ships. There is a dispute over the appropriations for these ships, with the House on one side and the

Serate on the other. But whatever the eventual appropriation, the ships were included in the defense procurement bill. Secretary Brown complains about Congress killing ships that were in fact in the bill his chief just vetoed.

Now, within the context of the procurement authorization, it's true that despite $1.9 billion for the aircraft carrier, the congressional total was close to the President's original request. About half of the funds came from rather ordinary changes: the Army reporting it could not spend money on its new XM-1 tank as fast as it originally thought; Congress's decision that it could both save money and improve the NATO tank force faster by upgrading more existing M60A1 tanks and producing fewer new M60A3 tanks than contemplated in the original administration request.

The other half of the carrier money came from funds originally requested for the Trident submarine program, but which cannot be spent in this year's bill because of delays. With the Trident program delayed, and with the administration poised to order up a new carrier next year, Congress is merely saying, let's use this idle money and get the carrier started now.

There remains the issue of what kind of carrier. In passing, it should be noted that in light of the latest studies it is far from clear that large carriers are especially vulnerable. They can sustain hits from Soviet cruise missiles that would atomize small carriers, which have their magazines above water line. Large ships also make sense in light of electronic battlefield management, which promises a defense capable of shooting down attacking missiles. But this debate is beside the immediate point, since the White House has requested no small carriers. Indeed, the bill Mr. Carter vetoed provided more research funding for small carriers than he requested.

It is also unclear that oil-powered carriers save money. They are cheaper to build, but more expensive to fuel. Over the lifetime of a ship, it is difficult to see much difference in total cost. Congress prefers the nuclear carrier because it has better performance, being unencumbered by a train of tankers to refuel it every few days. The administration prefers a conventional carrier, saving money on construction now but spending more on operations later. And over this difference the President is willing to veto the entire procurement bill, inviting further controversy and delay that may hinder the improvements on which he and Congress agree.

In order to escalate this minor quarrel to veto proportions, President Carter launched an attack on Congress that seriously distorts the record. Sen. Stennis rose on the floor to complain, in what is for him strong language, of the administration's "false facts." The Senator was too much of a gentleman to say it, but we will: This is not a case of the Congress being soft on national security, but of the President dallying with defense in pursuit of cosmetic politics. The defense procurement bill was vetoed not because of any large difference on substance, but because it was the first bill to come along after Mr. Rafshoon whispered in the President's ear that he could look "strong" by vetoing something.●

## EQUAL RIGHTS AMENDMENT

● Mr. MUSKIE. Mr. President, tomorrow is the 58th anniversary of the adoption of the 19th amendment to the Constitution, the women's suffrage amendment. The years which preceded adoption of that amendment saw the growth and development of a "women's movement," and the 19th amendment was their symbol of social equality.

Today, 58 years later, a strong new women's movement is fighting for another amendment to the Constitution, the equal rights amendment. That amendment has become a symbol of social equality for the women of today.

The amendment is the subject of great controversy in the States which have not yet ratified, and in some States which have. As a supporter of the equal rights amendment, I believe the case for it is clear, even obvious. I hope those States which have not ratified will do so quickly.

And most importantly, I hope that the women—and men—who have fought so hard and so persuasively for the equal rights amendment, first in Congress and for the past 7 years in the States, will resolve on tomorrow's anniversary to keep up the fight until it is won.

I am concerned that the question of the 7-year time limit suggested by the 92d Congress has obscured the debate over the equal rights amendment, diverted the energies of supporters and created a controversy which may well be empty of meaning.

The fate of the equal rights amendment still lies in the hands of those legislatures which have not yet approved it. I urge supporters of the amendment to redouble their efforts in the States, and concentrate on convincing three more legislatures of the need to ratify the amendment.

The Congress finds itself in a curious postion, which the framers of the Constitution either did not foresee, or thought so improbable that the question was never addressed.

We are debating deadlines as if amending the Constitution were some sort of sports event, with four quarters or three periods or nine innings. The development of a Constitution by the people is and must be a more dynamic and sensible process than that.

To make matters worse, the question of a deadline for ratification of the equal rights amendment has run up against a "deadline" the Congress itself has imposed for adjournment this fall. Perhaps it is the pace of modern society which makes these ad hoc days on the calendar seem like a solid brick wall blocking the road to ERA. A closer examination, I believe, will expose the deadline as a mirage.

The Constitution sets no such deadline or time limit in article V, which describes the method of amending the Constitution. The framers made no reference to time limits when debating the article. And the Congress set no time periods for ratification for nearly 130 years until 1917, when it proposed the 18th amendment.

Even then, a time period was proposed mainly in response to approval by the Ohio legislature of a long-forgotten amendment proposed 80 years earlier.

The Supreme Court has given only limited guidance on the question of deadlines. The Court's major pronouncements have been these:

That the ratification procedure ought to be "succeeding steps in a single endeavor," and "sufficiently contemporaneous in that number of States to reflect the will of the people in all sections at relatively the same period * * *";

That the Congress may set time limits:

And that the question of a reasonable time for ratification is one which may be addressed "in the presence of certified ratifications by three-fourths of the States."

It seems to me the Supreme Court has felt that the question of amending the Constitution is closely intertwined with the political and social climate of any given period. While the passage of generations before adoption is probably not a reasonable time, some other period might well be reasonable. And it is the Congress which makes that decision.

The key question is not what the Congress does next month, or before next March. The key is getting the approval of the legislatures. Regardless of our decision on a time period this year or next, the Congress almost certainly will be confronted with the questions of timely ratification again, after three more legislatures ratify. Regardless of whether Congress acts now, it certainly could declare then that ratification had in fact occurred.

And anyone who might wonder whether the question of ERA is alive need only observe the events of tomorrow's anniversary. The fact of the controversy itself is persuasive evidence that ERA is a live issue ripe for action.

I hope the question is settled in favor of the equal rights amendment. Whether or not we act this year to extend the time period, the passage of days will not end the hopes of equal rights amendment supporters.

When the Senate is given an opportunity to extend or eliminate the time limit suggested 7 years ago, I will support that approach. I do not believe it is necessary. Nor is it likely to finally settle the question of what constitutes a reasonable time.●

## UNITED STATES RELATIONS WITH CHINA

● Mr. McGOVERN. Mr. President, the August 1978 issue of the American U.S. relations with China written by the distinguished Senator from Utah, my friend JAKE GARN, and by me. I ask that these views be printed in the RECORD.

The articles follow:

[From the American Legion Magazine, August 1978]

OPPOSING VIEWS ON A QUESTION OF INCREASING IMPORTANCE: SHOULD THE U.S. NORMALIZE RELATIONS WITH RED CHINA?

(By Senator George McGovern)

"YES"

In 1972, President Nixon signed the Shanghai Communique, committing the United States to normalizing relations with Peking (mainland China). Since then, Presidents Ford and Carter have endorsed this commitment. More than 100 nations—all of our major allies—recognize Peking. Polls show a majority of Americans favoring normalized relations. However, we remain the only major power with diplomatic links with Taiwan instead of Peking.

The establishment of diplomatic relations with Peking is vital to our national interests. Let us look at two examples.

China has sought our support in the U.S.—U.S.S.R.—People's Republic of China power triangle. Peking's shared objectives to restrain Moscow has added flexibility to our strategic capacities in Korea, Southeast Asia, the Middle East, Africa and Europe. Recognition of Peking will secure and expand our leverage. Failure to do so with responsible expediency can only lead to a renewal of mistrust and hostility.

Peking is already an important trading partner with many of our allies. Peking's economy is one of the world's largest. By the year 2000, its Gross Domestic Product is expected to equal well over $1,000 billion and its trading capacity will have quadrupled. There are mutual economic benefits in increased trade. For example, one-fourth of the human race lives in the PRC; 80 percent are involved in agricultural production at a level similar to ours in 1815. Consequently, China would like to buy U.S. machinery, grain and agricultural commodities. U.S. agricultural exportation is a multi-billion dollar industry, employing 1.2 million Americans. The trade potentials in agriculture, as in other spheres, are substantial. Until we normalize relations, we will continue to lose this world market.

The benefits of normalizing relations with Peking do not mitigate our commitment to Taiwan. The substance of our relationship will essentially remain—only the form will differ. We should make a unilateral statement opposing aggression against Taiwan, assure its access to self-defense supplies, and encourage Peking to indicate unilaterally it peaceful intent toward Taiwan. Additionally, we will continue to develop economic and other nondiplomatic relations with Taiwan following our recognition of Peking.

A realistic evaluation of Peking's objectives indicates its desire for peace with Taiwan. Peking lacks the military capability for a confrontation and doesn't want to jeopardize a Sino-American alliance. Peking needs grain, trade, technology and credits which are contingent upon a sound relationship with Japan, Western Europe and the United States. Finally, Peking desires that we change the form of our relationship—they accept our continued economic and other non-diplomatic relations with Taiwan.

Since 1972, each President and Secretary of State has affirmed that normalizing relations serves the interests of our nation, East Asia and the world. I concur with this conclusion and would support the proper legislation to insure it.

---

"No"

(By Senator JAKE GARN)

The United States should not "normalize" relations with Communist China—if doing so would mean the abandonment of Taiwan. In view of our longstanding and mutually beneficial ties with Nationalist China, I think it is up to the "normalizers" to explain what advantages would flow to the U.S. by shifting our allegiances in that critical area of the world. I can see none.

For the foreseeable future, Communist China would not be a major trading partner. In its present state of underdevelopment, the mainland has no foreign reserves with which to buy our production. Any trade would have to be financed with loans from the U.S. Government. We would be buying our own goods with our tax money.

We would be forced to abrogate important treaties and understanding to the detriment of our credibility in the world. The People's Republic of China has just reiterated its intention eventually to establish control over Taiwan, and has repeatedly said that "normalization" must involve the abandonment of Taiwan. Were we to acquiesce, we would destroy the last shred of credibility we have in the Far East. The Communist influence in that part of the world would be irresistible.

It is true that Communist China can serve as a counterweight to a growing Soviet threat, and that is a positive advantage that should be exploited. However, there is no indication that "normal" relations are a prerequisite to increased competition between the Soviet Union and Communist China. There is already mistrust between the two nations, and that can most easily be exploited by a United States acting forthrightly and confidently.

In fact, there is some evidence that the Communist Chinese maintain respect for us to the extent that we do act positively. When we yield too quickly to every demand made to us by great power rivals, we reduce our own weight and status in the world. It is likely, in my opinion, that we command more respect from the Communist Chinese by pursuing our own interests in the Far East, including support for Taiwan, than we would by adbandoning a longtime ally. Communist China is interested in using us as a counterweight to the Soviet Union. Might her rulers not conclude, if we were to abandon Taiwan, that we are an untrustworthy ally? And might they not seek rapprochement with the Soviets?

I have no objection to the establishment of relations with Communist China, providing that can be done without breaking relations with Taiwan. In fact, I propose that we make that offer. If the Communist Chinese do not like it, that would be their problem. The actual establishment of relations with the two countries may involve some risks to Taiwan, but I am convinced that the problems can be worked out to mutual advantage.●

---

## SEATTLE'S EXAMPLE TO THE COUNTRY

● Mr. KENNEDY. Mr. President, I call to the Senate's attention a recent article in Public Power magazine on how one of the Nation's leading cities has chosen energy conservation as the most environmentally and economically sound ways of supplying its future energy needs and ask that it be printed in the RECORD.

Three years ago Seattle's municipally owned electric utility, City Light, asked the city council for approval of a plan to buy additional power capacity from three proposed nuclear powerplants. Instead of rubberstamping the request, the council opened up one of the most interesting and instructive decisionmaking processes of any community, large or small. Over 14 months, 12,000 Seattle citizens participated in the decision about how the city would get additional power.

In the end the citizens chose conservation as Seattle's new power source. Although not traditionally thought of as a source of power, achieving energy efficiency can frequently result in more available energy and lower cost than any new supply source. Half of Seattle's growth up to 1990 will come from conservation.

If every electric utility followed the example of Seattle City Light, and each city and public utility commission followed the example of Seattle's City Council, we would be well on our way to reducing the need for increased oil imports, prohibitively expensive central powerplants, and unproven synthetic fuels. As Seattle has shown, allowing local residents to make decisions on what type of energy policy is best for them will be the cornerstone for any future national energy policy.

The article follows:

[From the Public Power, July/August 1978]

SEATTLE'S "ENERGY 1990": CONSERVATION AS GENERATION

(By Joan Whiley)

Seattle City Light's year-long study, "Energy 1990", has been termed one of the most comprehensive ever undertaken by an electric utility. Energy 1990 involved a programmatic review of load forecasts, generation alternatives, energy economics, environmental impact and conservation.

Three consulting firms worked on the project as well as City Light staff; a Citizens Advisory Committee labored for months prior to advising the Seattle City Council of its recommendations; the City Council undertook lengthy public hearings. Finally in July, 1976, the City Council selected conservation as the favored energy source through the year 1990 in lieu of participation in two projected nuclear plants.[1]

Specific conservation goals and programs were adopted by the Seattle City Council to offset average energy growth by 230 mw by 1990. The 230-mw goal means that Seattle must satisfy nearly half its normal growth by conservation. At the present time, the Seattle system has a current average load of about 900 mw and a peak load of just over 1,500 mw. The conservation target is to be achieved by reducing residential average load growth by 85 mw, and industrial and commercial average load growth by 145 mw.

Main emphasis of the energy 1990 decisions is on conservation as a resource. However, accurate load forecasting and development of contingency generation play key roles in the planning process.

For contingency generation, Seattle City Light is concentrating mainly on hydro which the Council specified as the preferred source. Evaluation of Copper Creek, a fourth dam proposed on the Skagit River, is being conducted at a high level of effort and assessment is being made of all feasible hydro sites throughout the state of Washington. Coal options are also under investigation.

City Light is currently working with a second generation econometric model to develop both short- and long-range forecasts. Econometric models present a distinct advantage in their sensitivity to independent factors or variables.

CONSERVATION GETS TOP PRIORITY

The conservation program, which has been given top priority by Seattle City Light Superintendent Gordon Vickery, involves virtually every discipline and organizational entity in the utility. Focal point is the Office of Conservation.

The program now consists of over 30 projects concentrating on residential energy savings; commercial/industrial conservation; education/community outreach; and conservation research, development and demonstration. An additional category covers a range of project activities from in-house conservation and participation on the municipal energy task force, to tracking energy conservation legislation, conservation grants, application and grants management.

In October of 1977, the Department of Energy awarded Seattle a grant of $375,651 for the first five years of a demonstration utility conservation program. The six proj-

---

[1] Development of the "Energy 1990" study was described by Ms. Whiley in an earlier article in *Public Power*, Nov.–Dec. 1976, pages 20–22.

ects included in the program are: neighborhood workshops and residential audits; revision of electrical service requirements; bank financing of the insulation program; energy management information system; hourly load prediction system; and analysis of the legal authority of the city to require that energy consumption of a home be disclosed at time of sale. This grant was one of 10 awarded nationally for pilot conservation demonstration by utilities.

The severe drought of 1976 to 1977, which affected the entire Northwest, imposed an immediacy to the entire conservation program that had not been anticipated. As generating utility with a 90 percent hydro base, Seattle City Light was heavily impacted by the water shortage. From a self-generating capability of 70 percent, Seattle was reduced to 53 percent. The difference was made up by outside power purchases at costly thermal rates. The utility goal had been an accumulation of 17 mw per year through 1990. Due to the severe drought, a voluntary curtailment program was initiated for a 10 percent reduction in consumption.

The immediate need was to develop public awareness and a mood of public urgency. Numerous programs were promptly initiated for consumer information, energy audits, media advertising and development of an employees' speakers bureau.

ADS ATTRACT ATTENTION

City Light embarked on an aggressive program by radio, television and newspaper advertising. Themes were catchy, clever and funny. They got public attention.

Radio spots featured a husky-voiced woman describing the benefits of a shorter shower; a housewife greeting her weary husband with a martini and low lights to discuss—energy conservation. Television spot commercials were similarly designed to be humorous attention-getters. Newspaper advertising included photos of an energy hog, a power junkie, and infrared photos of a home dissipating thermal energy.

The City Energy Office, working in cooperation with the Conservation Office, initiated a program for reduced lighting on arterials and reduced energy use in municipal buildings. Public display materials were another necessity, with formal City Light exhibits appearing in Home Shows and street fairs.

The public awareness portion of City Light's conservation program was a turbulent and creative period. It involved interfacing with schools, community groups, industrial and commercial organizations, professional groups and citizen groups. It required a mixture of humor and an adventurous, creative management mood; it also took management vision since its success meant sharp, short-term revenue reductions.

By the end of 1977, the entire program yielded the remarkable savings of nearly half a billion kwh.

Since the drought ended in the fall of 1977, City Light has returned to the long-term conservation effort. Heavy promotion has been replaced by emphasis on customer contact, neighborhood-based projects and research and development.

Substantial savings will be achieved by adoption of amendments to the City's structure-related codes. Over 100 mw of load growth should be saved by the use of energy efficient building standards. Substantial progress has been made in this area, however, interaction of the many parties involved necessitates a slow and steady pace.

RESIDENTIAL AUDITS CONDUCTED

The residential audit program which was initiated early in 1977 involved the training of 80 employees to conduct energy surveys of customer homes in line with regular duties of inspection of high bill complaints and answering appliance service calls.

Later in the year, the audits were extended to include installation of a water heater insulation jacket at cost, lowering the water heater thermostat, selling 40-watt and 60-watt bulbs for 25 cents to replace specific higher wattage bulbs and giving away free shower head flow restrictors. This service, again greatly expanded by the Department of Energy grant, now includes an in-depth survey of each home.

Working in tandem with the audits is the concept of home energy workshops which is being researched through the Department of Energy grant. Focus on the home workshop is on neighborhood groups and on the strong localized structure of Seattle communities.

A neighborhood "host" home is volunteered and a City Light energy checker gives a walk-through audit of the home for the host and neighbors. Emphasis is on low-cost and easily accomplished conservation measures. "How-to" information and brochures are distributed. Goal of the workshops is to combine fun with instruction and engender a feeling of neighborhood togetherness in conservation projects. Workshops are held both days and evenings. Still in its initial stages, the project will be fully operational in the fall.

Also tying into neighborhoods is the thermograph project. During the winter of 1976–77, Seattle City Light contracted for an infrared flyover of its 131-square-mile service area. The thermograph photos have been made available to the public through displays, public libraries and fire stations, through the home workshops and through the community workshops where they have been the main drawing card.

Located in church and school auditoriums, 14 community workshops have been held thus far. Workshop attendance has been as high as 800, and as low as 30 persons, depending on the community structure. Emphasis is on hands-on materials, do-it-yourself projects and interpretation of individual thermographs by City Light staff.

SEMINARS HELD FOR BUSINESSES

Energy management seminars have played a key role in training commercial and industrial businesses in the application of basic management principles toward the development of their individual energy conservation programs.

To date, 14 seminars have been conducted by City Light staff to train 160 commercial and industrial customers. Success of the seminars spread and the Washington State Energy Office contracted with the utility to hold sessions for personnel of other utilities throughout the state.

To address the issue of outdoor decorative lighting, a Citizens Task Force was formed to develop recommendations. The downtown business community also contributed. Result was the drafting of a holiday lighting brochure which outlined some conservation-oriented guidelines and the creation of some innovative ideas for energy efficient ways to observe the festive season.

Employee awareness, one of the prime motivating factors of any program and essential to utility credibility, has not been overlooked. Quarterly briefing sessions to all employees by specially trained peers, plus a number of incentive and involvement projects have served to keep City Light personnel up to speed on conservation and energy issues.

As energy information center with hands-on materials, brochures, how-to material, advisory personnel and a bicycle generator to equate electricity with human energy use, is in full use in the customer lobby.

SENIOR CITIZENS AIDED

Possibly one of the more rewarding conservation programs has been that of providing low-income senior citizens with insulation. Through this program, senior citizens whose income was under a certain specified amount and who had electric heat received, free of charge, an inspection of their home and installation of insulation with necessary retrofit. A post-insulation inspection was also provided.

Insulation has been provided to over 380 home owners who have written letters of appreciation and gratitude for both the visit and audit by City Light personnel and the fact that their homes have been made far more livable.

To prove that conservation begins at home, City Light embarked on a comprehensive internal program to reduce its own energy consumption through reduced lighting levels, revision in lighting controls, replacement of incandescent lights with more efficient lighting sources, reduced building space, and refinements in system operation.

Conversion of the utility's main building to a heat pump system had dramatic results. The system demonstrated total energy consumption of two-thirds that of the original steam heat from a central downtown plant with cooling via a conventional chiller. Electricity consumption in the building was reduced by 76%. There was a 24.9% overall savings in electricity used in the facilities and distribution system.

Research and development also play a key role in the conservation program. Several studies are in progress. Project Weathervane was initiated in 1975 to determine the efficacy of sun and wind in providing electricity in Seattle.

Weathervane features flat plate collectors, a heat pump, and a six-kw wind powered generator, installed in a typical single-family residence. During nearly two years of operation, the solar heating system has supplied 47% of the energy required for space heating in the home during the winter, while wind power has supplied less than 10%.

A low cost solar collector heat pump demonstration project is under study at Seattle Fire Station No. 13 to supply energy for heating domestic water. This solar heating system has the potential to collect significant heat under rainy or cloudy conditions, with the heat pump refrigerant functioning as the solar panel working fluid. Less expensive and lighter than systems using flat plate collectors, its design eliminates all need for cover glass and insulation.

Recently Seattle City Light received a Department of Energy grant to proceed with a biomass project in conjunction with the University of Washington.

The utility is also in the business of awarding grants or contracts to communities. One R & R project involves neighborhoods in competing for grants or contracts for up to $5,000 for innovative and workable conservation projects. Eligible projects could be exhibits, do-it-yourself classes, inventions, or cooperative work projects. Main criteria are the involvement of 10 or more persons in the project and demonstrated benefit to a specific neighborhood.

As Seattle City Light's conservation program evolves, it will almost surely become more complex when it begins to affect more customers and more employees.

"We perceive our conservation program as an additional source of generation as much a part of our day-to-day operations as generation from our hydroelectric plants," said superintendent Gordon Vickery. "We must still find additional sources of generation by 1989, but for us in Seattle conservation has top priority." ●

## LEADERSHIP AND FOLLOWERSHIP: ARE WE TOO REPRESENTATIVE?

● Mr. MUSKIE. Mr. President, the current issue of Newsweek contains an article by Mr. Jerry Tucker, a professor

at Manchester College in Indiana. His article, "Up Against the White House Wall," contains some provocative thoughts for all 44½ dozen of us in the Congress, and for the country. As they read the article, I hope my colleagues will not be distracted by the chuckles and belly laughs they will find therein.

Mr. Tucker raises some fundamental questions about the nature of our society and the job of being a representative of a portion of it.

I say that not because I once tried to become President of the United States, or because I have in the past offered candy to a few of my friends' children. I say it because I believe a fundamental national debate over the uses of government has already begun.

Mr. President, I ask that the article by Mr. Jerry Tucker in the August 28, 1978, issue of Newsweek be printed in the RECORD.

The article follows:

[From Newsweek magazine, Aug. 28, 1978]

UP AGAINST THE WHITE HOUSE WALL

(By Jerry Tucker)

Only two things can permanently ruin a man's reputation. One is giving candy to someone else's children, and the other is becoming President of the United States.

For almost twenty years no American President has completed two full terms in the White House. We use up presidents like hot dogs at a bowl game and the reasons go deeper than Vietnam, Watergate or walking into doors. We *like* to see the top dog get sacked.

Ritual destruction of leaders is not new. In ancient Greece the first kings were sacrificial victims. They were fattened and fondled, but come spring it was deemed necessary to slit their throats to ensure a good harvest. Likewise, the Biblical prophet Hosea wrote: "They . . . devour their rulers; all their kings have fallen."

American mythology holds that anyone's son can become President. Yet, when we discover that the seat of power is occupied by an ordinary posterior, we feel cheated. It's not that we resent an equal exalted to power; rather, we need to feel superior to whichever poor hamster is running in circles around the Oval Office.

It was bad enough that Lyndon Johnson spoke with a drawl, but when he bared the Presidential belly and picked up a basset by the ears, he was finished. Gerald Ford stumbled a lot and forgot where he put Eastern Europe. The beauty of Richard Nixon was that he fully justified our desire to kick him around.

In Jimmy Carter's case we began by pretending shock at the lust in his born-again heart. Carter has been critized for defending human rights, having too many teeth and for committing statesmanship with Panama. If Jimmy could change water into wine, the pundits would complain about the vintage.

CUTTING UP

Freedom of speech is a highly competitive business. There is intense pressure in the media to create a daily sensation, even if it amounts to nothing more than an aide cutting up in a saloon. Reporters face a constant demand to fill up blank paper on days when little has happened. Deadlines lead even the best writers to cater to the public's taste for gossip and soft-core slander.

As individuals, members of the press are decent and conscientious people. As a group, the demands of professional success cause otherwise gentle journalists to swarm at the first scent of blood. With dreams of pulitzer prices dancing in their heads, the media fraternity justifies carnivorous copy in the name of "the public's right to know." Under these conditions, it is inevitable that every President will be pilloried in the Post.

Columnists feel helpless in the face of the social diseases of poverty, racism and militarism. After all, you can't pull down a slum with a slashing expose that landlords are putting ketchup on their cottage cheese. Social problems aren't good copy and it's easier to bang out a piece on a dead President's mistress. Surrounded by social cancer, columnists are more comfortable attacking the moral equivalent of warts.

The obsession with trivia reflects popular taste. Perhaps one person in a thousand could give a coherent summary of Federal urban policy, but nine out of ten would recognize the First Brother's mug on a six-pack. The press, politicians and public do not want to face tough issues. If we took social injustice seriously, we would have to accept responsibility for doing something about it.

HEROES ON THE HILL

The failures and excesses of the imperial Presidency gave Congress a golden opportunity to expand its potency at the expense of the executive. In twelve years we have moved from passive acquiescence in the Tonkin Gulf resolution to a ranking senator's complaint that the President is "interfering" in foreign policy. The heroes on the hill have inflated their egos without demonstrating an ability to exercise responsibility.

Congress is a body composed of 535 members, every one of whom is convinced he or she deserves a larger role in national affairs. Here are 44½ dozen people who think they are personally important just because they've in Congress. Consequently, collective Congressional accountability is as improbable as finding doctors who make house calls.

Legislators can make a splendid symbolic show on hard issues and avoid the consequences. When angry farmers drove their $30,000 tractors into Washington to demonstrate their poverty, Congress passed a self-contradictory farm bill knowing the President would have to veto it. If you can't take the heat, punt.

The Congressional approach is quite practical; it recognizes that presidents go away even if problems do not. While presidents flounder for lack of support, Congressional committees huddle with special-interest and agency heads to block significant change. Presidents are expendable; buraucratic empires and campaign contributors are not.

RESPECT FOR AUTHORITY

The Founding Politicians wisely created a system in which the government cannot function unless there is cooperation between Capitol Hill and the White House. The Constitution succeeds admirably in checking ambition with ambition. Our current problem, however, is not checking power but rather the absence of effective power. By sacrificing Presidential authority to the twin gods of ego and expediency, we are left with a form of pluralistic anarchy in which neither Congress nor President can command respect.

The disrepute of government has not been created by Jimmy or Jerry or even Dirty Dick. Contempt for authority extends beyond politics to every segment and level of society. Good leadership requires followership, but our ethic for the '70s is look out for No. 1 and grab all the gusto you can get.

A nation gets the government it deserves. Self-indulgence, scapegoating and disrespect for authority are perfect ingredients for political decline. We shouldn't need a Russian hermit to tell us that a people unwilling to subordinate personal gratification to common goals has become a mob. No civilization has been able to dispense with acceptance of legitimate authority.

Staying afloat as a nation requires respect for the Presidential office. I am naive enough to trust a President until he gives me reason not to. I am cynical enough to believe that no President can singlehandedly stop organized greed, whip inflation or cure the common cold. Presidents are really not very powerful, and that's why they need all the help they can get.

(NOTE.—Tucker is a political-science professor at Manchester College in Indiana.) ●

## ASTRONOMY RATES HIGH IN HAWAII

● Mr. MATSUNAGA. Mr. President, Hawaii is well known throughout the country as a beautiful place to visit in order to enjoy its lovely beaches, balmy weather, and unique way of life. Indeed, more and more visitors travel to Hawaii each year, making tourism the State's leading industry.

Not as well known is the fact that Hawaii also has become a major center for scientific research. The University of Hawaii, as the principal research center in the State, ranks consistently among the top U.S. universities in the receipt of Federal research grants, and, in one recent year, received more money from the National Aeronautics and Space Administration than any other university in the country.

Recently, the New York Times carried an article which described the development of what is called "one of the world's most important observation sites" atop Mount Mauna Kea. I would like to share the following article which appeared in the New York Times on August 1, 1978 with my colleagues, and therefore ask it be printed in the RECORD.

The article follows:

[From the New York Times, Aug. 1, 1978]

ISLAND IN HAWAII IS BECOMING A WORLD ASTRONOMY CENTER

(By Walter Sullivan)

MOUNT MAUNA KEA, HAWAII—Here, atop the most massive protuberance from the earth's surface—the highest island mountain—astronomers from four nations are developing one of the world's most important observation sites.

Its telescopes, some already in operation, will probe the farthest observable reaches of the universe, and, closer to home, study such targets, as the atmospheres of moons orbiting Jupiter and Saturn in ways previously beyond reach.

After tests at sites around the world, many astronomers have become convinced that conditions for observation are better here than anywhere else in the Northern Hemisphere.

The summit of this volcano, 13,796 feet above the surrounding sea, is so high that clouds rarely pass overhead. Even more impotant, the air above is extremely dry, making the site ideal for infrared observations—one of the fastest growing fields of astronomy.

KEYS TO MANY MYSTERIES

Infrared wavelengths—those beyond the red end of the spectrum—are strongly absorbed by water vapor, but their observation is the key to many astronomical mysteries. The infrared telescope being built here at a cost of $6 million provided by the National Aeronautics and Space Administration has a mirror 120 inches in diameter.

Its design is much like that of an ordinary optical telescope except that it must avoid exposure of the optics to any structural surfaces that might radiate heat—that is, energy at infrared wavelengths.

The site's disadvantages include winds that sometimes exceed 125 miles an hour and a location bristling with cinder cones left by past eruptions, suggesting the possibility of another. There has, however, been no volcanic activity on this mountain for thousands of years.

The atmosphere is so thin that the astronomers do not live here and some find it difficult to do profound thinking. They commute from a base station at 9,200 feet elevation, where they can do much of their homework.

PREPARATION FOR EARTHQUAKES

Finally there are occasional earthquakes, one of which has already done slight damage. The telescope mounts have been built with the possibility of temblors in mind.

The advantages, however, are overwhelming. The site's nearness to the Equator means that most of the southern and all of the northern sky, can be observed. Astronomers sometimes have rare conditions when clearness and stability of the atmosphere make it possible to observe features only one second of arc in angular width.

Such nights occur fairly often at the Kitt Peak National Observatory in Arizona, considered an excellent site and perhaps the most extensive observing facility in the world. Here, it has been estimated that they occur three times more frequently.

While remoteness of the site is a problem for some sponsoring institutions, notably in France, almost halfway around the world, it also means there are virtually no city lights to contend with.

NORMAL STREET LAMP GLOW

Even the most remote mainland American sites are near enough to a community with sodium vapor street lamps for their glow to be scattered back from overhead. Thus every spectrum recorded from the light of the most distant object shows an overwhelmingly strong sodium line.

Here the nearest large city is Hilo, but like other shoreline communities, it is usually covered by low-lying clouds.

Mauna Kea and its twin summit, Mauna Loa, crown the largest volcanic massif on earth, rising in a gentle slope more than 30,000 feet from the Pacific floor. While Mount Everest stands 29,141 feet higher above the distant sea, its height above the surrounding land is far less.

The summit of Mauna Kea is a cluster of barren humps of volcanic debris reminiscent of a lunar landscape, but sometimes in winter it is white with snow, providing the Hawaiians with the rare experience of skiing while their fellow islanders are swimming off the beaches far below. A two-stage rope tow is operated, as well as jeep service that shuttles skiers back to the top.

The crown jewels of the summit are three great telescopes all nearing completion. NASA's infrared telescope, when finished early next year, will be operated by the University of Hawaii as a national facility.

FRANCE-CANADA PROJECT

The chief interest of the space agency is to use the instrument in conjunction with spacecraft making observations of such targets as the moons of the outer planets to determine the temperatures and compositions of their atmospheres. Infrared observations are also opening new vistas on cosmology as well as the formation of stars and planets.

The primary optical telescope, in terms of expected performance, is one with a 144-inch mirror being built as a joint project of Canada, France and the University of Hawaii. It was budgeted in 1973 at $18 million, to be provided equally by France and Canada.

Each of those countries, when the telescope goes into operation some time next year, will be entitled to 42.5 percent of the observing time. The University of Hawai, in return for providing support facilities, will use the remaining 15 per cent.

The largest telescope on the summit is Britain's 150-inch reflector, to be used for both optical and infrared work. It is a "bargain basement" instrument without the precisely shaped mirror needed for distinguishing tiny features. The mirror reportedly became available after the manufacturer had made it as an experiment. It should be in operation before the end of this year.

The University of Hawaii has been operating an 88-inch reflector here since 1970.●

## GEORGE PHINNEY

● Mr. THURMOND. Mr. President, the dedicated chairman of the Laurens County, S.C., Development Board, Mr. George Phinney, recently retired after 20 years of distinctive service.

When Mr. Phinney became chairman of the development board, Laurens County had not had a new industry for 26 years. Under Phinney's guidance, however, the Laurens County Development Board was able to attract such diverse industries as the Torrington Co., Ascoe Felts, and Josten's.

Through his tenacity and hard work, Mr. Phinney has perfromed a great service to Laurens County. During his tenure as chairman of the development board, the industries Phinney was instrumental in locating in Laurens County have created between 3,000 and 4,000 new jobs and plant investment lies between $30 and $40 million.

Although he has retired from the development board, he continues to work hard for Laurens County. He will long be remembered for the service he has performed for his county and his State.

Mr. President, in order to share with my colleagues a recent editorial in the Laurens County Advertiser concerning Mr. Phinney's retirement, I ask that it be printed in the RECORD.

The editorial follows:

[From the Laurens (S.C.) County Advertiser, Aug. 25, 1978]

RECOGNITION DUE

When George Phinney took over as chairman of the Laurens County Development Board some 20 years ago, Laurens County had not had a new industry in 26 years.

He went to work on American Lava of Chattanooga, then a sudsidiary of 3M, to get them to build a plant in Laurens. Phinney and other business leaders contacted American Lava people over a period of two years, sometimes spending one day a month, sometimes three or four days a week.

"I'll believe it when I see it," some people said about the plant. After about two years when American Lava built a small plant and hired 65 people, those same folks said "It won't amount to anything."

Today the little plant with 65 employees has become two plants of the 3M Technical Ceramics Products Division and is one of the country's largest plants.

That broke the ice and soon the Gilliland Plant came. This was followed by the Clinton Bearings Plant of the Torrington Company, our largest industry. Then Ascoe Felts located in Clinton, the Benjamin F. Shaw Plant in Laurens, St. Joe Paper Company, then Josten's, and the latest industry is Hackney & Sons of the northwestern edge of the county. And of course there is Tavern Sportswear, and possibly others that we have missed.

During the last 20 years there have been between three and four thousand new jobs created, with plant investment of between $30 and $40 million dollars, and that's a conservative figure.

Phinney retired as chairman of the Laurens County Development Board July 1, and he says that "I don't know of anything I have enjoyed any more."

But just because he has retired as chairman doesn't mean that he isn't going to continue working to help the county. "Only today," he said, one day last week, "representatives of an industry that has been looking at Laurens for over two years were in my office, and the prospects are very bright for their bringing their industry, a completely diversified one, to Laurens.

"I believe Laurens County has as much to offer new industry as any part of the United States. And it has always been my philosophy of life that every human being should at least have the opportunity to secure a good job with good pay."

Although he has had help from others, Phinney has always been the leader in getting new industry. But it was taking too much of his time from his own business, Southern Research and Development Corporation, to which he plans to devote more of his time.

A lion's share of the credit for Laurens County's growth in the past 20 years is due Phinney and he is to be commended for his long service which was given at great sacrifice of money and time away from his family.●

## STATE OF THE ELDERLY—1978

● Mr. CLARK. Mr. President, this marks the fifth time in as many years that I have shared my thoughts with my colleagues on the state of the elderly. As one who represents a State with a significant older population—in fact, one in eight Iowans are 65 years or older—I have a special interest in their needs, in their problems, and in their aspirations.

The state of the elderly—particularly as compared to the situation I found 5 years ago—is much improved. In 1973, I cited statistics indicating—

That more than 3 million senior citizens lived in poverty;

That all too many older people could not afford to stay alive because they could not afford decent health care;

That hundreds of thousands of older Americans were ill housed, ill clothed, and ill fed; and

That the burden of inadequate transportation, high property taxes, and insufficient social services fell hardest on those least able to carry it.

This Nation has made substantial progress in this decade in confronting the acute problems of the aged.

Almost 1½ million fewer older Americans now have income below the official poverty level than in 1970. Much of the improvement can be attributed to such Federal programs as social security, supplemental security income, and food stamps. In 1970, the average monthly social security benefit for a retired couple was only $169. Today, that level has increased to $400, following enactment of legislation in 1972 that substantially boosted benefits and tied future benefit increases to changes in the cost of living.

The consolidation of State old-age assistance programs into the SSI program was another significant step in reducing poverty among older Americans—even though SSI benefits still fail to provide

poor elderly persons with sufficient income.

And the food stamp program recently was overhauled to make it more available to the low-income elderly. Just a few years ago, only 18 percent of elderly persons living in poverty took advantage of the food stamp program. This means that more than 2 million poor senior citizens, most of whom were automatically eligible for food stamps, either chose not to or were discouraged from participating in the program. However, the changes enacted last year, which eliminate the burdensome purchase requirement, should lead to a higher participation level among the elderly.

Many of the problems I cited in 1973—relating to health care, housing, nutrition, transportation, and social services—are being confronted on the local level through cooperative efforts by communities, States, and the Federal Government.

While Federal social services funding for the elderly through title XX of the Social Security Act has remained constant since 1972, the Federal role has expanded in recent years through the Older Americans Act.

Approximately $150 million in Federal dollars is now being channeled through nearly 560 area agencies on aging for the provision of social services and for area planning. The area agencies, of which there are 11 in Iowa, support a wide range of services, including the following: Information and referral, transportation, Outreach, home services (including homemaker and home health), escort, legal and other counseling, and residential repair and renovation.

One of the largest and most popular of all elderly programs is the nutrition program for the elderly. At the present time, about 10,000 nutrition sites scattered across the country are serving nearly 600,000 hot meals each day. In Iowa $3.6 million in Federal funds support 200 nutrition sites that serve 13,000 meals daily.

Other valuable programs for senior citizens are also authorized by the Older Americans Act, including senior centers, senior community service employment, and model projects.

The Older Americans Act gives local communities discretion in spending Federal aging dollars. This assures that the special problems of a given area are addressed. The act grants responsibility for coordination and planning not to bureaucrats in Washington, but to those persons in the States and localities who best know how to effectively implement older American programs.

With the fine tuning that Congress is continuing, the Older Americans Act will undoubtedly bring greater fulfillment to the lives of this Nation's 25 million elderly.

CHALLENGES AHEAD

I would like to take a few moments to discuss some general attitudinal and societal trends that relate to our treatment of senior citizens. Often in an atmosphere of crisis, we tend to overlook the "big picture," the overall status of older Americans today as compared to decades ago. We also fail to be attentive to future challenges and to make appropriate plans to meet those challenges.

For example, it was not too long ago that older citizens were institutionalized with little thought. We tended to classify every stress and strain encountered by our older relatives as "senility"—a phenomenon that we rarely attempted to deal with.

Our general attitude was that senior citizens are unable to continue as contributing members of our society, and, therefore, we treated them as charity cases.

Describing this condescending attitude in the past tense, in fact be overly optimistic. Undoubtedly there are many who continue to have the deep-seated view of the elderly as dependent citizens, and this cannot be changed overnight.

Special types of efforts on behalf of the elderly are necessary to make society more sensitive to the aging process. We must promote those programs that emphasize a humane approach toward the elderly—treating older persons as whole individuals.

We should be discussing the realities of life for the aged, not only in terms of their physiological changes, but also in terms of the psychological and social problems they must face. We should then discuss various creative strategies that can be employed to help our senior citizens as individuals and in groups. We should examine the available resources on the community level that can be utilized in pursuit of these objectives.

Over the past two decades, most of the financial resources and the legislative mandates for elderly programs have flowed from the Federal level. The list of programs entirely or primarily focused on the needs of the elderly grows with each passing year—medicare, supplemental security income, the elderly nutrition program, the Older Americans Act, the retired senior volunteer program, and the foster grandparent program are just a few examples.

Until recently, programs of this sort have been considered "motherhood and apple pie" issues for most Congressmen and Senators. Most voters want the very best for older Americans. In addition, older persons themselves are the most active participants in the political process, and have become a powerful force giving representatives further reason in support of programs for the elderly.

However, there has been a subtle change in this atmosphere, a change that results directly from two factors. First, our fragile economy appears to be unable to generate sufficient Federal revenues to begin massive new social programs or to expand existing ones. Instead of witnessing the creation of new domestic initiatives, we see instead consolidation of existing programs at constant funding levels. While funding for Federal elderly programs, especially those authorized by the Older Americans Act, has risen dramatically these past few years, continued increases may not be forthcoming.

Second, demographic trends for the coming decades translate into potential conflict between generations. By the end of the century—just 22 years from now—one in every eight Americans will be 65 years or older. What sort of life will these 32 million Americans lead, and will the nonelderly be able to continue their financial and moral support for programs that serve the elderly?

During the last 12 months, we saw two examples of the type of conflicts that could develop in the coming years. During the congressional debate over mandatory retirement, concerns were often raised that older workers would take jobs from younger heads of families. In fact, the issue that divided the House and Senate on mandatory retirement legislation was whether college professors, schoolteachers, and business executives should be forced to retire at age 65 in order to enhance job mobility for younger professionals.

Another topic that demonstrates in a clear way the intergenerational struggle is social security financing. For the first time since I have been in Washington, I have been receiving a considerable amount of letters questioning the value of the social security program—once the sacred cow of all Federal programs. Faced with the prospect of significant increases in payroll taxes in order to save the program from bankruptcy, our Nation's workers are growing more and more skeptical of the need for more generous social security benefits.

RECENT SUCCESSES AND CURRENT ISSUES

In other legislative issues, particularly those that are not exclusively focused on the elderly, we have seen some progress this year. As I have mentioned, the new amendments to the food stamp program should make it easier for low-income senior citizens to participate, because of the elimination of the purchase requirement. We hope this new legislation will be fully implemented this year, allowing those who had been deterred by the purchase price to enter the program.

Another successful effort was passage of the rural health clinic bill. In 1976, I brought the Senate Rural Development Subcommittee to Iowa to study rural health care in the State. During those public hearings, and in other similar hearings in the Midwest and in New England, we discovered that the medicare and medicaid programs discriminated against rural people. This was because the programs prohibit reimbursement for health services furnished by rural satellite clinics. The new rural health clinic legislation, which I authored with Senator LEAHY, reverses this inequitable policy and demonstrates a new Federal commitment to rural health.

Improving rural health care delivery will be of special value to the elderly who live in small towns or rural areas—and they represent 45 percent of the national elderly population. For example, nearly one-fifth of the 275,000 Iowans who live in rural areas classified by HEW as "medically underserved" are 65 years and over.

Our Nation is just now starting to realize that using local sources of health care, provided at a health center or within the home, is the most socially desirable and cost-efficient approach. Whenever we force the elderly to travel to a

larger city for medical treatment, and whenever we force them to be institutionalized for lack of an adequate alternative, we waste health dollars and increase the stress for senior citizens.

As a result, there can be little disagreement over the need to do much more in the area of home health care. Because of the restrictive nature of the medicare coverage, less than 1 percent of medicine funds is used for home health care. This is clearly undesirable, especially when HEW studies indicate that 1 in 7 acuate-care hospital patients and 1 in 4 nursing home patients could be appropriately cared for in their homes.

And as is the case for other types of health services, home health services are most lacking in rural areas—precisely where physical and financial obstacles to other forms of patient care make home health care services especially appropriate. Fifty-four percent of the Nation's counties have no certified home health agency, and these counties are predominately rural.

A few months ago, I discussed these and other problems facing the rural elderly, an article appearing in the National Council on the Aging's publication, Perspective on Aging. At that time, I proposed a modification of the Older Americans Act to make it more equitable for persons living in small towns and rural areas.

Specifically, I called for a change in the senior centers program that would encourage the development of centers in our smallest communities. Funding is now restricted to acquiring, altering, or renovating buildings so they can be suitable for providing a broad spectrum of services to older persons. In testimony before the Senate Aging Subcommittee, I suggested allowing funding for limited construction of senior centers when—as is often the case in small communities—no vacant facilities are available for conversion into senior centers.

I also urged Congress to make transportation services a higher priority in the Older Americans Act, to establish a meals on wheels program for the homebound elderly, and to make other social services more accessible to the rural elderly.

I ask that this article be printed in the RECORD at the conclusion of my remarks.

Congress is in the process of adopting these recommendations, as the conference committee will soon report out legislation to extend and improve the Older Americans Act. The House and Senate bills both would establish a meals on wheels program and permit limited construction of senior centers. In addition, the Senate bill would require States to assure that at least half of the social services funds be spent on three priorities alone—in-home services, improving access to services, and legal services.

When the Senate considered the reauthorization of the act in July of this year, I offered an amendment that would require special consideration of rural areas for the receipt of model projects. To this date, no model projects money has gone to rural area agencies. My amendment was adopted by the Senate, and will increase support for the elderly in rural areas.

In addition, the Senate adopted another of my amendments, which established the Senior Environmental Employment Corps. This program is especially important to me because it is based on a project that began in my home State of Iowa. In Iowa, a few years ago, senior citizens were hired by the State environmental agency to work in conservation, soil and well sampling, and other environmental projects. The Senior Environmental Employment Corps is based on the success of this Iowa project. I am pleased that the Senate has agreed with me that this program should be expanded for the benefit of senior citizens nationwide.

The Senate has also recognized that the special needs of rural Americans have been overlooked for too long. This oversight has particular effect on the elderly. Because of this, I cosponsored an amendment, which the Senate adopted, that will weigh the funding formulas under the act to the benefit of the rural elderly. Therefore, if the Senate version of the bill is adopted, rural people's access to services would be expanded.

In the Congress, the potential exists to immediately address the concerns of the elderly in a most direct way. Specifically, the reauthorization of the Older Americans Act and the revision of the food stamp program afford Members of Congress the opportunity to adequately serve the needs of this Nation's older Americans. I call on my colleagues and on the President to work as partners in this effort.

I am confident that during the 95th Congress we can continue our efforts to substantively improve the state of the elderly in this country. Through these efforts we must be attentive to the needs of the poor elderly as well as those with adequate resources; to those older Americans in rural areas as well as those in the metropolises. We must give attention to all of this Nation's elderly, for with them lies our history, and a forecast for our future.

The article follows:

TOO MUCH PROMISED, TOO LITTLE DONE

(By Dick Clark)

I congratulate the National Council on the Aging for its initiatives in the area of the rural elderly—to work toward establishment of a National Center on the Rural Aging and the decision to devote an entire issue of *Perspective on Aging* to this topic.

Despite the fact that four of every 10 older Americans live outside metropolitan areas, most Federal programs for the aged continue to neglect the rural elderly's needs. When one analyzes the impact of policies and programs in practically every area—health, transportation, housing, employment and income, to name a few—the clear impression emerges that older persons who live in small towns and rural areas are subject to discrimination.

Income maintenance programs, such as Supplemental Security Income (SSI), do not reach adequately into small towns.

Senior citizen housing—built with U.S. Department of Housing and Urban Development (HUD) Section 202 funds—is now concentrated in the nation's urban centers.

The Medicare program, until this year, discriminated against the rural elderly by refusing to reimburse services provided by rural health clinics in areas that lack physicians.

And the key to the delivery of all services for the elderly—transportation—needs to be greatly expanded, so that senior citizens in small towns have access to programs and services that other older Americans take for granted.

Medicare is a prime example of a Federal program that promises more to the rural elderly than it actually provides. While intended to provide all older Americans with financial access to medical services and hospital care, in reality older persons who live in cities receive about 40 percent more in Medicare benefits than do those residing in rural areas.

But financial resources do not guarantee services for small town residents. The lack of physicians and other health providers in rural communities often frustrates older persons in their attempts to use the Medicare benefits to which they're entitled.

Similarly, home health services are most lacking in rural areas, precisely where physical and financial obstacles to other forms of patient care make home health care services especially appropriate. The strict and complex Federal Medicare requirements make it difficult for home health agencies tc be estblished in rural America, with the result that more than half of the nation's counties—most of them rural—have no certified home health agency.

It appears that Congress and the Carter Administration are beginning to realize that Federal policies and practices, such as those in the area of health, contribute to the problems of the rural elderly rather than to help in alleviating them.

ADDED EMPHASIS URGED

In 1975, I sponsored a series of amendments to the Older Americans Act that would have required all senior citizen programs to place additional emphasis on the rural aged's needs. In the end, the amendments were converted into legislative authority for demonstration projects to improve the delivery of services and meet the special rural needs.

This initiative was continued through Senate Special Committee on Aging field hearings on "The Nation's Rural Elderly" in three midwestern states during the summer of 1976. Those fruitful hearings, and my subsequent involvement in rural health issues as chairman of the Senate Rural Development Subcommittee, have enriched my personal understanding of the rural aged's problems.

Congress took an important first step in the area of rural health in 1977 by enacting the Rural Health Clinic Act. Based on legislation that I sponsored with overwhelming congressional support, the new law permits payment under Medicare and Medicaid for the medical services furnished by physician assistants and nurse practitioners within rural health clinics.

Until enactment of the legislation, the Federal Government and most states forbade Medicare and Medicaid reimbursement when physicians did not directly supervise the care. It was a disastrous policy for the rural elderly because many live in towns where no physicians practice. An alternative that has gained public acceptance is the small health clinic staffed by non-physician health providers. I intend to sponsor additional legislation in the coming year to encourage the development of these clinics.

OLDER AMERICANS ACT REVIEW SEEN

In the coming months, Congress will again review the Older Americans Act, which authorizes a wide range of service programs for senior citizens. I believe the act should be further amended to make it more relevant

to those who are living in small towns and rural areas.

Title V of the act authorizes funds for multipurpose senior centers, and $40 million will be spent in the current Fiscal Year for that worthy program. However, existing policies hamper the development of senior centers in our smallest communities—those under 10,000 population.

Funding for senior centers is restricted to acquiring, altering or renovating buildings so they can be suitable for providing a broad spectrum of services to older persons. Regrettably, most small towns lack available vacant facilities that can be converted into senior centers. The few buildings that are vacant—usually school buildings and small hospitals—require a tremendous financial investment to be made suitable.

My intention is to urge Congress to permit the use of Federal Older Americans Act funds for limited construction of senior centers. State agencies on aging would develop criteria for construction funding, and area agencies on aging would make recommendations for possible sites.

Two other special needs of the rural elderly that should be addressed more adequately by the act are nutrition and transportation.

MEALS ON WHEELS CRUCIAL NEED

If we as a nation are sincere in our goal of increased independence for older Americans, we should be doing more to maintain them in their own homes through such programs as home-delivered meals. For rural citizens—often unable to travel to congregate meals sites—a meals on wheels approach is all the more necessary. While there is substantial agreement among policymakers on the need for a national program to promote home-delivered meals, we need to reach a concensus on the best way to administer such a program.

The Federal Government should be doing far more to expand public transportation services in rural areas. It is the key to increasing access to all services. My hope is that Congress will place greater priority within the Older Americans Act on small transportation bus systems for the elderly and handicapped.

I also intend to urge Congress to consider ways to modify the act's funding formula to take into account the extra expense of serving the rural elderly. Due to the lack of public transportation facilities in small communities and sparsely settled areas, the cost of delivering services to those localities has risen, a factor not now considered when the Federal Government funds agencies on aging and services programs for elderly persons.

Only the "tip of the iceberg" of what Congress has done in response to the rural elderly's needs and what yet requires congressional attention has been discussed.

I hope NCOA's National Center on the Rural Aging becomes a resource for information on the rural elderly and an advocate for the kinds of changes that are vitally needed.●

## CRIME AND THE FEDERAL GOVERNMENT

● Mr. THURMOND. Mr. President, the Criminal Laws Subcommittee, on which I serve as ranking minority member, has begun its oversight and reauthorization hearings on the Law Enforcement Assistance Administration. Recently, editorials appeared in the Boston Globe and the Wilmington News which offer throughtful and informed commentary on this program. I was especially impressed by the Globe's observaiton that it is easy enough to take potshots at LEAA, but that—

Crime by all accounts, is still one of the most two or three problems that Americans find most distressing. Yet, the Federal Government, which has involved itself heavily in almost every other aspect of public life at the local level, has made only a small contribution to crime fighting.

The Globe then observes that the Federal Government could reasonably do even more than the pending LEAA bill provides.

Mr. President, the subcommittee will continue its hearings in the coming months. Thoughtful commentary, such as those I will shortly submit, will be most helpful in constructively focusing our deliberations to the important issues involved in LEAA reauthorization.

Mr. President, I ask that the August 21, 1978, editorial from the Boston Globe and the July 17, 1978, editorial from the Wilmington News be printed in the RECORD.

The editorials follow:

[From the Boston Globe, Aug. 21, 1978]

LOCAL CRIME AND THE FEDS

Hearings have begun in Washington on a proposal to restructure and refinance the federal effort to aid local anti-crime fighting that is embodied in the Law Enforcement Assistance Administration. It's easy enough to take potshots at the LEAA's layers of bureaucracy and occasional approval of expenditures on wild military armaments. And it's always arguable whether the federal government ought to be involved in what is essentially a local-government activity. In fact, it is because of the ease with which those arguments can be made that the LEAA legislation now in Congress is modest. The approach is nonetheless worthy.

Most of the bureaucratic layering—the cross-sections of criminal justice planners and criminal justice plan analysts—is removed. Of the proposed $825 million annual expenditure, $450 million would be allocated as anti-crime revenue-sharing by a formula that weights population, crime rates, local anti-crime spending and the local tax effort to finance the expenditure.

Another $128 million would be distributed not by formula but would be used as matching money—50 federal cents for each $1 of local spending—to help with the costs of running special programs that a quasi-independent federal Institute for Criminal Justice believes are particularly promising. Special efforts to expedite the trials of career criminals and financial assistance to help secure witnesses in trials would be two examples.

The total outlay proposed amounts to less than a nickel of every dollar spent in the nation on fighting crime. Yet, the matching funds could prove a valuable carrot in encouraging localities to try innovative approaches to law enforcement.

The $450 million is simply designed to ease the financial burden of local anticrime efforts. While some may argue against such federal involvement, the really startling fact is that the federal government is so little involved.

Crime, by all accounts, is still one of the two or three problems that Americans find most distressing. Yet the federal government, which has involved itself heavily in almost every other aspect of public life at the local level, has made only a small contribution to crime fighting. With its revenue-raising capacity, it could reasonably do even more than the pending LEAA bill provides.

That it hasn't, probably reflects, more than anything else, a decade of polarization in Congress, fostered by President Nixon's "law and order" campaigns. That polarization is gradually ending. The LEAA bill sponsors range from Sen. Kennedy, its primary drafter, to Sen. Thurmond. Its passage would be an initial signal that the national government is now prepared to make a meaningful, if modest, response to crime as one of the most pressing of national problems.

[From the Wilmington (Del.) News, July 17, 1978]

NEW DIRECTIONS NEEDED

On the whole, President Carter's proposals to drastically overhaul the Law Enforcement Assistance Administration make a lot of sense. It certainly is a better solution to the problem-plagued agency than abolishment.

The decade-old federal agency has been fraught with lack of direction and any real sense of what it should be doing. The result, in the words of the president, is that LEAA has been "ineffective."

Perhaps the essence of the agency's problems lies in its attempt to be all things to all aspects of the criminal justice system. Because money to help state and local anti-crime efforts came through this agency, all those with any legitimate claim on such money were constantly battling each other for it.

Police departments wanted hardware (patrol cars, uniforms, weaponry), the courts wanted more clerks or pre-sentence investigators, the prosecutors and corrections systems had their demands.

As each group became more sophisticated in the writing of complex applications and in the art of courting the state coordinating body and federal bureaucrats, their slice of the pie got bigger.

A key to intelligent coordination in this scrambled eggs program was the state commission. In Delaware the commission, known variously as Delaware Agency to Reduce Crime, the Law Enforcement Planning Commission, the Governor's Commission on Criminal Justice, and now, the Delaware Criminal Justice Planning Commission, has had a spotty record.

Over the years there have been cries of "Too much money for administration" or "The police are getting all the money." At a meeting last summer a skillfully coordinated coalition managed to gain several changes in the commission staff's proposal, much to the chagrin of other commission members.

Yet, on balance, a federally supported effort to curb crime at local and state levels makes sense. LEAA money was largely responsible for improving the Delaware Superior Court's docketing procedures, establishing the computerized networks on criminal records and motor vehicle records used by the courts and police, and LEAA is now funding Atty. Gen. Richard R. Weir Jr.'s investigation of white collar crime.

What President Carter wants to do is streamline the agency and give it some direction. Major elements of his proposal are:

Ban the use of federal money for salary increases or construction projects and sharply reduce use of federal money for police hardware.

Eliminate the requirement that state and local applicants submit annual plans—and instead submit three-year plans.

Guarantee fixed allotments for cities over 100,000 and counties with populations of more than 250,000 because that's where most crime occurs.

These all make a lot of sense. If nothing else they would reduce the amount of needless, repetitious paperwork that applicants must go through year after year.

One part of the president's proposals establishing a research oriented National Institute of Justice within the Justice Department gives us some trouble. We agree with the American Bar Association that such a research unit should be clearly separate from the "action" part of anti-crime efforts. The ABA is promoting legislation that would make a National Institute of Justice a separate governmental body, not unlike the Na-

tional Science Foundation or the National Institutes of Health. Such an independent body would be relatively free of the kinds of political pressure that have marred the efforts of LEAA for years. So freed it could produce valid data on ways to improve court procedures, police and corrections operations without concern for stepping on toes.

The president's proposals were introduced in the Senate by Sen. Edward M. Kennedy, who is scheduled to head the Judiciary Committee next year. With that kind of backer the reorganization could be accomplished soon.●

## CONGRESS MUST ACT QUICKLY TO HALT NARCOTICS SMUGGLING

● Mr. PERCY. Mr. President, last week I was pleased to join my distinguished colleague from Iowa, Senator CULVER, and Senators CHAFEE, THURMOND, HATCH, RIBICOFF, NUNN, HATHAWAY, and BENTSEN in introducing S. 3437, the Drug Trafficking Control Act of 1978. Although we are rapidly approaching the end of this session of Congress, this is a piece of legislation that ought to receive the immediate attention of the Senate.

There has been a tremendous upsurge in the importation of narcotics into this country. The volume of this criminal enterprise is of staggering proportions. Hundreds of millions of dollars worth of illicit drugs enter this country each year promoting crime, violence, and human misery. From January through July of this year, the Coast Guard seized 101 vessels, arrested 494 persons and confiscated over $700 million in drugs. This is more than twice as much as the year before.

Just 2 weeks ago, the Senate Permanent Subcommittee on Investigations, on which I serve as the ranking minority member, heard testimony from underworld figure, Gary Bowdach, on this alarming situation. He testified about his role as a bodyguard and enforcer in the notorious Rick Cravero gang, a loosely alined group of 150 members which illegally imported millions of dollars of marihuana and cocaine into south Florida. He told us that the biggest risk for the drug trafficker "is getting into the country;" because of that, a kilo of cocaine purchased for $8,000 in Colombia, South America, immediately triples in price once it has made its way into Florida.

But the risk is not nearly as great as it should be. Mr. Bowdach also made it clear that in fighting this battle, law enforcement officials are outmanned and outsmarted.

The Cravero gang brought its drugs into Miami by ship. Bowdach described how the narcotics would be shipped on used Colombian freighters, or "mother ships," and transferred on the open sea, beyond the 12-mile territorial limit of the United States. The transfers would often take place at night, when the Cravero gang would send out high-speed boats to pick up the loads and bring them into a remote landing area.

Money was no problem for the Cravero operation. They would spend as much as $40,000 for each small high-speed craft. Then they would "soup up" an engine to further increase its speed, and equip the boat with sophisticated radio and electronic gear capable of picking up law enforcement communications. When Bowdach was asked how fast the law enforcement craft are able to go, he replied simply, "not as fast as ours."

We also heard testimony from two members of the Dade County Florida Department of Public Safety that, just a few years ago, a drug load worth $100,000 was considered a large shipment. Today, a load with a value of less than $500,000 is considered "peanuts." Indeed we are being confronted with a tidal wave of narcotics flowing into this country from the southeastern United States. In 1976, 60 percent of marihuana seizures took place along the Mexican border. That figure is now down to 7 percent; 89 percent of the marihuana seized this year was in the gulf and southeast Atlantic region. Florida is rapidly becoming the national clearinghouse for most of the marihuana and cocaine in this country. For example, according to DEA, more than half the marihuana coming into Chicago arrives via Miami.

Wherever big money is to be made, you can be sure that organized crime is lurking close by. Bowdach testified that organized crime is becoming increasingly involved in this nefarious enterprise. Bowdach was personally aware of the extensive narcotics dealings of Ralph Broccoli, a soldier in the Gambino crime family of New York. Bowdach put it this way:

> So everybody in organized crime shied away from the narcotic action. What had happened as a result of shying away from it, various other groups got into it. . . . But when they saw the money, the amount of money that was coming in that these people were making, that is when it decided to go full steam into it.

What is most outrageous is that our present laws encourage and aid these drug pirates. Much as Mr. Bowdach described, a large percentage of these illicit drugs enter this country from large "mother ships" which anchor outside the 12-mile territorial limit of the United States. From here, these ships unload these drugs onto smaller boats which can safely elude drug enforcement officials and carry their dangerous cargo to shore. Law enforcement officials estimate that at best they are only able to stop 10 percent of this tidal wave of drugs.

Under present law, U.S. enforcement agents can prosecute the crews of these large mother ships only if they have actual proof of the actual act of distribution from the mother ship to the smaller craft. With very limited resources, the chances of EDA or the Coast Guard catching the crews of the mother ships in the act of distribution on the high seas is much like the proverbial search for a needle in the haystack. This inadequacy in the law has greatly frustrated enforcement efforts. In fact, only 40 percent of the individuals arrested when mother ships are seized are even prosecuted. Most of these are foreign nationals who are deported, and, in effect, given a free ride back home. In a few days, they are right back in business.

The Drug Trafficking Control Act which has the full support of the DEA, Customs, and the Coast Guard, would put an end to this invitation to smugglers. Under the act, enforcement agents would be required to show only that the crew possessed the illegal drugs and intended to distribute them in the United States or had actual knowledge thereof. This would effectively plug a major hole in drug trafficking regulations and would make the occupation of the drug trafficker significantly more risky.

A second section of the Drug Trafficking Control Act would correct another loophole in current law that makes it difficult to prosecute drug traffickers attempting to "launder" their illegal proffits or buy more drugs by taking large amounts of money out of the country.

Under existing law, individuals coming into the country, or leaving it, must file a report whenever they transport monetary instruments in excess of $5,000. This is intended to allow the authorities to monitor such activity, with a view toward determining when it is connected to illicit smuggling or other illegal conduct. However, in a recent court case involving an individual who attempted to leave the country with $250,000 in unreported currency, a judge dismissed the case because the arrest took place prior to the time the individual actually left the United States. This is a Catch-22 situation for customs officials. It is only when the person is out of the country that you can prosecute him. But you cannot prosecute him because he is out of the country. Under the terms of this decision, it will be virtually impossible to bring prosecutions in the future.

This bill would amend the Currency and Foreign Transactions Reporting Act to require the reports to be filed prior to departure, and to stipulate that persons must file such reports prior to boarding outbound common carrier vessels or aircraft.

The bill would also clarify existing law with respect to searches for currency. It would permit warrantless searches by customs agents under exigent circumstances if they have probable cause to believe this law is being violated. This is consistent with prior Supreme Court interpretations of the fourth amendment.

Lastly, the act would require the master of any vessel arriving from a foreign port immediately to report the arrival of his vessel to the appropriate American officials. Present regulations allow vessels coming from foreign ports, other than Canada or Mexico, 24 hours in which to report. Drug traffickers often transfer their contraband cargo during this 24-hour grace period, and, thus, do their damage without fear of prosecution.

Mr. President, the problem we now face can be put very simply: Drug trafficking must be stopped. The White House estimates that drug abuse costs this country $18 to $27 billion a year. Law enforcement experts estimate that one-half of all robberies and property crimes are drug related. In this battle against crime, we must utilize every weapon at our disposal. Yet, this Nation is at a severe disadvantage. We cannot fight these drug traffickers with one hand tied behind our backs.

The tremendous fortunes that can be made from drug trafficking have attracted a literal horde of gangsters and criminals to its seamy cause. Against their sea and air armada, the Federal

Government has put into the fight very limited resources. In Georgia, for example, the Drug Enforcement Administration has but three agents to protect some 2,300 miles of coastline from drug traffickers. The regional customs office has only 10 planes at its disposal, and these are so frequently in need of repair, because of age, that there are many days when none of them can take off.

Current laws against drug trafficking are inadequate and unable to prevent this Nation from becoming the dumping ground for the world's drug traffickers. How can we succeed to stamping out such trafficking if the laws themselves make this goal impossible? Indeed, if these laws are not remedied, I fear the battle against drugs will be lost entirely.

The Drug Traffickers Control Act will make our criminal laws work for justice, not against it. It plugs loopholes in current law, aids enforcement efforts, and makes it clear to potential traffickers that the full force and effect of the law will be used against them.

We must not ignore the great damage and violence that has resulted from drug trafficking and drug use in this country. Mr. Bowdach told us of the greed and viciousness which were facts of life in the Cravero gang. He estimated that of the 150 members of the gang, about 40 were murdered or "made one-way trips out to sea and never returned." The ugliness that surrounds drug use is acted out again and again as illicit drugs are passed from their source to their ultimate destination across this country. Crime in Miami leads to crime in Chicago, New York, Detroit, Philadelphia, and elsewhere. The frightening cycle perpetuates itself.

But, with the aid of effective laws, we can stop the cycle before it begins. We can put a halt to the alarming use of drugs by the youth of this Nation. And, we can make the United States a safer and more decent place in which to live.

Mr. President, on August 22, the Juvenile Delinquency Subcommittee, chaired by Senator CULVER, held a hearing on this drug smuggling epidemic. I would like to print in the RECORD the testimony of Peter Bensinger, Administrator of DEA, G. R. Dickerson, Deputy Commissioner of the U.S. Customs Service, and Captain Robert H. Overton III, Chief Ocean Operations Revision of the U.S. Coast Guard. All three of these agencies have been dedicated troops in our fight to halt this invidious narcotics trade. They have had to go into battle with meager resources and contend with laws that put them at a severe disadvantage.

The heads of these agencies, Peter Bensinger, Robert Chasen, and Adm. John Hays deserve much praise for the joint efforts they are making. After a period of trouble and turmoil within its ranks, it is especially gratifying to witness the outstanding work of DEA under Peter Bensinger's able administration.

DEA statistics show that the purity level of retail heroin is now 4.9 percent, the lowest level since the early 1970's. Heroin deaths and injuries are down 60 percent from the time Bensinger began as administrator. This is a record to be proud of, and DEA agents in the field should be rightfully proud of the courageous work they are doing.

Mr. President, I also ask unanimous consent that S. 3437, the Drug Trafficking Control Act of 1978 be printed at the conclusion of my remarks.

The requested material follows:

STATEMENT OF PETER B. BENSINGER ON DRUG TRAFFICKING FROM SOUTH AMERICA

Chairman Culver, Gentlemen: It is a pleasure to appear here this morning before the Subcommittee to Investigate Juvenile Delinquency to discuss the Drug Enforcement Administration's role in the Federal effort to stem the flow of drugs from South and Central America to this country.

A serious situation facing the law enforcement community today is the recent surge of drug trafficking into the Southeast sector of the United States. Nearly all the cocaine distributed in the U.S. and a substantial amount of the marihuana originates from source countries in South America. An estimated 65 per cent of worldwide illicit cocaine is processed in Columbia. Columbia is also a major source of supply for marihuana.

In transporting the contraband from South America to the United States, the traffickers use various routes by private and commercial aircraft. Drug smuggling on commercial air carriers has been limited to quantities which can be carried by individuals on their person or in their luggage. Private aircraft take advantage of Florida's many natural landing strips and heavy legal air traffic. Some fly directly into the United States from South America; while others involve stopovers on any of the major Caribbean Islands or in the Central American countries for refueling or cargo drop-offs. To a lesser extent, the traffickers also traverse an overland route through Central America.

Because the Caribbean Sea and the Gulf of Mexico are natural paths for the traffickers, narcotics interdiction on the high seas plays an important part in the United States' enforcement program. There are four "established" maritime routes. They are through the Yucatan, Windward, and Mona Passages in the Caribbean and up the Pacific Coasts of the South and North American continents.

A variety of vessel types and methods of operation are employed by maritime smugglers. There appear to be several basic trafficking patterns:

The first involves smugglers who use relatively small vessels such as fishing and pleasure craft, which are privately owned and/or operated by the traffickers themselves.

The second category involves larger commercial vessels such as freighters and passenger liners. The contraband is carried onboard in addition to the regular cargo. As a rule, the management of these vessels are not involved in the smuggling activity.

A third type of smuggling operation involves a "mother ship" and several contact vessels. The typical "mother ship" is usually a vessel which, by size and registration, may be regarded as a commercial vessel, generally ranging from 100 to 300 feet in length. Usually the entire crew, captain and owners are involved. It appears, that the "mother ships" are principally owned and operated by traffickers located in source countries rather than in the United States. They are also generally manned entirely by foreign nationals. The entire ship is load with contraband. Those vessels then proceed to areas off the U.S. coasts, where they eventually transship their loads to smaller high-speed vessels, fishing boats, cabin cruisers and yachts. These smaller vessels quickly become assimilated with legitimate vessel traffic, making enforcement action difficult.

To meet this challenge presented to law enforcement by the maritime smugglers, a multi-faceted approach is required. Within DEA, we have implemented several measures that are designed to have an impact on the Southeastern area. Specifically, DEA has established two new Resident Offices and opened Airport Offices in two major cities in Florida. Furthermore, additional Special Agents have been assigned to Florida, as has an element of the DEA Airwing. Because the Bahamas are a significant transit point, we are establishing an office there pending approval from the Department of State. Manpower has been redistributed among the South American posts so that the majority are now stationed in drug source countries. DEA is also working with State and local enforcement agencies to improve the coordination and intelligence collection/exchange activities.

Interagency cooperation is essential if we are to realize any successes in immobilizing narcotics traffickers. A White House review team, with the participation of DEA, U.S. Customs, U.S. Coast Guard and the State Department, has been examining action initiatives that will have a lasting impact on drug trafficking in the Southeastern United States. Briefly, these measures are designed to disrupt the entire chain of drug smuggling from the source and transit countries through the distribution systems in our nation.

In addition to monitoring these programs, the White House review team will be seeking longer term solutions through legislative, juidical and diplomatic initiatives.

One such model for interagency joint efforts was Operation Stopgap, a 45-day program initiated by DEA to coordinate its efforts with those of the United States Customs Service, the United States Coast Guard and the Immigration and Naturalization Service. Stopgap's objective was to decrease the availability of marihuana in the United States by seizing multi-ton quantities and the vessels transporting the marihuana; by arresting and prosecuting entire crews abroad the vessels; thus ultimately disrupting the operations of large-scale Colombian marihuana smuggling operations. Intelligence on suspect aircraft and vessels, primarily "mother ships", was relayed thru the El Paso Intelligence Center (EPIC) to the U.S. Coast Guard for appropriate enforcement action.

The U.S. Coast Guard, in particular, is to be commended for their contributions to Operation Stopgap. In all, 900,000 pounds of marihuana were seized, as were 33 vessels (4 of which were sunk or scuttled), 6 aircraft, 18 land vehicles, 3 hydraulic presses and $15,000 in cash. Furthermore, approximately 220 persons were arrested and/or detained and deported. A similar program is going on in the North Atlantic/New England area and another is being developed for the Pacific/West Coast region.

For the present, we are monitoring several trends in maritime vessel smuggling. There has been a rapid expansion in both number of and sophistication of "mother ships" operations, especially between Colombia and the East Coast and Gulf Coast of the U.S. DEA expects that the growth in vessel traffic will continue. We anticipate the increased law enforcement pressure will displace the traffic to some extent, forcing it to the Colombian Pacific coast or causing the "mother ships" to divert eastward around the island chains in order to avoid the three passages where the U.S. Coast Guard has concentrated its efforts. Expanded use of aircraft for smuggling is anticipated.

We recognize that the conviction and incarceration of top-level traffickers does not necessarily disrupt trafficking organizations; the acquisition of vast capital permits regrouping and the incarcerated trafficker can continue to direct operations. Therefore, it is essential to attack the finances that are the back bone of organized drug traffickers.

Vast profits, generated by the sale of drugs, leave the United States. Valuable intelligence regarding drug trafficking organizations can be realized from monitoring the flow of currency and monetary instruments. Existing statutes provide us with one investigative tool.

One section of the Bank Secrecy Act requires every domestic financial institution to report to the Internal Revenue Service (Form 4789) the identity of persons involved in currency transactions exceeding $10,000. Since October 1977, a DEA/FBI Joint Task Force has been conducting just such an investigation into the utilization of U.S. financial institutions to facilitate payments for drug shipments and other financial aspects of drug trafficking. While this type of investigative endeavor is time consuming, it can be very effective. The financial evidence which is being developed will enable U.S. enforcement officials to attack the profits and operating funds of narcotics traffickers.

Unfortunately, there are gaps in the existing statutes which unintentionally aid the cause of the traffickers. Therefore, as I mentioned earlier, legislative initiatives will provide law enforcement with needed tools to cope with drug smuggler's tactics.

The Comprehensive Drug Abuse, Prevention and Control Act of 1970 replaced an earlier act (the Act of July 11, 1941, 55 Stat 584), but in the process inadvertently omitted the prohibition against possession of controlled substances on vessels engaged on a foreign voyage. The extant act prohibits possession of a controlled substance ". . . (only if it) was arriving in or departing from the U.S. or the Customs territory of the U.S."

Thus, there is a significant gap in the present law regarding the commission of substantive controlled substance offenses on *American owned or registered* vessels on the high seas.

Specifically, the United States Code (Section 959, Title 21) has extraterritorial application only if a controlled substance is manufactured or distributed outside of the United States with the intent of smuggling it into this country. This section does not, however, include possession with intent to smuggle as an extraterritorial offense.

Several cases have arisen at the United States District Court level in which ships registered in the United States, carrying large amounts of marihuana, were intercepted outside the territorial waters of the United States. The District Courts held that the Government lacked jurisdiction to prosecute the individuals on board for possession of marihuana even though the evidence showed the marihuana was possessed with the knowledge that it would be unlawfully imported into the United States.

Thus, a legislative proposal that would cure this defect would be strongly supported by the Drug Enforcement Administration.

The same statute to which I referred earlier, the Bank Secrecy Act, requires an individual to file a report (Form 4790) if he knowingly transports monetary instruments in excess of $5,000 in or out of the United States. The law, as written, is inadequate in that it does not provide for attempted or intended violations of existing reporting requirements. And, in fact, in March 1976, the United States District Court for the Southern District of Florida dismissed a criminal proceeding against a defendant who was discovered departing the United States with $250,000 of unreported currency. The Drug Enforcement Administration endorses legislation that would close this gap in existing law by requiring this report to be filed prior to departure from the United States.

At present, a search warrant is required in all instances in order to seize monetary instruments being taken from the United States in violation of the Bank Secrecy Act. In many cases, it is impossible to obtain a search warrant in time to search individuals thought to be in possession of monetary instruments or currency who have not reported them or have filed a false report. As such, DEA would also support a proposition that would strengthen the existing statute and allow U.S. Customs officials to search persons under exigent circumstances, as they do now in other searches.

There is another loophole in existing law which affords shelter for traffickers. The present law allows the master of any vessel carrying foreign merchandise 24 hours in which to report his arrival to U.S. Customs. The smaller boats that transport the drugs from the "mother ship" cannot be readily distinguished from the many legitimate private vessels of the Southeastern coastal area. Under this cover, there have been cases where vessels have arrived in the United States, unloaded their illicit cargo, and departed, all within 24 hours, thereby circumventing the intent of the law. A legislative proposal that would require immediate reporting of such a vessel's arrival would greatly assist the U.S. Customs Service and the Federal drug enforcement effort.

Legislative proposals, such as the ones presently under consideration by this Committee, would give to the Federal drug enforcement effort much needed support. Based on intelligence and interdiction data, we believe that drug smuggling on the high seas and smuggling by air is escalating.

Chairman Culver, on behalf of the Drug Enforcement Administration, I would like to thank you for initiatives with respect to this serious problem. I look forward to working with you and the Congress on this vital agenda directed to help disrupt the flow of illicit drugs from South America.

---

STATEMENT OF G. R. DICKERSON

Mr. Chairman, and members of the Committee, I appreciate the opportunity to appear before you today to discuss the need for new legislation to tighten the laws relating to drug smuggling by vessels and the exportation of currency. I understand that your committee is considering introducing new legislation on these subjects. We welcome your interest and believe that now is the time to address the problems created by our present law.

We are presently facing a new wave of drug smuggling into the United States, particularly by vessels and aircraft in the Gulf and Southeastern Atlantic areas. Fortunately, present law is adequate with respect to smuggling by aircraft. However, we have encountered many problems with respect to smuggling by vessels which are magnified due to the scope of the problem.

What limited success we have realized is due primarily to the excellent cooperation which exists among DEA, the Coast Guard, and Customs. Last month, Coast Guard and Customs signed an agreement which solidifies our strong present working relationship. In fact, most of the seizures recorded by Customs are a direct result of this relationship.

Statistics indicate that over 3.5 million pounds of marihuana have been seized through July of this fiscal year compared to 1.2 million pounds during the same period last year. An additional measure of the size of the smuggling problem facing us in the Southeast border is the changing seizure rate as compared to other significant smuggling areas. As recently as 1976, Mexican border districts averaged 60% of the national total of marihuana seized. Today seizures of marihuana in the Gulf and Southeastern Atlantic, almost all multi-ton loads, now account for 87% of a much increased total.

Cocaine seizures have also increased. For the first half of this fiscal year, the amount of cocaine seized has nearly surpassed the amount that has been seized for the entire preceding fiscal year. The Miami region has accounted for approximately 60% of the total amount of cocaine seized, while making only 25% of the total seizures. These figures indicate that the bulk shipments of cocaine are also being smuggled into the United States along the Southeastern coastline. We believe that the cocaine, which is more easily hidden, is smuggled via commercial vessels, very often in banana boats originating out of a Turbo, Colombia, which land at our Southeastern ports.

Another measure of the problem of drug smuggling in this region is the number of vessels seized. Through July of this fiscal year, 190 vessels have been seized in this area out of a national total of 269, while for the entire preceding fiscal year only 122 vessels were seized in this area.

We believe that several factors account for the increasing use of vessels by the drug smuggler—the continuing Mexican eradication program has made Colombia marihuana more attractive, the use of large vessels provides a relatively cheap method of transporting vast quantities of the bulky marihuana, the extensive coastline offers easy, undetected access to the United States, and gaps and inadequacies in our present law make successful prosecutions difficult. Thus, smuggling by vessel has become the new modus operandi of the drug smuggler.

To take full advantage of all of these factors, smuggling by vessel is primarily achieved by the use of "motherships." By this method, freighters, sometimes 300 feet in length, are loaded with large quantities of marihuana—50 to 60 tons is common—in Colombia and then set their course for the United States. These motherships, most often under foreign registry, will remain on the high seas outside the 3 mile territorial or 12 mile Customs waters, thus effectively beyond the United States jurisdiction, where they rendezvous with smaller high-speed craft generally owned by or registered to United States citizens. It is these smaller craft which then transport the contraband into the thousands of bays and inlets which line our coast.

Consequently, it is evident that two types of vessels are involved: the large motherships often flying under foreign flag, and the smaller "runners" which ferry the marihuana to shore. We face different problems with respect to each.

Once a vessel laden with marihuana is seized, loopholes in our present law create prosecutorial problems which often result in the individuals gaining their freedom to once again make another smuggling attempt. Under present law, the smuggler has committed no substantive crime by possessing narcotics on the high seas, even though he is an American citizen or aboard a vessel of the United States. This is so despite our obligation under the Single Convention on Narcotic Drugs to suppress drug trafficking by our vessels and citizens. Additionally, under present law it is extremely difficult to prosecute foreign nationals engaged in smuggling efforts aimed at the United States so long as they remain on the high seas. Consequently, the high seas remain a smuggler's paradise.

More importantly, international law presents many of the same obstacles. Since most of the motherships found on the high seas are of foreign registry, except under limited circumstances, permission must be requested and received from the country in which the vessel is registered before any enforcement action can be taken, even when there is proof that the particular vessel has a load of contraband destined for the United States. While most nations have been cooperative, the time required to notify the country of registry and to receive the proper authorization has caused some problems. The time may vary from several hours to two days, depending upon the hour or day of the week when the request is made. During this time

delay, the suspect vessel may take evasive action or may have sufficient time to jettison its contraband cargo. However, once permission is received to take enforcement action, either the gaps in our own law create prosecutorial difficulties or the foreign government will be reluctant to prosecute their nationals because of what they believe to be evidentiary problems created by a seizure and arrest by United States officials.

The small "runners" take advantage of our vast coastline with its numerous harbors and inlets and can easily mingle with the thousands of legitimate craft which sail in these same waters. Present law provides twenty-four hours from the time of arrival that a report must be made to Customs of such arrival. As a result, it is extremely difficult for Customs to intercept the few smugglers from among the thousands of legitimate vessels.

To begin to solve all of these problems, we believe that legislation which would tighten the conspiracy, transshipment, and extra-territorial provisions of the present law must be addressed. Further, legislation which would clearly delineate which vessels are subject to the jurisdiction of the United States would greatly enhance our enforcement effort aimed at the mother vessels flying foreign flags.

With respect to smuggling by private pleasure vessels, we strongly believe that immediate reporting at designated places should be required. While we do not foresee the smuggler dutifully reporting immediately upon his arrival, nonetheless such a requirement would enable us to establish designated reporting stations for vessels just as we now require for vehicles and aircraft. Then, assuming that a great majority of the legitimate vessel traffic would comply with the immediate reporting requirement, it would become a far easier task to sort the legitimate traffic from the illicit traffic. Thus, we can exert our enforcement efforts more judiciously. We are pleased to learn that your Committee is considering legislation to require immediate reporting.

I would like to relate to the Committee a very recent seizure which illustrates the nature of the problem and the process we must go through.

On August 5, 1978, based on information supplied by DEA, a Customs patrol aircraft established a search pattern 40-miles from the Bahamas. While the Customs aircraft was attempting to locate a particular vessel for DEA and after flying for several hours, our aircraft sighted two maneuvering in small slow circles and lying heavy in the water approximately 38-miles north northeast of Walkers Cay in the Bahamas, some 360 miles east of Florida. The other, the "Rio Chico" was a 70' shrimper without its proper riggings. Since both vessels appeared quite suspicious, the air crew notified the Coast Guard.

The aircraft continued the surveillance, departed for refueling, returned and completed over seven hours of surveillance, four being on the suspect vessels. While the Coast Guard had been notified and the Cape Knox responded, stormy weather that appeared and loss of its radar required that all vectoring of the cutter to the suspect vessels be accomplished by the air crew.

The larger vessel, whose stern bore the name "Heidi", failed to display any flag but claimed to be registered in the Netherlands Antilles. A check with that country revealed that the claimed registry was false. We understand that other countries were also queried without any records being located. The Coast Guard then boarded the "Heidi" as a stateless vessel.

The boarding officers found the vessel fully loaded with marihuana. The vessel was taken into Jacksonville, where Customs officers have already unloaded 225,469 pounds (113 tons) of marihuana. I might add that it took 57 hours to incinerate the marihuana which will not be needed for trial.

The other vessel, the Rio Chico, was also boarded and discovered to have 44,000 pounds of marihuana which is believed to have been off-loaded from the Heidi. Two other vessels which were expected to rendezvous with the Heidi are believed to have broken-up in the stormy seas.

Fortunately, there will be a trial in this case. The 22 Colombians and 1 Chilean on board have been linked to a conspiracy developed by DEA involving several U.S. citizens—seven of whom have since been arrested pursuant to federal warrants.

I say fortunately there will be a trial, because very often there is no evidence to link the foreign crewmembers with any conspiracy to smuggle the marihuana. As a result, the foreign crewmembers are deported. Also, we were fortunate that the concerned agencies had sufficient prior information so that we could detect the mothership before all of its contraband cargo was offloaded to smaller "runner" vessels, such as the shrimper, Rio Chico. Additionally, the determination of foreign registry, or lack thereof, was made rela tively quickly.

While this particular seizure did proceed smoothly with expected successful prosecutions, it is illustrative of the types of problems we face.

In response to the noticeably growing smuggling problem by both vessels and aircraft, Customs has undertaken the following steps to improve our interdiction program. We have surveyed potential smuggling locations for additional resource needs. At this time, we are planning to establish a new patrol station at Fort Myers, and to increase the staff presently serving the stations at Key West and Port Everglades. In the future we expect to establish a patrol station at Fort Pierce. To insure a rapid deployment, a number of patrol officer positions will be transferred from other border stations. When the survey is completed and all resource requirements are identified, Customs will make every effort, within budget constraints, to meet these needs.

With respect to our efforts aimed at the problem of smuggling by aircraft, a significant improvement in our radar detection capability has recently come about as a result of a DOD agreement to use the newly operating AWACS radar system for detecting smuggler aircraft along the entire southern border. As reported in recent media accounts, AWACS radars operate from aircraft which fly along the border. Its radar can observe a larger area with a very high probability of detection.

At this time, we are staffing sufficient personnel to accompany the AWACS flights. Our personnel currently are in training to better operate with the Air Force. Customs personnel have already accompanied the AWACS aircraft on familiarization flights, and additional flights are scheduled for the future.

Several problems must still be overcome before the system can be truly operational. Of immediate concern is improved communication and logistics. Customs currently has one sensor-equipped high performance aircraft and is in the process of procuring another.

Customs has received approval from DOD for the loan of four Air Force T-39A aircraft. Since these aircraft are not equipped with radar, Customs is negotiating to modify and install appropriate radars. From this point, the first aircraft will be operationally available in 8 months and the remainder within 12 months.

Unfortunately, the actual smuggling of the contraband into the United States is just a piece of the puzzle. The glue to this puzzle is the vast amount of currency which is necessary to finance these transactions. The sale of narcotics and dangerous drugs in the United States produces vast sums of money, much of which leaves the United States, often to finance other smuggling attempts. By monitoring the flow of currency and monetary instruments, significant information about narcotics trafficking can be developed. While present law does require that report be filed with the Customs Service by persons transporting or causing to be transported monetary instruments in excess of $5,000 out of the United States, various courts have interpreted this law to mean that no violation can occur until the person has actually left the United States without filing the required report. Needless to say, effective enforcement of this reporting requirement has been significantly impaired.

To remedy this defect in the law, we believe that the Committee should consider legislation which would require that a report be filed prior to departure by any person who wishes to transport or have transported out of the United States any amount exceeding $5,000. The Secretary of the Treasury could then, by regulation, determine the time and manner in which such reports should be filed. For example, the regulation could provide that a person departing by aircraft or vessel would have to file the report prior to boarding the outbound carrier.

Currently, Section 235 of the Currency and Foreign Transaction Reporting Act (31 U.S.C. 1105) states that application may be made for a search warrant authorizing the search of any person, place, vehicle, or physical object when the Secretary has reason to believe that there will be a violation of certain reporting provisions of the Act. The implication is that if there is reason to believe, for example, that there will be an attempt to transport a substantial amount of currency out of the country without filing the required report, a search may be conducted only after a search warrant is obtained. Decisions of the U.S. Supreme Court, however, have made it clear that in certain "exigent circumstances" warrantless searches can be conducted where there is probable cause to believe that a law has been violated. We believe that the Committee should consider legislation which would remove any doubt as to the application of the "exigent circumstances" exception to currency reporting cases by authorizing warrantless searches to be made for violations of the Reporting Act where exigent circumstances can be shown. In many instances, this may prove critical. Frequently, circumstances leading to probable cause do not surface until just before the departure of an aircraft or boat, and subsequent enforcement action by the Federal Government is severely restricted.

Under such legislation, Customs would still have to show that probable cause as well as exigent circumstances existed at the time of any warrantless search.

While Customs continually is striving to develop new procedures and new working arrangements with other agencies which will result in a more effective interdiction effort, it is evident that there exist many problems which need solving. We appreciate the Committee's concern and interest, and we remain willing to work closely with you to solve these problems.

I will be happy at this time to answer any questions.

Thank you.

---

STATEMENT OF CAPTAIN ROBERT H. OVERTON III

Mr. Chairman and members of the Committee:

I am Captain Robert H. Overton, Chief of the Coast Guard's Ocean Operations Divison, and Manager of the Enforcement of Laws and Treaties Program. I thank you for this opportunity to testify concerning the proposed bill, the "Drug Trafficking Control Act of 1978," and the Coast Guard's maritime

drug interdiction effort. With me here today are Cdr. John E. Streeper, USCG and Lcdr E. Alex Blanton, USCG who are members of my staff.

The Coast Guard supports the purposes of legislation along these lines. Such legislation would increase our ability to take law enforcement action against U.S. vessels, and persons aboard them who are engaged in illicit drug trafficking on the high seas. As written, the bill overcomes the current necessity for proving intent to import controlled substances into the United States, by making mere possession of these substances aboard U.S. vessels, a crime. Insofar as persons aboard U.S. vessels are concerned, it would close one significant loophole in our enforcement scheme.

We are still reviewing the Bill within the administration with a view towards possibly recommending amendments which we believe will make it a more effective vehicle for countering maritime drug smuggling.

Specific language to accomplish such changes will be provided to the Committee by separate correspondence after our review is completed.

The Coast Guard's drug interdiction effort is based upon continuing surface and aircraft patrols of known or suspected smuggling areas, and a vigorous boarding program. Our major cutters may be assigned to conduct surveillance of a geographic area, patrol a known smuggling route, blockade a passage or "choke point," or pursue a specific target identified by intelligence information. A helicopter is normally embarked on flight-deck-equipped cutters, to extend the range and detection capability of the cutter and to improve patrol efficiency. These patrols by our larger cutters are normally from three weeks to one month in duration. Cutters may be deployed between districts during these operations to permit expanded coverage of a "hot" area or to provide flexibility, should the trafficker shift their activity to avoid enforcement pressure.

Supplementing the patrol activity of our high and medium endurance cutters are our 82 and 95 foot patrol boats. These small cutters are used in a similar manner, however their habitability and endurance limits patrol length during independent operations to approximately one week. Multi-unit operations are conducted as a means to overcome this limitation. This concept consists of a high or medium endurance cutter acting as a refueling and reprovisioning "base" for one or more WPB class vessels in company, and has the advantages of providing expanded patrol area coverage in addition to extending the WPB's endurance.

A concept vital to our operations that should be clearly understood is that of "multi-mission" operations. It is this concept which allows us to accomplish our many duties simultaneously in an effective manner, with a minimum number of resources and personnel. Simply stated, many of our tasks are performed in a common environment—at sea. Attendant to these tasks are three elements: First, surveillance—to determine the activity in a given area of ocean; Second, detection—to discover violations of applicable U.S. laws, marine casualties, or pollution incidents; and third, apprehension or recovery—to arrest the law violator or rescue casualty victims. It is our contention that the factor necessary to accomplish these tasks, regardless of the label applied to the individual mission, is the continuing presence of a suitable maritime unit, capable of response in a given time. Thus, because of their capabilities to surveil, detect and apprehend any of our cutters and aircraft may respond to the demands of the drug interdiction effort at any time during their operations.

The Coast Guard's vessel boarding program is governed primarily by our jurisdictional limitations. In the case of United States vessels, we are authorized to board and search at any time, for the enforcement of U.S. law, regardless of the location of the U.S. vessel. This includes the high seas environment as well as the waters of our country. A significant problem we face in the boarding and seizing of U.S. vessels is the necessity to prove conspiracy to import should a large cargo of controlled substances be discovered aboard a U.S. vessel on the high seas.

Foreign vessels, on the other hand, are normally immune to boarding and search by Coast Guard units except in special circumstances. Such special circumstances include foreign vessels in U.S. waters, stateless or assimilated stateless vessels, and foreign vessels "constructively present" in U.S. waters by virtue of their acts.

Generally, foreign vessels operating within 12 miles of the United States are subject to our jurisdiction, and may be boarded and seized for violations of smuggling or customs laws with the concurrence of the Department of State. Similarly, a stateless vessel, that is, a vessel which is not registered in any country, or a vessel which can be assimilated to statelessness by its claiming of the protection of more than one country, can be boarded and seized with Department of State concurrence. Since such vessels are not entitled to the protection of any flag, any nation may exert jurisdiction over them for enforcement purposes on the high seas.

"Constructive presence," may also be used to obtain jurisdiction over a foreign vessel on the high seas, if three elements exist. First the foreign vessel must be "adjacent" to the waters of the United States. Second, it must be acting as part of a team with another vessel in an attempt to violate U.S. law. Third, the "teammate" must have engaged in a violation of U.S. law, within U.S. waters. Once these elements have been established, the foreign vessel may be boarded and seized as though it were actually within the waters of the United States. This concept has proven effective in combatting "mothership" operations, where foreign vessels with multi-ton loads of marijuana hover offshore to effect the transfer of illicit cargo to smaller "contact boats," which then introduce the contraband into the U.S.

Foreign vessels which do not fall within the preceeding exceptions and enjoy the legitimate protection of their flag state may not routinely be boarded or searched. The alternative used by the Coast Guard to pursue law enforcement action against suspect vessels in this category is to seek the permission of the flag state, through the State Department, to board and search the vessel. In the event contraband is found, we may, with the concurrence of the flag state, prosecute any violations of U.S. law discovered, or failing this, we may detain the vessel for further enforcement action by the flag state. The success of this approach varies with the flag state queried, and cooperation ranges from excellent to very poor. There are indications that some countries are becoming increasingly reluctant to grant this intrusion on their sovereignty, particularly if the laws of the nation involved do not contain appropriate provision for doing so.

As a practical matter, the impact of delays encountered while attempting to obtain flag state permission for boarding and seizure of a foreign vessel on the high seas leads to a significant reduction in enforcement capability. Generally, the unit seeking authorization to board is faced with maintaining overt surveillance of the suspect, often for several days, as negotiation continues. The object of the boarding invariably continues on course during this period, drawing the Coast Guard unit away from the patrol area. It is conceivable that during this evolution, other trafficking vessels may transit the patrol area and remain undetected. The Department of State and the Coast Guard are investigating the possibility of establishing pre-seizure agreements with foreign governments which may reduce the time required to obtain the appropriate authorizations.

In response to direction from the President and Congress to place increased emphasis on drug interdiction, the Coast Guard has focused on four positive actions:

First, we are continuing to expand our interdiction program through the increased use of our 82 ft and 95 ft patrol boats for dedicated law enforcement patrols. Approximately 54,800 hours of additional WPB patrol time will be expended for this purpose in FY 1979. Additionally, our Groups and Stations are using smaller utility boats to conduct more frequent surveillance of inshore areas. Our major cutters, augmented by the WPB's, continue to conduct frequent patrols of the Yucatan, Windward and Mona Passage "choke points," and we are directing more attention to the Northern Bahama area which has developed into a hotbed for illicit at-sea transfer of drugs.

Second, we are committed to improving the quality and quantity of Coast Guard law enforcement training, to promote increased professionalism among enforcement personnel. Judgmental weapons training, jurisdictional issues and limitations, search and arrest procedures, and boarding techniques are areas which require concentrated instruction.

Third, we are continuing our efforts in conjunction with the Customs Service, the Drug Enforcement Administration, and the Department of Defense, to improve and expand our intelligence capability. A Maritime Information Team with representation from the Coast Guard, the Customs Service, and the Drug Enforcement Administration has been formed to centrally collect and analyze post-seizure information. Through close cooperation with the Department of Defense, and in particular with the Navy, the number of at-sea intelligence collectors has recently been significantly increased. Naval units will furnish sighting data accumulated during their routine operations to the Coast Guard. This information may consist of specific reports concerning previously targeted suspect vessels, or data of a more general nature based on "profiles" of smuggling activity furnished by the Coast Guard. Information collected by Naval units reaches us through the Naval Ocean Surveillance Information Center, where a Coast Guard liaison officer is assigned. Efforts to further expand and refine this vital program within the limitations of the "Posse Comitatus" Act and the availability of DOD resources are continuing.

Finally, we are accumulating data from all available sources to better define the trafficking problem, evaluate our interdiction effectiveness and determine the appropriate level of law enforcement activity. This quantification must be obtained if we are to adequately justify expansion beyond the limits of existing resources. As we increase our participation in the overall federal effort to control the flow of illegal drugs, we are seeing improvements in several areas. The recent success of joint enforcement operations directed against specific trafficking operations, and the increasing number of seizures resulting from exchanges of information between agencies lead us to conclude that cooperation between federal entities involved in anti-drug activity is improving. Memoranda of understanding have been executed with the Drug Enforcement Administration and the Customs Service. This is particularly important and we will continue our attempts to foster

these productive relationships in any way possible.

Mr. Chairman, this concludes my formal statement. I will be happy to respond to any questions that you may have at this time.

---

S. 3437

A bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 and other laws to prevent the illicit importation of controlled substances into the United States and for other purposes

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Drug Trafficking Control Act of 1978".

TITLE I—POSSESSION OF A CONTROLLED SUBSTANCE ON THE HIGH SEAS

SEC. 101. Section 1009 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 959) is amended to read as follows:

"MANUFACTURE, DISTRIBUTION, OR POSSESSION FOR PURPOSES OF UNLAWFUL IMPORTATION

"SEC. 1009. It shall be unlawful for any person to manufacture or distribute a controlled substance in schedule I or II, or to manufacture, distribute, or possess a controlled substance in schedule I or II onboard a vessel subject to the jurisdiction of the United States as defined in section 1001—

(1) intending that such substance will be unlawfully imported into the United States; or

(2) knowing that such substance will be unlawfully imported into the United States.

This section is intended to reach acts of manufacture or distribution outside the territorial jurisdiction of the United States, and acts of manufacture, distribution, and possession on vessels on the high seas. Any person who violates this section shall be tried in the United States district court at the point of entry where such person enters the United States, or in the United States District Court for the District of Columbia.".

SEC. 102. Section 1005 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 955) is amended by—

(a) striking the heading for the section and inserting in lieu thereof: "POSSESSION ONBOARD VESSELS, AIRCRAFT, AND OTHER VEHICLES";

(b) inserting "(a)" immediately after "SEC. 1005."; and

(c) adding at the end thereof the following new subsection:

"(b) It shall be unlawful for any person to bring or possess onboard any vessel or aircraft of the United States, or onboard any vehicle of a carrier of the United States, a controlled substance in schedule I or schedule II or a narcotic drug in schedule III or IV, unless such substance or drug is part of the cargo entered into in the manifest or part of the official supplies of the vessel, aircraft, or vehicle. This subsection is intended to reach acts of possession committed outside the United States or the customs territory of the United States. Any person who violates this section shall be tried in the United States district court at the point of entry where such person enters the United States, or in the United States District Court for the District of Columbia.".

SEC. 103. Subsection (a) (3) of section 1010 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 960(a)(3)) is amended to read as follows:

"(3) contrary to section 1009, manufactures distributes or possesses a controlled substance,".

SEC. 104. Subsection (a) of section 1001 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 951) is amended by adding at the end thereof the following:

"(3) The term 'high seas' means all waters beyond the territorial sea of the United States and beyond any foreign nation's territorial sea which is recognized by the United States and includes the Customs waters as defined in section 401 of the Tariff Act of 1930 (19 U.S.C. 1401).

"(4) The term 'vessel of the United States' means any vessel documented under the laws of the United States, or numbered as provided by the Federal Boat Safety Act of 1971, as amended, or owned in whole or in part by the United States, or any citizen of the United States, or any corporation created under the laws of the United States, or any State, territory, district, Commonwealth or possession thereof, unless such vessels has been granted nationality by a foreign nation in accordance with article 5 of the 1968 Convention on the High Seas.

"(5) The term 'vessel' includes every description of watercraft used or capable of being used as a means of transportation on the water.

"(6) The term 'vessel subject to the jurisdiction of the United States' includes (A) any vessel without nationality; (B) any vessel assimilated to a vessel without nationality in accordance with paragraph (2) of article 6 of the 1958 Convention on the High Seas; (C) any hovering vessel or any vessel within the customs waters as defined in section 401 of the Tariff Act of 1930 (19 U.S.C. 1401); (D) any vessel on the high seas registered in a foreign nation when that nation authorizes the United States to assert jurisdiction over such vessel for the purposes of enforcing this Act; and (E) any vessel of the United States.".

SEC. 106. The table of contents of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by—

(a) striking out

"Sec. 1005. Possession on board vessels, etc., arriving in or departing from United States.

and inserting in lieu thereof

"Sec. 1005. Possession on board vessels, aircraft, and other vehicles.";

and

(b) striking out

"Sec. 1009. Manufacture or distribution for purposes of unlawful importation."

and inserting in lieu thereof

"Sec. 1009. Manufacture, distribution, or possession for purposes of unlawful importation.".

TITLE II—ILLEGAL EXPORT OF CASH

SEC. 201. Section 231(a) of the Currency and Foreign Transactions Reporting Act (31 U.S.C. 1101) is amended to read as follows:

"(a) Except as provided in subsection (c) of this section, whoever, whether as principal, agent, or bailee, or by an agent or bailee—

"(1) intends to transport, or have transported, monetary instruments from any place within the United States to or through any place outside the United States in an amount exceeding $5,000 on any one occasion shall file a report or reports in accordance with subsection (b) prior to departing from the United States;

"(2) knowingly transports, or causes to be transported, monetary instruments from any place outside the United States to or through any place within the United States in an amount exceeding $5,000 on any one occasion shall file a report or reports prior to or at the time of arrival in accordance with subsection (b); or

"(3) receives monetary instruments at the termination of their transportation by common carrier to the United States from or through any place outside the United States in an amount exceeding $5,000 on any one occasion shall file a report or reports in accordance with subsection (b).".

SEC. 202. Section 235 of the Currency and Foreign Transactions Reporting Act (31 U.S.C. 1105) is amended by redesignating subsection (b) as subsection (c) and by adding a new subsection (b) as follows:

"(b) When because of exigent circumstances a warrant cannot be obtained, any officer of Customs may search without a warrant any of the individuals or objects included in subsection (a) of this section if he has probable cause to believe that monetary instruments are in the process of transportation and with respect to which a report required under section 231 of this Act (31 U.S.C. 1101) has not been filed or contains material omissions or misstatements.".

TITLE III—PROMPT REPORTING OF VESSELS

SEC. 301. Section 433, Tariff Act of 1930, as amended (19 U.S.C. 1433), is amended to read as follows:

"The master of any vessel from a foreign port or place, or of a foreign vessel from a domestic port, or of a vessel of the United States carrying bonded merchandise, or foreign merchandise for which entry has not been made, arriving at any port or place within the United States, shall immediately report the arrival of the vessel at the nearer customhouse or such other place as the Secretary of the Treasury may prescribe in regulations. The Secretary may by regulation prescribe the manner in which arrival shall be reported and may extend the time, not to exceed twenty-four hours after the arrival of the vessel, in which to report arrival.".

SEC. 302. Section 459, Tariff Act of 1930, as amended (19 U.S.C. 1459), is amended by substituting a comma for the word "or" wherever it appears between the words "entry" and "customhouse", and inserting after the word "customhouse" the phrase "or other places as the Secretary of the Teasury may prescribe in regulations.".●

---

## POVERTY DECLINES FOR OLDER AMERICANS

● Mr. CHURCH. Mr. President, our Nation has made considerable progress in reducing poverty among older Americans during the past decade.

In 1967, almost 5.4 million persons 65 years or older fell below the poverty line. Ten years later the number of aged poor declined to 3.2 million.

The rate of poverty among the elderly has also been slashed substantially, from 29.5 percent in 1967 to 14.1 percent in 1977.

Social security increases, improvements in other retirement benefit programs, and the establishment of supplemental security income have helped to improve the economic well-being of older Americans.

A recent advance report from the Census Bureau provides new information about improved economic conditions for most elderly persons, although not all older Americans. Poverty, for example, declined by 136,000 from 1976 to 1977 for all persons 65 or older.

However, the Census report provides some disturbing information. Poverty among aged blacks actually increased by 57,000, from 644,000 in 1976 to 701,000 in 1977.

Moreover, the low-income thresholds represent a barebones existence: $2,895 a year for a single aged person and $3,637 on an annual basis for elderly couples.

As chairman of the Committee on Aging, my No. 1 goal is to work for the eventual elimination of poverty for all older Americans.

Our Nation can take pride in the con-

crete actions to improve the well-being of the aged in recent years. But, much more remains to be done.

The Senate Committee on Aging has launched a comprehensive hearing concerning "Retirement, Work, and Lifelong Learning." We plan to focus on many subjects, including the most efficient and effective means to enable older persons to live in dignity and self-respect.

Mr. President, I ask that three tables from the Census Bureau's advance report on "Money Income and Poverty Status of Families and Persons in the United States: 1977" be printed in the RECORD.

The tables follow:

TABLE 16.—PERSONS BELOW THE POVERTY LEVEL BY FAMILY STATUS, SEX OF HEAD, AND RACE, 1959–77

[Numbers in thousands; persons as of March of the following year; for meaning of symbols, see text]

| Year, race, and sex of head | Number below poverty level | | | | | | | Poverty rate | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Total | | In families | | | | | Total | | In families | | | | |
| | All persons | 65 yr and over | Total | Head | Related children under 18 | Other family members | Unrelated individuals | All persons | 65 yr and over | Total | Head | Related children under 18 | Other family members | Unrelated individuals |
| ALL PERSONS | | | | | | | | | | | | | | |
| All races: | | | | | | | | | | | | | | |
| 1977 | 24,720 | 3,177 | 19,505 | 5,311 | 10,028 | 4,165 | 5,216 | 11.6 | 14.1 | 10.2 | 9.3 | 16.0 | 5.9 | 22.6 |
| 1976 | 24,975 | 3,313 | 19,632 | 5,311 | 10,081 | 4,240 | 5,344 | 11.8 | 15.0 | 10.3 | 9.4 | 15.8 | 6.0 | 24.9 |
| 1975 | 25,877 | 3,317 | 20,789 | 5,450 | 10,882 | 4,457 | 5,088 | 12.3 | 15.3 | 10.9 | 9.7 | 16.8 | 6.4 | 25.1 |
| 1974 [1] | 23,370 | 3,085 | 18,817 | 4,922 | 9,967 | 3,928 | 4,553 | 11.2 | 14.6 | 9.9 | 8.8 | 15.1 | 5.7 | 24.1 |
| 1974 | 24,260 | 3,308 | 19,440 | 5,109 | 10,196 | 4,135 | 4,820 | 11.6 | 15.7 | 10.2 | 9.2 | 15.5 | 6.0 | 25.5 |
| 1973 | 22,973 | 3,354 | 18,299 | 4,828 | 9,453 | 4,018 | 4,674 | 11.1 | 16.3 | 9.7 | 8.8 | 14.2 | 5.9 | 25.6 |
| 1972 | 24,460 | 3,738 | 19,577 | 5,075 | 10,082 | 4,420 | 4,883 | 11.9 | 18.6 | 10.3 | 9.3 | 14.9 | 6.6 | 29.0 |
| 1971 | 25,559 | 4,273 | 20,405 | 5,303 | 10,344 | 4,757 | 5,154 | 12.5 | 21.6 | 10.8 | 10.0 | 15.1 | 7.2 | 31.6 |
| 1970 | 25,420 | 4,709 | 20,330 | 5,260 | 10,235 | 4,835 | 5,090 | 12.6 | 24.5 | 10.9 | 10.1 | 14.9 | 7.4 | 32.9 |
| 1969 | 24,147 | 4,787 | 19,175 | 5,008 | 9,501 | 4,667 | 4,972 | 12.1 | 25.3 | 10.4 | 9.7 | 13.8 | 7.2 | 34.0 |
| 1968 | 25,389 | 4,632 | 20,695 | 5,047 | 10,739 | 4,909 | 4,694 | 12.8 | 25.0 | 11.3 | 10.0 | 15.3 | 7.8 | 34.0 |

## SENATOR CLAIBORNE PELL—CHAMPION OF THE ARTS AND EDUCATION

● Mr. KENNEDY. Mr. President, since his first election to the Senate in 1960, the distinguished senior Senator from Rhode Island, CLAIBORNE PELL, has been a true champion of the arts and education. His important role in making the National Endowments of the Arts and Humanities a reality, is well known to all of us; his commitment and support for preserving the artistic heritage of our Nation and promoting a distinctive and unique American culture assures him the grateful thanks of the American people. And his valuable work in the area of education—especially his tireless support of the community college—has helped make it possible for millions of Americans to earn a college diploma.

A recent article by Ernesto Cuneo in the Newport Daily News pays tribute to my friend Senator PELL and his notable achievements. I ask that the article be printed in the RECORD.

The article follows:

RHODE ISLAND SENATOR WON PLACE IN HISTORY FOR AID TO ART, EDUCATION

(By Ernest Cuneo)

When it comes to government spending, Sen. Claiborne Pell makes Scrooge himself look like a big time spender. Pell is a fierce, growling Cerberus, hostilely stationed at the treasury doors. Since Rhode Island, in its providence, has seen fit to send him back to the Senate three times, God, the calendar and seniority have elevated Pell to the chairmanship of the Rules Committee. This committee allots the moneys to the 17 major committees which run the Senate. The 17 Senate chairmen are among the most influential men in the world, let alone the Senate.

Prudent men walk wide of offending them. However, casting advice on how to win friends and influence people to the winds, Pell had the temerity to tell every last one of the chairmen that they were spending too much money, ruling that, except for cost-of-living allowances, the cashier's window was shut.

Amazingly enough, the powerhouse Senate chairman acctpted Pell's order. One reason, presumably, is that Pell's own committee was the first to feel Pell's ax. There was hope in some quarters that "Big Jim" Eastland, longtime chairman of the mighty Judiciary Committee, might lead a revolt. However, Eastland was among the first to go along with Pell, because Pell is also a Claiborne. South of the Mason-Dixon Line, a Claiborne rates with a Bankhead, a Breckinridge, a Madison, or a Byrd. A Claiborne was the governor of Louisiana; George Dallas, another ancestor, after whom the city of Dallas and Pell's daughter are named, was President James Polk's vice president.

And thereby hangs a tale of the creation of the National Endowments of the Arts and the Humanities. When Claiborne Pell was elected to the Senate 18 years ago, the cultural history of these United States was not impressive. Actually, with the fall of the European dynasties—the Hapsburgs, the Romanovs, the Savoys and even the Hohenzollerns—the tradition of the government as patron of the arts also fell. There seemed little hope that the U.S. government would ever assume such role.

Despite the huge effort of Northern liberals, the Southern conservative bloc was utterly opposed. However, when Pell introduced the bill, the Southern Senators, with arch-conservative Harry F. Byrd of Virginia as leader, voted as a bloc to support not Pell of Rhode Island, but his ancestors, the Claibornes of Virginia and Louisiana! President Lyndon B. Johnson handed Pell the first pen he used to establish the endowments at $5 million each. They are now nearly $150 million each, and have been all but matched by American free enterprise .

Ancient royalty has been exceeded by the American Republic. Pell's whole program is a dazzling success. As an example, Pell fought for and got the Air and Space Museum. The recordbreaking 10 millionth visitor passed through its gates this week.

Nevertheless, Pell's place in American history, for sheer sweep, will be for his education acts. That incredible record can be summed up in a paragraph: Thomas Jefferson and Benjamin Franklin founded the Universities of Virginia and Pennsylvania. Abraham Lincoln gave the common people a crack at a college education by establishing the first state universities. Claiborne Pell's great educational acts put up over 1,500 community colleges. Under the Pell Acts, American higher education doubled and redoubled, and has a 12-million attendance today. Again, LBJ gave the Rhode Island senator the first pen with which the bill creating the greatest educational system in recorded history became law.

That, of course, is the hilarious paradox of Pell. His work is monumental, but he, as chairman, is chintzy enough to tell the 16 Senate chairmen, "No, brothers, I can't spare a dime!"

It might well be assumed that with such a record, Pell is as flamboyant as a Huey Long. That's the paradox. He is so solid and so gray that he makes Calvin Coolidge appear as romantic as Buffalo Bill.●

## VETO OF DEFENSE AUTHORIZATION BILL

● Mr. TOWER. Mr. President, on August 17, the President, in a televised press conference, announced his veto of the fiscal year 1979 defense authorization bill. That bill, as passed by the Senate and the House was a carefully crafted piece of legislation. However, the President cast aside the legislative branch's judgment but did not offer any specific congressional action that he would have preferred. In fact, it has become apparent that the President's remarks were directed at the wrong bill.

It is generally understood that the President's veto was contrived to bolster his decline in public opinion polls and shore up his indecisive image. The President has chosen to ignore the collective judgment of individual Members of Congress who worked together to provide the very best for U.S. defense. In its place, President Carter would substitute some fleeting political advantage to aid his sagging image. In short, the President chose to play politics with America's military might at a time when we are seeing an ever-increasing challenge by the Soviets and can ill afford such chicanery.

The effect of the veto is to disrupt the orderly process. The net result could be that production workloads will have to be adjusted, training with new and much needed equipment will have to be put off and the modernization of defenses would be slowed.

In my State of Texas, the President's action could upset plans to modernize the Fort Hood tank assets of the 2d Division and place in jeopardy the delivery of Bell helicopter Cobra/TOW attack helicopters to units there. The veto could also cause a delay in beginning production of the two-place TA–7D attack aircraft, added to the bill by my amendment, for the Air National Guard.

The bill also contains the Roland, Patriot and Hawk air defense systems, the training for which is conducted at Fort Bliss.

The House will, of course, have to act first in voting to override the veto, and I hope that they will dc so. The President's action came at the wrong time, on the wrong bill, and for the wrong reasons.

Mr. President, a number of press accounts have reported the difficulties raised by the veto. I ask that four of these articles be printed in the RECORD.

The articles follow:

[From the Wall Street Journal, Aug. 24, 1978]

THE RAFSHOON VETO

President Carter's veto of the defense procurement authorization is everywhere interpreted as part of a new "get tough" act, the practical incarnation of media adviser Gerald

Rafshoon's efforts to massage the President's sagging poll ratings. The veto would have helped Mr. Carter's competency rating more if he had not clouded the issue in monumental confusion, including confusion about what the bill he vetoed actually contained.

To cut through the clouds, it's necessary to keep in mind two simple facts. First: while Mr. Carter objects to the congressional decision to spend $2 billion on a nuclear aircraft carrier, his administration has already announced plans to include a large oil-burning carrier in its next budget request. The whole issue is, merely, this year or next year, and conventional or nuclear? Second: There is a difference between authorization bills, which set programs, and appropriations bills, which spend money. Mr. Carter vetoed the defense procurement authorization. The Pentagon appropriations bill has not yet been completed by Congress.

This elemental parliamentary distinction was entirely overlooked in Mr. Carter's charge that Congress is building the carrier by "diverting funds away from far more important defense needs." Among the congressional items to which he objected, for example, was a supposed cut of $500 million in military operational funds. But operational funds are not dealt with in the defense procurement bill; if this was the President's problem, he vetoed the wrong bill.

Doing the President one better, Defense Secretary Brown complained that Congress had killed three antisubmarine ships. There is a dispute over the appropriations for these ships, with the House on one side and the Senate on the other. But whatever the eventual appropriation, the ships were included in the defense procurement bill. Secretary Brown complains about Congress killing ships that were in fact in the bill his chief just vetoed.

Now, within the context of the procurement authorization, it's true that despite $1.9 billion for the aircraft carrier, the congressional total was close to the President's original request. About half of the funds came from rather ordinary changes: the Army reporting it could not spend money on its new XM-1 tank as fast as it originally thought; Congress's decision that it could both save money and improve the NATO tank force faster by upgrading more existing M60A1 tanks and producing fewer new M60A3 tanks than contemplated in the original administration request.

The other half of the carrier money came from funds originally requested for the Trident submarine program, but which cannot be spent in this year's bill because of delays. With the Trident program delayed, and with the administration poised to order up a new carrier next year, Congress is merely saying, let's use this idle money and get the carrier started now.

There remains the issue of what kind of carrier. In passing, it should be noted that in light of the latest studies it is far from clear that large carriers are specially vulnerable. They can sustain hits from Soviet cruise missiles that would atomize small carriers, which have their magazines above water line. Large ships also make sense in light of electronic battlefield management, which promises a defense capable of shooting down attacking missiles. But this debate is beside the immediate point, since the White House has requested no small carriers. Indeed, the bill Mr. Carter vetoed provided more research funding for small carriers than he requested.

It is also unclear that oil-powered carriers save money. They are cheaper to build, but more expensive to fuel. Over the lifetime of a ship, it is difficult to see much difference in total cost. Congress prefers the nuclear carrier because it has better performance, being unencumbered by a train of tankers to refuel it every few days. The administration prefers a conventional carrier, saving money on construction now but spending more on operations later. And over this difference the President is willing to veto the entire procurement bill, inviting further controversy and delay that may hinder the improvements on which he and Congress agree.

In order to escalate this minor quarrel to veto proportions, President Carter launched an attack on Congress that seriously distorts the record. Sen. Stennis rose on the floor to complain, in what is for him strong language, of the administration's "false facts." The Senator was too much of a gentleman to say it, but we will: This is not a case of the Congress being soft on national security, but of the President dallying with defense in pursuit of cosmetic politics. The defense procurement bill was vetoed not because of any large difference on substance, but because it was the first bill to come along after Mr. Rafshoon whispered in the President's ear that he could look "strong" by vetoing something.

---

[From the National Security, Aug. 19, 1978]

CARTER VETOES ARMS BILL, CITES CARRIER COST

(By Pat Towell)

President Carter: "This is not a question of money [but] of how that money is going to be spent."

In announcing his veto of the $36.9 billion fiscal 1979 weapons procurement bill, President Carter based his decision squarely on the impact of the costly nuclear-powered aircraft carrier added by Congress.

To pay for the $2 billion ship, Congress had cut "into the muscle of our military defense," Carter told a nationally televised press conference Aug. 17. "This is not a question of money. . . . It's a question of how that money is going to be spent."

Carter wanted more of it spent for projects directly related to the U.S. commitment to NATO and for maintaining the combat-readiness of forces already in the field, he said. But many of the congressional changes in the budget to which the president reportedly objected were not contained in the bill (H.R. 10929) he vetoed. H.R. 10929 set appropriations ceilings for weapons procurement, research projects and civil defense—about 35 percent of the annual defense budget.

By noon the day after Carter's announcement, neither the White House nor the Defense Department had a list of the specific congressional actions Carter disagreed with, but various sources indicated that he really had two other bills in mind:

The Senate version of the defense appropriations bill (H.R. 13635). The Defense Subcommittee reportedly had cut $200 million budgeted for Army ammunition, $437 million for operations and maintenance costs and $200 million for A-10 tank-hunting planes.

The final version of the military construction appropriations bill (H.R. 12927), which cut several hundred million dollars requested for NATO-related construction projects in Europe.

According to some sources, the president concluded that he had to show his determination not to fund the carrier so Congress—and especially the Senate Appropriations Committee, which still was marking up the defense bill—would redirect the funds to items on which Carter placed a higher priority.

House Democratic leaders quickly rallied to the president's position, but a lengthy battle is likely. Three times this year the House, which will consider the veto first, has voted in favor of the nuclear carrier by relatively large margins, most recently only 10 days before Carter acted.

On Aug. 7 the House rejected, 156-218, an amendment to the defense appropriations bill by Sidney R. Yates, D-Ill., that would have killed the carrier.

Lobbying Called Ineffective. Yates said administration lobbyists had worked on behalf of his amendment, and an aide to another member who also backed Yates insisted the administration had gone "full bore" on the amendment, at least "the best way they knew how." He added that this had not been done very effectively.

But an aide to another Pentagon critic charged that the administration effort had been feeble by comparison to its efforts in February to kill the B-1 bomber and its campaign early in August to save the foreign aid appropriations bill from crippling cuts. Carter's decision to take on Congress by vetoing the authorization bill, he said, was just "one more ploy in making him a decisive president."

CARRIER POLITICS

Carter complained that another big carrier would continue the trend toward a smaller number of very expensive Navy ships. But Gary Hart, D-Colo., a leading congressional proponent of moving the Navy toward a larger fleet consisting of cheaper ships, warned that a veto would set back that policy.

The final version of the authorization bill incorporated a very tenuous compromise that included the big carrier but also nearly $348 million to accelerate the Navy's development of vertical takeoff jets (V/STOLs) that could operate from ships appreciably smaller than the giant 1,000-foot-long carriers. (*Navy future, Weekly Report p. 1255*)

But several Senate committee votes on the V/STOL portions of the bill had been very close and, according to some sources, Sen. Hart nearly lost on all of them. Inclusion of the big carrier was essential to winning the support of many Senate committee members for the V/STOL acceleration and the concurrence of the House panel, which was even more skeptical of the new approach.

Hart urged the Senate to override the veto, arguing that Carter had ignored the bill's contribution to a new direction for the Navy.

DIFFERENCES BETWEEN VETOED BILL AND BUDGET REQUEST

| Programs | Carter request | | Final authorization | | Highlights |
|---|---|---|---|---|---|
| | Number | Amount (in millions) | Number | Amount (in millions) | |
| Aircraft carrier | | | 1 | $1,930.0 | Not counted: $1,575,000,000 nonnuclear carrier administration said it would accept. |
| Carrier planes | 53 | $1,557.4 | 81 | 1,988.8 | Faster production rates for F-14, F-18. |
| V/STOL development: | | | | | |
| Planes | | 158.0 | | 208.5 | Shift to modified Harriers by 1980's instead of new planes. Not counted: bill's cancellation of $113,000,000 of non-V/STOL planes for Marines. |
| Ships | | | | 140.0 | |

| Programs | Carter request: Number | Carter request: Amount (in millions) | Final authorization: Number | Final authorization: Amount (in millions) | Highlights |
|---|---|---|---|---|---|
| Trident missile submarine | 1 | 911.9 | | | |
| Surface effects ship | | | | 80.0 | |
| XM-1 tank | 110 | 585.1 | 110 | 493.3 | Funding readjustments requested by administration and Congress' increase of $27,500,000 to adapt German cannon. |
| M-60 tank (production) | 480 | 383.8 | 410 | 345.0 | Shift from purchase to modernization gives 90 more tanks for $4,800,000 less. |
| M-60 tank (modernization) | 220 | 98.4 | 380 | 132.4 | |
| Infantry fighting vehicle | | | | 39.0 | Shift to begin production of new type of troop carrier. |
| M-113 troop carrier | 910 | 74.2 | 550 | 44.5 | |
| Multiple antitank homing warheads | | 85.5 | | 50.5 | Funds shifted among eight research projects because of fear of duplication. |
| Medium-range ballistic missile | | 15.1 | | 22.0 | Pershing II missile shifted from Army to Air Force. |
| Air National Guard planes | | | 24 | 223.0 | Includes attack trainers and Hercules transports. |
| Strategic warplane research | | 210.0 | | 140.9 | Includes cuts of 50 percent in research on B-1 bomber ($50,500,000) and cruise missile carrier ($20,600,000). |
| Strategic attack warning | | 115.3 | | 131.3 | Increase of $25,000,000 for satellite protection. |

[In millions]

| | Increases above Carter's requests | Decreases from Carter's requests | Net change from request |
|---|---|---|---|
| Army: | | | |
| Procurement | $97.4 | $273.7 | −$176.3 |
| Research | 54.0 | 113.7 | −59.7 |
| Navy and Marines: | | | |
| Procurement | 2,941.2 | 1,122.6 | +1,818.6 |
| Research | 287.4 | 279.1 | +8.4 |
| Air Foce: | | | |
| Procurement | 253.0 | 138.2 | +114.8 |
| Research | 83.9 | 258.5 | −174.6 |
| Defense agencies: Research | 47.8 | 15.0 | +32.8 |
| Subtotal, procurement | (3,291.6) | (1,534.5) | (+1,757.1) |
| Subtotal, research | (473.1) | (666.3) | (−193.1) |
| Total | 3,764.7 | 2,200.8 | +1,564.0 |

### Changes Made by Congress

#### Army Weapons

Although the president maintained that Congress had cut $800 million from the Army weapons budget, the reductions made in the procurement bill totaled only $387.4 million. This was in part offset by additions to the Army budget of $151.4 million.

The cuts included $127.4 million for production overhead costs for the new XM-1 tank contract. But much of this reduction was approved by the administration and did not change the number of tanks authorized.

Other cuts included some management reshuffles prompted by congressional dissatisfaction with the Army's control of various programs. For instance, $15.1 million for programs connected with the Army's 400-mile-range Pershing ballistic missile was cut. Instead, Congress gave the Air Force $20 million to manage the Pershing program. The two Armed Services Committees had been concerned that the long-range missile program was being given too low a priority by the Army and decided that the Air Force was more likely to push it.

Another management-related reduction in Army weapons involved the new A3 model of the current M-60 tank that has more accurate gun-aiming equipment than the earlier M-60 models. Carter had requested $383.3 million to produce 480 new M-60s and $98.4 million to add the new equipment to 220 of the older models already in stock. The Armed Services Committees concluded that by buying fewer new models (410) and modernizing more of the old ones (380), the Army would get 90 more tanks for $4.8 million less.

#### Air Force Weapons

The net reduction made in Air Force programs in the authorization bill was only $59.8 million, a quarter of the $200 million reduction cited by Carter. But that figure was derived from cuts totaling $396.7 million and additions of $336.9 million.

There were no cuts in Air Force planes and cuts of only $36.7 million in three missile programs. But Carter may have been piqued by the addition of $223 million for 16 trainers and 8 transports for the Air National Guard. And $40 million was cut from a program that was central to Defense Secretary Brown's plan to greatly increase the number of reinforcements that could be flown from the United States to Europe in case of a war. Called CRAF, the program called for modifying civilian passenger jets so they could quickly be converted in an emergency to carry military cargo. Of $68.5 million requested, the bill approved only $7.5 million.

#### Readiness-Related Programs

Carter's reference to a $500 million congressional cut in programs related to combat-readiness is unclear since the types of programs he mentioned—ship overhauls, training and logistical support—are not contained in the bill he vetoed.

Overhauls. Major overhauls of ships, combat vehicles, airplanes and airplane engines do not require congressional authorization, but are an important element of the Operations and Maintenance account of the defense appropriations bill. Even if that was what Carter was referring to, his criticism was not relevant to House action on this year's bill (HR 13635). Of the $1.6 billion requested in the budget for major ship overhauls, the appropriations bill cut only $41 million. The House Appropriations Committee had argued that the shipyards could not absorb all the scheduled jobs. The bill added $182 million to the administrattion's request for Navy and Air Force overhauls of planes and aircraft engines. From the Army request of $975 million for major vehicle overhauls, the appropriations bill cut $8.4 million. (*Weekly Report pp. 2099, 2016*)

#### Training

Funds for training are not included in the authorization bill, nor are funds for any other personnel costs. But the bill does authorize manpower ceilings, and in that section Congress increased the number of Army and Navy personnel engaged in training by 3,950 above the number requested. The two Armed Services Committees rejected proposed cutbacks in the duration of recruit training for those services.

#### Logistical Support

The President did not explain what he meant by "logistical support," but according to news reports administration officials said he would like to see up to $500 million of the aircraft carrier funds used instead for spare parts for ships and planes. Spare parts for ships are not separately budgeted in the authorization bill, and the total budget request for airplane spares was only $1.8 billion, from which Congress made almost no changes.

#### Navy Programs

In addition to the congressionally imposed $1.93 billion for the nuclear carrier, the authorization bill increased Navy procurement funds by $428.4 million for carrier planes. Much of this increase was to increase the production of F-14 and F-18 fighters. The Armed Services Committees had complained that the slower rate at which the administration planned to buy the aircraft was inefficient and would increase the planes' cost per copy.

Partly offsetting the added cost of the carrier was a cut of $911.9 million for the eighth Trident missile-launching submarine. Both committees and the administration agreed that the construction of the ship could not begin in fiscal 1979 because of production delays at the General Dynamics shipyard where the ships are being built.

#### Carrier Costs

Opponents of the nuclear carrier had argued that the ship would, in effect, cost far more than its already hefty price tag of $2.2 billion (of which $268 million was appropriated in 1977). To derive the full benefits of nuclear power—essentially unlimited range at top speed—such a ship would need three nuclear-powered escorts, according to most Navy testimony. But the Navy already has a shortage of nuclear escort ships for the four nuclear carriers already built or being built, and such escort vessels now cost upwards of $1 billion each.

But pro-carrier members warned against placing too much hope in the savings resulting from the lower cost—$1.585 billion—predicted for the non-nuclear carrier requested by Carter. The smaller ship was only a gleam in an admiral's eye, they said. Design work was far from complete, and the history of recent Navy ship contracts almost invariably included large cost overruns by the time detailed designs finally were completed.

The nuclear ship, on the other hand, would be almost a carbon copy of the existing *Nimitz*-class carriers. The conference committee that wrote the final version of the vetoed bill had turned down a House proposal to modify the ship's design in order to better protect the ammunition magazines partly to reduce the potential for cost increases.

### Carter's Veto Politics

(By Rowland Evans and Robert Novak)

There is substantial evidence that in his daring veto of the defense bill, President

Carter was guided chiefly by a desire to re-establish his presidential authority rather than by fervent opposition to a costly, fifth nuclear aircraft carrier.

"The president was looking for a peg to hang his veto on," one usually pro-Carter Democrat on the House Armed Services committee told us. "The carrier was his best bet."

But asserting presidential mastery and muscling Congress to sustain his veto after Labor Day, Carter is following public-relations adviser Gerald Rafshoon's get-tough formula. But in getting tough, he has risked losing major defense items obtained as trade-offs for the carrier in the intricate congressional log-rolling process.

None of the president's military advisers, uniformed or civilian, recommended the veto. There was mirthless laughter in the Pentagon when Carter told his press conference that he had "not had a single adviser who told me that we ought to go ahead with the nuclear aircraft carrier."

By law, the president's "principal naval adviser" is the chief of naval operations. Both the present chief, Adm. Thomas B. Hayward, and Adm. James L. Holloway III, who was replaced by Hayward July 1, have been strong proponents of the nuclear carrier.

Apart from the president himself, the moving force behind the veto was White House political adviser Hamilton Jordan, along with Rafshoon—not Secretary of Defense Harold Brown.

That came out in Brown's private talks with congressional military specialists, sounding out sentiment before the veto. The defense secretary made clear he had not proposed such drastic action, but that Carter seemed determined on it.

Talking to one friendly congressman, Brown showed this was politics, not defense. He speculated whether the best way to defend the veto would be opposition to the nuclear carrier or opposition to cuts in research and development and in readiness funds. As it turned out, Carter used both arguments, emphasizing the carrier.

Politics showed itself when one congressman warned Rafshoon the veto might make the president look anti-defense. Rafshoon's answer revealed how clearly the political tactics had been developed: Don't worry; the president can deal with that in the veto message. Deal with it he did by calling Congress anti-defense.

Ignored by Rafshoon and Jordan was the effect of the veto on the delicate log-rolling needed to produce a defense bill. Although the veto probably will be sustained, writing a new defense bill will be no easy task.

A case in point is liberal Democratic Sen. Gary Hart of Colorado, an Armed Services Committee member highly skeptical of big nuclear carriers. Hart agreed in a trade-off with conservative Republican Sen. Jesse Helms of North Carolina to support the nuclear carriers in return for Helms' backing of a new generation of small carriers favored by Hart.

One day after the veto, Hart wrote all senators urging an override of the veto with this argument: "The Congress produced a carefully crafted, logical and progressive conceptual approach to the question of the future of the carrier. The veto destroys this achievement and puts us back on the treadmill of the carrier question—with no solution in sight."

Routine trade-offs, spun into a seamless web, are at the heart of the congressional defense-budget process. That explains why vetoing a major defense bill is so rare that it has not been tried in this century. In his dramatic effort to show himself a commander-in-chief who truly commands, the president ignored that record for the gamble of large political gain.

For now, however, the president is less concerned with putting the defense bill back together than with mobilizing public opinion behind his argument that he, not Congress, is the staunch fighter for national defense. That was the message Aug. 23 when 200 prominent businessmen were summoned to the White House for enlistment in the anti-carrier crusade led by Vice President Walter Mondale.

Results were mixed. One executive was puzzled that the White House expected him to accept Mondale's word on faith against that of Sen. John Stennis (D-Miss.), veteran chairman of the Senate Armed Services committee. "They're crazy if they think I'm going to tell Sen. Stennis he's wrong," the executive told us.

No such national campaign was started against the carrier until *after* the defense bill was sent to the Oval Office. That only reinforces suspicions about the president's veto motives.

---

[From the Dallas Morning News, Aug. 23, 1978]

NO TIME FOR IMAGERY

(By Joe Dealey, Jr.)

If President Carter's veto last week of that $37 billion military weapons authorization bill was an attempt to enhance his public image by standing firm against a free-spending Congress, Gerald Rafshoon's tenure at the White House may rival that of Bert Lance's for brevity.

Carter invoked the presidential veto for the fifth time since taking office 20 months ago, ostensibly because the military weapons authorization bill included $2 billion for construction of a nuclear-powered aircraft carrier.

Sorry, Mr. President. That excuse, if you'll pardon the expression, won't float.

In the first place, the Navy didn't request funding for the additional aircraft carrier. The aircraft carrier was added by the appropriations committee for inclusion in the fiscal 1979 budget, a full year before the Navy was expected to seek such funds.

Carter's veto of the military weapons authorization bill was another ill-timed slap at the Congress. Regrettably, in this instance, the White House blow has fallen on a Navy Department that has image problems of its own.

Last week's presidential veto, which all but laid the blame for the military weapons authorization bill's failure to get a presidential signature on an aircraft carrier, was patently unfair to the Navy.

Last week, one unidentified Department of Defense official described the aircraft carrier as a "glamour" item included in the military weapons authorization bill at the expense of U.S. military readiness.

Chances are the official was a booster for the North Atlantic Treaty Organization, which accounts for his attitude. Had he been in the Navy, he would know just how vital the aircraft carrier is to the Navy.

The NATO ministers, who met in Washington earlier this year, were assured of continued U.S. support, both economically and militarily. Chances are that the bulk of the funds pared from the military weapons authorization bill were to have gone to North Atlantic alliance members.

Instead, the appropriations committee cut these items out, substituted an aircraft carrier the Navy itself didn't want, at least not yet, sent it to Congress for approval, which may, in part, account for NATO's supreme commander's, Gen. Alexander Haig, reluctance to discuss the President's veto.

"This is not a question of money," Carter told reporters at his press conference.

"The Congress reduced only slightly the amount of money I recommended. It's a question of how that money is going to be spent."

Agreed, Mr. President. The problem was that the aircraft carrier represented money destined for NATO, money Congress wanted to enhance U.S. military readiness.

By vetoing a military weapons authorization bill many members of Congress felt reflected the mood of the nation toward military spending—or lack thereof—the President hasn't exactly enhanced his public or congressional image.

Furthermore, by laying the bill's failure at the Navy's doorstep, Carter has served only to further undermine the entire military establishment's attitude toward him as commander in chief.

The Navy, in this instance, will shoulder the blame for the failing of this military weapons authorization bill, but what of the other uniformed services that must go without much-needed funding because the President chose this particular time, indeed this altogether critical military weapons authorization bill, to show how tough he was in the face of a free-spending Democratic Congress?

Secretary of the Navy Graham Claytor, a former Navy veteran like the President, is understandably concerned about the Navy's future role in the event of Soviet intervention on the high seas.

Like the President, Claytor doesn't believe another nuclear-powered aircraft carrier is needed. What is needed, according to Claytor, is for the Navy "to start building another carrier of some kind in the near future."

Critics charge that aircraft carriers are vulnerable. Certainly they are, but only as vulnerable as other surface-going vessels.

To be sure, aircraft carriers are a more desirable military target than, say, a guided missile cruiser, but an aircraft carrier carries a substantial part of its defenses along with it in the form of its aircraft.

Adding to the carrier's survivability are the incoropration of extensive damage control features, hardening if you will, in addition to electronic countermeasure technology to guard and defend against surface-to-surface attack.

In time, the Navy will be presenting a request to Congress to fund aircraft-carrying surface vessels. It's hoped that last week's presidential veto didn't scuttle the Navy's chances for getting an admittedly "glamorous" piece of equipment, but one that is sorely needed if the Navy is to remain militarily viable.●

---

## A TRIBUTE TO G. JOSEPH MINETTI

● Mr. CANNON. Mr. President, I rise to pay tribute to G. Joseph Minetti who will retire next week as a member of the Civil Aeronautics Board. I want to emphasize that this is not a pro forma tribute. It is based upon my deep personal respect for an exceptionally dedicated and talented public servant.

When Joe Minetti retires, he will have been a Federal regulatory commissioner continuously for a total of 24 years and 3 days. This is longer, I believe, than any other commissioner before him. It is, however, not an endurance record which motivates this tribute, but a history of the highest quality public service. The "new" mood in Government for less regulation and more competition in regulated industries is old hat to Joe Minetti. For years he was the lone voice of dissent against the restrictive policies of an entrenched protective CAB. I am very disappointed that he will not be able to remain on the Board to participate in the development of a truly competitive air transportation system which he has advocated for so long.

Joe Minetti's aviation experience extends back over 30 years. In 1947, he was appointed a Commissioner of the Department of Marine and Aviation for the city of New York. From there he moved on to become the Commissioner of the Board of Transportation of New York City. Then in 1954, President Eisenhower nominated him to become a member of the Federal Maritime Board; 2 years later he was nominated to the Civil Aeronautics Board. It should go without saying that each time he was unanimously confirmed by the Senate. Joe won the firm support of each President under whom he served. In 1962, he was renominated by President Kennedy. In 1967, President Johnson renominated him. And once again in 1973, he was appointed for another term by President Nixon.

As if it were not enough that Joe Minetti has such a long and distinguished record, he is also one of the kindest and most dignified individuals I have ever known either inside or outside of the Government.●

## U.S. GRAIN EXPORTS AND THE SOVIET UNION

● Mr. DOLE. Mr. President, U.S. estimates of the Soviet 1978 grain crop continue to increase indicating the Russians may import less U.S. grain next year. This situation again raises the issue of the importance of the exports to U.S. farmers.

The Agriculture Department this month raised its estimate of the Russian grain crop to 220 million metric tons and said the figure could even surpass the record 224 million metric tons produced in 1976.

A big Soviet harvest raises the possibility the Russians will buy considerably less United States grain in the 12 months starting October 1 than the 15 million metric tons they are expected to buy in the current year. Before the latest crop estimate, some analysts had been forecasting the Soviets would take 8 to 10 million metric tons of U.S. grain in the next year.

Other analysts say any reduction from this figure would be moderate, despite an abundant Soviet crop, because Russian grain stocks are low and some of this year's harvest would be used to replenish them.

### CURRENT 5-YEAR AGREEMENT

A current 5-year agreement requires the Soviet Union to purchase 6 to 8 million metric tons of grain annually from the United States.

Under the agreement, the Russians so far this year have bought about 14 million metric tons of wheat and feed grains, valued at more than $1 billion. Most of the wheat sold to the Russians during the current 1977–78 crop year has been delivered, but a significant portion of the feed grains sold have not been shipped.

### AGRICULTURAL EXPORTS

Our agricultural exports of $24 billion in 1977 generated net earnings to the United States of almost $10.5 billion last year. This year, farm exports will contribute an estimated $12 billion to our balance of payments deficit. That record is unmatched in any other segment of our economy.

Agricultural exports are very valuable to the farmers of this Nation. Our farmers depend on exports to keep production high in the United States and also to keep market prices strong. Any reductions in the export market would mean a severe loss of farm income to U.S. farmers.

Everyone recognizes the importance of grain sales both to the U.S.S.R. and to our own economy and that we should continue to encourage the Soviets to satisfy their import needs with U.S. gains, soybeans and other agricultural products.

American grain exports to Russia bring us into close contact with the Russian grain harvest, the Russian economy and to some extent the Russian people. Many Americans have been upset over recent developments in the Soviet Union which they feel were violations of human rights and the Helsinki agreement.

### POLITICAL TRIALS

President Carter, in reprisal for the political trials in the Soviet Union, has decided to impose new controls on sales of American technology to Russia and to cancel the sale of a Sperry UNIVAC computer system to Tass, the Soviet news agency.

Some Members of Congress, myself included, have called for stronger measures. Some have suggested cancellation of the sale of a modern plant for producing oil well drilling bits.

Also, some officials say they had reports that Zbigniew Brzezinski, President Carter's national security adviser, was backing a proposal to use the administration's heaviest economic leverage against the Soviets—the 1975 grain agreement.

There are voices being heard on both sides of the issue as to whether food should be used as a weapon to express our displeasure over human rights violations and as a weapon to help force some compliance.

### GRAIN EXPORTS

Certainly the President must look at all the "options" including grain sales, but I do not believe grain exports to the Soviet Union should be embargoed unless there is an international situation severe enough to warrant a total embargo of all exports to and imports from the Soviet Union.

Only if all exports and imports of all economic goods, cultural and scientific exchanges, and any other transfer of goods or special knowledge between the two countries would be embargoed should grain and other agricultural products be included.

### FARMERS WILL SHARE SACRIFICES

Farmers across this country have always been willing to bear their fair share of any personal or economic sacrifices needed for necessary national strategies. They will always be willing to do so in the future.

Unfortunately, farmers have been singled out in the past to bear the burden of international policies while other American producers have not. A policy of this type is not fair or equitable. I shall continue to oppose such selective embargoes that hurt farmers and that use food as the only weapon in international strategies.

It is my view that there are other more effective ways that the United States can tell the Soviets that we deplore the continued mistreatment of Soviet citizens than by cutting or suspending grain exports through an embargo. Surely, the SALT talks and scientific exchanges are things the Soviets value highly. I have supported temporary "suspensions" in these areas.

### GRAIN EXPORT EMBARGO NOT EFFECTIVE

A grain export embargo by itself would not be effective. The most immediate beneficiaries of a restriction on U.S. grain sales would be Australia, Canada, and other large grain-producing countries who would increase their sale of grain to Russia.

The world grain market seems to be peculiarly unsuited to embargoes because less than one-eighth of the grain produced in the world is traded internationally as compared with more than half of all the oil produced. Grain-producing countries have not established a cartel similar to the major oil-experting countries.

Mr. President, in conclusion, I do not believe grain exports to the Soviet Union should be embargoed unless there is an international situation severe enough to warrant a total embargo of all exports to and of all imports from the Soviet Union. I shall continue to oppose any selective embargo that uses food as the only weapon in international strategies.●

## A NEW LOOK IN AGING

● Mr. CHURCH. Mr. President, at hearings by the Senate Committee on Aging this summer dealing with "Retirement Work, and Lifelong Learning," several expert witnesses challenged wastefulness of the talents and experience of older Americans.

It is not only a matter of mandatory retirement, an institution now undergoing exhaustive scrutiny and probably on the verge of total abolition.

It is also a matter of attitudes toward aging during the work career. What do industry and business and the service sector do to keep job skills from becoming obsolete? How flexible are personnel managers in providing new work opportunities as employee interests or work capabilities change? And how do we measure such capabilities at all, in the face of widespread negative attitudes toward aging?

Such questions will receive careful attention in continuing committee studies and hearings on retirement, employment, and lifelong education. We will also heed the writings of authors such as Dr. Harvey Wheeler, chairman of the Institute for Higher Studies in Santa Barbara, who in the current issue of the American Association of Retired Persons' Modern Maturity, discusses changes which are on the way along with the virtual end of mandatory retirement in this country.

I ask to have this article printed in the RECORD.

The article follows:

AGING—THE NEW LOOK: THE VIRTUAL END OF MANDATORY RETIREMENT PRESAGES RADICAL CHANGES IN AMERICA'S OLDER POPULATION

(By Harvey Wheeler)

Few things are changing as fast today as the look of aging in the United States.

New legal prohibitions against forced retirement at 65—or at any age in some cases—are opening up new floodgates of change.

But while we see what's happening, we can't predict the outcome. America's older population has become democratized by its sheer numbers. I call it "the rise of elderhood."

That democratization is the secret of much that is new and unpredictable about today's society. One reason it is unpredictable is that we don't know enough about elderhood. Most of the conventional maxims about the elderly have been created by people who were younger; society could ignore what it's really like to be old so long as elders were politically unimportant.

Old people are—or have been—invisible. That has made it easy to fasten onto them the stereotypes of decrepitude devised by others. And that is why any rigid policy of forced retirement at a fixed age rankles.

Large employers don't like flexible retirement policies because they require discrimination according to merit and productivity. That means traeting individuals on their own merits, which is what elders now demand. Such treatment is not as hard as employers claim.

For years, employers have been able to hire people over 65 on an annual contractual basis, and they have done so on selected bases. But under the umbrella of forced retirement, such discriminations permit deals highly advantageous to the corporation.

The corporate whiplash engenders poignant complaints about "being thrown on the bone pile." Suddenly, one is no longer an individual, but only an invisible member of an outcast class of elders.

What about some of the other stereotypes?

Younger people commonly think elders dwell heavily on the subject of death. Elders do think about death; everybody does. But it is different.

An elder calculates, idly, his remaining actuarial allotment, but there is also optimistic awareness of the staying power of people like Pablo Cassals, Bertrand Russell and Piccaso; everyone expects to receive similar exceptional increments. A person of 60 knows that insurance companies will gamble on only another 16 years but the consolation is that it could be another 30.

We all maintain a certain psychic continuity throughout our lives and inside each one of us there dwells much the same person that has been there since youth.

Psychologically, elders do not see themselves as aged so long as they are vigorous. They identify with people of similar vigor, not with people of a similar chronological age.

My good and indefatigable friend Ernest Bader at 85 picked me up at London's Heathrow Airport, carried my two heavy bags to his Rover, and then proceeded to exhaust me with a breakfast-to-midnight schedule for the next three days.

To elders, very few people die of "old age," but of something specific like cancer, or pneumonia, or an automobile accident, or a stroke. These accidents or diseases might conceivably have been prevented or cured. They could have happened to a person of any age.

We all suffer from progeria—too rapid aging—and the disease is progressive. But death is never really imminent or inevitable in a sense that is special to elders. It always was inevitable since one first became aware of it; it is merely a little more inevitable. So a sense of impending death is not something that haunts elders as a class.

Emotionally, we are all in the same boat and always have been.

The terrified whimper that his father's death evoked from Dylan Thomas—"Go not willingly, but kicking and screaming"—is a young man's protest. The elderly are more in tune with the great Spanish philosopher Miguel de Unamuno: Death is an absurdity, an insult, a kind of biological mistake which, although for the time being is an unavoidable fate, should never be considered a just one.

All this needs to be brought into the open now because, barring the accidents that can happen at any age, most people expect to become elderly one day and already, from sheer political clout, elders must be taken into consideration.

One of the things they plead—demand may be too strong as yet—is to be considered as persons.

One reason this plea now carries considerable force is that for the first time we are on the verge of being able to make such judgments through advances in social gerontology. That is why Robert Butler, director of the National Institute of Aging, favors a flexible retirement policy. And to administer it, he promises Congress that his institute will shortly have a battery of tests to make it possible for employers to abandon chronological age as a determinant of retirement policy.

Once these more accurate measures of health, well-being, and competency are available, policies based on chronological age alone might even be violations of the equal protection clause of the United States Constitution.

Alex Comfort, one of the world's leading gerontologists, writes that old age is a "trip" society lays on the old, telling them that at a given point, 65, widowhood, or some other arbitrary point, they are henceforth to become drab, spiritless, weak, sexless, hopeless, senile, childlike, dependent, useless, incompetent, and on and on, even though the day before they may have held the highest power and esteem among their peers.

This condition has never been the lot of the elderly rich. They have always had the option of retirement at birth, like Doris Duke, or lifelong functioning, like Nelson Rockefeller.

The democratization of longevity has outmoded the stages of adulthood with which all previous people have lived and this is the bedrock foundation on which future policies involving elderhood will have to rest.

The central issue can be stated briefly: The three stages of adulthood—socialization/training, work/parenting and retirement/leisure—no longer follow precise chronological age. Within Shakespeare's seven stages of man, episodic life-stages are appearing. Education, leisure, family-building and socialization are now occurring in repetitive sequences throughout adult life. Individuals may have several careers, several matriculations, more than one family, several sabbaticals and even several status situations, as their chronological time clocks run their courses.

Our policies relating to schools, the family, Social Security and mental health all require adjustment so as to jibe with the needs of our new, rotating life-stages that are beginning to acquire special new rites of passage of their own.

Retirement is merely one of the first of these traditional rites to undergo legislative revision.

Such stage adjustment problems will have to be worked out over a period of years and with flexible approaches. In general, careers should follow each other on the principle of progressing from routine to prudence. Lifelong education should coincide roughly with this progression: the early mastery of tool competencies, whether the tools are intellectual or craft, and provision after that for career interruptions to furnish advanced education. Each additional schooling component would be designed to match accumulating experience, growing competency and maturing wisdom, with provision for preparation to adopt alternative careers at each stage.

In general, every maturing person should be able to look forward to an ultimate role that utilizes the enlarged prudential capacities of elders. From the start, all educational stages should be thought of as stage-specific preparations for this ultimate goal; not merely as training for an immediate job.

It is often said that as people get older they fall into ruts. This may be merely another way of saying that they become experts. It can also be another way of saying that everybody requires periodic refresher courses, just as do physicians and accountants.

The positive side of this is that as people age they usually acquire a greater capacity for taking into account the likely long run implications and unanticipated side effects of contemplated tasks. This talent is really what we mean when we talk of the wisdom of elders.

Like all behavioral traits, this one too is learned by experience, but the optimum way to insure getting it is by supplementing the natural benefits of experience with a complementary educational program.

Our nation is now at the beginning of a period in which all age-related problems will become aggravated by the mere fact that the post-World War I baby boom is just now entering elderhood. After it dies out, these problems may mitigate until about 2010, when the even larger post-World War II baby boom will enter elderhood.

We must solve our present problems, not only for their own sake, but also in preparation for the more serious ones that are on their way. Of course, the situation may *not* lessen between now and 2010: If the cardiac-cancer-renal killers were to be eliminated, it is estimated that by 2000 the gross number of elders might be as much as 75 percent more than we have today. What are some of the potential developments?

The first concerns ageism as a form of class consciousness.

Class consciousness is in part a function of quantity plus density. Social gerontologists have been expecting elders to exhibit signs of class consciousness for several years. That time may be now. Age-oriented associations are growing rapidly.

As the average educational level of elders rises during the next few years, they will become not only more active politically, but also more liberal ideologically. This trend has aready started.

The polls of the 1960s and 1970s provided the basis for generalizations that are now being abandoned. We now discard theories that elders, by their nature, "disengage" from society and life, and grow more conservative with age. That may have been true of our bygone elders, but it is not true of people now becoming elders.

Specialists mistakenly assumed that the elders of all times would be like those who had matured during the 1920s. More recent value-free tests have shown all this to be false.

The aging process does not produce political conservatism; it merely tends to confirm what was believed all along. People who have always been conservative continue that way, and so do those who have always been liberal.

Elders can *appear* to become more and more conservative with age if the society itself is becoming more and more liberal, as has been the case until recent times. However, if our society as a whole should continue along a conservative trajectory for some years more, those now advancing to-

ward elderhood would naturally turn out to occupy roles in the vanguard of liberalism. Critics would doubtless call them "dated" but, in a society with nearly one-third of the voters over 65, who is dated and who isn't can be resolved by ballot rather than epithet.

The class dynamics of elderhood is another matter of great moment. The sociologist Irving Horowitz argued in the 1960s that youth then constituted a social class. Something similar may characterize the elders of the 1980s. Economically, elders tend to occupy a lower-middle-class status.

According to Dr. Butler of NIA, half of the families headed by an older person have incomes of little more than $8,000 per year, compared with over $15,000 for younger family heads. The median income of older persons living alone is about $3,500, compared with $6,500 for younger unrelated individuals. One-sixth of all elders live in households with incomes below the official poverty threshold.

Attitudes do not always correlate with incomes; England has its well-known class of Tory paupers. No social theorist has ever been able to figure out what it is that at special times in history ignites that spark of class consciousness that mobilizes a defined social stratum into a militant political force.

However, since the mid-16th century, the lower middle classes have been at the forefront of radical movements of both left and right. The social scientist Hans Speier concluded that after a drastic collapse, they tended to become reactionary, as in Nazi Germany. But his studies of other periods indicated that a lower middle class that had experienced a lifetime of gradual improvement, followed by a period of gradual decline, would tend to favor left-looking reformist policies.

At the present time, it is precisely the latter condition that characterizes elders as a class. If Speier is right, our rising elders will have some political surprises in store for America.

Consider the fact that technological obsolescence has an especially cruel impact on elders. The constant improvement of old technologies and the substitution of increasingly sophisticated computer-assisted machines (both office and factory) for more primitive equipment diminishes the value of all workers, but that of older workers most acutely. Seniority is of little help; old jobs are simply phased out.

This is a form of inflation that depreciates skills the way monetary inflation depreciates annuities. Ravaged by these dual inflationary forces, elders have nowhere else to turn but politics.

Very few of the foregoing issues have arisen because of today's economic problems. The plight of elders has been described in other terms in part to counter a common assumption: that age-related politics has surged into prominence because economic difficulties bear down heavily on the elderly.

It's true; they do. But as we have seen, inflation and the nation's business slowdown are by no means solely responsible for the rise of the elders. Those conditions merely amplify the force of a large number of recent age-related developments. Before the century is out, they will alter irrevocably the shape of our society.●

## THE FEDERAL PRISON SYSTEM

● Mr. HOLLINGS. Mr. President, the Appropriations Subcommittee on the Departments of State, Justice, Commerce, the Judiciary and related agencies has focused considerable attention on the Federal prison system. Over the last 2 years we have authorized additional capacity of 4,566 because of the 25-percent overcrowding that exists in the Federal correctional facilities. We have also turned down requests for new close security facilities that recent information indicates are not needed, in favor of additional minimum security facilities and camps.

This year we provided for two new minimum security facilities at former military installations in Texas and California. Thus, for basically the cost of a fence, we will put in place beds for 750 prisoners and avoid the land acquisition and construction costs of establishing new facilities. Just as importantly we have eased the impact on the communities faced with closure of military installations.

This year's budget also marks a significant departure in the number of prisoners serving their time in community treatment centers, that are commonly called "halfway houses." Two years ago the appropriation only provided for a daily average of 2,182 persons serving their time in the community; in fiscal 1979 we are budgeting for an average of 3,156. This is a 45-percent increase.

We are justifiably proud of these efforts to improve the welfare and program of the Federal prisoners. However, these advances have encountered unexplainable criticism from various groups who apparently believe that we should set the prisoners free. By some strange and convoluted reasoning these groups argue that stopping construction and overpopulating the present facilities even further, the judges will stop sending people to prisons. That is ridiculous.

While we support the alternatives to incarceration for those whose crimes and rehabilitation warrant less than a prison sentence, we certainly are mindful of the continuing need to imprison the terrorists, drug traffickers, murderers, rapists, and other perpetrators of violent crimes. As long as I have a say in these matters there will be a more balanced view than any head-in-the-sand ideas.

Mr. President, unfortunately, most of the mail has been from the antiprison crowd. Thus it was refreshing to receive a letter from Joseph S. Bair who is presently an inmate at the Chillicothe, Ohio, correctional institution. This is a State institution so Mr. Bair has no personal advantage in writing of his admiration of Norman Carlson, the director, and the program of the Bureau of Prisons. I fully share Mr. Bair's appreciation of the outstanding service of Mr. Carlson and his associates and ask that Mr. Bair's letter be printed in the RECORD so that my colleagues and other interested persons can also have the benefit of his inside views.

The letter follows:

CHILLICOTHE CORRECTIONAL INSTITUTE,
*Chillicothe, Ohio, August 8, 1978.*

Hon. ERNEST F. HOLLINGS,
*U.S. Senator, Senate Office Building, Washington, D.C.*

DEAR SENATOR HOLLINGS: This letter, I surmise, will almost certainly end up being quite unlike the overwhelming majority of those received by you, simply because it seeks no favor of any sort, neither does it set forth some complaint, grievance or grudge, real or imaginary.

Additionally, I feel equally certain that it will be among the relative few written to express sincere, very real thanks and enthusiastic support for the careful consideration you have given in a most difficult matter, as well as the determinations that you have made as to your stance regarding that matter.

My appreciative approval is in regard to your consideration of the needs of and proposals advanced of late by the Honorable Norman A. Carlson, Director of the United States Bureau of Prisons; and, your courageous support of the Director in all.

On the one hand it is crystal clear that you and others in the Congress have been subjected to considerable pressure, coming as it does from people of a variety of persuasions and for various reasons, to deny the Bureau necessary funds with which to operate, to build, to staff and to renovate the federal penal system which, like those of numerous states, has been plagued by a seemingly endless series of problems, judicial and otherwise. This pressure comes from very small organizations but ones that are extremely active, adamant, persistent and ultradetermined.

On the other hand, it is clear no less that Director Carlson has very real needs and that they are as persistent as they are valid; and, if the United States Bureau of Prisons is to continue to operate and continue to deal with the ever-changing, ever-mounting problems that arise, he must have that sort of help that only the Congress can provide.

I am very visibly impressed by the goals, objectives and determinations of this very competent, very dedicated, very sincere and totally concerned man. I have no doubt whatsoever that my view is shared by many in the nation's capitol; but, venture to say that this is relatively very rare, coming as it does from a man who is himself confined to prison!

I am now and long have been confined to serve consecutively-imposed federal and Ohio terms for interstate transportation of stolen property and felony-fraud respectively, having served the firstly-imposed sentence in Leavenworth Penitentiary and thereupon, was remitted directly here to undertake the consecutively-imposed state sentence. I have been under felony sentence, initially in the 80-year-old maximum security federal prison and thereupon in this, a 40-year-old medium-security state prison for well over seven calendar years to date. Of late, I have been accorded parole. Thus, and for the further reason that I am not in federal custody at all, it cannot be said that my support of Mr. Carlson is motivated by any attempt to curry favor with him or the Bureau.

In the time of my confinement, consisting as it does of well over 2,500 long days and over 60,000 long hours of penal servitude, I have had ample opportunity to view prisons, prisoners, prison-keepers. And, I have had considerable exposure in a variety of ways, to both those inside of prison and without who are involved with the so-called "prison-reform" movement and who purport to be concerned over what they delineate as "prisoners' rights".

In recent years, and for a variety of reasons, a clearly erroneous picture of the penal scenario has developed, grounded in equal parts upon myth, superstitution, emotion, rhetoric and frankly, bald-faced lies and self-serving statements purported to be facts but which in reality are no such thing.

Penal authorities have been attacked, vilified, cursed, pictured as incompetents, sadists and worse. The endlessly vicious attacks come from a minute handful of prisoners; and, from an equally tiny handful of free people. Some are cranks; others are violence-inclined radicals, revolutionaries, anarchists; others are simply grossly naive do-gooders who seemingly have a huge affinity for obscure minorities and somewhat masochistically view prisoners as some sort of victims or sort of overgrown wayward youths.

I have, during the time of my confinement, paid exceedingly close attention to the so-called "prisoners' rights" movement which includes a variety of people with an even wider variety of backgrounds and an admixture of organizations—some religious, others pseudo-religious, some centered upon mental health, and so forth. Many of these are officed, understandably, in Washington, D.C. and/or New York City; and, some have branch offices or sub-divisions of the parent organizations in the major states.

While at first blush these organizations seem concerned as to reform and betterment of penal conditions, in the final analysis they are absolutely no such a thing. I think primarily and at this moment of a decidedly peculiar group, the National Moratorium on Prison Construction with sort of vague Unitarian Church affiliation; and, the National Prison Project which is an adjunct of the American Civil Liberties Union. Both are found in Washington and both are ever-eager to leap into penal problems (and, if none are at hand, they are shown, on the record, to be more than happy to create some, much to the chagrin of penal authorities, prisoners themselves, and others, too).

The total lack of moral virtue and honesty clearly visible in these groups (and others, too, including those found in Ohio, Illinois, California, New York and elsewhere) is made unequivocally clear to all save the most myopic of persons. While they are busily complained about allegedly "unconstitutional" in-prison conditions (to them, the slightest defect is per se unconstitutional) and chief among those conditions endlessly railed against being overcrowdedness, at the self-same time they are very aggressively opposing construction of necessary new institutions, the revamping, remodelling and improvement of existing ones, and so forth. In the final analysis, it is obvious even to the average prisoner, that these organizations firstly do not represent the true and best interests of prisoners any more than they do those of prison-keepers or the general public. Secondly, knowing prisoners are very well aware that the stated goals and objectives of these groups are on one hand 100% unrealistic; while on the other hand, these groups and individuals frequently propose, affirmatively or negatively as case may be, things that even hardened felons regard as absurd, outrageous, dangerous and view with grave apprehension.

But last month, the National Moratorium on Prison Construction stated with typical (and, I respectfully submit, shocking and frightening) ignorance that in their view, no more than 3,000–6,000 of the 280,000-odd confined felony prisoners in America need be confined; that the remaining 97½–98½ percent can safely be released and should in fact be released one way or another! No factual basis for this is asserted; no reasons whatsoever accompany this statement, nor was there any cognizance whatsoever of the simple fact that be all that as it may, penal authorities state or federal have no power whatsoever to release any of these prisoners themselves, for such may be done only by sentencing judges or parole agencies! Accompanying this is the equally ridiculous statement to the effect that those in prison are "political prisoners" and are there because they are (a) poor; (b) minority members and/or (c) at odds with some unspecified part of the government, federal or state, executive, administrative, judicial, legislative, etc.

The patent absurdity of statements thusly (and thinking back of it) is exceeded only by the huge and terrible danger were such to have occur, and such statements reflect mental (and moral) myopia possessed by those who make them.

These groups are rallying support for what has become the strange focal point of their decidedly sick thinking. Opposing by every means conceivable any and all construction of new prisons, improvements and enlargements of existing ones, they have mounted a campaign in regard to the proposed Federal prison at Lake Placid, New York.

There, the careful, forward-looking and budget-minded Director has determined to take the excellent advantage of construction of a Winter Olympic headquarters which, for a minimal amount of money can be converted into a new, modern, excellently equipped and staffed penal institution of an ideal size. Further, the location of it means that it will be relatively close to an area which presently has no federal facility of any sort. Finally, it is located in an area which, while less than impoverished, is devoid of industry, short on employment and one that will itself benefit a hundred times more than it can conceivably suffer from location of a permanent penal facility there.

Literally every single, solitary prisoner among the 1,700 here and the 2,000-odd at Leavenworth that I have come in contact with; literally every single one of those that I correspond with, in New York, California, Illinois, Florida and in between regards the Director's plans thusly as innately wise, considerate, humane and knowing. Penal employees high and low regard this as a true stroke of genius and more. No single, solitary critical word have I read or heard from any prisoner or penal employee; and in truth, many is the envious remarks or written word that has come my way from inmates and employees who would be privileged in the first instance to be confined there; and in the second, to be employed there.

Despite a stated concern for rehabilitation, improved prison conditions and so forth, it is clear to those within prison (and hopefully, to those without as well) that such groups as the National Moratorium on Prison Construction, the National Prison Project, the National Lawyers Guild, various pseudo- or quasi-religious organizations with similar interests, are totally disinterested in true reform, meaningful rehabilitation, and primary concern with the public good.

To like effect, it is equally clear to those confined that those who are most concerned and most capable, too, are those whose profession penology is. Despite penal problems existing in various jurisdictions, prisoners themselves unhesitatingly join hands with concerned and responsible members of the three branches of Government and private citizens, too, who know the true facts of life and do not hesitate to state them, and together both approve and applaud such very keen, capable and concerned professionals in the penal field as Mr. Carlson in the Federal bailiwick, Ohio's own Rehabilitation & Correction Director, Honorable George F. Denton and others elsewhere who are well educated, formidably experienced, and who possess and endlessly show a superb sense of balance in relating to and dealing with prison-type problems.

I most respectfully submit to you, and only wish I could somehow make my thoughts (which I hasten to assure you, leastwise in this respect) are those of nearly all confined to prison) fully known to those in both houses of the United States Congress and those in the states' legislature in relation to the matters above. At the same time, I would implore those who may be inclined to think of these organizations as being ones that enjoy the approval and cooperation of those confined to prison to stop, think and thereupon realize that these are not appointed or endorsed spokesmen of those behind prison's proverbial bars, nor are their views, more times than not grounded upon and engrafted to alien and disturbing radical, semi-anarchistic, Marcusian, totalitarian views and philosophies, the views of those who they wrongly purport to represent and "protect".

In relatively short order I go forth from prison. This fact, plus the additional fact that I am not at all in Bureau of Prisons custody since remission from federal prison to here, a state prison, make clear that I have no interest whatsoever in speaking as I do. I have had the honor to speak, in the time of my confinement with numerous federal and state legislators, various executive and administrative officials, penologists, journalists; and, I have authored various articles myself and in collusion with other prisoners. I have had no qualms about stating truth and fact; and, most clearly, have suffered no consequence large or small for doing so. I only wish that at the time when problems, monetary and otherwise, commenced to develop in regard to the Bureau of Prisons, that I might have had the honor to speak a few words, lowly soul that I am, in support of the Bureau and its wise and knowing Director, Mr. Carlson and thereby, to make an unashamed showing of support by the very people who are affected by these matters.

I can but hope that you will feel free to utilize this humble letter in any and every manner conceivable in support of the Federal penal service, which is most clearly in excellent and capable hands, headed as it is by Mr. Carlson. In going forth from prison, I freely offer myself as a living witness, willing and able at any time to speak to such matters as these, and speak to them on the basis of that which the organizations above do not have at all: Several years of in-prison experience and endless observation.

Those in the various branches of government, those in the news media, too, have been shown a penal picture by a minute handful of ex-convicts and a variety of high-pressure "rights" organizations that is either totally false or monstrously distorted. From within prison I have attempted, in speaking with and corresponding with the high and the mighty; the meek and the low, to correct the numerous falsehoods, the gross distortions and to place in proper perspective the hugely exaggerated and magnified complaints of the insatiable few.

There are today confined to prison, federal and state, 280,000-odd out of perhaps 220,-000.000 people; and here in Ohio, but 13,000 of the 12,000.000 of this state's citizenry are confined felony prisoners. This minute minority consisting as it does of a small fraction of one percent of the populace, like many another minority, has no faith in, puts no trust in, and possesses no enthusiasm for the self-anointed "prisoners' rights" advocates who have commenced to tell us what our rights are, how we are purportedly being wronged and that these groups and individuals know what is necessary and best for us. There is a near-total lack of support for these organizations and individuals among the very people that they loudly claim to champion.

Rather, all knowing prisoners truly believe that penal authorities, with very rare few exceptions, well know what they are doing; and further, that many of the problems existing simply are not the fault at all of penal authorities.

In leaving prison directly, I propose to continue writing as I have for pubic consumption and speaking to like effect, and as has aways been the case, declining any and all reward, compensation, gratuity, as a matter of principle. I freely proffer my testimony and am pleased to submit to questioning, in person or in writing, in regard to imprisonment per se, the problems of penal administrators, budgetary and otherwise, in support of the United States Bureau of Prisons and its excellent administration; of the Ohio Department of Rehabilitation and Correction and its, too, as well as those of numerous other states.

I beg your indulgence, in closing, for this poorly-typed letter, sir, prepared as it is very late on a hot, humid summer's night and at the end of an exceedingly long day. I take the

liberty, with your further indulgence, of providing copies of this poor letter to Senator Biden, Representative Danielson, Representative Stark, Representative Tom Railsback of Illinois (with whom I have been honored to speak in prison heretofore, among many others); and, to those concerned and competent penal administrators in charge of the Federal and Ohio penal systems.

Very respectfully yours,

JOSEPH S. BAIR.●

## ADDRESS BY SENATOR CURTIS BEFORE HUMAN RIGHTS ORGANIZATION

● Mr. GRIFFIN. Mr. President, recently the distinguished senior Senator from Nebraska (Mr. CURTIS) visited Kalamazoo, Mich., to deliver an address before the National Committee for Human Rights and Fundamental Freedoms.

It was an excellent speech, which deserves the careful attention of many who were not privileged to be there. I ask that the text of his remarks be printed in the RECORD.

The remarks follow:

SPEECH OF SENATOR CARL T. CURTIS BEFORE THE NATIONAL COMMITTEE FOR HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS, KALAMAZOO, MICH., AUGUST 19, 1978

Mr. Chairman and Ladies and Gentlemen:

It is always a pleasure for Mrs. Curtis and me to visit the beautiful State of Michigan. We are delighted to be in the Congressional District of Congressman Garry Brown, who serves this area so well.

It has been my privilege to serve in the Senate for many years with Michigan's outstanding United States Senator, and my good friend, the Honorable Robert P. Griffin. He has a consistent record in favor of the defense of our country and those policies that protect the principles and freedoms that we hold dear. He is one of the stalwarts of the United States Senate.

I am delighted to be here today sharing with you my thoughts on human rights. It is a particular pleasure to discuss the subject with men and women like you who know the value of freedom, and who devote their time to fighting for fundamental rights for people living in slavery throughout the world.

Today there are millions of people throughout the world who enjoy none of the rights we consider basic. From the time they arise in the morning to the time they go to sleep, their lives are regimented by the State. They are told how and where to work and how to use their spare time; they are denied the free exercise of their religious beliefs, they are instructed on what political course to support, and how to bring up their children. Regardless how hard they work, their salary is established by the State and is almost certainly insufficient to meet their families' needs. Because of the effect of this on workers' morale, and consequently on production levels, the most common material goods are scarce, when available at all.

While there are many differences between the Democratic and Communist systems of government, there is one which I would like to mention as being particularly pertinent. The United States is based on the concept of human dignity, and from this flow the freedoms we enjoy. In practical Communism, man has no intrinsic dignity and therefore no claim to fundamental rights. From a moral point of view, it is a barbaric concept, and in regarding men as just so many soulless cogs in a machine, Communist governments give proof of being hopelessly and irredeemably barbaric. To the Soviet Union, Red China and their various satellites it is inconceivable that each and every man is intrinsically endowed with dignity, and that in all areas which do not infringe on the rights of others, he should have absolute jurisdiction over his actions. Of all the governments in the world, it is precisely these "people's democracies" that cannot accept that no man has an intrinsic right to impose his will on another, and that there is nothing which fundamentally places him above anyone else.

To contrast this with the freedom and material abundance we enjoy in the United States is sobering, and allows us to most vividly grasp the nightmarish element of a lifestyle which for millions is the only routine they have ever known. This contrast, moreover, should also be made to serve a useful purpose. It should make every one of us renew our commitment to help these millions obtain freedom. It is a commitment which cannot end until every political prisoner behind the Iron Curtain has been freed from the jails in which millions are now rotting to a slow death; until people can go to the church of their choice without fearing retaliation; until it is no longer necessary to circulate literature clandestinely simply because it is written in a language offensive to the ruling authorities; and until every person knows that his life is his own to plan, and not a tool for the State to impersonally dispose of.

To those of us vitally concerned about human rights, President Carter's verbal commitment to the issue from the beginning of his presidency has been heartening. And yet, many of us are growing increasingly disturbed at the apparent lack of action with which he has supported his words.

For example, it was good to hear the Administration defend Anatoly Scharansky in the course of his recent trial, and to see Vice President Mondale meeting personally with Mrs. Scharansky. Yet how much more meaningful it would have been if the United States had supported these symbolic acts with something more concrete. While the trial was in process, many felt that the SALT talks should have been halted, at least briefly, as a sign of U.S. disapproval. Despite American public opinion, however, Secretary of State Vance proceeded to meet with Soviet Foreign Minister Andrei Gromyko while the trial was taking place.

Similarly, Mr. Carter has used stirring words in describing the strong defense posture he supports for the United States. But when the words have been translated into action the picture to emerge has been very different. Let's look at some specifics.

In the development of nuclear weapons, there has been a pattern of unilateral concessions with several key weapon systems being either cancelled or delayed. The B–1 bomber was cancelled, for example; production of the neutron bomb has been deferred, perhaps indefinitely; there have been continuous delays in the production of the MX-missile, which we badly need to keep pace with the Soviet Union's sophisticated hardware. During the same period of time, by contrast, the Soviets have developed powerful sea and land based missiles and the Backfire bomber.

Having thus unilaterally undercut the U.S. bargaining position at the SALT talks, he has proceeded to accept an arms control accord which, if signed into a treaty some time in the future, will have dangerous implications for the whole free world. He also seeks approval for a Comprehensive Test Ban Treaty which, according to experts, will result in as much advantage for the Soviet Union as it will in disadvantage for the U.S.

Given this record, how can we expect the Soviet Union, Red China, or any other adversary to take seriously our commitment to defend our freedom, let alone the freedom of any threatened nation abroad? Unfortunately, still other items can be added to the list of steps President Carter has taken, or failed to take, which weaken the position of the free world further. He has proclaimed the need for a stronger Navy, yet he has drastically cut the Navy's shipbuilding plan, and vetoed the construction of a nuclear carrier which is needed to bolster the Navy's power projection capability. He has neglected the Reserve forces, which he promised to strengthen during the campaign. He is continuing his efforts to withdraw American troops from South Korea and Taiwan, increasing these countries' vulnerability to Soviet aggression.

Many of us are concerned, moreover, that the United States, while building a dismal record of improving its defense capability, is actively, if inadvertently, helping the Soviets build up theirs. There is growing alarm, which I share, about the sophisticated technology being sold to the U.S.S.R. by some sectors in our country. It has been in the President's hands to halt this, yet with the exception of the controversial TASS computer sale which the Administration cancelled, nothing has been done. Just recently, for example, the Administration gave its blessing to the sale of sophisticated oil drilling equipment to the Soviet Union. In wartime, needless to say, having an abundant energy supply is as crucial as any weapons system. Yet no thought was apparently given to the idea that this oil which the Soviets will drill with our aid may someday be used against us, or in the course of a campaign to subjugate another nation which now enjoys freedom.

As you can see from this brief rundown, Mr. Carter's verbal commitment to human rights has meant little when translated into concrete military action. The record of its implementation from a diplomatic point of view is just as much cause for concern.

Right now it is probably in our hands to determine if in the future Rhodesia will be a democracy, or if it is to become one large concentration camp, like Angola and Mozambique. On their own initiative the Rhodesians have formed a government which includes the most popular and respected Blacks in the country, and which, if supported, promises to bring prosperity and representative democracy to the country. Yet the U.S. is unwittingly destroying that promised stability through its insistence that Marxist factions be included in the government. These Communist groups, however, have made it clear that they want absolute control.

It is sad to see the manner in which U.S. foreign policy has changed over the years in this regard. Not too many years ago we stood for representative government, and opposed the advance of Communism as being inimical to the development of such representative government. Now in the name of democracy and human rights we are trying to force Communist participation on the unwilling citizens of Rhodesia. It is as if history had not taught us the lesson, and taught it to us repeatedly, that where there is communism there cannot be freedom.

I find something else disturbing in our human rights policy. Clearly, with regard to Communist countries, we have not backed our words with action of perceptible significance. At the same time, I see "human rights" being used as a club against other governments which are far milder than Communist regimes, but have nevertheless made themselves unpopular in some quarters.

In Asia we see it happening in connection with South Korea. There are many which describe its form of government in terms of nothing but the most absolute cruelty and oppression, and work ceaselessly for the U.S. to withdraw its support and material assistance to that nation. Of the brutal regime of North Korea, however, not a word is said.

Nowhere do we see this double-standard mentality as clearly as in our policy toward Latin America. Early in his presidency, Mr. Carter succeeded in alienating Brazil, Argentina and Uruguay. In all of these countries citizens are allowed to exercise a broad range of freedoms, and all have free enterprise systems which, unlike Communist systems, allow the individual to reach his maximum material and economic potential. Uruguay and Argentina, moreover, have both made clear their intention to restore a democratic form of government within a few years.

This policy stands in sharp contrast to the Administration's attitude toward Panama. That this country has a Marxist-oriented government seems to have disturbed no one in the Executive Branch, nor has the clear fact that this government is a dictatorship caused any concerns. Panama is rated by Freedom House as granting no more liberties to its citizens than Cuba, and from Panamanian exiles we know of many political prisoners and of untold cases of torture or harassment being applied to dissidents. Yet the question of sanctions never once entered into the government's deliberations. Instead, we rewarded Panama with our Canal, and with a promise of billions of dollars of aid.

Some might think that Cuba is the exception to this double standard, that in at least this one instance the Administration is applying pressure where it rightfully belongs. Unfortunately, that is not the case. True, President Carter has verbally denounced Castro and his African expansionism. But this means little when contrasted with the opening of liaison offices between Cuba and the United States for the first time in almost 20 years at the initiative of his own administration. During these last few weeks, in a period of ever-increasing Cuban involvement in African affairs, the U.S. Government further lifted its economic embargo on Cuba. How can this be said to be meaningful implementation of a human rights policy?

The "human rights" label is being used by some as a convenient weapon to attack yet other governments in Latin America. Recently the Senate voted to ban military aid to Nicaragua and Paraguay. This was a clear display of what many call "selective morality." Fourteen countries which rated lower than Nicaragua and Paraguay in the Freedom House "political rights" scale were voted *more* aid than that which had been requested for Nicaragua and Paraguay; similarly, five countries with the same rating were also voted more aid, without a voice being raised in dissent.

It is evident that the "human rights" tag can be a dangerous weapon, and I do not see that the Administration's emphasis on it has had any constructive results. Highly publicized accusations by Brezhnev nonewithstanding, our human rights policy has not intimidated the Soviet Union one iota. It has not led the Administration to propose a truly meaningful build-up of our defense capabilities, nor to staunchly oppose Communist build-up abroad. It has merely alienated and weakened a number of theretofore staunch allies in Latin America and elsewhere.

This situation will continue until our government adopts an equitable scale of values on which to gauge human freedoms and a policy of applying this scale in a consistent manner. Last year the Senate took a sound step in this direction in adopting certain objective standards. Unfortunately, the House failed to agree to the measure, and it was never signed into law. It remains, nevertheless, an encouraging start which all of us should build on.

The first principle embodied in the standards is the Jeffersonian principle of "consent of the governed" as the basis for a government's legitimacy. The second concept is the existence of a rule of law shielding the citizens against arbitrary government action or government by terror. Just as importantly, however, the standard includes a number of freedoms; not only freedom of speech and the press, but freedom of religion, the right to choose among educational systems and professional occupations, freedom of movement, freedom to obtain private property and to operate in the market freely, and the right to join private organizations of choice.

Were this standard to be adopted, some fairness would be introduced in our application of the U.S. human rights policy. Its inclusion of freedoms which do not relate to politics but which affect people's every day lives sharply brings out the difference between a Communist-style dictatorship and authoritarian governments which, while not being a democracy in the manner of our country, nevertheless allow citizens ample freedom in the matters most important to their everyday lives. This standard would indicate clearly which countries it is that our human rights guns should be aimed at. If we apply it, perhaps we will stop concentrating so much on the imperfections of anti-communist countries and remember that Communism is the real threat.

We have a long way to go in bringing freedom to the citizens of the captive nations the world over. For every Solzhenitsyn and Sakarov we are able to save from prison, there is a Scharansky and a Ginsburg whom we are not able to save, as well as thousands of others who are sent yearly to political prisons without it coming to the attention of the West. While we have succeeded in making the concept of human rights a national policy, it is evident that the implementation of the principle has been at best inept and at worst detrimental. Yet we cannot admit defeat in our struggle. The millions living in captive nations have only one hope that their situation will improve. We are that hope.

At the same time, I hope that the members of the National Committee for Human Rights and Fundamental Freedoms and other similar groups will not despair at the loneliness of their struggle. You have allies. I and many of my colleagues in Congress wholeheartedly share your concerns and aspirations, and have spent our public careers fighting for freedom. So let us together continue our fight. Let us try to obtain congressional approval for an equitable human rights standard; let us together try to bring some meaning to the administration's human rights policy. Together let us work to bring to the millions living in slavery the one right without which life has no meaning—the right to be free.

In our National Anthem, we sing about the land of the free and the home of the brave. We should never forget that, when we are no longer the home of the brave, we will not be the land of the free.●

## VETO OF DEFENSE AUTHORIZATION BILL

● Mr. HOLLINGS. Mr. President, the recent veto of the defense procurement authorization was the wrong veto of the wrong bill at the wrong time for all the wrong reasons. As I listened to the President outline his rationale in vetoing, I was immediately struck by the extent of misunderstanding, or distortion, of the record. No distinction was made between authorization and appropriation matters; items to which the Chief Executive objected were not even contained in this particular piece of legislation; and the Congress was indicted for lapse of national security when, in fact, it is this Congress which has worked to increase defense spending.

The defense budget is no place for cavalier handling of the facts. It is no place for an artificially contrived confrontation with the Congress. And I can only wonder what the reaction must be in the capitals of both our friends and our foes when they see a matter of such fundamental importance treated is so frivolous a way.

The matter was discussed in yesterday's edition of the Wall Street Journal. The Review and Outlook editorial summed up the situation cogently and accurately, and the Journal's analysis deserves our most serious attention. For that reason, I ask that it be printed in today's RECORD, and I commend this piece to the attention of my colleagues.

The editorial follows:

THE RAFSHOON VETO

President Carter's veto of the defense procurement authorization is everywhere interpreted as part of a new "get tough" act, the practical incarnation of media adviser Gerald Rafshoon's efforts to massage the President's sagging poll ratings. The veto would have helped Mr. Carter's competency rating more if he had not clouded the issue in monumental confusion, including confusion about what the bill he vetoed actually contained.

To cut through the clouds, it's necessary to keep in mind two simple facts. First: while Mr. Carter objects to the congressional decision to spend $2 billion on a nuclear aircraft carrier, his administration has already announced plans to include a large oil-burning carrier in its next budget request. The whole issue, is merely, this year or next year, and conventional or nuclear? Second: There is a difference between authorization bills, which set programs, and appropriations bills, which spend money. Mr. Carter vetoed the defense procurement authorization. The Pentagon appropriations bill has not yet been completed by Congress.

This elemental parliamentary distinction was entirely overlooked in Mr. Carter's charge that Congress is building the carrier by "diverting funds away from far more important defense needs." Among the congressional items to which he objected, for example, was a supposed cut of $500 million in military operational funds. But operational funds are not dealt with in the defense procurement bill; if this was the President's problem, he vetoed the wrong bill.

Doing the President one better, Defense Secretary Brown complained that Congress had killed three antisubmarine ships. There is a dispute over the appropriations for these ships, with the House on one side and the Senate on the other. But whatever the eventual appropriation, the ships were included in the defense procurement bill. Secretary Brown complains about Congress killing ships that were in fact in the bill his chief just vetoed.

Now, within the context of the procurement authorization, it's true that despite $1.9 billion for the aircraft carrier, the congressional total was close to the President's original request. About half of the funds came from rather ordinary changes: the Army reporting it could not spend money on its new XM–1 tank as fast as it originally thought; Congress's decision that it could both save money and improve the NATO tank force faster by upgrading more existing M60A1 tanks and producing fewer new M60A3 tanks than contemplated in the original administration request.

The other half of the carrier money came from funds originally requested for the Trident submarine program, but which cannot

be spent in this year's bill because of delays. With the Trident program delayed, and with the administration poised to order up a new carrier next year, Congress is merely saying, let's use this idle money and get the carrier started now.

There remains the issue of what kind of carrier. In passing, it should be noted that in light of the latest studies it is far from clear that large carriers are especially vulnerable. They can sustain hits from Soviet criuse missiles that would atomize small carriers, which have their magazines above water line. Large ships also make sense in light of electronic battlefield management, which promises a defense capable of shooting down missiles. But this debate is beside the immediate point, since the White House has requested no small carriers. Indeed, the bill Mr. Carter vetoed provided more research funding for small carriers than he requested.

It is also unclear that oil-powered carriers save money. They are cheaper to build, but more expensive to fuel. Over the lifetime of a ship, it is difficult to see much difference in total cost. Congress prefers the nuclear carrier because it has better performance, being unencumbered by a train of tankers to refuel it every few days. The administration prefers a conventional carrier, saving money on construction now but spending more on operations later. And over this difference the President is willing to veto the entire procurement bill, inviting further controversy and delay that may hinder the improvements on which he and Congress agree.

In order to escalate this minor quarrel to veto proportions, President Carter launched an attack on Congress that seriously distorts the record. Sen. Stennis rose on the floor to complain, in what is for him strong language, of the administration's "false facts." The Senator was too much of a gentleman to say it, but we will: This is not a case of the Congress being soft on national security, but of the President dallying with defense in pursuit of cosmetic politics. The defense procurement bill was vetoed not because of any large difference on substance, but because it was the first bill to come along after Mr. Rafshoon whispered in the Presidents' ear that he could look "strong" by vetoing something.●

## THE HOW AND WHY OF SENIOR CENTERS

● Mr. CHURCH. Mr. President, the Congress has recognized the growing significance of multipurpose senior centers within recent years. The gradually increasing support of title V of the Older Americans Act, primarily by providing some funding for converting or improving existing structures, is one sign of often enthusiastic congressional interest.

One reason for our enthusiasm is that great things occur in centers. People pull together for worthy purposes sometimes not related to aging, but instead to community improvement. There is usually a sense of concern about other center participants, and I personally know of any number of transformations which have occurred at Idaho centers where poeple who had been living fairly isolated existences have become deeply involved in new and exciting kinds of neighborliness.

The current issue of Aging, the official publication of the Administration on Aging, is devoted primarily to reports on center activities in several sites, including rural New York and downtown Baltimore.

An introductory article by Don Kent gives an across-the-board description of many such centers. It is informative and timely; I ask to have it printed in the RECORD.

The article follows:

THE HOW AND WHY OF SENIOR CENTERS

(By Donald Kent)

When Mrs. Hooper developed a sharp pain in her back last winter, the 77-year-old widow decided to see a doctor. Since she had no physician of her own, a young neighbor, who worked as a volunteer in the local senior center, suggested going there, where Mrs. Hooper could have a general health screening without an appointment and at no cost.

Mrs. Hooper had never been inside the center although she had gone past it on a bus several times. Since its completion a few years before, it had become a city landmark. The red brick and glass building, whose rugged tower dominated the local skyline, spanned most of a city block in a downtown area that was rapidly renovating.

The doctor who preformed the screening (diabetes, hypertension, cancer, and other tests, including a careful examination of the painful back) found nothing seriously wrong. Mrs. Hooper's lower back problem would probably improve in a few sessions with the center's physiotherapist and some moderate exercise, the physician said. When Mrs. Hooper felt somewhat better, the therapist helped her enroll in a special physical fitness course meeting three mornings a week.

Then one thing led to another. After morning exercises Mrs. Hooper looked into a needlework group. A staff "enabler" got her interested in embroidery again and she tried her hand at crewel, which was new to her. Then other women in the sewing group suggested staying for lunch at the center, a Title VII nutrition site. That not only solved Mrs. Hooper's noonday meal problem but kept her at the center for the main event in the afternoon program—the one o'clock concert, film, or lecture. That day the performer was a young Polish-American folk dance group. On succeeding days there would be a pianist, guitarist, wildlife films, and a discussion with several city councilmen. On Mondays, a live combo played and since there were never quite enough male partners to go around some of the women danced together.

Mrs. Hooper had grown less outgoing over the years and was never much of a dancer. She felt many of the center's programs were not for her, but she was reassured to see how much help she could find there if she needed it—a consumer counselor who might have solved her complaint against a television repair man last year; a dentist who did denture repairs or fillings almost immediately; an optometry service and podiatrist; a staff member who organized bus tours to parks, museums, and ball games; an insurance expert, legal counselor, representatives for the Food Stamp and social security programs, and—if she should ever need them—mental health services and special assistance for the deaf and blind.

Mrs. Hooper's life became more active than it had been for many years and her outlook was brighter. Her new perspective stimulated her long-dormant desire for organized study. Although she had never finished high school and had not entered a classroom for 60 years, she had always enjoyed reading and learning about the way her city and country had grown and evolved since her childhood, and she loved contacts with nature. The courses at the center were varied enough to fit with her life-long interests—local history, "ecology and you," a program called self-discovery through the humanities, weight control, poetry, several foreign languages, music appreciation, and a variety of creative skills courses such as painting, ceramics, and jewelry making.

In the course of a few months, the senior center experience became a strong new influence in Mrs. Hooper's life. She found there what Joyce Leanse, director of the National Institute of Senior Centers, says centers are uniquely qualified to give—"the help older people need in continuing their personal growth and maintaining a viable life style."

It happened to Mrs. Hopper at the Waxter Center for Senior Citizens in Baltimore, but for more than three decades older Americans have been finding the same type of stimulation at senior centers large and small across the country.

WHO USES SENIOR CENTERS AND WHY

Jean Fisher, director of the Philadelphia Center for Older People, one of America's first central-city, multi-service centers and a model for many of the centers developed during the past three decades, says, "I wish we could get anthropologists to write books about senior centers. We need people with Margaret Mead's social and community sensitivities to observe and understand the new communities being formed in the centers.

"Members are using the senior centers as their community. They come in when they know their friends will be there, to share conversation and meals. Then they call each other up at night on the phone. And when an emergency occurs, it's the friend from the center who is often the first to get to the home or hospital and provide the backup support, the undercurrent of communication, which others may get from family and neighbors. For many older people here their friends from the senior center have become family, neighbors, and community."

Such loyalty and support goes not only to each other but to the senior center itself, Mrs. Fisher says. Members raise funds to pay off the center's mortgage, chipping away in sums of $50 to $400 from sales, parties, and benefit activities.

Joyce Leanse has observed in her study of thousands of senior centers that "while data show that many older persons are attracted to a facility where services and activities are available, the fact of the facility itself and the opportunity it creates for bringing people together appear to be the most compelling."

Mrs. Leanse says, "Participants view the senior centers as a program of services and activities and also as a place to go, a place to gather for friendship and fellowship, or a place to sit, observe, and just be near other people."

In a broad survey in 1974, Mrs. Leanse found that more than 25 percent of those interviewed at centers attended daily but few had participated in any specific services or activities during the week or even the month in which they were interviewed.

Other studies have pointed out that this type of socializing is not for everyone. A typical comment is, "I just go to the center for bridge lessons. I don't need it for anything else. . . . I'm not ready for it yet." Others reject the idea of associating primarily with their age peers, saying, "It makes you feel old to associate with old people only."

Still other older people may be perfectly content to reduce their activities and fall into more and more sedentary habits.

These comments and findings were among many received in a Cleveland, Ohio survey a decade ago in connection with a comprehensive senior center there. The major deterrents to senior center membership were competing activities and interests, and feelings of ambivalence toward exclusive association with older people. The study by Dr. James E. Trela of the Cleveland Vocational Center

and Leo W. Simmons of Case-Western Reserve University noted that, "For those isolated from meaningful social opportunities and detached from supportive relations, age-graded social clubs may provide relief from a vortex of loneliness, while for those active in a variety of roles such groups may offer little attraction. The study concluded that the strongest incentive to membership in senior centers may lie in program offerings which manifestly meet the various needs of individual members.

A Stanford University study indicates that those attending Little House in Menlo Park, Calif., one of the earliest and most successful senior centers, are long-term extroverts. Many of the people who need socializing most won't go to senior centers.

Surveys by the Senior Centers Institute, however, tend to refute the Stanford findings. While users may include a somewhat higher proportion of relatively active older people than is to be found among nonusers, no evidence suggests that a large majority of users are outgoing joiners and doers. On the contrary, the NISC surveys suggest that at least a sizeable minority of users are not typically outgoing people.

More than five million older Americans from 60 to 95 years of age (about one-quarter are 75 or older), are members and participants in the country's more than 5,000 senior centers, according to the National Institute of Senior Centers.

More than half of the participants live alone compared with one-third of the general elderly population who live alone.

They come from all economic backgrounds. Among those who attended, 47 percent were blue collar workers, 16 percent, white collar workers, and 16 percent, professionals, according to the Institute.

In any given two-week period, about six percent of all older Americans attend a senior center, according to data collected for the Institute by Louis Harris & Associates, and about 18 percent have attended a senior center "recently." Another 18 percent would like to attend a center. The most frequent reason they do not is that no facility is available.

WHERE THE MONEY COMES FROM

Ever-greater sums of money, energy, and community commitment are going into senior centers today. Yearly budgets for operation, expansion, and construction of senior centers may amount to over $300 million.

Until the decade of the 60's local and State funds—private and public—provided for the bulk of building and operating expenses. Civic leaders and politicans love senior centers because they are visual proof of what a community is doing for its older citizens. Such leaders can point to the centers and count off the services they provide and the number of persons engaged.

With passage of the Older Americans Act of 1965, the Federal government began playing a constantly expanding role in funding center services and facilities.

In the 1977 fiscal year, Title V of the Older Americans Act provided $40 million for building, altering, or renovating facilities to serve as multi-purpose senior centers, while Title VII nutrition funds were the major financial source for meals served in senior centers. Many of the coordinated, comprehensive services provided by senior centers (transportation, outreach, home services, information and referral) are funded under Title III of the Older Americans Act, and Title IV continues to be a valuable source of funds for training center staff to assist older persons.

The most important change brought about by the Older Americans Act, however, may have been the efforts to channel other Federal funding sources to meet the programming and service needs of senior centers. Many senior centers now receive vital sources of funding from the Federal General Revenue Sharing program, block grants under the Community Development Act of 1974 and Title XX (Social Services) of the Social Security Act.

"These funds have become very important to us," says Jean Fisher of the Philadelphia Center, "but their mandates sometimes seriously inhibit us in running our centers.

"For example, it's terribly hard to tell a nice old person he or she can't carry away uneaten food in a doggie bag because of Federal restrictions applying to nutrition sites." Mrs. Fisher says. "It needlessly humiliates the people involved," no matter what the health-guided intent of the regulation is. The government should leave us freer, not inhibit us.

"I wish the Administration on Aging would send out questionnaires in which we could tell about the problems we run into with the mandates of the different Federal programs," she continues. "Nobody wants a heavyhanded Federal uniformity imposed in senior centers."

In Philadelphia and many other areas, United Way—which raises voluntary contributions in the community—has long been a major source of senior center funding. Other voluntary groups include the National Council of Jewish Women, church groups, Junior League, and service clubs. Foundations and trust funds also have made important grants to some centers.

City governments have also floated special bond issues for senior centers. Baltimore's $3.8 million bond issue for the Waxter Center is an example.

Many States recently provided funds for center operations and construction. Wisconsin has appropriated $2 million for facilities, staff, and programming, while Tennessee has provided $1 million for staffing and the operation of ongoing senior centers and established a goal of at least one multi-purpose senior center in each of its 95 counties. In Hawaii the legislature authorized $1.5 million for construction of senior centers, and the Hawaii State Senior Center in Honolulu receives more than $100,000 a year in State funds for a program which reaches 9,000 elderly Hawaiians.

In the 1978 fiscal year, West Virginia has allocated $350,000 in Revenue Sharing funds for construction, renovation, and acquisition of senior center facilities. The Governor's request for an additional $1.3 million of revenue sharing funds for the same purpose is now before the legislature.

During the 1977 fiscal year, New York State appropriated $1.7 million for senior center operations, and New Hampshire, Nevada, Florida, Massachusetts, and Pennsylvania are among many other States taking legislative action to fund and strengthen senior centers.

THREE DECADES OF PROGRESS

During more than three decades of existence, the concept of what senior centers can be and should do has evolved.

Until the first senior center was founded in New York City in 1943, the only special services directed to older people were homes for the aged and Old Age Assistance. What was to become the Hodson Community Center grew out of a clear need for a center where people could meet and associate on a neighborhood basis. Soon services for the elderly were introduced, especially those needed to maintain the elderly in the community. Over the years, this focus on multiple needs of older adults increased.

Two early West Coast centers which were the prototypes for many centers around the country, emphasized education and recreation more than was the case at New York's Hodson Center. The San Francisco Senior Center, created in 1947, developed out of the combined efforts of the United Community Fund, the American Woman's Volunteer Services, and the grassroots efforts of many older San Franciscans who recognized the need. The city's Parks and Recreation department granted use of a large building near Fisherman's Wharf for the group's activities. The clientele was as mixed and varied as the population of the city itself.

The Little House in Menlo Park, a primarily white-collar middle class community, has had from the start an exceptionally high degree of member participation in planning and carrying out its programs. Members not only planned their own programs but became actively involved in projects of benefit to the community.

With regard to counseling members. Little House saw itself as a referral agency—not equipped to provide certain services directly but ready to give complete advice on where to turn for aid.

In the late 1940's the Philadelphia Center for Older People also became a model of a centrally located citywide facility which tries to serve the total needs of older persons.

PATTERNS AND STRUCTURES

Since the decade of the 40's the grassroots development of senior centers has produced countless variations on several main themes:

The now-familiar multipurpose senior center with a broad spectrum of health, social, educational, and recreational activities and services in a central facility.

The network composed of a single center with multiple satellites or branches operating at the neighborhood level.

Multicenter systems, linking more or less equal facilities.

Centers linked with club programs throughout the community.

If organizational patterns and structures vary almost ad infinitum, the mix of services offered by the 5,000 or more senior centers is hardly more standard.

Slightly more than half of the centers responding to a 1974 survey by the National Institute of Senior Centers under an Administration on Aging grant rated themselves as "multi-purpose centers." In most cases, this means they provide three or more types of services, such as transportation, education, information and referral, counseling, medical help and others. One of the unexpected findings was that nearly half of the self-identified multi-purpose centers provide health services.

The publication last July of HEW's final regulations on grants for acquiring, altering, or renovating multi-purpose center facilities was broadly perceived as a sign of renewed and increased Federal interest in senior centers.

In order to assure that Title V monies go to multi-purpose center facilities which are integrated with the comprehensive and coordinated service systems under Titles III and VII of the Older Americans Act, the Administration on Aging gives priority to applications from State agencies on aging in awarding funds.

Title V defines the multi-purpose senior center as a community facility for the organization and provision of a broad spectrum of services for older persons, including health, social and educational services, and facilities for recreation activities. But it does not give a detailed description of distinguishing characteristics of a multi-purpose senior center.

HEW officials concerned with aging programs see the desirable and distinguishing characteristics in four main areas: group services and activities, individual services, the accessibility of center sites both geographically and in the sense of accommodating the handicapped and disabled, and relationships with other public and private agencies.

Group services, in this view, should include recreation for physical health and socialization, a variety of education opportunities, opportunities for sharing information,

mutual concern sessions which strengthen natural support mechanisms, congregate meals, and social events.

Individual services would normally include counseling and referral in such areas as housing, employment, and benefit entitlements; outreach programs and visiting homebound persons; health services which include screening, rehabilitation, maintenance, and restoration services aimed at maintaining independence; home-delivered meals; protective services including supportive and crisis services; and day care services which enable physically or emotionally impaired older persons to participate in the center.

Program access considerations focus on such aspects as the number of days in operation (at least five days and one evening a week seems to be an expected minimum), community visibility of the facility, adequate size and physical facilities relative to the needs of participants, and accessibility for the handicapped; appropriate assistance to the deaf, blind, and non-English speaking participants; and transportation and escort services for participants who need them.

In regard to their relationship with community services, multipurpose centers should provide opportunities for other public and private agencies in the community to deliver services in the center and become a part of its service program. There should be opportunities for participants to become involved in the decisionmaking process of the center and encouragement to take part in the local, State, and national democratic process.

WHOM SHOULD THEY SERVE

While most senior centers welcome increased Federal funding, not all are pleased with the accompanying mandates which tend to emphasize greater attention to the most frail and vulnerable elderly.

Some feel that since resources are limited, those most in need should be served first. Others, however, point out that if the 75 percent of older persons who are less vulnerable are neglected, centers will soon be used almost exclusively by those groups most urgently needing help, thus limiting the positive self-help aspects of facilities which can only operate when the physically or socially active elderly are mixed with the not-so-well and less socially aware older person.

"We want to include the frail but we do not want to lose the people who leaven the lump and give joie de vivre to everyone in the center," says one center director.

In efforts to help the thousands of diverse senior centers to see their own operations more clearly and carry them out more successfully, the National Institute of Senior Centers has been devising standards for evaluating centers. They may help senior center staffs evaluate their work periodically and determine such points as:

Is the program meeting the needs and interests of the participants?

Are resources (staff, funds, facilities) being used in the most efficient and effective manner?

Has the center reached its goals?

Are individual services and activities accomplishing their objectives?

What is the cost of a particular activity or service?

In what may be a significant new trend, some schools are being converted to senior centers.

In Nashville, Tennessee, the Knowles Senior Center is a converted elementary school. In Sheboygan, Wisconsin, the second floor of a high school shelters a senior center. In Hawaii, the Kaunoa School became the first senior center on Maui.

In Montgomery County, Maryland, part of an elementary school has been converted to a senior citizen day care center, with the remainder used for recreation department offices.

Each of the thousands of centers located across the country is unique and distinct, yet, as Leon Woolf, director of Baltimore's Waxter Center says, "The joy of them is that almost everything we do in this new building can be done in a store-front operation or almost any other site."

Jean Fisher, in Philadelphia, says, "We've accomplished so much in senior centers. Now we should look at their roots. See what they have in common. And see what new directions to take, wherever they're not getting down to living people."●

## HUMAN RIGHTS AND THE HELSINKI-BELGRADE EXPERIENCE

● Mr. GRIFFIN. Mr. President, I recently delivered a speech before the National Committee for Human Rights and Fundamental Freedoms in Kalamazoo, Mich. I ask that the text of these remarks be printed in the RECORD.

The speech follows:

REMARKS BY U.S. SENATOR ROBERT P. GRIFFIN

Chairman Strautkalns, distinguished guests and friends:

Flagrant violations of human rights in Soviet-dominated countries continue unabated despite the promises given in Helsinki and Belgrade. This is intolerable and we would betray our own heritage as Americans if we were to remain silent in the face of such oppression.

The basic question suggested by the topic of your conference is this: Has the Helsinki-Belgrade experience been a success—or a failure—from a human rights standpoint?

The answer, of course, depends largely upon what one expected to achieve through the European Security Conference mechanism.

Those who really expected "nothing," have not been disappointed.

At the other extreme, it appears that many people thought that once Moscow supposedly had "agreed" in Helsinki to respect human rights, some kind of a major transformation would somehow occur almost immediately in the Soviet Union. By the time Round Two in Belgrade came along, so the theory went, all of the outstanding problems would be resolved. Needless to say, these people, if they have paid attention, have been disappointed.

In all candor, my own expectations were quite limited.

If one really never trusted the Russian leaders to begin with, he would not have expected their agreement to the principles set forth in Basket Three at Helsinki to produce much in the way of concrete results.

After all, if it had been the practice of the Soviets in the past to honor their promises, the whole Helsinki experience would have been unnecessary. History is full of broken Soviet promises to respect human rights. For example:

Stalin's 1936 Constitution of the USSR supposedly "guaranteed" freedom of religious workship, freedom of speech, freedom of the press, freedom of assembly, and a wealth of other "rights." Of course, they never have been respected.

The 1945 Charter of the United Nations—which Moscow signed—contains numerous references to the U.N.'s purpose of "reaffirm(ing) faith in fundamental human rights," of respecting "the principle of equal rights and self-determination of peoples," and of "promoting and encouraging respect for human rights and for fundamental freedoms for all." These rights, too, were subscribed to—but then ignored—by the Kremlin.

In December 1948 the Soviets voted in the General Assembly to adopt the United Nations "Universal Declaration of Human Rights." This document guarantees the right to privacy, the right to own property, freedom of speech, assembly, religion and association. It even says that "(t)he will of the people shall be the basis of the authority of government." Again more rights debased by Moscow.

Thus, history indicates that most, if not all, of the human rights to which Moscow pledged itself three years ago in Helsinki were already allegedly "guaranteed" in other documents to which the Soviets had already officially subscribed. Therefore, it would have been naive in the extreme to assume that somehow this time was going to be significantly different—that Soviet liberalization was just around the corner.

Indeed, our reaction to Helsinki reflects, to a certain degree, a fundamental problem this country has had for more than three decades in dealing with the Soviets. Because we desperately want to see things change, too often we pretend to see change—where no change exists.

Tragically, it sometimes seems that the West did not learn much from Yalta.

Just as the realities subsequent to Yalta seemed to catch Roosevelt and Churchill by surprise, those who thought they saw a new Soviet Union in the early 1950's had a rude awakening with the October 1956 Soviet invasion of Hungary.

Tomorrow—August 20—will mark the tenth anniversary of an event that once again temporarily brought realism to Western perception of Soviet realities. I speak of the invasion of Czechoslovakia.

Not many years ago—when the term detente was in more respectable use—it was popular in some quarters to describe the Soviet Union as a "status quo power," uninterested in foreign adventurism.

Then came Africa—with billions of dollars in Soviet military aid and tens of thousands of Cuban mercenaries.

Today the Russians and their Cuban puppets are involved in no fewer than five wars in Africa—and yet our Ambassador to the United Nations assures us that things have never been better.

I don't suggest that it is hopeless even to try to affect Soviet policy. But my point is that we must be realistic.

Indeed, experience has demonstrated that, on occasion, we have had some limited success in bringing about desirable changes in Soviet policy.

In 1962, President John Kennedy's firm stand led to a withdrawal of Russian missiles from Cuba.

In 1972, President Nixon's use of increased force against North Vietnam resulted in Soviet pressure on Hanoi to conclude a peace agreement.

And Western pressure concerning Soviet human rights violations have produced some limited beneficial results.

Nevertheless, we would be naive in the extreme to assume that those limited successes signaled any basic change in Soviet goals or strategy.

In 1920, Lenin wrote that compromise is essential for the eventual success of Communism. Lenin told his supporters to fight only when what he called the "correlation of forces," was favorable; and until then to compromise and maneuver as necessary to weaken the enemy and to increase the forces of Communism.

In large measure, this strategy has worked for the Communists, and it is still being followed by Moscow. The result has been that whenever the Soviets have perceived that the United States has both superior military strength—and the will to use it if necessary—the Soviets have followed Lenin's advice and have backed down.

Khrushchev withdrew his missiles from Cuba in 1962 not because he changed his mind about their military utility. He withdrew because he became convinced that the United States had both the strength and

the will to make the costs of Soviet adventurism greater than the expected benefits.

Thus, common sense—as well as the lessons of history—tell me that the danger of war increases when the United States grows weak—or if the United States is ever perceived by a potential enemy as being weak.

Common sense—as well as the lessons of history—tell me that the prospects for peace are brighter when the United States is strong—strong not only in military power but strong also in terms of patriotism and the will to defend freedom, when necessary.

Unfortunately, the perception of the United States has been suffering under the leadership of the current Administration.

It is important to the United States and the free world that the Administration get its act together and that various spokesmen for the White House start reading from the same script—at least in foreign affairs.

National unity and resolve are difficult to achieve unless there first is unity within the Administration itself. Not only has there been inconsistency between statements made by White House spokesmen, but there has even been inconsistency between statements made by the President from day to day.

For example, on March 17 of this year President Carter delivered a hard-hitting speech in North Carolina about the need for a strong national defense.

But, just a few days later he turned around and ordered the Navy's shipbuilding program cut in half.

Then, following a vigorous propaganda campaign waged by the Soviet Union, he postponed production of the newly-developed neutron warhead (referred to by some as the "neutron bomb"), which, if deployed, could help significantly to offset the massive Soviet advantages in tanks and other conventional forces in Europe.

And these two announcements came after the President had already cancelled production of the B–1 bomber—a decision leaving the U.S. dependent upon World War II-vintage bomber planes, so old that some of our B–52 pilots are flying the same aircraft that their fathers flew two decades ago. This, while Moscow moves full-speed ahead with production of their supersonic BACKFIRE bomber and with development of a second strategic bomber that, according to intelligence reports, has characteristics strikingly similar to our B–1.

Problems resulting from conflicting signals from the President, himself, are further complicated by the varying positions taken by his senior advisers. For example, on the issue of Cuban adventurism in Africa, Secretary of State Vance, National Security Adviser Brzezinski and U.N. Ambassador Young all have taken different stands.

Despite such shortcomings in our own foreign policy, there have been a few positive signs as a consequence of the Helsinki-Belgrade experience.

In the Soviet Union, I understand that the cost of an exit visa has declined by half since Helsinki; and on the eve of Belgrade, Jewish emigration increased by more than 60 percent. Last year in the Ukraine, limited quantities of some 32 Western newspapers became available for the first time.

In Hungary, the last three years has brought a noticeable increase in religious freedom. Both evangelist Billy Graham and the President of the National Council of Catholic Bishops made week-long visits to Hungary.

In Poland, authorities last year announced a general amnesty for some 10,000 persons, and at the time of Belgrade began greater cooperation on family reunification cases presented by the U.S. Embassy.

In Bulgaria, prospects for family reunification also have improved and Western Literature—including newspapers and American novels—have become available.

In Czechoslovakia, there has been a noticeable improvement in emigration policy, and in June of last year the government proclaimed an amnesty for Czechs who fled during the Soviet invasion 10 years ago.

Finally, in Romania, two general amnesty orders last year brought the release of 30,000 prisoners; and emigration to the United States has increased 21 percent.

But another important benefit of the Helsinki-Belgrade process has been the opportunity it has provided for representatives of this country to raise the issues of human rights with the Soviet Union and Eastern European nations.

Last November, for example, my friend and colleague Senator Dole delivered a speech stressing the fact that the United States has never recognized the Soviet incorporation of Lithuania, Latvia and Estonia. And that must continue to be our policy.

At first the Russians tried to avoid the whole issue of human rights—arguing that raising such questions amounted to an interference in the internal affairs of another State, which is prohibited by the Final Act of Helsinki.

This reasoning was rejected. Soon, the Soviets tried to counterattack by charging "racism" and human rights violations by the U.S. and other Western countries. In so doing, however, they implicitly acknowledged, at least, that human rights are a legitimate and fundamental issue of East-West relations.

Even if the Helsinki-Belgrade process has accomplished nothing else, this recognition that human rights are an integral part of detente can be viewed as a significant achievement.

The Communists have heard the criticism, and it has had some effect.

But, of course, there is no basis or reason for a great deal of optimism. It's true that the 1975 Helsinki Conference led to the establishment of "Helsinki Watch" groups in Moscow and in other Soviet dominated areas—and that is good. But it is also true that more than 30 percent of the members of those groups are now in confinement, and others have been sent into foreign exile.

It is true that in some instances emigration figures increased immediately prior to the Belgrade conference. But it is also true that after Belgrade, people like Petkus, Rostropovich, Ginzburg and Scharansky have received harsh sentences for advocating respect for human rights.

This brings us to the real question: What should be our policy in seeking to promote an improvement in human rights policies behind the Iron Curtain:

I suggest that three elements are necessary for a successful policy in this regard:

First of all, our commitment to the cause of human rights must be a real commitment, and not be limited to the kind of selective moral outrage that has characterized so much of the rhetoric in recent months. For example, is criticism by this Administration of human rights practices in Rhodesia and South Africa to be judged when the Administration ignores serious human rights violations in the so-called "front line" African states of Tanzania, Mozambique and Angola? Similarly, it seems a bit strange to hear some spokesmen condemn violations in Chile, South Korea and the Philippines and then express only kind words for the Communist regimes in Cuba and Indochina. If our efforts on behalf of international human rights are to be productive, they must not be perceived simply as politically expedient posturing.

Second, we must project a policy of strength as well as consistency in our dealings with other Nations. This means we must have military and economic capabilities that are second to none, and we must make clear that we do have the will to use that strength if necessary.

The third requirement for a successful human rights policy vis a vis the Soviet Union must be the creative and consistent use of incentives. We need to reinforce responsible behavior and punish irresponsible behavior—the old "carrot-and-stick" approach. Earlier this month Ray Moseley—formerly European news editor for United Press International and one of the reporters who covered the 1975 Helsinki conference—wrote in the Chicago Tribune:

"If the West continues to make the Soviets pay a price for their unwillingness to abide by the rules of civilized conduct, then the Helsinki accords may be viewed in the Kremlin leadership for years to come as one of Leonid Brezhnev's greatest blunders."

I agree—and it is up to the United States to hold Mr. Brezhnev's feet to the fire whenever possible.

In two years the European Security Conference will convene again—in Madrid.

Madrid will provide yet another opportunity to call world attention to continuing Soviet violations of human rights.

But we must not wait until Madrid.

Although it's hardly likely to produce a radical transformation of the Soviet society, events of the recent past have shown that international protest—public and private—does have some effect.

And those of us gathered here tonight must rededicate ourselves to a continuing effort to expose human rights abuses. We must never for a moment let the world forget what is happening. * * * We must never let the Soviet authorities forget that the world is watching.

In concluding many of the speeches I deliver, particularly when I'm speaking before young people, I often express a thought that is not new—but it is a thought that can bear a good deal of repetition. It goes like this:

In the long course of history, freedom has died in various ways. Freedom has died on the battlefield—freedom has died because of ignorance and greed.

But let me suggest that the most ignominious death of all is when freedom dies in its sleep.

I commend you for your efforts to retrieve freedom where it has been lost. May you also be vigilant in making sure that the freedom we enjoy here in America does not die in its sleep.

Thank you.●

## NEW OPPORTUNITIES FOR OLDER AMERICANS

● Mr. CHURCH. Mr. President, the National Council of Senior Citizens recently issued an excellent report: Senior Aides—A Unique Federal Program: New Opportunities for Older Americans.

Celebrating the 10th anniversary of what began a decade ago in 1968 as a tiny senior community service employment program providing part-time work for about 200 unemployed persons 55 and over, the report pointed out that the

number earlier this year was more than 37,000.

This growth, said the report, in a preface written by NCSC Director William Hutton, demonstrates "the high employability of many older persons and the useful part-time work that they can perform to the benefit of their communities."

The NCSC, as one of the national contractors for such programs, reports that at the start of the year it had 7,012 AIDES on projects in 118 rural or metropolitan communities, that 18.1 percent of the participants are 70 years or older, and that minority groups account for 36 percent of the AIDES. A majority are women.

We in the Congress who have long supported the title IX program under which the AIDES are enlisted know about the national significance of the overall program.

But in our home States and sometimes in others, we find from firsthand visits that the morale and effectiveness of the participants has to be seen to be fully understood—and enjoyed.

The first article in the NCSC report, which invites us to "Meet Some Senior Aides: Interesting People in Useful Jobs," captures some of the excitement and enthusiasm to be found at all AIDES sites. I ask that it be printed in the RECORD.

The article follows:

MEET SOME SENIOR AIDES: INTERESTING PEOPLE IN USEFUL JOBS

Many older persons have a special quality that helps them relate to others, young and old, more easily than those less mature. That quality appears to be a blend of experience, philosophy, patience, tolerance, compassion and the ability to listen. Perhaps, it could be summed up as the wisdom of maturity.

This wisdom is what makes Senior Aides useful workers in serving the people of their communities. It was a phenomenon observed early in the Senior AIDES program after its inception in 1968. In 1969, the Senior AIDES' National Advisory Council conducted a public hearing at St. Louis, Mo. The Advisory Council chairman was the late Matthew DeMore, former secretary-treasurer of the International Association of Machinists and Aerospace Workers. Senior Aides from various projects in the area described their work and what it meant to them.

One elderly woman, a Senior Aide employed at a state mental institution, told of her job. She helped patients in many ways, listening to their problems, keeping in touch with relatives, taking them to the hospital when they need treatment, calming them down. She appeared to have a tremendous rapport with these fear-filled persons. Chairman DeMore was so fascinated that he asked her:

"What is it in your background that gives you so much ability to relate to those unhappy people?"

With an ironic smile, the Senior Aide replied:

"I was a barmaid in New York City for 20 years."

* * * * *

BLINDNESS NO HANDICAP

Mrs. Vesta Reeves, 79, of Lawrence County, finds her blindness no handicap in her job.

She works 20 hours a week making telephone calls to persons living alone and unable to leave the house. She is their main and sometimes only contact with the outside world, checking on their health, general welfare, listening to their problems and referring them to the appropriate person or agency for help.

Mrs. Reeves is employed as a Senior Aide under the outreach program operated by Wabash Valley Senior Citizens, Inc. When her blindness became acute several years ago, Mrs. Reeves worried that she wouldn't be able to keep her job so she memorized all the phone numbers. She says:

"If I didn't listen to other people's problems, I might feel sorry for myself."

As Americans grow older, their problems with local, state and Federal laws and regulations multiply. They run up against knotty questions involving Social Security, Medicare, Medicaid, income taxes, property tax regulations and a host of others. Some Senior Aides work to help elderly persons with these problems.

A PARALEGAL

Hector Monette, 68, of Lowell Mass., a retired electronics and textile worker, works as a paralegal Senior Aide with the Merrimack Valley Legal Services, an organization to help the needy. His work is typical of that performed by the three Senior Aide paralegals working in Merrimack Valley communities.

Monette helps low-income elderly persons who can't afford to pay for an attorney. Most of his cases relate to social security benefits, supplemental security income (SSI) for those with very low social security benefits, consumer problems, landlord-tenant disputes and wills.

When a case involves more complicated legal questions, he turns it over to an attorney with Merrimack Valley Legal Services. His efforts relieve the attorneys of less complicated but time-consuming matters that he has been trained to handle.

The Senior AIDES project director, Daniel Madio of Lawrence, Massachusetts, saw his potential for this sort of work, got him enrolled for paralegal training at North Shore Community College. Now Monette's desk is stacked high with folders on problems brought to him by elderly persons in need.

Monette says his interest in helping people grew out of his 30 years as an active member of the St. Vincent DePaul Society. When he retired, he started visiting young families in their homes and elderly persons in nursing homes telling them about local services which could help them with their particular problems. That in turn led to his new career as a paralegal Senior Aide.

Senior AIDES project directors like Mrs. Jimmye Batchelor at Copiah-Lincoln Junior College, Wesson, Miss., seek jobs to match the capabilities of those who apply for Senior Aide jobs. Here is an example:

HOW-TO-GET-HELP EXPERT

Senior Aide Ruth Bennett is now the how-to-get-help expert of the Pike Amite Library System in the McComb, Miss., area. She writes a weekly newspaper column, "Information Station," and short radio-TV announcements on help offered by the community's public and private service agencies. Her columns and announcements emphasize whom to call and where to go to get help for persons of all ages. Telephone numbers are emphasized.

Likewise, she has organized the library's information and referral service so that its up-to-date card file makes it possible for any staff member at library headquarters to answer calls for help accurately and intelligently.

Although she serves library patrons of all ages, her prime responsibility is for the elderly. Among the elderly she helps are those who use large-print books and talking-book machines with records or cassette tapes. She also maintains a mail service for the homebound and a home delivery service for books and equipment within the city limits.

RADIATION VICTIM

Employment as a Senior Aide has given a good many older, unemployed workers new confidence in themselves and their ability to make their way in life.

Take the case of James Hughes who won a job as a Senior Aide in the greenhouse at the Southwestern Sheltered Workshop in the Bryson City, N.C., area.

Hughes had been discouraged, despondent that he couldn't find work. He had been unemployed more than six months and he knew why employers shied away from him.

Several years before, he had worked on a job that involved handling radioactive material. A container was spilled and some of the material splashed on his face between his temple and his eye. The result is an ugly, one-inch hole on the side of his head that at first glance appears to be an open, festering sore.

On his job at the Sheltered Workshop's greenhouse, Hughes helps mentally handicapped persons learn about planting and caring for potted flowers and plants. For Hughes, the result has been new confidence in himself and release from the fear and despondency that hung over his life.

These Senior Aides whose work has been described here are but a tiny fraction of those employed on useful community service projects across the nation. Yet their skill in and dedication to community work that would not otherwise be performed is generally typical of the whole group of 7,012 Aides employed on 118 different projects. Therefore, it is useful to look at how these projects have been set up and understand the rules that govern the employment of Senior Aides to achieve the goals that Congress set for the program.●

## JOHN DENVER'S ALASKA

Mr. DURKIN. Mr. President, I would like to call to the attention of my colleagues a distinguished television documentary on Alaska which will be shown throughout the country on the ABC network on Sunday, September 3, 1978, from 7:00 to 9:00 p.m.

It is entitled, "John Denver's Alaska: The American Child."

Mr. Denver, a strong conservationist, made several trips to Alaska to film this program. With veteran guides as his companions, he invites the American viewer to explore with him isolated coastal and interior regions of this great State and experience, what is perhaps the most scenic wilderness and wildlife habitat left in the United States today.

Mr. Denver's experiences in Alaska are rich and varied and show graphically why I support legislation to protect these scenic lands and wildlife areas.

He and his companions take a raft journey down the sprightly rapids of the Alagnak River on the Alaska peninsula.

He confronts a huge polar bear on the polar ice cap and witnesses a family of brown bears feasting on summer salmon.

There is an arduous climb in the

Majestic Wrangell Mountains and participation in the centuries' old ritual of hunting for the bowhead whale.

The scenes remind us all that Alaska is wild, unspoiled and unsurpassed in scenic beauty. In Mr. Denver's words, it is "a precious land." a land whose protection gives us a final opportunity to show our children and grandchildren what all of America was once like.

Alaska is too important to have its future guided by narrow and parochial interests. That is why Congress must face its responsibility in the so-called D–2 issue and set aside Federal land for permanent protection as national parks and wildlife refuges and forest wilderness.

My hope is that my colleagues and Americans everywhere will have a chance to see this valuable program. I am certain it will convince them that the Alaska lands issue is a national issue and, with development interests waiting in the wings, one that is crucial to address right now.

---

## EFFECT OF EMPLOYEE STOCK OWNERSHIP ON LABOR PRODUCTIVITY

Mr. LONG. Mr. President, the July 31 edition of the Washington Post contained an editorial which greatly alarmed me. The editorial, entitled "American Productivity," contrasted the increase in American productivity—the average output per hour of labor—over the past decade with that of the other major world powers. I ask unanimous consent to print a copy of that editorial in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AMERICAN PRODUCTIVITY

Throughout most of the years since World War II, productivity in the American economy has risen briskly. As it went up, it carried with it people's earnings and standards of living. But the rise began to slacken about a decade ago, and for the past year and a half there has been hardly any rise at all. Of all the changes overtaking the American economy, the behavior of productivity is one of the most peculiar—and one of the most disquieting.

The immediate consequence of no productivity gains is that inflation will become harder than ever to control. But if the present pattern continues, it will also ignite uncomfortable political questions about dividing the pie in a country that has come to expect, and to count on, steady increases in both public and private wealth. Nobody really knows why productivity has stopped rising. All explanations are, to one degree or another, speculative. But the evidence suggests that it is no minor passing blip on the chart. The causes seem to lie deep in the changing structure of the national economy.

Productivity is simply the average output per hour of labor. The Labor Department computes it every three months, and it has just published the figures for the spring quarter of this year. They show that productivity was rising at the minuscule rate of 0.1 percent a year, after having fallen during the winter. Through the 1950s and most of the 1960s, it was going up at an impressive pace of nearly 3 percent a year. In the years after 1968, the trend dropped to half that rate. Since late 1976, it has been almost flat.

That departure is consistent with two other surprises. Inflation has been running considerably higher in recent months than most people expected, and unemployment has been considerably lower. Output over the past year has been raised by putting more people on payrolls, not by improving each person's capacity to produce.

It's a striking departure, and one explanation may well lie in the rather low rates at which business has been investing new capital. That, in turn, may be the result of low profits. Another possibility is the cost of the new environmental and safety rules, requiring industry to invest heavily in equipment to control air and water pollution.

Whatever the influences controlling productivity, they vary enormously from one country to another. In international competition, the United States is currently not doing well. The following brief paragraph compares the increases in productivity in manufacturing, for the decade 1967–77, among some of the major industrial powers:

United States, 27 percent; France, 72; West Germany, 70; Italy, 62; Japan, 107; Canada, 43; and Great Britain, 27.

There is a tendency in this country to regard Britain as the world's great example of industrial decline. But you will note that the rate of productivity gain in British factories over the past 10 years has been the same as in American factories.

Since no one is quite sure why the American rate has fallen, no one is in a position to offer a sure remedy. But these latest productivity figures may well strengthen the impulse in Congress to cut taxes on capital gains, in an effort to increase investment. Beyond that, it's also necessary to consider the possibility that some of this change may lie beyond the reach of government policy. A good many Americans' ideas about work, incomes and economic growth began to change around 1968. These new attitudes may now be showing up in the statistics on the nation's economic performance.

Mr. LONG. The editorial points out that there "is a tendency in this country to regard Britain as the world's great example of industrial decline." This, I think, is a fair assessment of the average American businessman's opinion.

However, the author then cites statistics which reflects that the productivity gain in the United States over the past 10 years is no better than that of Great Britain: a miserable 27 percent.

This statistic becomes even more alarming when compared to the productivity gains over the same period for Japan, 107 percent; France, 72 percent; and West Germany, 70 percent. Even Italy had an increase of 62 percent—almost 150 percent more than our own.

Clearly, we as a country are not increasing our productivity at a rate which makes us competitive with the other free-world economic powers.

As every Senator knows, one major consequence of declining or lagging productivity is inflation. That we are now in a period of spiraling inflation cannot be denied. What we need to do is find ways to increase each individual's productivity and thereby increase the volume of goods and services which are competing for the consumers' dollar. This is one of the important ways in which we can begin to break the cycle of too many dollars chasing too few goods and begin to place a lid on the inflation spiral which we have thus far been so helpless to stem.

Also, as productivity rises, so does the potential for corporate profits and, thus, the likelihood of expanded capital investment.

Last month, the Senate Committee on Finance held 2 days of hearings on employee stock ownership plans (ESOP's). During these hearings, we received testimony from such major corporations as Sears, Roebuck & Co., Potomac Electric Power Co., the Dow Chemical Co. and Lowe's Cos., Inc. These companies were unanimous in their opinions that providing employees with a stock ownership in their employers carries with it major benefits not only for the employer and its employees, but for the economy as a whole.

There was complete agreement that the unified interest between employer and employee which results from employee stock ownership has a definite impact on productivity. Since that time, I have received statements of support for the ESOP concept from such corporations as General Telephone & Electronics Corp., Gulf Oil Corp., Weyerhauser Corp., McDonald's Corp., and Celanese Corp.

I have long believed that employee stock ownership increases productivity, and I was delighted to have my opinions reinforced by the heads of these corporations.

At the same time, we received testimony from Ambassador Robert S. Strauss, Special Counselor on Inflation. Mr. Strauss indicated that he would look carefully at ESOP as a possible solution to the problem of declining productivity and increasing inflation since, as he pointed out, an employee always works harder when he has "a piece of the action." My longstanding commitment to giving employees "a piece of the action" is well known.

Finally, I also submit for insertion in the RECORD at the close of my remarks a copy of a recent Department of Labor report, entitled "Employee-Owned Companies: Is the Difference Measurable?"

This report suggests strongly that employee stock ownership results almost invariably in better attitudes toward the job and higher productivity and corporate profits. I am gratified that the administration is finally taking a look at the beneficial effects of employee stock ownership and I hope that the results of this investigation will answer the questions raised by the "doubting Thomases" about ESOP.

I hope that other Senators will join me and the heads of many of our major U.S. corporations in actively promoting the concepts of ESOP and broadened stock ownership as vehicles for resolving some of these major economic problems which currently plague our country.

On June 23, I introduced S. 3241, the "Expanded Employee Stock Ownership

Act of 1978"; Senators WENDELL ANDERSON, MIKE GRAVEL, and BILL ROTH are cosponsors of this bill. My purpose in introducing the bill is to reduce administrative problems for ESOP's and provide greater incentives for employers to adopt such programs and provide access to greater stock ownership for their employees.

This past Tuesday, August 15, Congressmen JOE WAGGONER and BILL FRENZEL introduced the same bill in the House (H.R. 13882). I am pleased that these Members of Congress are directing their attention toward broadening stock ownership. I would encourage all Senators and Congressmen to review the proposals we are making in these bills and work with us toward providing more Americans with a "piece of the action."

Mr. President, I ask unanimous consent that an article in the Monthly Labor Review of July, 1978, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EMPLOYEE-OWNED COMPANIES: IS THE DIFFERENCE MEASURABLE?

(By Michael Conte and Arnold S. Tannenbaum)

Employe ownership can be found throughout the history of the United States, although companies that are wholly owned by employees (including workers) have always been rare. One survey reported that 389 companies, in which a large proportion of the stock was directly owned by employees, were established in the United States between 1791 and 1940.[1] The number of companies with at least some degree of employee ownership was probably much larger, and there is evidence that this number has grown in recent years.[2]

Several aspects of performance in a variety of employee-owned companies are analyzed in this article.[3] The data employed include: the size and sales volume of employee-owned companies; the percent of employees who participate in the ownership plan; the percent of equity owned by nonmanagerial as well as managerial persons; and aspects of control of the company by employees. Also analyzed are the attitudes of managers toward the ownership plan and their judgment about the effect of the plan on productivity and profit. Actual profit data were available for a subset of companies, and the relationship between profit and other characteristics of these companies was studied.

Employee ownership can take two forms: direct, where employees own shares in the company as would ordinary shareholders in a joint-stock company; or "beneficial," where employees own shares through a trust, as illustrated by the Employee Stock Ownership Trust (ESOT).[4] The Employee Retirement and Income Security Act of 1975 stipulates that the holdings of an Ownership Trust must be invested "primarily" in the stock of its company—unlike the holdings of the usual profit-sharing trust, which may be diversified, or of a pension trust, which must be diversified.

Contributions to the Trust are governed by an Employee Stock Ownership Plan (ESOP). Depending on the plan, contributions may be made on the basis of a profit-sharing principle (whereby some fixed percentage of company profits is annually transferred to the Trust), a cost principle (whereby a fixed percentage of labor costs is annually transferred to the Trust), a fixed contribution principle (whereby a fixed dollar amount is transferred to the Trust), or by other methods determined entirely at the discretion of a single party or parties. The central requirements, however, are that the Ownership Trust invest "primarily" in employer securities and that disbursements from the Trust be made in employer securities. Dividends that may be declared are not usually distributed immediately to employees but, rather, are held in trust. Nonetheless, the financial well-being of the "beneficiaries" of stock in the Trust is tied to the success of the company.

FINDING WHO OWNS WHAT

A list of 148 companies in the United States and Canada, thought to have some degree of employee ownership, was compiled.[5] After conducting telephone interviews, usually with the financial officer, 98 of these companies actually were found to have some component of worker ownership; 68 firms had Stock Ownership Plans, and 30 had direct ownership. Their median size was approximately 350 employees; 17 percent had fewer than 100 employees and 25 percent had 1,000 or more. During the previous year, almost half of the companies had sales of at least $25 million.

As shown in table 1, employees in about three-quarters of the companies owned at least half of the equity; ownership of the entire equity by employees was more likely to occur in stock-plan than directly owned companies. This table refers to the percent of equity held by all employees, including managers. Table 2, on the other hand, refers to the percent of equity owned by the workers alone, which, of course, is less than that owned by all employees.

TABLE 1.—PERCENT OF TOTAL EQUITY OWNED BY EMPLOYEES, INCLUDING MANAGERS, IN 87 COMPANIES

| | Percent of companies | | |
|---|---|---|---|
| Equity owned by employees | Stock ownership plan (N=60) | Direct ownership (N=27) | All companies (N=87) |
| Less than 10 percent | 4 | 4 | 4 |
| Between 10 and 49.9 percent | 18 | 18 | 18 |
| Between 50 and 99.9 percent | 28 | 59 | 38 |
| 100 percent | 50 | 19 | 40 |

Note—Eleven companies did not provide sufficient percent of equity owned internally data to determine the percent of equity owned internally.

TABLE 2.—PERCENT OF TOTAL EQUITY OWNED BY WORKERS ONLY, IN 83 COMPANIES

| | Percent of companies | | |
|---|---|---|---|
| Equity owned by workers | Stock ownership plan (N=58) | Direct ownership (N=25) | All companies (N=83) |
| Less than 3 percent | 34 | 8 | 27 |
| Between 3 and 9.9 percent | 16 | 8 | 13 |
| Between 10 and 49.9 percent | 43 | 20 | 36 |
| Between 50 and 100 percent | 7 | 64 | 24 |

NOTE—Fifteen companies did not provide data relevant to the percent of equity owned by workers.

The measure of equity owned by workers in stock-plan companies was obtained by multiplying the percent of the company's equity owned by the Trust times the percent of the Trust's equity owned by the workers. Because of the way records are kept in most of the stock-plan companies, we found it necessary to rely on the distinction between salaried and other personnel as the basis for distinguishing rank-and-file workers from managers in these companies. Furthermore, although most of the directly owned companies could report the allocation of ownership between managerial and other personnel, only about half of the stock-plan companies could report the precise allocation of stock within the Ownership Trust. In these companies, 54 percent of the Ownership Trust stock, on average, is owned by nonsalaried employees. This average then, was used to define the amount of worker-owned stock within the Trust in each of the remaining cases.[6] As estimated, therefore, worker-owned equity in the remaining cases is directly proportional to (that is, 54 percent times) the percent of the company's equity in the Trust itself.

Employee owners in the Trust are entitled to dispose of their stock at market value once it has been distributed to them. Unlike employees in directly owned companies, however, owners in a Trust generally do not vote their stock. The following tabulation shows the percent of companies where voting rights and other employee control mechanisms are reported to be available:

| | (1) | (2) | (3) |
|---|---|---|---|
| Employee-owners have: | | | |
| Stock-voting rights | 27 | 97 | 50 |
| Representatives on Board of Directors | 36 | 77 | 49 |
| Union representation | 32 | 33 | 32 |
| Influence on important decisions other than through a union | 51 | 77 | 56 |

[1] Percent of stock-plan companies.
[2] Percent of directly owned companies.
[3] Percent of all companies.

In general, the data indicate substantial differences between stock-plan and directly owned companies in these measures of employee influence over company decisions. For example, only 36 percent of the respondents in companies with Stock Ownership Plans report that worker representatives sit on the board of directors; 77 percent of the companies with direct ownership report the presence of workers on the board. Similarly, 51 percent of the respondents in companies with ownership plans, compared to 77 percent in companies with direct ownership, indicate that employees influence "important" decisions in the company. In some of the companies, this influence reportedly extends to such decisions as whether or not to make major capital acquisitions. The two types of companies do not, however, appear to differ with respect to whether or not employees are unionized. Although not specifically measured, indications are that directly owned companies have significantly fewer unionized employees than do comparable ownership-plan companies.

EMPLOYEE OWNERSHIP AND PROFITABILITY

Profit data were supplied by 30 companies. The ratio of pretax profits to sales was used as a basis for gauging profitability. Each company's ratio was then divided by its industry's 1976 ratio.[7] This weighted ratio was the primary measure of a company's pretax profitability. For five companies, however, an additional adjustment was necessary. Because these companies are directly and wholly owned by employees, they distributed a part of their "profit" to employees in the form of wages. This allocation of funds has the effect of depressing the conventional profit statement, although it has the corresponding advantage of reducing taxes. These moneys, however, should be considered as part of the company's profit for purposes of comparison with other companies in our set.

Footnotes at end of article.

To calculate the amount of money diverted from profits to wages in the five companies, the average wage differential between the worker owners and nonowner workers was used.[8] This differential in each company was added to its formally stated profit figure, and this final value was used for computing the profitability of these five companies. Although this adjustment seems appropriate as a way of maintaining comparability among companies that employ different accounting procedures, the unadjusted profit statements also were compared. This unadjusted value is, most likely, overly conservative; but there may be some utility in examining both measures of profitability.

The average adjusted profit ratio for the 30 companies was 1.7; the unadjusted ratio was 1.5. In both cases, these values, which are greater than 1, indicate greater profitability among employee-owned companies than comparable sized companies in their respective industries. However, because the variance in profitability among the 30 companies is relatively large and the number of cases is small, statistical significance is not achieved. It is also possible that the "sample" of companies may be select with respect to profitability. The results are suggestive, however, that employee ownership, in one form or another, may be associated with the profitability of a company.[9]

TABLE 3.—REGRESSION COEFFICIENTS FOR THE PREDICTORS OF "ADJUSTED" AND "UNADJUSTED" PROFITABILITY

| Predictor | Adjusted | Unadjusted |
|---|---|---|
| ESOT (=0) vs. direct ownership (=1) | −.22 | −.34 |
| Percent employees participating in plan | −.30 | −.31 |
| Percent equity owned internally | −.31 | −.19 |
| Percent equity owned by workers | [1] 1.02 | .78 |
| Worker representativeness on board of directors | −.18 | −.18 |
| Employee stockholders vote | −.05 | −.24 |
| Multiplier | .72 | .47 |

[1] $p < .02$.

NOTE. The data necessary to calculate the adjusted profitability ratio are unavailable in five companies of the subset and 5 companies did not provide information concerning all of the predictors in this regression. The number of cases in the adjusted and unadjusted cells are therefore 20 and 25 respectively.

In table 3, the two indexes of profitability (adjusted and unadjusted) are predicted using several aspects of employee ownership in a regression analysis. The predictors include: (1) the form of employee ownership, whether direct or through a Trust (Ownership Trust is scored "0"; direct ownership is scored "1"); (2) the percent of employees who participate in the plan; (3) the percent of company equity owned by employees (by managers and workers); (4) the percent of company equity owned by the workers themselves; (5) whether employees have representatives on the board of directors; and (6) whether employee stockholders have voting rights.

These predictors jointly explain a substantial amount of the variance in "adjusted" profitability, but only one of the predictors, the amount of equity owned by the workers themselves, proves statistically significant (p less than .02); the more equity the workers own, the more profitable the company, other things being equal (beta = 1.02).[10]

The second variable of importance in this analysis, the amount of equity owned internally, has, if anything, a negative relationship with profitability (beta = −.31); but the statistical significance of this variable is marginal, at best—a coefficient of this size occurring about one out of four times by chance. Variation in "internal ownership" in this context is really variation in ownership by managerial personnel, because ownership by the workers themselves is controlled in the analysis. The possible implication, therefore, is that increases in the amount of equity owned by managers may have a negative effect if this increase is not accompanied by an increase in the equity owned by the workers. This result is not strong statistically, but it may be worth considering as a hypothesis.

The impact of the remaining variables can easily be attributed to chance, but it is interesting to see that they, too, imply, if anything, negative relationships in the regression. Direct ownership (rather than through a Trust), the percent of employees who participate in the plan, the existence of worker representatives on the board, and the existence of voting rights show a negative relationship (if anything) to profitability when the percent of equity owned by the workers themselves is controlled.

Prediction of the unadjusted profitability index is not as good as the prediction of the adjusted index, the multiple correlation being only 0.47, and none of the predictors meets the usual criterion of significance. The pattern of results, however, is similar to that for the analysis of the adjusted profitability index; the one predictor that approaches a marginal level of statistical significance is the percent of equity owned by the workers.

The negative signs associated with several of the variables in table 3 do not imply (or they would not imply, even if they were statistically significant) that these characteristics are associated with low profitability; they imply (or would imply) such a negative association only under the conditions of the regression analysis where, for example, the amount of equity owned by the workers is controlled statistically. In fact, because companies where workers hold a high percent of the equity are likely also to be directly owned, direct ownership, like the amount of workers ownership itself, is positively associated with profitability.

TABLE 4.—CORRELATIONS AMONG ASPECTS OF EMPLOYEE OWNERSHIP AND PROFITABILITY

| Characteristics | Profit (adjusted) (N=20) | Profit (unadjusted) (N=25) | Stock plan vs direct ownership (N=75) | Percent employees participating (N=75) | Percent of equity owned internally (N=75) | Percent of equity owned by workers (N=75) | Workers on board (N=75) |
|---|---|---|---|---|---|---|---|
| ESOT (=0) vs. Direct ownership (=1) | [1] 0.48 | 0.27 | | | | | |
| Percent employees participating | −.33 | −.29 | [1] −0.23 | | | | |
| Percent of equity owned internally | −.02 | −.06 | −.10 | [1] 0.25 | | | |
| Percent of equity owned by workers | [1].60 | .31 | [1].68 | .14 | [1] 0.34 | | |
| Workers on board | .24 | .08 | [1].36 | .08 | .04 | [1] 0.43 | |
| Employee stockholders vote | .30 | .18 | [1].68 | −.11 | −.11 | [1].47 | [1] 0.22 |

[1] $p < 0.05$.

Table 4 helps to illustrate these associations. This table shows the simple, zero-order correlation among the variables presented in the regression analysis. Correlations that are significant at the .05 level or better are indicated. We see in this table not only how the predictors may be associated with profitability, but also how the predictors relate to one another. For example, companies in which workers hold a high proportion of the equity tend to be directly owned (r=.68), to have worker representatives on the board (r=.36), and to provide voting rights to employee owners (r=.68). On the other hand, the correlation between the percent of equity owned by the workers and that owned internally (by workers and managers is not as high as one might expect, in view of the fact that internal ownership includes ownership by workers (r=.34). The proportion of equity owned by managers in many of these companies is relatively large and "internal ownership," therefore, reflects managerial ownership more than worker ownership.

Direct ownership in this table is signficantly and positively related to adjusted profitability (r=.48)—unlike the relationship indicated in the regression analysis—because direct ownership is associated with the percent of equity owned by workers, which appears from the regression analysis to be more closely associated with profitability. Voting rights is also associated with the percent of equity owned by workers and it, too, shows a positive relationship with adjusted profitability (unlike the relationship in the regression analysis), although the magnitude of the correlation does not meet the criterion of statistical significance, given the small number of cases.

The percent of employees who participate in the ownership plan, however, does not show the relationship to profitability that one might expect from the hypothesis that employee ownership has a positive effect on profitability (r=.33). The explanation may hinge on the association, or rather lack of association, between the percent of employees who participate and the percent of equity owned by workers (r=.14). Apparently, many companies that have relatively widespread employee ownership, in fact, involve only a small proportion of the companies' equity in such ownership. Many members, in other words, own very little.

SUBJECTIVELY SUPPORTED BY MANAGERS

In a previous study, substantial sentiment in favor of employee ownership was found among both managers and workers in a company that had recently adopted an ownership plan.[11] Employee ownership, they felt, contributed substantially to the satisfaction of all employees, to the motivation of workers, and, ultimately, to the productivity and profitability of the company. Records of the company also indicated that grievances and waste (in the form of expendable tools) declined and that productivity and profitability increased during the period immediately following the introduction of the plan (although profitability was higher during one period a number of years earlier).

In the present analysis, a management representative in each company was asked questions about the effect of employee own-

Footnotes at end of article.

ership on productivity and profit. "Do you think that employee ownership affects profits? Does it increase profits, decrease them, or have no effect?" Similar questions were asked concerning productivity. On average, the responses to these questions indicated substantial support for employee ownership. The analyses presented in the previous section, suggesting that employee-owned companies are associated with above average profitability within their respective industries, lend some credence to the claims of these managers. However, the managers who credited employee ownership for high levels of profit did not necessarily work for the more profitable companies.

Managers in companies that were substantially worker-owned were no more likely to ascribe positive effects to employee ownership than managers in less intensively worker-owned companies even though the proportion of equity owned by workers appears to be related to profitability. On the other hand, employee ownership is more likely to be reported to have positive effects on profit where such ownership is direct, rather than through a Trust; managers also respond more favorably where workers are not represented on the board.

Each manager respondent was asked whether employee ownership affected the attitudes of workers toward their job. The average response was 0.84 on a scale from 0 to 1, where "1" means that work attitudes are better and "0" that they are worse as a result of the ownership plan. Their response, therefore, implies that these managers, on average, perceive employee-ownership plans as having a substantially positive effect on the attitudes of employees. But, according to a regression analysis, this judgment by managers may be less positive where workers have representatives on the board of directors. In general, managers were more satisfied with the plan where ownership is direct rather than through a Trust and where the percent of employees who participate in the plan is relatively large. It seems reasonable that managers should think well of the plan where participation is widespread. On the other hand, we have seen that widespread ownership, per se, is not associated with profitability; such ownership may very well mean that many employees own only a very small fraction of the equity—and it is the amount of equity owned by workers that appears to be most often associated with profitability.

TAKING STOCK

Employee ownership in the United States has taken a number of forms, although examples where workers own a substantial part of a company's equity are rare. These data, although only preliminary, offer a glimpse of the possible impact of employee ownership on the economic performance of companies and employee attitudes. On the basis of this brief analysis, some tentative conclusions may be suggested: The industrial relations climate in employee-owned companies appears to be good, in the judgment of managerial respondents; managerial respondents in these companies see employee ownership as having a positive effect on productivity and profit; the employee-owned companies that have been studied appear to be profitable—perhaps more profitable than comparable, conventionally owned companies; the ownership variable most closely associated with profitability is the percent of equity owned by the workers themselves; although workers influence in the company, as judged by managers, is a function of worker-owned equity, managers' evaluation of the ownership plan is not affected in a positive way by either the amount of equity held by the workers or the amount of influence exercised by the workers; managers appear more favorably disposed toward plans with widespread participation among employees, even though this may involve only a small fraction of the company's equity.

These conclusions are tentative. The companies that provided profit data may be select, and the analyses are based on correlations that illustrate association among variables—they do not prove causation. The results, however, are sufficiently encouraging to justify a detailed, longitudinal study of a number of companies over a period of years. Such a study should include measures of the attitudes and motivations of all employees within the companies as well as measures of company performance. If employee ownership does have an effect on the economic performance of a company, as the data of this study tentatively suggest, the explanation may be found, at least partly, in the effect of ownership on the employees themselves.

## TAX LIMITATION THROUGH INDEXATION

Mr. GRIFFIN. Mr. President, earlier today I presented a statement urging the Committee on Finance—as I urged the Subcommittee on Taxation and Debt Management 4 months ago—to report to the Senate not just a tax cut bill—but a tax reform bill that includes tax indexation.

Unless tax rates are adjusted automatically in the future to reflect future increases in the cost-of-living, the effect of any tax cut voted this year will be quickly eroded and made meaningless by inflation.

Last year, during consideration by the Senate of another tax bill, I offered a tax indexation amendment on the floor. Unfortunately, that amendment failed by a vote of 64-to-24. The very next day—April 29, 1977—I introduced the same language as a bill, S. 1431. In the future, under this bill there would be automatic annual adjustments of the personal income tax rate schedules, deductions, and exemptions to compensate for increases in the cost of living.

Since I introduced that bill last year, I am pleased to note that a number of similar bills have been introduced by other Senators, including S. 2738, which I have cosponsored with Senators DOLE and MCCLURE.

I remain steadfastly convinced that enactment of tax indexation is the single most valuable and important step that this Congress could take to give taxpayers genuine relief from the squeeze of raging inflation and ever higher taxes that economists now call "taxflation."

Tax indexation to cope with taxflation is no longer an esoteric economic concept. People all over the country understand it, and want it. I have learned that, firsthand, after traveling throughout the State of Michigan, where at every stop, people express their concern about inflation and taxation, and indicate their strong support for tax indexation.

That's true not just in Michigan. A Roper poll released last month—which surveyed nationwide attitudes toward taxation—showed that 60 percent of American taxpayers would prefer having income tax rates adjusted automati-

cally for inflation, rather than waiting for the periodic tax cuts granted by Congress.

Let me cite that figure again. Six out of every 10 taxpaying Americans want tax indexation—not just a tax cut—as the means for real relief from the scourge of taxflation.

We all know the symptoms of taxflation. Unbridled inflation forces wages to rise so that wage earners can keep up with the cost of living. But as his pay goes up, the worker finds that he is pushed up into higher and higher tax brackets—which mean that a higher percentage of his income is taken by the Government in taxes. Even though a pay raise means no actual gain in purchasing power—he has more dollars which are worth less—the worker is required under the present system to pay a higher rate of taxes. This is unconscionable.

To compound the problem, our progressive tax system takes a steadily increasing percentage of a taxpayer's earnings as the taxpayer gets moved into higher tax brackets. As the well-known advertisement says: "There's no living with inflation"—and I would add, there's no living with taxes!

Given this unhappy interplay between taxes and inflation, it is no wonder that workers today feel like the man trying to climb a ladder in a bog: for each rung the taxpayer climbs on the economic ladder, the ladder sinks a little deeper into the financial mire.

As in almost every arena of life, there's usually a winner and a loser. When it comes to taxflation, the real winner now—as you might have guessed—is the Federal Government. Because the taxpayer's loss is the Government's gain.

As Nobel prize-winning economist Milton Friedman computes it, when the cost-of-living goes up by 10 percent, the taxes flowing into the Federal Treasury go up—not 10 percent—but 16 percent. This worked out to a windfall profit on inflation for the Federal Government of about $6 billion last year.

Perhaps it should be no surprise that some of the big spenders here in Washington take a dim view of my proposal to index the tax rates. As the system operates now, taxes are increased, without a vote of Congress, just by promoting policies and programs that are inflationary.

What does all this mean to the individual wage earner? Let me provide a few illustrations.

Consider the plight of the wage earner with a wife and two children who in 1977 earned $15,000. Being conservative [or perhaps the word is "optimistic"] let us assume an inflation this year of 8 percent. To stay even with inflation, our wage earner this year will have to earn $1,200 dollars more—or $16,200. But, he really does not stay even. Because, while his income increases by 8 percent, his income taxes will go up about 19 percent. Pushed up into a higher tax bracket, he will have to pay a tax increase of $260, which will give the Government a hidden profit of $150. In other words, if the worker were allowed to pay the same tax rate on his increased pay his tax bill would be $150 less.

The situation gets worse each year if the tax rates are not indexed or adjusted. The following year—in 1979—if inflation continues at 8 percent, and the worker's wages manage to keep up, his taxes will increase by another 17 percent, and the Government's windfall will be about $305—for a whopping 2-year total of $455, taken almost by stealth.

The effects of taxflation become even harsher and more pronounced as the worker continues to climb up the income ladder. A family with a $30,000 yearly income in 1977 will have to earn $2,400 more in 1978—just to keep pace with an 8 percent inflation rate. However, at $32,400, the family's tax bill will rise by about $857. The Government's profit on that will be $423.

But income derived from wages is not the only area where taxpayers are hit by the impact of inflation. Let us look at another typical situation.

Take the case of a couple who bought a home back in 1952 for $25,000. Twenty-five years later, their children have grown up and have gone off on their own; the couple wants to sell their home for $60,000 and move into a small apartment. During the 25-year period, inflation has pushed the cost of living up 144 percent. In terms of purchasing power, the $25,000 that the couple paid in 1952 is worth or equal to about $61,000, today, 25 years later. So by selling the house for $60,000, the couple actually receives less than they paid for it.

But, under our current tax system, the Government decrees that the couple has realized a $35,000 capital "gain," and must pay tax on it. For the average taxpayer, that is a tax bill of about $7,000.

It is unconscionable that the Government imposes a tax in such a situation. The taxpayer has gained nothing at all—his dollars are just worth less.

I am very pleased to note that our colleagues in the House of Representatives have recognized this inequity in their version of the Revenue Act of 1978, which for the first time would index most capital assets (such as homes) to reflect increases in the cost of living.

This action on the part of the House is a very significant first step. But we should not stop with tax indexation of capital assets. As I have already pointed out, the effects of taxflation on wages is equally devastating. Congress should take the bull by the horns and should also index the tax brackets, the personal exemption and the standard deduction. This bold and justified step would operate to neutralize the tax impact of inflation.

Mr. President, the Finance Committee—soon to be joined by the full Senate—is in the process of determining the size and shape of this year's tax cut. I wholeheartedly support the idea of a tax cut. However, a tax cut is not the answer to taxflation.

Too often—and this year is a perfect example—tax cuts are determined by prevailing political winds, and they often do not make a taxpayer whole for past losses suffered through taxflation. And even if a tax cut appears adequate at the time, the benefits are quickly lost in the years following if the inflation spiral continues.

As I told the Finance Committee this morning, it is important that we restore integrity to our tax system and give American taxpayers reason to have confidence in it. Particularly in light of the citizen tax revolt that exploded in California and is sweeping the country today, this is the year to adopt effective tax limitation by enacting tax indexation.

A tax cut this year will not really provide a tax reduction for most workers; it will merely provide an adjustment of sorts for the inflation already suffered. However, if a tax cut were coupled this year with tax indexation for the future, then the next tax bill approved by Congress could be a real tax cut.

Tax indexation is an idea whose time has come. I urge the Senate to act accordingly.

---

## IBM PRESIDENT OUTLINES VITAL BUSINESS EFFORT ON REGULATORY REFORM

Mr. PERCY. Mr. President, the Business Roundtable has been an important ally to the Congress in its quest to weed out unnecessary regulation and put the lid on excess Government intrusions into the affairs of American businesses. Frank Cary, chairman of the board of IBM, heads a task force on regulation for the Business Roundtable. He has written a comprehensive summary of the Roundtable's current efforts and plans concerning the area of business and regulation. His statement outlines:

A study commissioned by the Business Roundtable which will assess the real and specific economic impacts of Government regulation on a variety of businesses;

A plan to make regulatory agencies more completely administered;

An invitation for businesses to play a more active role in the regulatory process;

A mandate for "sunset" legislation assuring that regulatory laws and agencies do not outlive their usefulness; and

A bid to small businesses, labor, consumers, and every American to recognize the impact excess regulation has on their lives and well-being and the importance of supporting meaningful legislation in this area.

Mr. President, I ask that this thoughtful commentary by Mr. Cary be printed in the RECORD at this point.

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

BUSINESS AND REGULATION

(By Frank T. Cary)

The growth of government regulation concerns us all. But in recent days, with the increased concern over inflation, the need for action has taken on new urgency. Clearly, the cost of regulation has emerged as a significant force in the higher and higher prices we are paying for almost everything we buy.

What must be recognized at the outset is that most regulation stems from genuine concern about genuine grievances. So it

would be unrealistic to set out to eliminate it. What is needed is a hard look at all regulations to make sure that they are both necessary and cost effective.

Recently, we've seen some progress in this area. The Administration has, among other actions, issued an Executive Order which requires that many existing regulations be periodically reviewed, and that major proposed regulations be analyzed for their economic impact.

But we still have a long way to go, and there are several actions I believe that must be taken.

The first thing is to get the facts. Despite all the rhetoric we've heard over the years about the enormous costs of regulation, only a few people have ever tried to measure those costs in any systematic, comprehensive way. The plain fact is that no common methodology exists by which a specific company or industry can measure the economic impact of a regulation on its business.

To remedy this, an organization of corporate chief executive officers called The Business Roundtable has commissioned a study to produce such a methodology and measure costs. This effort began in February with a pilot test at General Electric. In June, data collection began in over forty participating companies in a wide variety of industries, including autos, steel, chemicals, pharmaceuticals, utilities and financial organizations. The study will measure the incremental costs of government regulations affecting capital, research and development, administrative, operating, and direct product costs.

When the project is completed the end of this year, the cost impact of regulation on specific firms in a variety of industries will have been measured for the first time, and specific regulatory problem areas will have been pinpointed on the basis of cross-industry analysis. The Roundtable then plans to make its study methodology available for public use.

A second thing we have to do is make sure all regulations are competently administered. The Business Roundtable has made recommendations that would: require the President to appoint only fully qualified people to regulatory agencies; have the President submit, with the nomination, a statement of those qualifications; and require commissions to have a balance of backgrounds represented, including business.

The Roundtable rejects the contention that regulatory agencies should consist of people with no expertise in the business they're regulating. It also favors conflict-of-interest legislation not only for businessmen, but for everybody—including environmentalists, journalists, and public interest lawyers—to prevent abuse of a public trust for personal profit.

Third, we in business have to take initiatives in the regulatory process to help make it work better. We must cooperate with members of the Congress to assure that new regulatory legislation is as workable as possible; we must cooperate with the regulatory agencies to produce fair and efficient rules; and we must give sound business advice to government agencies that do economic analyses of new regulations.

The President's new Executive Order, which requires advance publication of proposed regulations and economic analyses, invites this kind of business participation.

Next, we have to get behind legislation to assure that regulatory laws and agencies don't outlive their usefulness. As you know, the Congress has been considering "sunset" legislation which provides for periodic review and renewal of agency charters, and "sunrise" legislation which requires that any new regulatory law specify its goals and include a provision for periodic review against those goals. The thrust of such legislation we applaud. And we should do what we can to see that an effective bill becomes law in this session.

Finally, I believe we have to get ourselves some allies—lots of allies—and join with them in speaking out. The plain fact is that everyone (and not just big business) suffers from excessive regulation—from what Walter Lippmann once called "the sickness of an overgoverned society."

For small business, needless regulations can mean a bar to entry into the marketplace or, even worse, a necessity to circumvent the law to keep the business alive.

For labor, excessive regulation can mean plants and mines closed or never started, and job opportunities destroyed.

For consumers, too much regulation can mean higher prices and fewer goods from which to choose.

For universities it can mean new financial burdens to meet the costs of compliance with federal standards.

And for every American, regulation has an impact on the rate of productivity increase, which it has already cut significantly over the past decade. Regulation also has had a decisive impact on our rate of inflation, which it is raising by as much as a full percentage point every year.

We cannot eliminate all federal regulations.

But we can make sure they make sense, work effectively, and become part of the solutions, not part of the problem. To this end, we need new facts, new requirements for regulators, new initiatives in business-government cooperation, new regulatory review laws, and new alliances.

We have a big job ahead of us, and we all must work together to achieve any measure of success.

---

## CHICAGO CITY COUNCIL URGES HALT TO SURPRISE MEDIA SEARCHES

Mr. PERCY. Mr. President, on May 31, the Supreme Court ruled in Zurcher against Stanford Daily that the police, armed with a warrant, could conduct surprise searches of newsrooms for evidence of a crime, even though no newsperson is suspected of any complicity in that crime. Since that decision, there has been grave concern expressed throughout the country about the potential power that this court decision places in the hands of the police. There is a growing fear that this decision may have a profoundly harmful impact on freedom of the press, and, indeed, on every citizen's right to privacy.

The idea of policemen rummaging around a newsroom—opening drawers, rifling files, searching through wastebaskets—is totally contrary to our fundamental belief in a free press. It is an image drawn from a police state.

A reporter's stock-in-trade is the ability to gather information, often from confidential sources. If we permit these police searches, such sources will soon dry up, and with them, the public's access to information independent of Government.

In response to the Supreme Court's ruling, the Chicago City Council Committee on Federal and State Legislation, under the distinguished chairmanship of Roman Pucinski, recently held hearings to examine the ominous implications of Zurcher. The committee received testimony from Clayton Kirkpatrick, editor of the Chicago Tribune, Paul Beavers, news director of WMAQ-TV, Don Reuben, attorney for both news operations, and Anthony Damato, professor at Northwestern Law School. The committee approved a resolution on freedom of the press which the City Council passed unanimously on July 7. The resolution strongly asserts that the Supreme Court's decision endangers the first amendment guaranty of freedom of the press. Furthermore, it urges Congress to pass legislation that would preserve freedom of the press, and to review present standards for search and seizure as they affect all citizens of the United States.

I congratulate Chairman Pucinski and his colleagues on their swift response to this very troubling decision by the Court.

Zurcher should not remain the law of the land. It is not only a blow to freedom of the press, but also a serious infringement of our right to privacy. Reporters are not the only ones threatened by this decision. This ruling unlocks the doors of innocent citizens' homes and offices for surprise searches for evidence. It renders almost meaningless the confidentiality promised by clergymen, doctors, psychiatrists, and lawyers. As Justice John Paul Stevens noted in his dissent in Zurcher:

> Just as the witnesses who participate in an investigation or a trial far outnumber the defendants, the persons who possess evidence that may help to identify an offender, or explain an aspect of a criminal transaction, far outnumber those who have custody of weapons or plunder. Countless law abiding citizens—doctors, lawyers, merchants, customers, bystanders—may have documents in their possession that relate to an ongoing criminal investigation. The consequences of subjecting this large category of persons to unannounced police searches are extremely serious. The ex patre warrant procedure enables the prosecutor to obtain access to privileged documents that could not be examined if advance notice gave the custodian an opportunity to object. The search for the documents described in a warrant may involve the inspection of files containing other private matter. The dramatic character of a sudden search may cause an entirely unjustified injury to the reputation of the person searched.

The Citizen's Privacy Protection Act, S. 3164, introduced on June 5, 1978, by Senators BIRCH BAYH, HOWARD METZENBAUM, and myself would put a halt to surprise searches of innocent people. It would require Federal, State, and local law enforcement officials to forego a search warrant and, instead, obtain a subpena for evidence of a crime when that evidence is in the hands of someone not suspected of the crime. The measure would still allow police to obtain a search warrant if there is probable cause to believe that the evidence would be destroyed, hidden, or removed. I urge my colleagues to act quickly on this legislation, and protect these fundamental rights.

Mr. President, I ask unanimous consent that the text of the Chicago City

Council's resolution on freedom of the press and the accompanying letter from Roman Pucinski, the chairman of the Council's Committee on Federal and State Legislation, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JULY 12, 1978.

Hon. CHARLES H. PERCY,
*Dirksen Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR PERCY: As Chairman of the Chicago City Council Committee on Federal and State Legislation I am enclosing for your information a copy of a resolution on "Freedom of the Press" unanimously passed by the City Council of the City of Chicago on July 7, 1978. This resolution memorializes the U.S. Congress ". . . to enact legislation which would protect newspapers and other media from governmental search where there is no reasonable basis for belief that the parties involved in the media have been guilty of any crime". This resolution further urges ". . . Congress to review present standards for search and seizure as they effect all citizens of the United States".

Sincerely,

ROMAN PUCINSKI,
*Chairman, Committee on Federal and State Legislation.*

RESOLUTION ON FREEDOM OF THE PRESS

Whereas the freedom of the press has been one of the tenets of American beliefs; and

Whereas newspapers and other media publicly disseminating information have historically been active and often essential in protecting our people from excess and improprieties whether by a private or governmental body; and

Whereas to preserve freedom of the press and to protect media investigation and analyses in our country it is essential that newspapers and other media publicly disseminating information be protected from governmental review of their files and records or governmental harrassment where there is no reasonable basis for belief that the parties involved in the media have been guilty of any crime; and

Whereas Congress has the obligation to uphold the principal of freedom of the press; and

Whereas the right of the various media to be protected in the confidential nature of their investigations has been endangered by a recent decision of the United States Supreme Court to the effect that the Constitutional guarantees of freedom of the press do not protect the media from governmental search and that a warrant for such search can be issued even though the party involved is not presumed guilty of or involved in any crime;

Now Therefore be it resolved that the City Council of the City of Chicago memoralize the Congress of the United States to enact legislation which would protect newspapers and other media from such governmental searches;

We further urge Congress to review present standards for search and seizure as they effect all citizens of the United States.

## WORKING MOTHER'S DAY

Mr. PERCY. Mr. President, many States across the Nation, including my own State of Illinois, will observe September 3, 1978 as Working Mother's Day. I would like to commend these States for the observation of a day in honor of these women who are making a dual contribution to our country.

As we all know, the number of women in the work force has increased dramatically in recent years. A substantial number of these women are the mothers of children under 18 years of age.

Since 1970, the total number of women in the civilian labor force has increased by almost 10 million, reaching 41 million in March of this year. Of this number, 16.1 million women are mothers of children younger than 18 or about 39 percent of all working women. It is important to note also that of all mothers 16 years of age or older with children under 18, more than half had joined the work force as of March.

Whether it is by choice or necessity that these women have joined the ranks of workers, their dual contribution to the growth of the economy and the strength of the American family deserves this special recognition.

Mr. President, I ask unanimous consent that the text of the proclamation signed by the governors of these States be printed in the RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

WORKING MOTHER'S DAY PROCLAMATION

Whereas, more than 15 million American women with children under the age of 18 are employed outside the home; and

Whereas, working mothers are making unique and substantial contributions both to the growth of the economy and the strength of the American family; and

Whereas, working mothers deserve special recognition for meeting their exceptional responsibilities in the home and in the world of commerce,

It is appropriate that particular attention be focused on the unique accomplishments of this segment of American society.

Now, therefore, September 3, 1978 is proclaimed as Working Mother's Day and families, individual citizens, labor and civic organizations, the media and business are urged to recognize and acknowledge the importance of the working mother and express public appreciation of her role in American society.

## PROCONSUMER INTERNATIONAL "OPEN SKIES" AIRLINE GUIDELINES ISSUED

Mr. PERCY. Mr. President, on August 22, 1978, the White House issued new policy guidelines for the conduct of international air transport negotiations. These bold, new guidelines can be expected to lead to lower air fares for consumers, improved direct international service to more U.S. cities, and more competitive opportunities for regularly scheduled and supplemental U.S. airlines wishing to serve international routes .

I am particularly interested in the provision which may lead to more of our cities being designated as gateway cities for international air service. For too many years, most international air travelers have been subjected to the inconveniences of having to travel to John F. Kennedy International Airport in New York City in order to reach Europe and the Middle East. This has been a particular hardship for the elderly and for families with young children who frequently must transfer between Kennedy and LaGuardia Airports after a long and tiring overseas flight.

In recent years, additional nonstop service to Europe has been approved from Atlanta, Miami, Dallas-Ft. Worth, Houston, New Orleans, and Tampa. Under this newly announced policy, hopefully, new nonstop service will be extended from Lambert International Airport in St. Louis to London and other international destinations. Approval of such service will be of direct benefit to my constituents in central and southern Illinois.

Additionally, Chicago has become increasingly identified as a major international gateway that merits additional service. For instance, Chicago was high on the list of new cities to be served by El Al-Israel Airlines under the recently signed bilateral agreement. And I am informed that United Airlines wishes to provide direct service from Chicago to Japan and mainland China.

In sum, I commend this administration for this policy. It has already been successfully carried forward in the recent landmark negotiations with the Government of Israel that will give El Al-Israel Airlines four new landing points in the United States at the lowest fares ever offered between the two countries.

I ask unanimous consent to have printed in the RECORD at this point a letter I wrote to Secretary of Transportation Brock Adams on July 20, 1978 in favor of the new policy, as well as a statement of support issued by President Carter, the policy statement itself, and an accompanying factsheet issued by the White House.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON
GOVERNMENTAL AFFAIRS,
*Washington, D.C., July 20, 1978.*

Hon. BROCK ADAMS,
*Secretary, Department of Transportation,*
*Washington, D.C.*

DEAR SECRETARY ADAMS: I am writing in support of implementation of the Department's proposed policy for the conduct of international air transportation negotiations involving the United States. It is a policy that is pro-consumer because it emphasizes competition and low fares. It is a policy which should also increase the frequency of international air transportation to many points across the United States, including Chicago and St. Louis which serves the central and southern portions of Illinois.

I am particularly pleased with the preamble to the policy which states that "Reliance on competitive market forces to the greatest extent possible in our international air transport agreements will allow the public to receive improved service at low costs that reflect economically efficient operations." This is precisely why I co-sponsored and actively supported the Air Transportation Regulatory Reform Act of 1978, which has now passed the Senate. This legislation emphasizes competitive market forces and gradually removes the control of government from domestic economic aviation policy matters. Although

the legislation does not deal with international aviation, the executive branch should implement many of the pro-competitive policies embodied in the bill in the area of international air transport.

I would like to comment on several of the proposed negotiating objectives contained in the policy, namely:

(i) Creation of new and greater opportunities for innovative and competitive pricing to respond to the varied service and price needs of different consumers.

Comment: Unquestionably, the encouragement of Freddie Laker-type Skytrain operations from cities other than New York and Los Angeles should be encouraged. I should note that Trans International Airlines (TIA) has applied for low-fare service from Chicago to Brussels on the one hand, and from Chicago to Hong Kong and Tokyo on the other. TIA proposes to charge low fares comparable to those of the Skytrain, but with advanced reservations and meals. This type of proposal should be promptly approved.

(ii) Liberalization of charter rules and elimination of restrictions on charter operations.

Comment: I enthusiastically support this concept.

(iii) Expansion of scheduled service through elimination of restrictions on capacity, frequency, and route and operating rights.

Comment: Airlines should be free to service any point on the globe from any city in the United States, without government interference, except on matters relating to safety. The position of the Israeli government, as enunciated in its recent bilateral air negotiations with the United States, should be applauded. We too need "open skies."

(iv) Elimination of discrimination and unfair competitive practices faced by U.S. airlines in international transportation.

Comment: Some of these restrictions are blatantly unfair and the U.S. government should move for their removal. It is difficult to understand why this government allows our flag carriers to be discriminated against and sometimes charged outrageously high user charges at the same time that we allow foreign carriers overflying our country to tap into our air traffic control facilities at no cost. Why should the American taxpayers continue to pick up the cost for providing free air traffic control services to foreign airlines that do not even land in this country and do not provide comparable assistance? This practice should come to an end.

(v) Flexibility to designate multiple U.S. airlines in international air markets.

Comment: Chicago is a good example of the lack of U.S. flag carrier service abroad. Pan Am does not even provide regularly scheduled service from Chicago; TWA provides one year-round daily 747 nonstop to London and a summertime-only nonstop to Paris; and Northwest Airlines provides a nonstop to Tokyo. There are many dormant routes not now being served by U.S. flag carriers out of Chicago and other cities. I would recommend that the new policy include a special international dormant route provision which would encourage airlines to apply for unused international route authority as part of an expedited approval proceeding. Domestic carriers that currently do not provide international service should be encouraged to pick up the nonstop routes to interior cities of Europe of those airlines which choose to concentrate their flights out of New York's Kennedy International Airport.

(vi) Encouragement of maximum traveler and shipper access to international markets by permitting service through more nonstop gateway cities and improving the integration of domestic and international airlines services.

*Comment:* On at least two occasions, Chicago has been denied international air service to Europe because of the insensitivity of U.S. Government officials to the economic and social needs for such service. For instance, in 1973, LOT the Polish Airlines, was denied access to Chicago from Warsaw and Sabena Belgian World Airlines was denied nonstop authority to Chicago from Brussels. It is difficult to understand who benefited from those decisions. These types of nonstop and direct service proposals, which would have the effect of increasing competition, should be approved in future air negotiations. With regard to St. Louis, which serves my constituents in central and southern Illinois, I have supported its designation as a "wild card" coterminal point from London as part of our current bilateral agreement with the United Kingdom. I would hope that, in the context of this new policy, U.S. and foreign flag carriers will be permitted to serve such points as St. Louis at service levels that conform to market demands. For instance, although daily nonstop service from St. Louis to many European cities may not be economically viable, weekly or semi-weekly service could prove to be economically feasible. Such service should be encouraged.

In sum, I support the framework and underlying principles of the Department's new international air transport negotiating policy and urge its prompt implementation. You are to be congratulated on your encouragement of this policy which, in the end, will better serve the nation, its economy, and the millions of air travelers who will directly benefit in terms of lower-priced, more-competitive air service abroad.

Sincerely,

CHARLES H. PERCY,
*U.S. Senator.*

---

[The White House]

UNITED STATES POLICY FOR THE CONDUCT OF INTERNATIONAL AIR TRANSPORTATION NEGOTIATIONS

INTRODUCTION

United States international air transportation policy is designed to provide the greatest possible benefit to travelers and shippers. Our primary aim is furthering the maintenance and continued development of affordable, safe, convenient, efficient, and environmentally acceptable air services. Our policy for negotiating civil air transport agreements reflects our national goals in international air transportation. This policy provides a set of general objectives, designed particularly for major international air markets, on the basis of which United States negotiators can develop specific negotiating strategies.

Maximum consumer benefits can be best achieved through the preservation and extension of competition between airlines in a fair market place. Reliance on competitive market forces to the greatest extent possible in our international air transportation agreements will allow the public to receive improved service at low costs that reflect economically efficient operations. Competition and low prices are also fully compatible with a prosperous U.S. air transport industry and our national defense, foreign policy, international commerce and energy efficiency objectives.

Bilateral aviation agreements, like other international agreements, should serve the interests of both parties. Other countries have an interest in the economic prosperity of their airline industries, as we do in the prosperity of ours. The United States believes this interest is best served by a policy of expansion of competitive opportunity rather than restriction. By offering more services to the public, in a healthy and fair competitive environment, the international air transport industry can stimulate the growth in traffic which contributes both to profitable industry operations and to maximum public benefits.

GOALS OF U.S. INTERNATIONAL AIR TRANSPORTATION POLICY

The U.S. will work to achieve a system of international air transportation that places its principal reliance on actual and potential competition to determine the variety, quality and price of air service. An essential means for carrying out our international air transportation policy will be to allow greater competitive opportunities for U.S. and foreign airlines and to promote new low-cost transportation options for travelers and shippers. Especially in major international air transport markets, there can be substantial benefits for travelers, shippers, airlines and labor from increasing competitive opportunities and reducing protectionist restrictions. Increasing opportunities for U.S. flag transportation to and from the United States will contribute to the development of our foreign commerce, assure that more airlift resources are available for our defense needs, and promote and expand productivity and job opportunities in our international air transport industry.

TRANSLATING GOALS INTO NEGOTIATING OBJECTIVES

U.S. International Air Transportation Policy cannot be implemented unilaterally. Our objectives have to be achieved in the system of international agreements that form the basic framework for the international air transportation system.

Routes, prices, capacity, scheduled and charter rules and competition in the market place are interrelated, not isolated problems to be resolved independently. Thus, the following objectives will be presented in negotiations as an integrated U.S. position:

1. creation of new and greater opportunities for innovative and competitive pricing that will encourage and permit the use of new price and service options to meet the needs of different travelers and shippers,

2. liberalization of charter rules and elimination of restrictions on charter operations,

3. expansion of competitive opportunity and elimination of restrictions on capacity, frequency, and route and operating rights,

4. elimination of discrimination and unfair competitive practices faced by U.S. airlines in international transportation.

5. flexibility to designate multiple U.S. airlines in international air markets,

6. encouragement of maximum traveler and shipper access to international markets by authorizing more cities for non-stop or direct service, and by improving the integration of domestic and international airline services, and

7. flexibility to permit the development and facilitation of competitive air cargo services.

EXPLANATION OF OBJECTIVES:

1. Pricing. The U.S. will develop new bilateral procedures to encourage a more competitive system for establishing scheduled air fares and rates. Charter pricing must continue to be competitive. Fares, rates and prices should be determined by individual airlines based primarily on competitive considerations in the marketplace. Governmental regulation should not be more than the minimum necessary to prevent predatory or discriminatory practices, to protect consumers from the abuse of monopoly position, or to protect competitors from prices that are artifically low because of direct or indirect governmental subsidy or support. Reliance on

competition and encouragement of pricing based on commercial considerations in the marketplace provides the best means of assuring that the needs of consumers will be met and that prices will be as low as possible given the costs of providing efficient air service.

2. Charters. The introduction of charters acted as a major catalyst to the expansion of international air transportation in the 1960's. Charters are a competitive spur and exert downward pressure on the pricing of scheduled services. Charters generate new traffic and help stimulate expansion in all sectors of the industry. Restrictions which have been imposed on the volume, frequency and regularity of charter services as well as requirements for approval of individual charter flights have restrained the growth of traffic and tourism and do not serve the interests of either party to an aviation agreement. Strong efforts will be made to obtain liberal charter provisions in bilateral agreements.

3. Scheduled Services. We will seek to increase the freedom of airlines from capacity and frequency restrictions. We will also work to maintain or increase the route and operating rights of our airlines where such actions improve international route systems and offer the consumer more convenient and efficient air transportation.

4. Discrimination and Unfair Competitive Practices. U.S. airlines must have the flexibility to conduct operations and market their services in a manner consistent with a fair and equal opportunity to compete with the airlines of other nations. We will insist that U.S. airlines have the business, commercial and operational opportunities to compete fairly. The United States will seek to eliminate unfair or destructive competitive practices that prevent U.S. airlines from competing on a equal basis with the airlines of other nations. Charges for providing airway and airport properties and facilities should be related to the costs due to airline operations and should not discriminate against U.S. airlines. These objectives were recognized by the Congress in legislation enacted in 1975, and their attainment is required if consumers, airlines and employees are to obtain the benefits of an otherwise competitive international aviation system.

5. Multiple Airline Designations. The designation of new U.S. airlines in international markets that will support additional service is a way to create a more competitive environment and thus encourage improved service and competition pricing. Privately owned airlines have traditionally been the source of innovation and competition in international aviation, and it is therefore particularly important to preserve for the U.S. the right of multiple designation.

6. Maximum Access to International Markets. Increasing the number of gateway cities for non-stop or direct air service offers the potential for increasing the convenience of air transportation for passengers and shippers and improving routing and market opportunities for international airlines. In addition, enhancing the integration of U.S. airline domestic and international air services benefits both consumers and airlines.

7. *Cargo Services.* We will seek the opportunity for the full development of cargo services. Frequent demand for such services requires special equipment and routes. Cargo services should be permitted to develop freely as trade expands. Also important in the development of cargo services are improved facilitation, including customs clearance, integration of surface and air movements, and flexibility in ground support services.

NEGOTIATING PRINCIPLES

The guiding principle of United States aviation negotiating policy will be to trade competitive opportunities, rather than restrictions, with our negotiating partners. We will aggressively pursue our interests in expand air transportation and reduced prices rather than accept the self-defeating accommodation of protectionism. Our concessions in negotiations will be given in return for progress toward competitve objectives, and these concessions themselves will be of a liberalizing character.

Proposed bilateral agreements which do not meet our minimum competitive objectives will not be signed without prior Presidential approval.

---

[The White House]

UNITED STATES INTERNATIONAL AVIATION POLICY FACT SHEET

The United States Policy for the Conduct of International Air Transportation Negotiations is a formal statement of the principles that guide our negotiations of bilateral air services agreements with foreign countries. Bilateral agreements between the United States and a foreign government set forth the rules that govern air transport services between the U.S. and that foreign country. The agreements specify the cities authorized for service, the procedures for regulating fares and prices, aviation security (anti-hijacking) commercial practices relating to aviation, and the type of airlines (scheduled/charter) that may provide service.

THE U.S. INTERNATIONAL AVIATION POLICY

The theme of our policy is to reduce government restrictions upon international aviation and rely on competitive market forces to the greatest extent possible. The international aviation policy states the following objectives:

Encouragement of price competition.

Elimination of restrictions on charter travel.

Elimination of restrictions on capacity, frequency, and route of operating rights.

Elimination of discrimination and unfair competitive practices faced by U.S. airlines.

Authorization of more cities for nonstop or direct service.

Development of competitive air cargo services.

RECENT NEGOTIATIONS

Principles embodied in this policy have already produced a number of significant competitive developments in international air travel, and are intended to produce additional benefits to travelers and shippers in bilateral negotiations to be held in the near future. Within the last year the U.S. has held negotiations with 26 countries to discuss more liberal bilateral agreements. Additional discussions are planned for the fall.

The agreement signed with Israel is the most recent example of a bilateral agreement that meets our policy objectives. The U.S.-Israeli agreement includes the following highlights:

Israel acquires two additional U.S. points immediately and two more on August 1, 1979. At this time, Israel has a route only to New York. Israel is free to select the four additional U.S. points that it will serve.

Either country may designate an unlimited number of airlines to operate scheduled and/or charter services.

Charter flights may be operated between any U.S. city and Israel without restriction on numbers. Charters will operate according to the charter rules of the country of origin of the traffic and do not require the prior approval of the other country. This provision will expand the availability of charter flights. Charter flights were not covered by the previous agreement with Israel, and for many years Israel banned charter flights completely. Only in the past two years has it accepted charters from the U.S. West Coast under restrictive conditions.

Price competition is encouraged. The U.S. and Israeli governments will intervene with airline pricing decisions only when air fares are predatory, discriminatory or an abuse of monopoly position. Beginning August 1, 1979, air fares may be disapproved only if both governments agree to such action.

Recent agreements with other countries which meet our international aviation policy objectives have already produced expanded travel opportunities and lower fares. Results of recent agreements include:

1. Fare Reductions:

Our policy of seeking international agreements which permit airlines to set prices freely in the competitive market place has already resulted in price reductions.

The table below sets out some of the fare reductions achieved in transatlantic markets.

| | Lowest available reserved seat fare [1] | | Percent reduction over 1977 fare | July 1978 standby fare | Percent reduction over 1977 fare |
|---|---|---|---|---|---|
| | July 1977 | July 1978 | | | |
| New York-Amsterdam | $477 | $340 | 29 | NA | ..... |
| New York-London | 440 | 299 | 32 | [2] $248 | 44 |
| Boston-Amsterdam | 472 | 290 | 39 | 279 | 41 |
| Dallas/Fort Worth-London | 631 | 392 | 38 | 349 | 45 |
| Los Angeles-London | 620 | 441 | 29 | 441 | 29 |

[1] Low standby fares were not available in the summer of 1977
[2] Laker fare; exact cost in U.S. dollars depends on exchange rate.

Major new agreements with Israel and Mexico are also expected to result in significantly reduced prices and expanded travel opportunities for consumers within the next year.

2. Expanded Air Service:

Recent agreements have increased authority for both U.S. and foreign airlines to provide more non-stop services from U.S. cities to foreign countries.

New services that have begun include:
Atlanta–London.
Dallas/Ft. Worth–London.
Houston–London.
Miami–Paris.
Miami–Amsterdam/Frankfurt.
Tampa–Amsterdam/Frankfurt.
Houston–Guadalajara.
Los Angeles/San Francisco–Guadalajara.
U.S. West Coast–Singapore.
Boston–Amsterdam.
Atlanta–Brussels.

Authorized new services include:
Los Angeles–Amsterdam.
Los Angeles–Auckland/Sidney.

Braniff and Delta have instituted new transatlantic services. Northwest has also been authorized for a new transatlantic service but the service has been delayed by a work stoppage. In addition existing international airlines including American, Pan American, Continental, TWA, National, Western, Hughes Air West, and Flying Tiger have received expanded international authority.

3. Expanded Charter Service:

In the past many countries have restricted charter services. These restrictions have prevented consumers both in the U.S. and overseas from enjoying the benefits of international travel. A number of foreign governments have agreed to reduce or eliminate restrictions on the availability of low cost charter trips. In some cases, such as Israel, low cost charters (which had been severely restricted) will be permitted to operate from all cities in the U.S. for the first time. The Administration has obtained agreement to reduce or eliminate restrictions on charters

with the following countries: United Kingdom, Netherlands, Poland, Romania, Israel, Belgium, Yugoslavia, Singapore Republic, Mexico, Paraguay, Liberia, Senegal.

4. Encouraging Competitive Practices:

In many cases foreign countries restrict the ability of U.S. airlines to compete for business. For example, some countries refuse to permit U.S. airlines to load and unload their own aircraft and check in their own passengers, preferring to leave these services to government monopolies. Also, some countries have refused to issue custom licenses or other needed licenses to U.S. airlines. The Administration is actively engaged in seeking to eliminate these restrictions.

---

[The White House]

PRESIDENTIAL STATEMENT

Ever since I became President, I have been seeking to introduce the airline industry to the benefits of competition both at home and abroad.

Two events highlight that effort. I am today releasing a formal statement of international aviation policy for the United States. Recently, representatives of the U.S. and Israel signed a new air service agreement which reflects the spirit of that policy.

Our policy seeks to encourage vigorous competition, with the goals of permitting lower fares, better service to more cities, and fewer government restrictions on charter travel. Travelers of many countries have already benefited from recent agreements which reflect our competitive policy. I hope that our formal statement, by making our position clear, will ease the difficult process of negotiating additional air agreements with other countries.

The U.S.-Israeli agreement signed recently achieves these goals of reducing government restrictions. It will permit healthy competition among our airlines, and, by giving Israel authority to serve four additional U.S. cities, it will greatly expand Israel's opportunity to provide air service between our countries.

---

## ENOUGH OF MR. YOUNG

Mr. HARRY F. BYRD, JR. Mr. President, John B. Oakes, the former senior editor of the New York Times and a widely known liberal journalist, has written in an article published in the August 3 edition of the Times that Ambassador Andrew Young is temperamentally unfit for his job.

Mr. Oakes complained that Ambassador Young continues to be treated by President Carter as "the indispensable man for the third world—as though no other American could be found who would pursue American foreign policy in support of black freedom, equality and independence in Africa without at the same time finding it occasionally necessary to derogate our own institutions, give propaganda ammunition to our enemies and enrage our friends."

It has a been a few weeks now since Ambassador Young has caused embarrassment to the United States. I suppose we should be grateful for that.

However, his most recent gaffe was of a most serious character. At a particularly sensitive point in the conduct of foreign policy, Mr. YOUNG made a public statement which was a great embarrassment to President Carter and damaging to the national interest.

Just as the President was putting pressure on the Soviet Union because of Russia's harsh treatment of dissidents, Andrew Young proclaimed to the world that the United States has "hundreds, perhaps even thousands, of political prisoners."

This assertion was not only wrong but dangerous.

In his article Mr. Oakes cites this incident as an example of Ambassador Young's "egocentric frame of reference," meaning that he was thinking only of his own role in the civil rights movement and not of the effect of his unjust and unwise words on the Soviet Union and his own country.

I agree with the analysis made by Mr. Oakes, and I ask unanimous consent that his article, "Enough of Mr. Young," be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 3, 1978]

ENOUGH OF MR. YOUNG

(By John B. Oakes)

Once again the United States Ambassador to the United Nations, Andrew Young, has played to the audience with an offhand, eye-catching statement embarrassing to his nominal boss, the President of the United States, and injurious to the conduct of a rational American foreign policy.

Once again there have had to be explanations, retractions, apologies or excuses to cover the self-indulgent comments of this disarming enfant terrible of the Carter Administration.

Once again Mr. Young has made the President and the country look ridiculous in the eyes of the world, confused our friends and handed a delicious piece of propaganda to our opponents.

His statement to a French newspaper the other day that "hundreds, perhaps even thousands, of . . . political prisoners" languish in American jails was made just at the moment when Mr. Carter was trying to place maximum heat on Moscow, in the name of human rights, during the dissidents' trials. It is a measure of Mr. Young's temperamental unfitness for the job he still holds that, when he gave that interview, he was obviously thinking not of its effect on the Russians or the Americans, or on the dissidents or human rights, but rather only of himself and of his own experience in the civil rights struggles of the past.

Such an egocentric frame of reference might be permissible if he were running for political office again; it is unacceptable when he speaks as a Cabinet-level representative of the United States Government.

When in the same interview he was asked about the recent massacres of men, women and children in several missionary outposts in Rhodesia, Ambassador Young—who is the principal American voice in the efforts to negotiate between the transitional Rhodesian Government of Ian D. Smith and the guerrillas—observed that "a planned operation of attacks against missions . . . can only have come from the Smith camp." Is it the considered American position that it is the Smith regime and not the guerrilla Patriotic Front that is responsible for these bestial murders; or was this merely another of the American Ambassador's frequent offhand remarks made in his official capacity but reflecting not facts or evidence but emotional commitment, of a piece with his freely thrown charges of racism against persons or peoples whom he dislikes or with whom he is in disagreement?

While it surely pleases the African supporters of the guerrillas, not to mention their Soviet backers, the extreme partisanship of Mr. Young could only erode whatever influence the United States has left as "honest broker" with the transition biracial Government in pursuing negotiations with the Patriotic Front.

At the same time, as Mr. Carter has repeatedly emphasized, Ambassador Young has unquestionably played a major part not only in reaching the recent agreement on Namibia but also in establishing better rapport with the third world in general and several of the black African states in particular. He has accomplished this feat at least in part by unilaterally adopting their policy line on such issues as use of Cuban troops in Angola and Ethiopia—already under attack even by numerous third-world countries, and clearly divergent from the stated policies of the United States Government, for which Mr. Young purportedly speaks. How deep and lasting will be the popularity thus gained for the United States in black Africa by such tactics is uncertain; what is certain is that it has been achieved at considerable and unnecessary cost to the image of the United States, further confusing an already confused foreign policy. Mr. Young's loose statements as United States Ambassador are a luxury that American policy, shaky as it is, cannot afford.

And yet, receiving at most a tap on the wrist for repeated verbal offenses that would have resulted in instant dismissal for anyone else, Mr. Young continues to be treated by President Carter as the Indispensable Man for the third world—as though no other American could be found who would pursue American policy in support of black freedom, equality and independence in Africa without at the same time finding it occasionally necessary to derogate our own institutions, give propaganda ammunition to our enemies and enrage our friends.

A recent New York Times/CBS Poll showed that the percentage of Americans who approve of "the way Jimmy Carter is handling his job as President" has dropped by 26 percentage points in little more than a year, to an unprecedented low (in June) of 38 percent. Perhaps Mr. Carter should consider whether one factor in this deplorable showing is his tendency to allow personal and political friendship, even in the most sensitive appointive posts, to take priority over the broader national interest.

---

## SENATE ACCOMPLISHMENTS

Mr. ROBERT C. BYRD. Mr. President, this past week—the week of August 21—has been one of extraordinary accomplishment in the U.S. Senate.

On Tuesday, August 22, the Senate passed, 68 to 32, a joint resolution which proposes an amendment to the Constitution providing for voting representation in the House and Senate for residents of the District of Columbia. This vote was the culmination of decades of effort to enact such an amendment. Now the measure has been sent to the States for their concurrence or disapproval. It seems that at least three State legislatures are considering early action on the proposed amendment. Tuesday, August 22, was an historic day for the residents of the Federal city. If three-fourths of our State legislatures approve the adoption of the amendment, August 22 will become an important milestone in our country's constitutional history.

Action on a constitutional amendment is quite an important achievement any day of the week. But that is just the beginning of what the Senate accomplished in these few days. Yesterday, we passed a civil service reform bill—the

first major revision of the civil service system in 95 years. This measure was one of President Carter's top priorities. It is also a priority for millions of taxpayers who want to see Government streamlined and made more efficient. Enactment of civil service reform will have a far-reaching and beneficial impact on virtually every program administered by the Federal Government.

On Thursday the Senate completed action on, and sent to conference, the Education Amendments of 1978, extending for 5 years programs contained in the Elementary and Secondary Education Act of 1965 (ESEA). This legislation renews our commitment to provide educational opportunities to low-income and disadvantaged children who might otherwise receive inadequate schooling.

By clarifying objectives and simplifying requirements, the bill improves and strengthens existing programs. New initiatives have been added to address the nationwide problem of declining test scores. Title II, for example, will provide financial assistance to programs for teaching basic skills—reading, writing, and arithmetic. The bilingual education program is improved, making it more responsive to the special educational needs of children from the bilingual community.

Throughout the bill, regulations and guidelines are simplified to facilitate smoother implementation and operation of the programs by States and local education agencies.

In the area of employment, the Senate reauthorized existing job and job-training programs under the Comprehensive Employment and Training Act and established several new initiatives in the program. This legislation continues in fiscal year 1979 the current level of 725,000 public service jobs.

At a time when there is a pressing need to wind down inflation, the CETA legislation provides a way to reduce unemployment among the hard-to-employ without exacerbating inflationary pressures. It accomplishes this in part by calling for job-creation programs targeted to those who are generally excluded from the job-market because of a lack of training. The CETA program puts people to work—people who will pay taxes and contribute to our economic growth.

Today, the Senate sent to the House a major conference report to reform customs procedures. It will serve not only to modernize, but to simplify, customs procedures which affect our trade and commerce. Among the provisions of the bill which will be of interest to many Americans who travel abroad is an increase in the personal exemption for returning residents. It has long been recognized that more efficient management of customs and entry procedures is necessary and this measure will go far toward meeting this need.

In addition, the Senate completed action on a group of bills dealing with various tax issues. Two of these measures deal with unemployment compensation, including the eligibility period for extended unemployment compensation benefits and the reporting period for the National Commission on Unemployment Compensation.

We have also passed legislation affecting the treatment of private foundations and have adopted an amendment to provide for a tax credit for residential energy conservation.

In the area of energy, the Senate agreed to and sent to the President the conference report on the Outer Continental Shelf Lands Act—a bill which should spur development and production of offshore oil and natural gas. To achieve this, the measure includes two important policy provisions—improved bidding practices and a tighter system for resource assessment.

In other areas, the Senate passed and sent to conference a bill designed to improve the self-sufficiency of the District of Columbia pension fund. The proposed legislation also contains important provisions intended to prevent abuse of disability pensions—a situation which has resulted in an expensive and inadvertent drain on the pension fund.

The Senate passed and sent to the President the conference report on the military construction appropriations bill for fiscal year 1979—an appropriations bill which is almost 9 percent below the budget estimate. This is the third regular appropriations bill for fiscal year 1979 on which the Congress has completed all action.

Having agreed to the conference report on the second supplemental appropriations bill for fiscal year 1979, the Senate also sent this measure to the President.

Considerable progress has been made on the highway bill. Two major components of the final measure, dealing with safety and with the construction and maintenance of our Federal highway system, have been disposed of. The importance of our national highway system can hardly be overemphasized; it is crucial to the economic viability and growth of many regions of the country.

Mr. President, I have mentioned the major accomplishments of the week; I have not attempted to list each and every piece of legislation which the Senate has passed. Nor have I attempted to name each Senator who has made a special contribution in these areas—the list would be too long.

The Senate has come in early and worked late every day this week. Senators from both sides of the aisle have made major contributions to the important legislation on which we have acted. Committee and subcommittee chairmen, ranking minority members of committees and subcommittees, sponsors of amendments, participants in key debates—the entire Senate membership is responsible for the very constructive week which we have had.

I want to thank the distinguished minority leader, Mr. BAKER, and the minority whip, Mr. STEVENS, for their cooperation and assistance. On this side of the aisle, I especially want to thank the assistant majority leader, Mr. CRANSTON, for his invaluable help, and Mr. INOUYE, the Secretary of the Democratic Conference, and SPARKY MATSUNAGA, chief deputy whip, for their invaluable help.

## APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. PROXMIRE). The Chair, on behalf of the Vice President, pursuant to Public Law 95–45, appoints the following Senators to attend the 65th Interparliamentary Union Conference, to be held in Bonn, Germany, September 2–14, 1978: the Senator from Vermont (Mr. STAFFORD), Chairman, in lieu of the Senator from Alabama (Mr. SPARKMAN), resigned; and the Senator from Virginia (Mr. SCOTT).

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ROBERT C. BYRD). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I yield the remainder of my time to the distinguished senior Senator from Wisconsin.

## REFERRAL OF BILL

Mr. PROXMIRE. Mr. President, I thank the Senator from Kentucky.

Very briefly, I send to the desk a bill and ask for its appropriate referral.

The PRESIDING OFFICER (Mr. ROBERT C. BYRD). The bill will be appropriately referred.

## THE CAMBODIAN MASSACRE: IT IS TIME TO RATIFY THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, for hundreds of thousands of Cambodians, this speech comes too late. Hundreds of thousands, perhaps more than a million, of Cambodia's 7 million people have been killed.

And who has killed them, Mr. President? Is it some disease, some natural disaster, or perhaps a long and bloody war?

The startling, shocking, outrageous truth is that none of these is responsible. Not disease, not flood, not earthquake, not hostile enemy, none of these bears the blame for the decimation of the Cambodian people.

And who is the villain?

The Cambodian Government.

How can this be true? How can the government of so-called Democratic Kampuchea—how can that government undertake the massacre of its own people? To speak of this group of executioners as a government is a perversion of the word.

In fact, that is the final, incomprehensible outrage: the Cambodian people have been the victims of a genocide perpetrated in their own name.

It is too late to save these hundreds of thousands of Cambodians. Whatever the world may eventually do to halt the massacre, it is too late for perhaps a million people.

Mr. President, we cannot allow this to happen again. There is a simple step

we can take. It is the first step down a road of international cooperation to prevent these senseless crimes. It may not stop genocide from happening in every case, but it is one strong, international step to that end.

And what is that step, the step we can and must take?

Mr. President, we can ratify the Convention for the Prevention and Punishment of the Crime of Genocide. And I emphasize that word, "prevention." We must prevent Cambodia from happening again. Eighty-three nations have signed the treaty, but we have held out. And as long as we, the leader of the free world, continue to hold out, the power of the treaty is weakened.

Let us sign the Genocide Convention and take the first step toward the prevention of mass murder.

Mr. President, it is still not too late.

(Mr. MATSUNAGA assumed the chair.)

## A DIGNIFIED OLD AGE FOR AMERICANS

Mr. ROBERT C. BYRD. Mr. President, as the decade of the seventies draws to a close, as we look back just 2 years and remember our Nation's Bicentennial, let us remember that since our country's founding we have more than doubled the average lifespan of our people, and that, today, nearly 11 percent of our population are over 65 years of age. Some 23½ million of our citizens are over 65. They constitute a steadily growing proportion of our population.

These men and women have contributed mightily to the strength and prosperity of the country. It is appropriate that the Federal Government and the Nation establish the goal of a dignified and meaningful old age for our citizens. Yet this goal has not become a reality for many elderly citizens.

About one-half of the families headed by an older person have annual incomes which are much lower than those of families headed by an individual under 65. The median income of an older person living alone is only about one-half as much as that of an individual under 65 living alone. Some 3.3 million, or one-seventh of the elderly population, are reported to have incomes below the poverty level. This statistic, though distressing, does represent an improvement over 1970, when about one-quarter of the elderly were below the poverty level.

Many of our elderly become poor due to retirement. Retirement income simply does not balance out the loss of earnings from employment. The improvement in living standards which has been recorded since 1970 is largely explained, therefore, by increases in social security benefits. Social security is the economic backbone for the vast majority of older Americans; without these benefits, millions of people over 65 years of age would be forced into poverty, or onto the welfare roles. It has been estimated that, among the 34 million recipients of social security benefits (including old-age, survivors, and disability insurance), some 7 million beneficiaries are older Americans who otherwise would live in poverty.

Inflation hits very hard on older Americans because of their dependence on fixed incomes. Price inflation for certain commodities and services impacts much more severely on the elderly because of their spending patterns. Older Americans spend proportionately more of their income on food, housing, and health care than the population at large. Health costs are a particular problem. Between 1965 and 1976 the costs of health care in the United States more than tripled. Meanwhile, the health care costs for each person over 65 are about three and one-half times as much, per year, as per capita costs for those under 65. Older people represent about 11 percent of the total population, but account for 29 percent of total personal health care expenditures.

A more recent, but equally debilitating problem is the cost of energy. Rising energy costs have had a devastating impact on many older Americans. During 1976, depending on region, low-income elderly persons spent between 16 and 27 percent of their disposable income on energy for their homes. Rising energy bills place a particularly heavy burden on those elderly least able to bear it. Older Americans with annual incomes of less than $5,000 appear to spend a bigger chunk of their disposable income for household energy than those in more comfortable brackets.

Because energy prices, like health care costs, have been rising much faster than the Consumer Price Index, they are steadily outstanding social security cost-of-living increases.

Congress has taken cognizance of the energy needs of older Americans and provided, in several different pieces of legislation, some tools for addressing these needs. Thus the Community Services Administration, the Department of Housing and Urban Development, and the Farmers Home Administration are each authorized and directed to carry out weatherization programs for low-income elderly persons. With respect to health care costs, nearly 68 percent of these costs are paid for by public programs for the elderly.

Older Americans face other problems as well. Many of them would like to continue working past the age of 65, but face employment barriers. Statistics show that the middle-aged and older worker faces a greater risk of being unemployed for longer periods of time than do younger workers.

The 95th Congress acted to correct this problem and to assure that retirement is a choice rather than a forced state of inactivity. Passage of the Age Discrimination in Employment Act, now a public law, eliminated the upper-age limit of 65 for most Federal employees, and established protections against discrimination in employment for non-Federal older workers.

In the area of housing, reliable data is difficult to find, but it is generally acknowledged that a significant number of the elderly live in substandard housing. This is an issue which Congress has sought to address through various programs—in particular, through the section 8 subsidized housing program and through the section 202 direct loan program for renovation or construction, both of which are administered by the Department of HUD. Although some advances have been made in providing adequate housing to the elderly, the need for more housing still outstrips existing programs.

Another problem area for older Americans is transportation. According to the Bureau of Labor Statistics, transportation represents the third largest expenditure for older persons. Rising transportation costs make it ever more difficult for low-income older people to take advantage of mass transportation, or to own an automobile. Because many older people live in rural areas, distances become an even greater barrier to meaningful participation in the mainstream of society.

The growing congressional and national interest in mass transit systems that are free of architectural obstacles has resulted in some greater availability of these public services to the older person. Special transit services are now being developed and tested in more isolated, rural areas; it is hoped that these services will help to provide reasonably priced transportation to the elderly and disabled.

There are many other important services which the Federal Government—in many cases in conjunction with State and local governments and volunteer organizations—is helping to bring within reach of low-income elderly persons. Perhaps the most important of these functions is the provision of adequate food and nutrition to the elderly, particularly to those who are homebound. In addition, important support services are provided in many other areas, such as counseling and legal assistance.

Mr. President, Congress has acted on many pieces of legislation affecting the elderly. I would like to take this opportunity to have printed in the RECORD a list of those pieces of legislation passed by the 95th Congress to date which are designed to improve the lives and the living conditions of older Americans. This list cannot purport to exhaust every single legislative action of importance to the elderly; there are some instances of oversight hearings or investigations, or studies which do not result in legislation, but which do impact significantly on current practices, regulations, or the administration of a program. I do hope that the following list, which I request be included in the RECORD, will summarize the important measures enacted by the 95th Congress in this area.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

OLDER AMERICANS LEGISLATION—95TH CONGRESS

The Age Discrimination in Employment Act—now a public law—to protect against discrimination in employment of older workers.

The Supplemental Housing Authorization Act of 1977—now a public law—which included provisions affecting the Section 8 rent supplement program which should result in more housing units for low-income elderly.

Social Security Amendments of 1977—now a public law—which assured the financial

soundness of the Social Security Trust fund and made other improvements in the law.

Nutrition Program Amendments and Amendments to the Food Stamp Act—now public law—of importance to low-income elderly.

Legal Services Corporation Act Extension—now a public law—which assures priority services for the elderly.

Reduced Air Fare for the Elderly—now a public law—which authorizes reduced fares on a space-available basis.

Public Utility Rate Reform—has passed the Senate—provides that older persons receive the lowest possible rate for electricity.

Energy Tax Bill—has passed the Senate—provides for a refundable tax credit for older Americans for residential energy costs.

The Older Americans Act—has passed the Senate—contains the authorization for numerous programs affecting the elderly.

Housing and Community Development Amendments of 1978—has passed the Senate—includes several programs of importance to low-income elderly.

National Mass Transportation Assistance Act—has passed the Senate—provides that mass transit facilities and services be designed for effective use by the elderly and for increased attention to transportation needs of the elderly.

## AMERICAN JOURNALISTS AND THE SOVIET UNION

Mr. ROBERT C. BYRD. Mr. President, the Soviet Union has indicated that it does not intend to take further action against two United States journalists who had earlier been charged with slander.

I welcome the Soviet decision to halt the legal proceedings and hope this will bring an end to this travesty.

The Soviet Foreign Ministry gave the reporters a formal warning, but did not suspend their accreditation. The Foreign Ministry said it was acting in the interest of better relations with the United States.

The Soviet courts have dropped the case against the two journalists and ended the demand that the reporters retract their story on Soviet dissidents.

However, the reporters, Hal Piper of the Baltimore Sun and Craig Whitney of the New York Times, had previously been required to pay fines and court costs. The reporters refused to attend the court hearings on their case, in addition to refusing to retract their stories, which they maintained were balanced and accurate.

Mr. President, occurrences such as this campaign of harassment against these two U.S. correspondents can only undercut the prospects for any improvement in relations between the Soviet Union and the United States. I hope that the Soviets will recognize the damage that has been done by this incident and not allow it to be repeated.

I further hope that the treatment of Mr. Piper and Mr. Whitney will not have a chilling effect on U.S. reporters in the Soviet Union. This may have been intended as an act of intimidation. I am confident, however, that it will not deter American journalists from their efforts to report accurately and thoroughly on events in the Soviet Union.

Mr. President, on June 28, when charges had just been filed against Mr. Piper and Mr. Whitney, I introduced a resolution (S. Res. 503) condemning the action by the Soviet Government. Now, as then, I urge the Soviet Union to desist from further harassment and intimidation of journalists stationed in that country.

## AUTHORIZATION FOR THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, AND THE ACTING PRESIDENT PRO TEMPORE TO TAKE CERTAIN ACTION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Vice President of the United States, the President pro tempore, and the Acting President pro tempore may be authorized to sign all duly enrolled bills and duly enrolled authorizations during the recess of the Senate over until 10 o'clock on Wednesday, September 6, 1978.

The PRESIDING OFFICER. Without objection, it is so ordered.

## AUTHORIZATION FOR THE SECRETARY OF THE SENATE TO RECEIVE MESSAGES FROM THE PRESIDENT AND THE HOUSE OF REPRESENTATIVES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to receive messages from the President of the United States and from the House of Representatives during the recess of the Senate over until September 6, 1978, at 10 a.m., and that they be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

## AUTHORIZATION FOR COMMITTEES TO FILE REPORTS ON THURSDAY, AUGUST 31, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees may be authorized to file reports on Thursday, August 31, 1978, between the hours of 10 o'clock a.m. and 3 p.m. except for the reporting of S. 50, the Humphrey-Hawkins bill, on which there will be an objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RELEASE OF MATERIAL PERTAINING TO POSSIBLE CRIMINAL ACTIVITIES

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. JACKSON, I send to the desk a resolution dealing with the release of certain documents and ask for its immediate consideration. This has been cleared all the way around.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 550) to permit the withdrawal and release of certain documents, papers or other information pertaining to possible criminal activities.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

● Mr. JACKSON. Mr. President, I offer today a resolution to permit the withdrawal and release of documents, testimony and other information obtained by, and in the possession of, the permanent Subcommittee on Investigations of the Committee on Governmental Affairs.

By letter of July 11, 1978, the U.S. Attorney's Office, northern district of Georgia, requested that the Subcommittee supply copies of transcripts of executive session testimony and other statements and materials received by subcommittee staff during the course of a subcommittee investigation into certain homicides in the U.S. Penitentiary at Atlanta, Ga., which activities were focused upon as part of an authorized inquiry into organized crime activities in south Florida and at the Atlanta Penitentiary. The U.S. Attorney's Office is pursuing possible criminal violations by certain inmates at the Penitentiary in connection with the murder of Vincent Papa in the institution.

Pursuant to rule XXX of the standing rules of the Senate, and the privileges of the Senate, such information, documentation, statements and testimony may not be released without a resolution of the Senate.

Accordingly, Mr. President, I offer the following resolution, approved by the Committee on Governmental Affairs, and ask that this resolution be adopted.●

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 550) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

To permit the withdrawal and release of certain documents, papers or other information pertaining to possible criminal activities.

Whereas, the United States Department of Justice, through the Office of the United States Attorney for the Northern District of Georgia, is carrying out an investigation of alleged criminal activities of certain individuals relating to the murder of Vincent Papa at the United States Penitentiary-Atlanta; and

Whereas, the Office of the United States Attorney for the Northern District of Georgia has formally requested by letter dated July 11, 1978, that the Subcommittee transmit to the United States Attorney for the Northern District of Georgia certain transcripts, statements and recordings of interviews with and statements by Gary Bowdach and others, as well as certain other pertinent documents in the possession of the Subcommittee; and

Whereas, certain of the requested information relevant to the inquiry of the United States Attorney was obtained by the Subcommittee in executive session testimony and certain of the information was obtained by Subcommittee staff in the course of their duties as employees of the Permanent Subcommittee on Investigations; and

Whereas, by the privileges of the Senate of the United States and by Rule XXX of the Standing Rules of the Senate, executive session testimony and information secured by staff employees of the Senate pursuant to their official duties may not be revealed without the consent of the Senate:

Therefore, be it

*Resolved*, That the Permanent Subcommittee on Investigations is authorized, in the discretion of and at the direction of its

Chairman, to provide the United States Attorney for the Northern District of Georgia, with all or portions of copies of executive session testimony transcripts, statements and recordings of interviews with and statements by Gary Bowdach and others and such other documents as shall be pertinent to alleged illegal activities of certain individuals currently under investigation by that office in connection with the murder of Vincent Papa.

SEC. 2 The Secretary of the Senate shall transmit a copy of this Resolution to the United States Attorney for the Northern District of Georgia.

## FEDERAL EMPLOYEE HEALTH BENEFITS AND COVERAGE UNIFORMITY

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 2931.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved,* That the House agree to the amendments of the Senate numbered 1 and 2 to the bill (H.R. 2931) entitled "An Act to amend chapter 89 of title 5, United States Code to establish uniformity in Federal employee health benefits and coverage provided pursuant to contracts made under such chapter by preempting State or local laws pertaining to such benefits and coverage which are inconsistent with such contracts."

*Resolved,* That the House agree to the amendment of the Senate numbered 3 to the aforesaid bill with the following amendment:

In lieu of the matter inserted by the said amendment, insert:

"(2)(A) Notwithstanding the provisions of paragraph (1) of this subsection, if a contract under this chapter provides for the provision of, the payment for, or the reimbursement of the cost of health services for the care and treatment of any particular health condition, the carrier shall provide, pay, or reimburse up to the limits of its contract for any such health service properly provided by any person licensed under State law to provide such service if such service is provided to an individual covered by such contract who is a member of a medically underserved population (within the meaning of section 1302(7) of the Public Health Service Act (42 U.S.C. 300e–17)).

"(B) The provisions of subparagraph (A) shall not apply to contracts entered into providing prepayment plans described in section 8903(4) of this title.".

*Resolved,* That the House agree to the amendment of the Senate numbered 4 to the aforesaid bill with the following amendment:

Page 2, after line 7 of the Senate engrossed amendments, insert:

SEC. 3. The provisions of section 8902(m)(2) of title 5, United States Code, as added by the first section of this Act, shall apply to services provided under any contract entered into or renewed after December 31, 1979; except that such provisions shall not apply to services provided after December 31, 1984.

*Resolved,* That the House agree to the amendment of the Senate to the title of the bill with the following amendment:

In lieu of the matter proposed by the said amendment, insert: "An Act to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage by preempting certain State or local laws which are inconsistent with such contracts, and for other purposes."

● Mr. STEVENS. Mr. President, the passage of H.R. 2931 will help facilitate uniform health insurance coverage for the three million Government employees and annuitants and 6 million dependents protected by the Federal employees' health benefits (FEHB) program. By preempting State law as applied to such Federal employee health benefit contracts, it is projected that the bill will lower premiums and deflate ballooning health costs—without any substantial additional cost on State and Federal levels.

The goal of greater health benefit uniformity for Federal employees must not, however, blind us to the necessary maintenance of an authoritative equilibrium between Federal and State governments in matters of mutual interest. Historically, health care has been regulated by the States. In this age of the growing needs of the Federal employee and of the ever escalating cost of medical services, Federal intervention at creating uniformity in this area is necessary and logical. It is also logical to view the State as the optimum judge as to who is and who is not qualified to provide health care. The State, having more immediate access with its people, can evaluate more accurately than the distant Federal Government the needs of its constituents and the qualifications of persons necessary to fulfill these medical needs.

State control would make more qualified health practioners available to those who need help than would a general limit of coverage to FEHB approved medical doctors. This would allow Federal employees in search of medical help a greater choice of possible techniques to which to entrust their problems. In this way, not only tested and conservative methods will be available, but also experimental and perhaps innovative health techniques will be accessible to Federal employees under their health coverage.

The challenge before us is to find the compromise which will provide the uniformity necessary for the future functioning of Federal health coverage and yet retain for the States a flexibility and freedom necessary for providing more qualified medical care for whatever need that may arise. It is in this continuing search for a workable solution that I support the 5-year experiment, which holds that if a Federal insurance contract covers a certain health benefit, the insurance carrier must pay for any health practitioner who is licensed by a State to provide that benefit. This experiment will be restricted to medically underserved areas in the United States.

This is the crucial test for the States to retain their right to determine who is and who is not qualified to provide health care. The medically underserved areas should benefit noticeably from this experiment. Through the States' evaluation and licensing of more qualified medical personnel—rather than just medical doctors—more Federal employees will have access, under their Federal coverage, to the medical services which they require.

H.R. 2931 is an important step in the advancement of better services for Federal employees. In the establishment of a more balanced distribution of licensing authority by the States and the Federal Government, many more qualified medical practitioners will receive support for their work and Federal employees will have available to them more extensive and economical medical coverage. The next 5 years, if H.R. 2931 is enacted, will prove most fruitful in providing the information necessary for shaping an increasingly effective and efficient medical coverage system for future Federal employees.●

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate concur in the amendments of the House.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

## SECOND CONGRESSIONAL BUDGET RESOLUTION, 1979

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate now proceed, without any time being charged, to the consideration of Senate Concurrent Resolution 104, Calendar Order No. 1045.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 104) revising the congressional budget for the United States Government for the fiscal year 1979.

The Senate proceeded to consider the resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the built-in time agreement with respect to the second congressional budget resolution be modified as follows: That the time on any amendment be limited to 1 hour instead of 2 hours.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE SENATE HAS HAD A GOOD WEEK—EXPRESSIONS OF APPRECIATION

Mr. ROBERT C. BYRD. Mr. President, there is a beautiful land, it is often referred to as almost heaven. It is the State of West Virginia. It is the land of viridescent hills and iridescent sky. It is mountains, clear skies, pure water, clean air, and strong mountaineers who believe that mountaineers are always free.

I urge my friends in the Senate to retire to West Virginia for the recess, spend a day or so and recuperate, revive their energies, restore their clear vision, resuscitate their spirits, and come back on September 6 ready to do a lot of work and a good job and make every effort to adjourn sine die the middle of October and not to come back after election.

Incidentally, some of the best Bluegrass music played anywhere is played in West Virginia, and the good Lord willing, I expect to be over in West Virginia on Saturday, September 2. I am going to take all seven of my violins to a pleasant place there called Coolfont, that is C-o-o-l-f-o-n-t.

My wife, Lady Byrd, and the members of my staff, many members of my staff, are going over there. We are going to eat some of that good cooking prepared at Coolfont and I am going to play some of my good Bluegrass music on my violin.

I would love, just love, to see there on

that occasion Senator and Mrs. HANSEN. Senator HANSEN is from Wyoming. He is a good man, a man whose heart is as stout as the Irish oak and as pure as the lakes of Killarney. I wish he would come over there and be my guest on that evening and I would treat him to some Bluegrass music, the kind that is going to be on my album when it comes out next month, in September.

There are going to be 14 tunes on that album, may I say to my friend, and I will be playing some of those tunes over there.

But aside from that, let me say again that I do want to thank my colleagues on both sides of the aisle. I want to thank all of the officers of the Senate and the men who are at the desk, the reading clerks, the legislative clerks, the journal clerks, the Parliamentarians, the pages, the Doorkeepers, the Official Reporters, the members of my policy committee staff, the members of the Republican—do they have a policy committee over there?

Mr. HANSEN. Just barely.

Mr. ROBERT C. BYRD. All of them. Bill Hildenbrand, Howard Green, Tom Hart, Chuck Bangert, Joe Stewart and all of these people, Susan here, everybody who makes it possible for the Senate, the Sergeant at Arms—who is a puny man—a puny man with that lean—what was it Cassius and Brutus were saying? That fellow with the lean and hungry look. That is the Sergeant at Arms. The lean and hungry look. A great football player. One of the great all-American football players for Notre Dame, bless his heart.

Well, I thank them all. We have had a good week and we are going to continue to do great work.

This Congress has faced up to some tough issues. It has had the courage to face up to the hard ones, the rough issues, the mean issues. But I am just pleased with its record thus far and I want to thank all these I have named and any I may have overlooked inadvertently for the cooperation, the understanding and the patience that they have had and the support they have all given to make this a good session.

So, with that, Mr. President, if there be no further business to come before the Senate, I move——

The PRESIDING OFFICER. If the Senator from West Virginia will permit the Chair to intervene, the Chair could have sworn that the Senator from West Virginia, when he was speaking of the place that looked like heaven, that he was speaking of my State of Hawaii.

Mr. HANSEN. Mr. President, if the distinguished Senator, my very good friend from West Virginia, will yield, let me say that I thought he was getting ready to invite everyone to join the President in Jackson Hole, when he was describing the beautiful landscapes that he later identified as West Virginia. [Laughter.]

As he knows so well, I do greatly admire our distinguished majority leader. It has been my unique privilege and pleasure to hear him play his violin and to work with him on this floor, sometimes to oppose him—and I always come out second best—but more often to join him, which is a better way of winning, I find.

I should like nothing better, nor would Mrs. Hansen, than to be privileged to be with him and his wonderful family in West Virginia. We hope that before too long we may share that enjoyment.

Mr. ROBERT C. BYRD. I thank the Senator. I look forward to the time we can do that.

## ORDER OF BUSINESS

(The following proceedings occurred earlier:)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the discussion with respect to the natural gas conference report—the entire discussion by all Senators—appear in the RECORD just prior to the motion to recess.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE GAS PRICING CONFERENCE REPORT

Mr. LONG. Mr. President, I wish to address myself to the gas pricing conference report which will be before the Senate sometime soon. I was one of those Senators who voted for that bill, Mr. President, but I regret that I will not be able to vote for the conference report.

Mr. President, I will be compelled to join those Senators who have announced opposition to its passage. The bill is opposed by consumers for very good reasons. The bill is opposed by gas producers for very good reasons. The bill is opposed by labor and industry for very good reasons.

I would first like to make it abundantly clear that I am not opposed to the so-called natural gas compromise because of price. The new gas price called for in the conference report compares favorably with the prevailing unregulated intrastate market price and, therefore, is not an issue with me. My opposition is based on the nonprice elements of this proposal.

This bill will not adequately increase gas production. Furthermore, the regulatory costs and complexities are staggering—resulting in higher than necessary prices and less supply. This bill will escalate the cost of energy production and tie up producers and investors in a morass of endless paperwork, hearings, litigation, and bureaucratic redtape. For industry to comply with this act will create enough paperwork to plaster the entire United States from the Atlantic to the Pacific and from the Gulf of Mexico to the Canadian border.

No producer could survive in business unless he is permitted to pass along to the consumer the cost of complying with these burdensome regulatory requirements. This means the consumer would pay more and get less for his money. The only beneficiaries would be the armies of lawyers, accountants, court reporters. and Federal bureaucrats. Everyone else loses and must pay for this mind-boggling, make-work scheme.

Presently, the Department of Energy budget exceeds 10 billion in tax dollars. A considerable portion of that money is spent in regulating the oil and gas industry. If this bill is enacted, the additional Federal regulators, Government office personnel, and related costs needed to enforce this scheme will run this figure up even higher.

One should realize that for every tax dollar the Federal Government spends in regulating the industry, gas producers must spend a great deal more than that to comply. Obviously, these compliance costs must be passed on to the consumer in the price of the product. No one can continue to produce energy for long unless he is making a profit.

The end result is that the average American citizen is slashed from all sides. Too many of his hard-earned tax dollars will be spent on needless additional Federal regulation, and, at the same time, he will pay a higher price for energy as a consumer.

I am well aware of the months of tortuous negotiations by the House and Senate conferees on this bill. I never thought the conferees could take a House bill, favored by consumers, and a Senate bill favored by producers, and work out a fiasco opposed by both. But they have clearly succeeded in doing so.

It is strange, indeed, to see the entire free world turned toward capitalism and free enterprise in the effort to produce more energy while the United States is moving in the opposite direction—more regulation.

There are a few good provisions in the bill to permit intrastate pipelines to sell gas to interstate pipelines without subjecting the intrastate pipelines to needless regulations. There is another provision to permit gas to be moved within a State by interstate pipeline without subjecting it to Federal regulations. Those two provisions should be enacted. I will join with Senators from producing and consuming States in the effort to reject the many bad provisions in the bill and to substitute the two good provisions to which I have referred. If we are successful in doing that and no more, we will have served to eliminate the many billions of dollars of additional cost this bill would foist on the taxpayers of America.

Mr. President, I saw the old show, "Beverly Hillbillies" when it was current on television. The picture was shown of old Pa out in Arkansas firing his rifle by accident into the ground and oil gushed out. The family became rich and moved to Beverly Hills. Mr. President, under this bill, finding gas would be only the beginning of the Beverly Hillbillies' worries.

The needless impediment to production in this bill terrifies particularly every small producer. It is true that some of the major companies might be able to survive because they have a staff of lawyers and accountants. However, this bill would just add some to what they already have. But for a small independent producer, who does not have lawyers working for him, day in and day out, the bill creates an absolutely fantastic burden.

Mr. President, what do we have here? Consumers are opposing this bill for a very simple reason: It means they are going to pay more for gas, and a lot more.

You see the producers opposing the bill. You would think if the consumers are against it, the producers would be for it. It is just not the case. They look at all the nonprice regulation in this bill and say, "Spare us; just vote the bill down, defeat it. Do what you can, but do not let that bill become law."

Labor is against the bill. Labor is interested in the consumer. Business is against the bill. In the beginning, the large companies, represented by the American Petroleum Institute, were for the bill when it passed the Senate. There were a lot of things that were left to be desired, but on balance, they would have favored the bill. Now, for the most part, even some of the major companies are opposed to the bill.

One would ask, who is for the bill? Not even the environmentalists favor the bill, Mr. President. I should think there has never been a case where Members of Congress, working in the effort to serve the national interest, have so completely managed to alienate everybody as has been the case with this bill. I never thought I would find myself in agreement with the present occupant of the Chair (Mr. METZENBAUM) on a gas bill. But I am allied with him on this and might join him in a filibuster for the simple reason that we could do better than this with a simple substitute that is being suggested by Mr. METZENBAUM, Mr. KENNEDY, Mr. ABOUREZK, Mr. BAYH, as well as a number of Senators from producer States. Then we would say, as we have said twice already in the bill which passed both the House and the Senate, that gas could be purchased by the interstate pipelines from the intrastate pipelines when they find that they need additional gas. Such a provision is in the bill. That is a good provision. It ought to become law.

We will propose that the bill be recommitted with instructions to report that section.

We would also like to see a provision passed which is in the bill—I believe it is section 311(a)—that would say that gas inside a State can be moved solely within that State through an interstate pipeline without its becoming subject to Federal jurisdiction as interstate gas, under the so-called coming doctrine.

By doing that, Mr. President, every cubic foot of gas that can be sold and can be moved into interstate commerce, or intrastate commerce, as the case may be, can be made available to the consumers.

All of the problems of fantastic, mind-boggling regulation, the kind of liability that would scare anybody within an inch of his life, the sort of uncertainty that drives businessmen up the wall, would be avoided by simply passing those two provisions, and perhaps a few other things in the bill that make good sense and that everyone can readily agree upon.

The hopeless complexity, the unprecedented excess of bureaucratic regulation that is implicit in this bill, Mr. President, is such that we would do this Nation a great service to see that that bill, as represented in the conference report, does not become law.

Accordingly, Mr. President, I expect to lend my efforts to those who speak for both consumer States and producer States, speak for both the interests of labor and commerce in opposing the conference report and urging a constructive solution.

Mr. President, what I find to be one of the most impressive arguments to some Senators, when thoroughly analyzed, becomes one of the most ridiculous. That is the argument that we must pass a bad bill, even though it be a very bad bill, because it will strengthen the dolar, that somebody abroad will think America has done something about the energy question and, therefore, they will have more confidence in the dollar.

Mr. President, we might as well pass a blank sheet of paper and just write "energy bill" across the top of the sheet of paper and hope to fool somebody.

What good would it do us to pass a bad bill, a bill that is going to cause us to have less energy, not more energy, a bill that will hinder production, not increase production? What good will it do us to pass such a bill in the hope of fooling some foreigner?

Mr. President, those are sophisticated people. They are not a bunch of idiots over there in Japan, in Europe, and elsewhere. They will know from everyone they talk to in the industry that the bill does more harm than good.

Mr. HELMS. Will the Senator yield?

Mr. LONG. Yes.

Mr. HELMS. They are the last people who are going to be fooled.

Mr. LONG. Why, of course.

What good would it do us if we were successful in fooling a few Frenchmen or Germans for a few days to think we would pass something to help solve the energy problem when it makes it worse?

It would achieve absolutely nothing.

As the Senator from North Carolina so well points out, those are very smart, intelligent, perceptive people. They have allies and associates here in the United States who keep them well informed. Long before this debate on this bill was over, everyone would know that this thing is an absolute bureaucratic monstrosity that will impede the production of energy, not speed or hasten it. They would know that there is a much simpler and much easier way.

Mr. President, I hope that the President of the United States, the Vice President, and their advisers will reconsider their position. When they have a measure that is opposed by all those who started out on their side, or at least most of those, who can have any enthusiasm for the bill? I find no one who will say this is a very good bill, that it is something that will advance the Nation's interests.

About the only argument left is that we must do something. Does that mean we should pass a bad bill? I do not think so. It seems to me the answer to it is to say that, "Yes, we must do something," and pass the best bill we can.

Perhaps the administration should take credit for the fact that they have finally compelled the producers and consumers, and labor and management, to all get together. They all have united. The people on all sides are coming up with a constructive answer with which we can agree at this point.

It would be a far better approach, Mr. President, than to try to muscle through the conference report which will be presented to the Senate.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senator from Ohio.

Mr. METZENBAUM. Mr. President, my distinguished colleague from Wyoming had joined with Senator ABOUREZK, Senator BARTLETT, and myself, in fashioning this legislative answer on the natural gas pricing measure. We are particularly pleased that the distinguished Member of the Senate, the Senator from Louisiana, has seen fit to join with us in moving toward a legislative alternative. He has stated it well when he describes that which has been offered to the Senate as being objectionable to consumers, consumer advocates, producers, labor organizations, environmentalists, business organizations.

What we have seen fashioned out of long drawn out conference committee deliberations, over a period of months, sometimes in secret session, was an effort to get a bill at any price.

If somebody wanted some particular problem resolved, it was agreed to. If somebody wanted another problem resolved, it was agreed to. By the time we got done, we really had that which could be considered a legislative monstrosity. It does not solve the problem.

It was originally talked about by the President as being a measure that would provide for mandatory allocations, so the President could go in one State and take it out into another State. That is no longer in it.

It was originally talked about, as the President addressed himself to the entire question, of not deregulating the price of natural gas, a position which my friend from Louisiana advocates. When we got all done, we did not come down either plus or minus on that question. We came out someplace in the middle, and nobody is quite certain what we did do, except we know the price will go up, if we can figure out what the legislation said.

When the bill left the Senate and the House, it provided for incremental pricing for industrial users with the idea that by doing that we would cause more industrial users to turn to other energy sources. But when the bill came back to the Senate, it did not have that in it. It provided for higher prices for household users, residential users, and more of the burden was placed upon them than was placed upon the industrial users.

When the bill came back to the Senate out of the conference committee, it provided a special kind of consideration, that incremental pricing would be applicable to those who are in the consumer States, as far as industrial users are concerned, to the extent that incremental pricing is applicable and within the limits of what I just stated previously concerning residential users, but not incremental pricing for industrial users in the producer States.

As a consequence, those of us who represent consumer States would have found that more of our industry would have seen fit to move toward the producer States and that would not have been in the best interests of this Nation and that was certainly not intended in the original draft of the legislation.

There is available a chart indicating the complexity of this legislation, and it looks like—I do not know what to describe it as, but it is so complex that nobody could conceivably understand what it said, even if they had a staff of 100 lawyers working for them.

So I say that today has been a high point in our movement toward the development of a legislative alternative with respect to the Natural Gas Price Act. Twenty-four Members of the Senate have now signed their "Dear Colleague" letter. Included with the distinguished Senator from Louisiana is the distinguished Senator who made the strong battle and provided leadership for the enactment of the bill that passed the Senate, the so-called Pearson-Bentsen measure, which became the majority view of the Senate when it left the Senate.

Mr. PROXMIRE. Will the Senator yield briefly?

Mr. METZENBAUM. I yield.

Mr. PROXMIRE. Mr. President, I congratulate the Senator from Ohio and the Senator from Louisiana on their statements. I agree with them wholeheartedly. I think this is an impossible bill. As we indicated the other day, at a time when inflation is the No. 1 issue in the country, it is highly inflationary.

At the same time, I would like to indicate one difference, perhaps—I do not know. The Senator from Ohio and the Senator from Louisiana are extremely skilled technicians. The Senator from Ohio and the Senator from South Dakota (Mr. ABOUREZK) showed their great ability in filibustering before. They know every aspect of filibustering. I hope that, under the circumstances, we will be able to vote up or down on the bill.

I say that as one who is against the bill. I recognize that we have a tremendous weapon in delaying a vote. This has been debated at great length. Everybody knows about it. We have been up the hill and down the hill, over and over, for months.

I realize that the conference report is somewhat complicated and would take quite a few days of discussion, but I hope we can get an up and down vote within 3 or 4 days of the time the conference report comes out. I think there is enough strength to defeat it. At any rate, I think it deserves a vote on the merits.

The only argument I know of for a prolonged discussion is an educational process, so that people will take a second look and understand it. In this case, I do not think we have that argument for a filibuster. But I hope we will consider the possibility of letting it come to a vote.

Mr. METZENBAUM. Mr. President, I am pleased to respond to my good friend from Wisconsin, who is one of the cosigners of the "Dear Colleague" letter.

He has contributed much in his remarks with reference to one argument that has been made about the bill, and that has to do with the subject of its impact on the dollar overseas. I am happy to say to the Senator from Wisconsin that, although I have not consulted with all the others who have been involved in putting together this legislative alternative, I believe it is our thought that at a very early point in the debate, we will offer our motion to recommit, with instructions along the line as indicated in the "Dear Colleague" letter; that there really is no reason to have extended debate with reference to that subject, because it is my view now—and I must say it frankly and openly—that I believe there is a majority in the Senate prepared to support that motion to recommit.

I hope that if and when we do it, and if we are successful, the House will see fit to join us promptly, and that the administration will accept that as the will of Congress so that we can go about our business and enact not only this legislative answer, but also enact the other three bills that have been held hostage and that have been agreed upon for the last 8 or 9 months. Then, we, indeed, would have a national energy plan that may not be everything everybody wants, but at least it will have been a major step forward in getting a program. It may not be everything that the President or Congress or any particular group feels is the right answer, but it will be an answer, and I think it will be a good answer. I believe we could conclude our work within a week, if the House will accommodate this, after we return from the recess.

Mr. HANSEN. Mr. President, I want to say two or three things.

First, I express my very high regard for the chairman of the Finance Committee, a person who has earned my admiration a long time ago and who I believe, without reservation, is one of the most skilled Senators it has been my privilege to know.

I join my colleagues in saying that I have no desire at all to prolong discussion. If there is anything we have heard much more about than we needed to have heard about, it has been this gas bill.

In order to try to accommodate everybody, it is fair to say that we have come up with a piece of legislation that has to be a monstrosity. In the words of the administrative officer, Sheila Hollis, it would be impossible to administer. I hear this from people throughout the industry.

As a matter of fact, if they think—as I am certain they do—that they have experienced tough years recently in trying to wade through the time consuming, expensive, compounding maze of regulation and redtape, "they ain't seen nothin' yet." If this bill were to become law, their difficulties, their frustrations, and their short nerve endings would be compounded 10 times.

What impresses me so much about our friend from Louisiana is simply this: He does not think—as too often his admirer from Wyoming is inclined to think—one step at a time. The Senator from Louisiana is looking down the road to see what can be done for this country to get a bill passed that will be helpful, that will be constructive, that will be in the interests of everybody. He charted the course, insofar as I know, that gave the impetus and made me open my eyes to what we should be doing.

We could get into a head-knocking confrontation that could wind up in a long filibuster and a lot of feelings hurt, and trouble on the Senate floor, and not have anything done with it. But RUSSELL LONG—God bless him—is always thinking about what is doable and what is possible and what serves the national interest.

In that respect, he demonstrated this several weeks ago in the utterances he made which encouraged me to look forward to what can be done to make the best of a very badly deteriorating situation.

So I join in applauding him, in seeing if we can pick up, out of the myriad of ideas in this bill, some things that are going to be helpful, that can be approved insofar as the Senate and the House are concerned, and that will be signed by the President.

We can turn this country around, and we will not have to fool anybody—any foreign country or any of our other friends. We will have done something that is positive, that will combat inflation, that will expand jobs, that will increase the energy supply in this country, which will reduce the outflow of dollars, which will stop the flow that now accounts too much for the deteriorating situation of the dollar. That will be a continuing forward thrust in accomplishing the purposes all of us seek to achieve for this country.

So I salute the senior Senator from Louisiana for his perceptiveness in understanding that more is necessary than simply to defeat a bad bill; but, rather, to get everyone pulling together, and I sense that is now the case. We are going to pull together.

I think that this bill, this concept, upon which all reasonable men can join, will move this country forward in a positive manner, with an energy policy that will deliver. It will achieve the goals—not all of them—but it will achieve many of the goals that each of us knows are desirable.

I have many feelings about leaving this great institution. When I leave here—and that will not be too many months away—I know it will be a source of considerable pride and pleasure to know that I have been privileged to participate with some great Americans. RUSSELL LONG is one of those persons. I thank him.

Mr. LONG. Mr. President, I thank my able friend from Wyoming for the kind things he has said.

The Senator from Wyoming has been a courageous, indefatigable fighter for the free enterprise system in this country, and has helped to make the American system work the way our forefathers intended it to work. We all will miss him tremendously when he leaves this body. Many of us on this side of the aisle join our colleagues on the other side of the aisle in deploring the fact that the Senator has decided to retire.

He has many good years ahead of him, but we appreciate all he has done for his Nation serving here.

I certainly deeply appreciate the kind words that he has said about me.

But, Mr. President, it is really the Senator from Wyoming as well as the Senator from Ohio and the Senator from Texas, and others, who have joined forces in helping to shape a compromise that the producers, consumers, business and laborers of American can support.

If we can get all those factions together behind something that will make it possible to transport to the consumer every cubic foot of gas that can be produced here in the United States, why should we not do that? Why would we want to do something that is universally opposed by the working people, the consumers, the producers, everybody?

Mr. President, I am one of those who has had the experience of some of the embarrassment of going back and having people picket me at a meeting, because I voted for the Panama Canal Treaty. I felt it was our duty to ratify that treaty, it was in the Nation's best interests. It served our national purpose. I thought the President was right. It took a lot of courage to recommend it, but I think we owed it to him to support him on that rather unpopular undertaking.

But why should we do this to pass a bill which will be horribly unpopular and supported by no one?

One would have thought when we got through with the heated very honestly fought battle here in the Senate that at least you would please some people on the producers side when you passed the bill. One might have thought when they got through with the fight over on the House side they would have pleased some consumers in the country.

But to bring us back a bill that does not please anyone, no one on the business side, no one on the labor side, no one on the consumer side, and a bill that will impose literally hundreds of millions of dollars of cost on taxpayers and consumers by needless bureaucracy and regulation?

Mr. President, maybe we must have more than two prices for gas, maybe we must have more than three prices of gas, but why do we have to have 31 different prices of gas? It is the same product. You cannot see it, you cannot feel it, you cannot smell it, but if you light a match to it it makes a flame.

But why do we need 31 different prices that have nothing to do with what someone is willing to pay for it, nothing to do with what the stuff is worth? There are 31 different prices having to do with where you found it, how deep you drilled, who you were near when you found it, matters all of which should be totally irrelevant. Thirty-one different prices—some of them just seem to me to be the mere whims and caprice of an individual.

There is no point in imposing all this on the people of this country. It is simple enough to take the meritorious provisions of this bill, and there are some very meritorious provisions in the bill, and pass those. One of the key provisions that passed both the Senate and the House of Representatives on other occasions, passed twice, and has been signed by the President twice is the idea that you could buy gas from the intrastate pipelines and put it in the interstate pipelines if you need it. If you take care of that and take care of the movement of gas within the States, then anyone who has some gas can sell it and will sell it. He will have an incentive to go ahead and produce more. While that will not solve all the problems, it will not create any additional problems which unfortunately would be the case with the so-called compromise that will be laid before us sometime soon.

I thank the distinguished Senator.

The PRESIDING OFFICER (Mr. PROXMIRE). The Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I was sitting here listening to what appeared to be the beginning of the debate on the natural gas conference report, even though it has not yet been called up for floor consideration.

It is not often, in fact it is very rarely, that I rise to disagree with the chairman of the Finance Committee and with one of the ranking minority members of the Finance Committee, the Senator from Wyoming, all at the same time. But as one who supports the Natural Gas Deregulation Conference Report, I would like to respond to the question of the Senator from Louisiana, "Why 31 different prices?" by asking him this question, "Is it not true that without the bill which will be placed before the Senate after the recess, there would be not 31 different prices, but 1,000 different prices?" It is the understanding of the Senator from Hawaii that every time an application is made for the sale of gas by a producer, under present regulations, he applies for and normally gets a price according to the peculiar circumstances of each case, which can differ in a thousand different ways.

So while we are not now debating the gas bill, and I hope we will have a lengthy debate on the measure which will be brought back by the Energy and Natural Resources Committee, I feel that we ought to regard more seriously something which the conferees have worked on for 5 months. As a member of that conference committee, I can appreciate the great effort which the conferees exerted to arrive at the compromise represented in the report. The Senator from Wyoming was also a member of the conference committee.

Mr. HANSEN. Mr. President, I was a member, but I was not invited to the 5 months of meetings.

Mr. MATSUNAGA. The meetings which the Senator refers to were not conference committee meetings. They were caucuses, and I myself was not invited to all of them.

Mr. HANSEN. If my good friend from Hawaii will yield, and I have nothing but the greatest respect for him, let me say that one of my good friends, and I count many of my good friends on the other side of the aisle, is Senator JACKSON. I greatly admire and respect him. I cannot help thinking that it was he, I believe, who is credited with having conceived of the idea of legislating in the sunshine. But for 5 long months, Mr. President, not much sunshine shone on the deliberations of that select group of Senate conferees and House conferees as they fashioned this bill.

Mr. MATSUNAGA. The Senator from Wyoming himself well knows that every time the Senate conferees agreed to do something, we went back to the House conferees; then there was some objection, and then when we thought we had the House conferees agreeing with us, something else came up. So we were working back and forth. If the Senator from Wyoming, along with the Senator from Ohio, who was here in the Chamber a little while ago, could have at that time made the contribution that they propose to contribute now by opposing the conference report, maybe we could have come up with something that they, too, would have accepted.

But I hope that all this will be thrashed out when the conference report is being finally considered here in this Chamber.

I do not intend to take any more time, but I just could not sit still without saying something, especially in the light of the great respect which I have for the chairman of the Finance Committee, a committee to which I belong, and my good friend from Wyoming with whom I serve not only on the Finance Committee but on the Energy and Natural Resources Committee.

Mr. HARRY F. BYRD, JR. Mr. President, the Senator from Virginia does not want to get into the middle of a fight over the natural gas bill today. The Senator from Virginia has taken no position on it at this point.

I do want to associate myself, however, with the remarks made earlier by the distinguished senior Senator from Wyoming in regard to the chairman of the Committee on Finance. I thought the tribute paid to Senator LONG by the Senator from Wyoming (Mr. HANSEN) was a splendid tribute and a much deserved tribute. I think Senator LONG is an outstanding chairman of the Committee on Finance. He is one of the hardest-working Senators I know, and I might say he is frequently a much maligned Senator merely because he happens to be chairman of that committee.

Now, I read somewhere, either today or yesterday, in one of the papers—I read 15 or 20 newspapers a day, so I am not sure just where I read it—that Senator LONG was carrying around in his pocket a number of amendments to tax bills that might be on the floor today, one amendment, the paper said, dealing with the New England Patriots. I am not sure whether that is a hockey team, a basketball team, or a football team, but in any case, the only connection, insofar as I know, that Senator LONG had with that piece of legislation was that he happened to be chairman of the Committee on Finance.

The legislation was introduced sometime ago by the Senator from Indiana (Mr. BAYH), by the Senator from Rhode Island (Mr. PELL), by the Senator from

Rhode Island (Mr. CHAFEE), and by the Senator from Massachusetts (Mr. BROOKE).

It was referred to the Committee on Finance. It was then referred to the Subcommittee on Taxation. At that time it was placed in the RECORD that a hearing would be held on this bill and who the beneficiary would be.

A hearing was held before the Subcommittee on Taxation. Subsequently it came before the Committee on Finance in open session. It was duly considered there, and it was reported to the Senate.

The only connection Senator LONG had with the bill, so far as I know, and the only reason he happened to have an amendment to the bill, was because, as chairman of the Committee on Finance, it was the procedure that needed to be followed.

So I think it is important to realize that while the Committee on Finance has a tremendously able chairman, one of the ablest political minds I have ever known, and one of the ablest persons I have ever been associated with, and he can work a lot of magic both in the committee and on the floor of the Senate, still he is very frequently being maligned for matters with which he has no connection and for which he should not be blamed.

I do not say whether the particular bill we had, that was under consideration, was a good bill or a bad bill. Whether it was good or bad it was not Senator LONG's proposal.

I just want to say again that I want to associate myself with the remarks made by the Senator from Wyoming in tribute to the chairman of the Committee on Finance.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield at that point?

Mr. HARRY F. BYRD, JR. Yes.

Mr. ROBERT C. BYRD. I was not here when the tribute was made by the Senator from Wyoming, but whatever tribute was made I want to be in on it. Count me in on that combine. He is one of the most shrewd, most effective, most personable, most likable legislators in this Senate at this time or at any time in the history of the Senate, and I certainly have the utmost admiration for him and tremendous respect. On this one particular issue I guess we will not be able to agree, but certainly he is going to be my friend and I am going to be his regardless of the outcome. I thank the Senator.

Mr. HARRY F. BYRD, JR. What the Senator from West Virginia said about the skill and the ability and the shrewdness and the finesse of the Senator from Louisiana can be applied in equal measure to the distinguished Senator from West Virginia. [Laughter.] It is just very interesting that sitting side by side right here this afternoon are two of the shrewdest and ablest and finest political minds that I have been associated with in a long time.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. HARRY F. BYRD, JR. I yield to the Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I had fully intended to add my expressions of admiration for the Senator from Louisiana, who chairs the committee on which I serve. I join with the Senator from Wyoming and the Senator from West Virginia and the Senator from Virginia in praise of our chairman of the Committee on Finance. In singing praise of the Senator from Louisiana, I would like to relate one incident which happened while I was still a student at Harvard Law School.

I came to Washington at the call of Joe Farrington, who was Hawaii's delegate to Congress at that time. He told me Senator LONG was opposed to Hawaiian statehood, and he would not listen to Delegate Farrington because he was a Republican. He said in effect, "Sparky, you come on down and I am sure RUSSELL LONG will listen to you, because he has plenty of Aloha for the members of the 100th Battalion and the 442d Combat Regimental Team." Delegate Farrington was referring to the old Nisei regimental combat team, which served so valiantly in World War II.

In response I left my law school studies and went to see one Senator RUSSELL LONG, opponent of statehood for Hawaii.

Initially, the receptionist said he was too busy. But when he learned that I was a veteran of the famous combat team he agreed to see me.

So I spent some time with the Senator from Louisiana, opponent of statehood for Hawaii.

I started by stating what statehood would mean to those of us who served in World War II, who sacrificed not only limbs but even lives. After listening to me for a while he said to me, "Well, young man"—he called me that, and I am older than he is [laughter]—he said, "Young man, you must remember that a U.S. Senator is primarily interested in two things: one, to be elected; two, to be reelected." [Laughter.]

Then he said, "So don't come to me. Go to my constituents, and if my constituents tell me that I should support Hawaiian statehood I will."

So I took his advice and sought out his staunchest supporters in his home State. Fortunately, one of his principal supporters was a very close friend of mine, George Leightner. I telephoned him and said, "George, we have got to get RUSSELL on our side." He said, "Well, I will tell you what you do, SPARKY. You get the Governor of Hawaii to invite RUSSELL to go to Hawaii, and you lay out the red carpet. I will go with RUSSELL to help you."

We did exactly that. We got Senator RUSSELL LONG to go to Hawaii. We greeted him at the airport with leis right up to his eyes, and you know, of course, that he came back to Washington as a champion of Hawaiian statehood. [Laughter.]

At that time, some of my colleagues may recall, Senator Richard Russell was majority leader. When he saw the picture of RUSSELL LONG with leis up to his eyes, he said, "Well, there goes RUSSELL LONG. We have lost him." [Laughter.]

I thought this might be an amusing sidelight in the interesting and exciting career of the Senator from Louisiana, appropriate to the occasion, during the waning hours of this evening. I thank the Senator from Virginia for yielding.

Mr. LONG. Mr. President, if the Senator will yield, let me assure him that I very much appreciate these kind remarks from my colleagues. I do not know what prompted it. I really do not know whether my friends have in mind another Hawaiian bill or just what it may be, but whatever it is, I suppose they have me where they want me, and I will have to go along with them. I do not precisely know what it is they have in mind, but I assure my dear friends that I very much appreciate the kind words.

The Senator from Hawaii is right when he said the trip to Hawaii made an impression on the Senator from Louisiana. Senator Russell from Georgia said when he saw that picture of the Senator from Louisiana with those leis piled up all the way to his nose, "He is gone, just forget about him; he is gone."

[Laughter.]

I thank the Senator.

## THE NATURAL GAS PRICING CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I have never lost faith in the strength and the ability of the U.S. Senate to meet the greatest challenge of the 95th Congress—confronting the energy problem.

I have never wavered in my confidence, though, at times, the natural gas pricing bill has had a heartbeat as faint as that of a hummingbird.

You have heard of the proverbial cat that has nine lives. This bill has had more lives than that proverbial cat. It has been pronounced dead, I guess, 100 times. I have seen tombstone after tombstone erected over this bill, and it is still living; it still has life in it. I am not willing to concede that the bill is dead, and I am not willing to concede that this Senate will not pass that legislation. I am not willing to give up, and I do not think the others who support the legislation are ready to give up, either.

The energy problem is an insidious enemy, and it has allies in deception. It is difficult to act on crisis legislation when no crisis is perceived. The humid days of August do not stimulate memories of bitter cold winters and gas shortages, rivers iced over, factories shut down, employees out of work, schools closed, and residential consumers without heat in their homes.

For three decades the issue of natural gas pricing, and its resolution, has eluded and confounded Congress and the Nation. To our allies abroad, this beachhead is the Normandy on our shore, and they expect us to meet this challenge.

If we cannot face this problem, in this case, the battle is the war, and we will have lost our initiative, our momentum, and some would say, our fortitude. This is the way it will be perceived by our friends, as well as by our enemies.

Rightly or wrongly, this energy legislation is the axis on which our image turns abroad. This was made explicit during conversations I had in Europe with Chancellor Schmitt, with Prime Minister Callaghan, and with the leaders

in Belgium. For Congress to adjourn sine die without a solution would be broadstroke evidence of our inability to meet a problem that affects every man, woman, and child in this Nation. To adjourn sine die without a solution would be—through inaction—to further emasculate the power of the dollar overseas.

Mr. President, under this conference report, consumers would be protected as more natural gas is made available through incentives for greater production. Gas shortages give rise to job layoffs, and this is definitely not in the interests of the working men and women of this country.

As for price, it is important to remember that the prices set forth in the conference report are only ceiling prices. Many energy economists doubt prices will reach the ceiling.

Since last year, average wellhead prices in the intrastate markets have been dropping. Greater supplies as a result of the report's various incentives would help to keep prices below the ceilings.

The incentives are designed to elicit greater supplies. As this occurs, the higher price would have a negligible effect on inflation. The conferees estimate that it would increase the overall inflation rate by less than one-half of 1 percent.

If greater domestic gas supplies help to reduce gas or oil imports, consumers also will benefit by a more favorable trade balance.

Under the conference report, consuming States would be better served; without the measure, however, interstate consumers would be worse off.

Everyone who represents interstate gas consumers should realize by now that consumers without adequate gas supplies are not well protected.

Interstate pipelines which lose industrial customers because of insufficient deliveries face a no-growth future. Loss of sales to big interstate industrial customers will push up prices to interstate residential customers. Moreover, the loss of gas sales to industrial customers probably will cause them to consume more oil, much of which would have to be imported.

Increased gas supplies is not the only protection afforded interstate consumers under the conference report. The incremental pricing policy which the conferees designed would protect residential consumers. Increases in the price of gas sold to residences would be borne primarily by low-priority industrial consumers.

Maintaining adequate supplies and cushioning the price impact on residential consumers is particularly important to the middle and lower income groups in the interstate market. If interstate gas supplies continue to decline, it will be most burdensome financially for the middle and lower income families to switch to another fuel, particularly for residences with gas-fired boilers and appliances. The loss of purchasing power to those who live on the margin would be significantly larger if supplies dwindle. Enactment of the natural gas conference report would work to prevent this.

Mr. President, those who oppose this legislation are honorable men, and no one would doubt their motives. But I believe that insight and vision dictate that we meet the energy challenge we accepted earlier in this Congress. Mr. President, we have been deliberating on this now for 14 months. And this is an issue that has been around the Congress for 30 years, and the American people expect Congress to deal with it.

If Congress rejects this legislation, then the American people are going to believe that Congress cannot come to grips, that Congress does not have the fortitude, it does not have the vision, it does not have the courage and the determination to deal with the foremost problem facing this country, and the image of Congress before the American people, which is already not too good, will be made even worse.

In addition, Mr. President, the image of this country before the world is not going to be good. The OPEC countries will realize that the American Congress is not willing to come to grips with this problem, and our NATO allies will believe that the American Congress is not willing or not able to deal with this small problem which, in my discussions with Chancellor Schmitt, Prime Minister Callahan, and other leaders in Europe, was the No. 1 problem on their minds.

I believe there are three questions, and if only one is answered in the affirmative by a majority of this body, we will have assured this Nation of an energy policy.

Will we in the U.S. Senate have the vision to look after the interests of our citizens not only for the moment, the hour, the day, but for tomorrow and the future?

Will we in the U.S. Senate be able to put aside regional differences in an unselfish desire to contribute to the national strength and security of our Nation?

And, will we have the tenacity to show the world that the United States will not shrink from facing a global problem, and from its global responsibility?

I believe we will.

Mr. President, in my judgment, to recommit this conference report is to kill it. To kill it. And I think we can make our choice as to whether we want a bill or whether we do not want anything. Those who favor deregulation will not have it if this measure dies. And those who believe that there should be deregulation in some period of time, as I do believe that there should be deregulation on a phased basis, will support this legislation.

Let us not be misled by the motion to recommit: that will kill this legislation. Mr. President, the word is going to go out to the American people that the Congress, after 30 years, is still unwilling to deal with the foremost problem facing this country. That the Congress, after 14 months of toil and sweat, is unable and unwilling to deal, I repeat, with the foremost problem facing this country.

Mr. President, I respect those who differ with me. I have the utmost respect and admiration for Senators who oppose this measure. I just feel that it is the duty of the Senate to take a stand now. We have spent months and months and months, and the year is running out. A decision has to be made. The clock is running out. And the American people expect me and they expect the Members of this Senate to deal with this problem and to resolve it.

Mr. President, I hope that the Senate will stand up to this question.

I heard the distinguished Senator from Wisconsin, who is presently presiding over the Senate, say not to filibuster this conference report. I think the Senator is to be congratulated on that attitude. It has been filibustered enough. There have been prefilibuster filibusters, there have been postfilibuster filibusters, there have been postcloture filibusters, there have been maxifilibusters. I tell you, my friends, it is time that we stopped filibustering and vote on this issue.

It is perfectly all right to spend some days in dealing with the conference report. That is reasonable. It is a lengthy conference report; it is a complex conference report. I expect the Senate to take days. But let us reach a decision. If the Senate is not going to deal with the problem, let it say so by voting down the conference report. Let us say yes or no. As for me, I will be found standing with those who support the conference report, and I will vote against the motion to recommit. I will vote against any motion to recommit because a motion to recommit is a motion to kill the bill, and to erect over it once and for a tombstone. That is what it means. Let no one be misled by any motion to recommit.

So, Mr. President, I trust that Senators, having discussed this, having gone up the hill, having gone down the hill, having gone through the misery, the travail, the sweat, and the labor of months of argument, passionate, emotional argument in many instances, Members will at least let the Senate have a vote up or down on the issue.

The PRESIDING OFFICER. The time for morning business has expired.

Mr. ROBERT C. BYRD. I ask unanimous consent that the period be extended for another 20 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Kentucky.

Mr. FORD. Mr. President, I would like to be granted 5 minutes, if that is in order.

The PRESIDING OFFICER. The Senator may have 20 minutes.

Mr. FORD. I will take the 20 minutes and yield 5 minutes to the distinguished majority leader.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I have said enough at this time. This is such a very difficult issue. It cuts across regional lines, across parochial interests. It cuts across deep, deep, deep feeling.

Mr. President, if this conference report is killed, then we continue with what we have. We continue with no deregulation. There are those who say, "If we kill the bill, we will get a better one next year."

Do not bet on it. Do not bet on it.

Mr. President, I ask unanimous con-

sent that a document entitled "Points in Support of the Natural Gas Compromise" and a document entitled "Summary of the Major Provisions in the Natural Gas Conference Report" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POINTS IN SUPPORT OF THE NATURAL GAS COMPROMISE

The world is watching to see if we can come to grips with our energy problem. In view of the President's pledge to foreign leaders, and the increasing concern over the dollar, we cannot afford to fail.

It will increase supplies of our premium fuel for the nation's consumers while providing price certainty and new markets for the nation's producers.

Substantial additional quantities of natural gas will flow into the interstate market at prices below that of displaced alternate fuels.

The bill will also make construction of the Alaska gas pipeline possible. Together with increased production in the lower 48 states, this could mean a 30 percent increase in interstate gas supplies by 1990.

This, in turn, could result in savings of well over 1 million barrels per day of imported oil by 1985, and $5 to $8 billion a year in our balance of payments.

The national gas market created by this bill will allow gas currently backed up in the intrastate market to flow into the interstate market—where it is sorely needed.

The bill provides critical new incentives and certainty for the nation's producers of natural gas.

It opens up the intrastate market to interstate demand.

It provides certain, incentive prices.

It removes burdensome FERC regulatory requirements on all new natural gas.

It removes the uncertainty associated with recent Supreme Court decisions and simplifies federal regulations.

Increased supplies of natural gas at prices below alternate foreign fuels will be available for both homeowners and industrial users.

Under the bill's incremental pricing provisions, the supply of gas throughout the nation will increase for residential and industrial users at prices well below the cost of any other substitute fuels.

In almost every region of the country, the industrial gas price in 1985 will still be well below the price of distillate—assuming world oil prices stay constant—and one-quarter the price of electricity.

Significantly, the price of natural gas to industrial users, including the incremental pricing provision in the compromise, will be lower under this bill than the price would be under the Senate-passed Pearson-Bentsen deregulation bill without incremental pricing.

There will also be expanding use of gas in industry, particularly the special process uses for which gas is best suited.

Under this bill, there will once again be enough gas at economical prices to resume home hook-ups.

Enactment of the Compromise will:

Create a national market for gas.

Greatly increase supplies for industry and homes.

Cost the consumers no more than existing law.

Substantially reduce oil imports.

Protect home consumers.

Provide substantial quantities of gas for new home hook-ups.

Failure of the Compromise will:

Back-up sorely needed gas production in the intrastate market.

Continue the trend of declining supplies in the interstate market.

Lead to the increasing use of higher priced foreign energy.

Continue to occupy the Congressional calendar with a debate on natural gas in the coming years.

Destroy the possibility for acting on a comprehensive energy program this year.

The Country needs our help in this important effort to pass the first natural gas bill in twenty years. The alternatives to passage are unacceptable from both a national and international perspective. Too much is at stake for this bill to fail.

---

SUMMARY OF THE MAJOR PROVISIONS IN THE NATURAL GAS CONFERENCE REPORT

I. DURATION OF PRICE CONTROLS

Controls expire January 1, 1985 for:

(a) New natural gas, except new reservoirs in old leases offshore.

(b) Special incentive gas, except that legally required as of April 20, 1977 to be sold interstate commerce and gas from wells completed at a depth of less than 5,000 feet.

(c) Gas under intrastate contracts where the contract price is greater than $1.00 on December 31, 1984.

Controls expire June 30, 1987 for special incentive gas from wells completed at a depth less than 5,000 feet.

II. STANDBY PRICE CONTROLS

(a) The President or Congress (concurrent resolution with expedited procedures) could reimpose for 18 months at any time after June 30, 1985 and prior to June 30, 1987.

(b) Concurrent resolution of Congress could veto Presidential reimposition.

(c) Prices after reimposition would be on the same trend line previously applicable, except that for special development incentive wells, controls would be reimposed at a point mid-way between the original control trend line and the new gas trend line.

III. CEILING PRICE FOR NEW GAS

(a) $1.75 as of April 20, 1977 escalated at the implicit GNP deflator plus .2% annually plus 3.5% annually to April 20, 1981 and 4.0% annually thereafter.

(b) No vintaging.

IV. DEFINITION OF NEW GAS

(a) Onshore

(1) Gas from new wells (those spudded after February 19, 1977) completed 2½ miles from the surface location of any old well or 1,000 feet deeper than any old well. (Presumption that new well is drilled vertically unless a slant drilling permit was obtained.)

(2) Gas from newly discovered (after April 20, 1977) reservoirs.

(3) Gas from previously non-producing reservoirs ("withheld" gas and behind-the-pipe gas excluded.

(b) OCS

(1) Gas from any lease executed after April 20, 1977.

(2) Gas from a newly discovered reservoir (U.S.G.S. determines whether a reservoir is new).

(c) State agency determines new gas onshore. FERC review to be initiated within 45 days and decided within 120 days.

V. ONSHORE PRODUCTION WELLS (SPECIAL DEVELOPMENT INCENTIVE GAS)

(a) Ceiling Price is $1.75 plus inflation except that after January 1, 1985, the price for gas from wells completed at less than 5,000 feet depth shall be mid-way between the previous trend line and the new gas trend line.

(b) Wells must be outside an existing spacing unit and at least one spacing pattern away from old wells but within the 2½ miles. This is essentially a special incentive for the full development of old reservoirs.

VI. AND VII. OTHER GAS FROM NEW WELLS, GAS AND OLD GAS

(a) Ceiling price of $1.45 plus implicit GNP deflator plus 0.2 percent.

(b) All other old gas receives the contract price plus the GNP deflator plus 0.2 percent.

VIII. SEVERANCE TAXES

(a) Existing taxes are not included in the ceiling prices. Future increases in severance taxes are to be incrementally priced.

IX. ROLLOVER CONTRACTS

(a) Interstate

Contracts below $.54 can rise to that level plus GNP deflator plus 0.2 percent.

All others are contract price plus GNP deflator plus 0.2 percent.

(b) Intrastate

Below $1.00 at rollover, a ceiling price of $1.00.

Above $1.00 at rollover, new gas ceiling price.

State royalty gas and State-owned production, receive new gas ceiling price.

X. ALLOCATION AUTHORITY

Only in emergencies for maintaining residences and small commercial users after all emergency sales are used, authority is provided to allocate for coal convertable industries that burn gas.

XI. HIGH COST GAS

The following types would be deregulated at time of implementation of Incremental Pricing Rule 1:

(a) Devonian Shale
(b) Coal bed methane
(c) Geopressurized methane
(d) Gas from wells of 15,000 feet or deeper.

XIII. STRIPPER WELLS

(a) Ceiling price of $2.09 plus new gas escalation factors.

(b) Defined as gas from a well that produced less than 60 mcfd at the MER for three months.

XIV. INCREMENTAL PRICING

(a) Rule 1 (to be implemented by FERC within 12 months) would incrementally price industrial (not electric utility) boiler fuel for over 300 mcfd users up to the regional cost of distillate.

The incremental pricing account would consist of all amounts paid for gas above $1.48, except that for high cost gas it would be all amounts above the price of distillate landed in N.Y. harbor plus 30% (now about $3.40).

No Congressional review of Rule 1.

(b) Rule 2 (to be proposed within 18 months) would cover other industrial uses and be subject to one-house veto in Congress.

(c) Agricultural exemptions are provided.

Mr. MATSUNAGA. Mr. President, will the distinguished majority leader yield?

Mr. ROBERT C. BYRD. I yield.

Mr. MATSUNAGA. I congratulate the distinguished majority leader for the statement he has just made. I fully agree with him, and hope that every Senator will take time to read his statement, as it will appear in the RECORD.

If I may be permitted to make a prediction based upon the 14 months that I have been in this body, and 14 years in the House, and I make this prediction in all sincerity, the Senator from West Virginia will be recorded in history as one of the greatest, if not the greatest, majority leader this august body has ever had.

Mr. ROBERT C. BYRD. Mr. President, I just cannot find the words to thank the

distinguished Senator from Hawaii for his overly charitable, overly generous, overly gracious remarks. I am deeply grateful.

Mr. President, there is one more thing I want to say about this legislation. It is said that it is a measure that nobody wants.

Mr. President, if someone will bring a conference report in here on which everyone agrees on everything I will resign my seat from the Senate that day and say, "Hallelujah" and let out a whoop and a holler, if they bring in a measure that everybody likes.

Nobody likes everything in this conference report. I do not like everything in it. It is the kind of an issue that is so thorny, so complex, so deeply emotional, so deeply divisive, that it is impossible to bring in a conference report that everybody likes.

There is not a Senator in here, I guess, who likes everything in this measure. But on this issue there is not going to be any conference report brought in that every Senator likes. Any solution to it is probably going to be one that is not completely satisfactory to everyone.

Mr. LEAHY. Will the Senator yield?

Mr. PROXMIRE. I am happy to yield to my good friend from Vermont.

Mr. LEAHY. Mr. President, I shall try to be as brief as we Vermonters are reputed to be. I came back to the floor because I heard, over the speaker in our office, the comments the distinguished majority leader and others were making earlier.

As the majority leader knows, if the issue of the natural gas compromise were up today and I were constrained to vote right at this moment, I should have to vote against the conference committee report. But I agree completely with the distinguished majority leader that this matter should not be filibustered.

Proper debate, of course. A complex issue requires several days of debate. But, my God, we are fooling ourselves if we think that with the collective wisdom of 100 of us, we cannot handle the complexities of it within a few days. If we cannot, we do not deserve our salaries; we do not deserve to be here.

Debate it, vote it up or down. Do not play parliamentary tricks with motions to recommit solely for the sake of destroying the bill or killing it. If 51 Senators want to defeat the conference committee report, let them vote it up or down.

Mr. ROBERT C. BYRD. Right.

Mr. LEAHY. I agree with the majority leader in efforts to bring it up, have it debated properly and then vote on it. I, for one, will certainly do everything I can to help in that regard.

I shall spend a great deal of time studying it during the recess, do a great deal of reading on it. I expect to walk around the fields of my farm in Vermont and think about it and make up my mind how to vote.

I agree with the Senator from West Virginia that we ought to vote on it and not play games with the filibustering procedure.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Vermont (Mr. LEAHY). What he has just said is typical and characteristic of him. He will thoroughly study this matter; he will reach a considered judgment on it; and he is willing to show down, one way or the other.

That is what I am asking. I want the Senate to vote for the conference report, but I cannot control the will of the Senate. If it is the will of the Senate, 51 Senators, to reject it, I accept that verdict. But I want to see the Senate reach a verdict and let each Senator make up his own mind, reach his own judgment. I shall do what I can to support the conference report. I will support those who will do what they can to defeat it and I shall love them just as much afterward as before.

But let us have the vote. Let the majority prevail. If the conference report prevails, fine; I think that will be in the best interest of the country. If it is rejected, the Senate will have spoken.

I thank the Senator for his timely remarks.

(Conclusion of earlier proceedings.)

## RECESS UNTIL 10 A.M., WEDNESDAY, SEPTEMBER 6, 1978

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the provisions of the order previously entered, House Concurrent Resolution 696, as amended, that the Senate stand in recess until 10 a.m. on Wednesday, September 6, in this year of our Lord, 1978.

The motion was agreed to; and at 6 p.m. the Senate recessed until Wednesday, September 6, 1978, at 10 a.m.

## CONFIRMATIONS

Executive nominations confirmed by the Senate August 25, 1978:

### DEPARTMENT OF STATE

Mary S. Olmsted, of Tennessee, a Foreign Service officer of class 1, now Ambassador Extraordinary and the Plenipotentiary of the United States of America to Papua New Guinea, to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Solomon Islands.

### INTERNATIONAL ATOMIC ENERGY AGENCY

The following-named persons to be the Representative and Alternate Representatives of the United States of America to the 22d session of the General Conference of the International Atomic Energy Agency:

Representative: Dale D. Myers, of Virginia.

Alternate Representatives: Gerard S. Smith of the District of Columbia and Roger Kirk, of the District of Columbia.

### DEPARTMENT OF JUSTICE

Tyree A. Richburg, of Alabama, to be U.S. marshal for the southern district of Alabama for the term of 4 years.

### DEPARTMENT OF THE INTERIOR

Roger A. Markle, of Utah, to be Director of the Bureau of Mines.

### DEPARTMENT OF ENERGY

Ruth C. Clusen, of Wisconsin, to be an Assistant Secretary of Energy (Environment).

### FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

The following-named persons to be Members of the Federal Mine Safety and Health Review Commission for the terms indicated:

For a term of 4 years: Marian Pearlman Nease, of Maryland.

For a term of 6 years: Frank F. Jestrab, of North Dakota A. E. Lawson, of Pennsylvania.

Richard V. Backley, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of 4 years.

Jerome R. Waldie, of Maryland, to be a member of the Federal Mine Safety and Health Review Commission for the term of 2 years.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

### IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

*To be lieutenant general*

Maj. Gen. Howard MacLane, [redacted], U.S. Air Force.

### IN THE NAVY

Having been designated for commands and other duties determined to be within the contemplation of Title 10, United States Code, section 5231, Vice Adm. Harry D. Train II, U.S. Navy, for appointment to the grade of admiral while so serving.

Adm. Isaac C. Kidd, Jr., U.S. Navy (age 58), for appointment to the grade of admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

### IN THE ARMY

Army nominations beginning Rudolph E. Abbott, to be lieutenant colonel, and ending Michael K. King, to be first lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 24, 1978.

Army nominations beginning Frederick T. Abt, to be colonel, and ending John D. Rosenberger, to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 24, 1978.

### IN THE NAVY

Navy nominations beginning Keith E. Burtner, to be ensign, and ending Milton J. Hirshberg, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 24, 1978.

Navy nominations beginning Denis R. Boudreau, to be chief warrant officer (W-2), and ending Jerry W. Vance, to be chief warrant officer (W-2), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 24, 1978.

Navy nominations beginning Leon E. Ackart, to be captain and ending Thomas L. Dinges, to be ensign, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 28, 1978.

Navy nominations beginning William C. Absher, to be lieutenant (j.g.), and ending Edward P. Wyatt, to be lieutenant (j.g.), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 28, 1978.

Navy nominations beginning Paul A. Anderson, to be chief warrant officer, W-2, and ending Elmo G. Tucker, to be chief warrant officer, W-2, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 28, 1978.

# EXTENSIONS OF REMARKS

## THE PROBLEM OF DRUG ABUSE

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 17, 1978*

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for August 23, 1978 into the CONGRESSIONAL RECORD:

THE PROBLEM OF DRUG ABUSE

The headlines are frightening: Is the United States becoming a drug-ridden society? Drug use on the increase! Are drugs crippling our armed forces? Boom in illegal pills.

These headlines are supported by recent conversations I have had with community leaders and parents of young people in the Ninth District. Despite a lack of certain knowledge of the extent of drug abuse in their communities, these citizens are worried and frustrated. They are unsure how to deal with drug abuse. They want to do something, but they fear that hasty, unplanned measures could make the problem worse.

The widespread use of illicit drugs has spawned a new subculture in America, complete with its own vocabulary ("bennies," "roach," "crank," "co-pilots" and the like) and paraphernalia (spoons, pipes, needles, clips and assorted containers). The hard statistics on this subculture are disturbing. Some 43 million Americans have tried marijuana and 16 million smoke it regularly. Many Americans, especially those under 30 years of age, are beginning to accept the use of marijuana as a way of life. About 400,000 people are addicted to heroin, a deadly drug whose overdoses claimed 1,700 lives last year. About 1.8 million Americans pep themselves up with amphetamines or related stimulants. Some 1.1 million relieve their anxieties with powerful sedatives. Ten million Americans have tried cocaine, a new "glamor drug," and more than 1.6 million use it routinely. Over 1.4 million ease their moods with tranquilizers while another 1.1 million alter their minds with hallucinogens. A full six million young people use PCP, a dangerous unpredictable drug nicknamed "angel dust."

The problem of drug abuse is not confined to the young. Alongside the subculture of illicit drugs are the chronic users of alcohol and tobacco, substances which must be classified as drugs even though they are legal. Of course, the abuse of these drugs takes place in every age group and economic stratum. If the 93 million drinkers of alcohol and the 65 million smokers of tobacco are counted, more than 75% of all Americans are drug users. Perhaps the United States has already become the drug-dependent society announced in the headlines.

Beyond the people whose health is jeopardized by alcohol and tobacco, nearly a million others are treated for drug abuse each year. The annual cost is $500 million. Countless others suffer lesser effects of a "drug revolution" that is sweeping the American scene.

Although many users of illicit drugs pose no immediate threat to themselves or others, the line between drug use and drug abuse is not easy to draw. Anyone who uses drugs runs a risk. A visit to a typical hospital emergency room will almost always turn up an individual who mistakenly thought that some drug could be taken safely. Experts tell us that much workers absenteeism and many traffic mishaps result from drug use, but it is impossible to say exactly how much or how many. The harmful consequences of drug use for performance in school, social activities and family life are becoming more apparent every day, but authoritative information remains sketchy. My suspicion is that we have only seen the tip of the iceberg.

The federal government has responded to the problem of drug abuse by trying to reduce both supply of and demand for dangerous substances. To cut down supply, the federal government regulates the pharmaceutical industry and all others who handle drugs in the course of legitimate commerce or medical practice. It pursues those who operate outside legitimate channels. It aids state and local lawmen by providing technical assistance. The federal government also patrols our international borders and ports of entry to prevent smuggling. It helps to administer programs of crop substitution and eradication in foreign countries. It encourages foreign governments to step up their own drug enforcement efforts. All told, about $780 million will be spent on these activities in 1978, a nine-fold increase since 1969.

Reduction in demand for dangerous substances is a newer goal in the national strategy to curb drug abuse. During the past 15 years the federal government has instituted and expanded programs of treatment, rehabilitation, education and teacher training. Treatment and rehabilitation have received more attention to date, but many experts are arguing for improved education and teacher training. Their idea is to reach young people before drug abuse occurs. The cost of these programs will be $390 million this year, an eleven-fold increase since 1969.

The federal government is increasingly conscious of the role that it must play to crack down on drug abuse, but it cannot work alone. State and local officials, civic-minded citizens, parents and young people must also do their part. The problem of drug abuse is too important to ignore.

## A SOUND VETO

### HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 17, 1978*

Mr. FORD of Tennessee. Mr. Speaker, the President has caused a great deal of controversy with his veto of the bill H.R. 10929, the Department of Defense Authorization for 1979. I would like to share with you and my colleagues in the House of Representatives an editorial appearing in the recent editions of the Memphis Press-Scimitar which explains the issues involved very well. The editorial follows:

A SOUND VETO

President Carter, whose bent is to avoid fights with Congress, nevertheless was right to veto the weapons-buying bill because it funds a fifth $2 billion nuclear-powered aircraft carrier he and the Pentagon do not want.

The huge carrier, which Sen. William Proxmire has aptly dubbed "the dinosaur of the seas," was rammed into the bill by a potent lobby of nuclear seapower advocates, some naval officers and defense contractors.

At his news conference Thursday, Carter correctly explained that the $2 billion carrier with more billions needed for its planes and escort vessels would not enhance but weaken the national defense.

To pay for the glamorous supercarrier, its congressional backers diverted funds from less glamorous military necessities: ammunition, repair of ships and planes, equipment and training. All are vital to military readiness.

Carter spoke the plain truth when he said the Navy did not need a small number of very costly ships but a large number of less expensive vessels. In the nuclear age, when one weapon can take out one ship, naval strategy should go toward dispersal, meaning more ships but smaller ones.

Unfortunately the "carrier admirals"—the spiritual descendants of the battleship admirals who led the nation astray in the years before World War II—still have great clout along with their congressional and industry allies.

All three groups will try to thwart Carter and get their pet carrier back in the $36.9 billion defense authorization bill. This is one fight the president deserves to win.

## CONGRESSIONAL RECORD STATEMENT

### HON. JOHN J. CAVANAUGH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 17, 1978*

● Mr. CAVANAUGH. Mr. Speaker, as part of my ongoing effort to be accountable to the people who I represent, I have compiled for publication in the CONGRESSIONAL RECORD my complete voting record for the 95th Congress, through May 31. A most difficult yet essential element of representative government is communicating to constituents the action we take in their behalf. I intend to list all the votes I cast as a Member of the House of Representatives so the voters of the Second Congressional District of Nebraska will be fully aware of the type of representation I am providing.

Quorum calls are excluded from the listing in an effort to save space. Otherwise, the list is complete for all of 1977 and the first 5 months of 1978. Subsequent votes will be included in a future edition of the RECORD. The listings include the rollcall number, a brief description of the bill, my vote, and whether the measure passed or failed. Voting abbreviations include NV for not voting; NVA for not voting, but indicated opposition to the measure; and NVF for not voting, but indicated support for the measure.

It is my sincere hope that this listing will be a handy resource for my constituents who seek to examine the votes I cast on their behalf in Congress.

The voting record follows:

1977 VOTING RECORD

(2) Election of the Speaker of the House. O'Neill, 290; Rhodes, 142. Cavanaugh voted O'Neill.

(3) To bar amendments to Rules of the House for 95th Congress. Yes. Passed.

(4) Rules of the House for 95th Congress. Yes. Passed.

(9) Authorize the President to establish a 90-day emergency natural gas program. Yes. Passed.

(10) Approve journal of Feb. 1 proceedings. Yes. Passed.

(11) Emergency Natural Gas Act; 90-day emergency allocation program; 180-day emergency purchase program; delete ceiling price on gas purchased from intrastate suppliers for interstate markets. Yes. Passed.

(12) To adopt rule on resolution to create a Select Committee on Assassinations. Yes. Passed.

(13) To eliminate language defining scope of investigation of Select Committee on Assassinations. NV. Failed.

(14) To reestablish until March 31, 1977, the Select Committee on Assassinations. Yes. Passed.

(15) To approve journal of Feb. 2 proceedings. Passed.

(16) Emergency appropriation ($6.4 million) for Department of Interior's Southwestern Power Administration. Yes. Passed.

(17) To approve fishing agreements between U.S. and Bulgaria, Romania, East Germany, Poland, the Soviet Union, and the Republic of China. Yes. Passed.

(18) To approve journal of Feb. 9 proceedings. Passed.

(19) To direct Committee on Standards of Official Conduct to conduct an inquiry to determine whether Members of the House, their immediate families or their associates have accepted anything of value from the South Korean government or its representatives. Yes. Passed.

(20) To raise ceiling on Small Business Administration loans and investments in FY 1977 from $6 billion to $8 billion. Yes. Passed.

(22) To adjourn from Feb. 12 to Feb. 21. No. Failed.

(23) Reduced air fares for the handicapped and the elderly. Yes. Passed.

(24) To authorize medal to Marian Anderson in recognition of her distinguished career. Yes. Passed.

(25) Budget Resolution: To adjust revenue and spending levels downward, assuming permanent tax cuts instead of expenditures for job programs. No. Failed.

(26) Budget Resolution: Set spending ceiling and revenue floor for FY 1977. (Spending, $419.1 billion; revenue, $348.8 billion). Yes. Passed.

(27) To adopt rule on public jobs bill (Local Public Works Capital Development and Investment Act of 1977). Yes. Passed.

(28) To require that 65 per cent of funds for public works projects go to states based on number of unemployed in the state, and that 35 per cent of funds be set aside for states with unemployment rates in excess of 6.5 per cent. No. Failed.

(29) To base public works funds allocation on number of unemployed in state in relation to national rate. Yes. Passed.

(30) To make $6 billion available for public works projects on which construction could begin within 90 days. No. Passed.

(31) To extend arrest and police authority of fish and wildlife enforcement officials. No. Failed.

(33) To approve fishing agreements between U.S. and Spain, Japan, South Korea, and European Economic Community. Yes. Passed.

(34) Depository Institutions Amendments of 1977 on interest rate regulations, federal credit unions, Federal Reserve Banks. Yes. Passed.

(36) To close debate on H. Res. 287, a new code of financial ethics for the House of Representatives. Yes. Passed.

(37) To remove provision of ethics bill abolishing unofficial office accounts and, instead, increase official expense allowance. No. Failed.

(38) To remove ethics code restriction on Members' outside income. No. Failed.

(39) Code of financial ethics, strengthening financial disclosure requirements, prohibit unofficial office accounts and lame duck travel, and restrict franking privilege and outside earned income. Yes. Passed.

(41) To provide $200 million authority for disaster relief activities made necessary by severe weather in eastern U.S. Yes. Passed.

(42) To restore $81.6 million to budget for long lead time funds for Nimitz-class nuclear aircraft carrier. No. Failed.

(43) To restore to budget $371 million for converting U.S.S. Long Beach nuclear cruiser to anti-aircraft cruiser. No. Failed.

(44) Conference report (House-Senate compromise) on Third Budget Resolution calling for spending ceiling of $417.4 billion, revenue floor of $347.7 billion. Yes. Passed.

(46) To consider (adopt rule) on Kennedy Center Act Amendments. Yes. Passed.

(47) To reduce funds for Kennedy Center repairs from $4.7 million to $3.3 million. Yes. Failed.

(48) Kennedy Center repairs. Yes. Passed.

(50) To reestablish committee to study need for sports legislation. No. Failed.

(51) To accept resignation of Rep. Henry B. Gonzalez as chairman of Select Committee on Assassinations. Yes. Passed.

(52) To close debate on Tax Reduction and Simplification Act. Yes. Passed.

(53) To phase out $50 rebates for persons earning more than $25,000 per year; to provide $50 payment to recipients of social security and veterans benefits. Yes. Passed.

(54) Tax Act: To provide flat standard deduction of $2,400 for single persons and $3,000 for married couples. Yes. Passed.

(55) To provide tax credit of 40 per cent on the first $4,200 of wages paid a new employee who represents actual increase in employer's payroll. No. Passed.

(56) Tax Act: To substitute permanent tax cut in seven lowest brackets for $50 tax rebates. No. Failed.

(57) Tax Act: Final passage providing $12.7 billion in tax cuts and payments in 1977, change standard deductions, etc. Yes. Passed.

(59) To end debate on resolution establishing Select Committee on Ethics. Yes. Passed.

(60) To establish Select Committee on Ethics to issue interpretive regulations for new code of financial ethics. Yes. Passed.

(61) To recommit Judiciary Committee funding and earmark $300,000 to investigate subversive activities. No. Failed.

(62) To consider Supplemental Housing Auth. Act. Yes. Passed.

(63) Supplemental Housing to increase Section 8 contract term from 20 to 30 years. Yes. Passed.

(64) Supplemental Housing: Equal number of men and women on the National Commission on Neighborhoods: Yes. Passed.

(65) Supplemental Housing: To eliminate provision creating Commission on Neighborhoods. No. Passed.

(66) Supplemental Housing: Additional authority of $378 million for Section 8; $19.6 million for public housing; $10 million for urban homesteading. Yes. Passed.

(67) To raise overall loan limit of Small Business Administration. Yes. Passed.

(68) To prohibit importation of chrome from any nation which violates the human rights provisions of U.N. charter. Yes. Failed.

(69) To delay for 30 days effective date of Rhodesian Chrome bill. No. Failed.

(70) To allow prohibition on importation of Rhodesian Chrome. Yes. Passed.

(72) To allow and evaluate 90-day test televising of House proceedings. Yes. Passed.

(73) To consider (adopt rule) on Economic Stimulus. Appropriations. NV. Passed.

(74) To reduce countercyclical aid from $632.5 million to $250 million. No. Failed.

(75) To prohibit public works funds for projects unless at least 10 per cent of those employed had lived in area 30 days and been unemployed for at least 30 days. No. Failed.

(76) Economic Stimulus Appropriations: $23.3 billion. Yes. Passed.

(77) To consider (adopt rule) on Supplemental Appropriations for FY 1977. No. Passed.

(78) Supplemental Appropriations: $200 million for emergency assistance to low-income families to help with fuel bills. Yes. Passed.

(79) Supplemental Appropriations: To bar use of funds for salaries and expenses in connection with military pardon program. No. Passed.

(80) Supplemental Appropriations: To delete International Development Association funds. No. Failed.

(81) Supplemental Appropriations: $27.92 billion for various departments and programs. Yes. Passed.

(82) To consider (adopt rule) on National Aeronautics and Space Administration (NASA) Authorization Act. Yes. Passed.

(83) To authorize $4.05 billion for NASA, FY 1978. NV. Passed.

(84) To authorize $275 million for expanding public library services (two years). Yes. Passed.

(85) Unemployment Extension: To bar amendments to the rule. No. Passed.

(86) To consider (adopt rule) on Emergency Unemployment Compensation Extension Act. No. Passed.

(87) To extend Federal Supplemental Benefits (Unemployment Act) and reduce by one-half maximum number of FSB weeks. Yes. Passed.

(89) To amend Vocational Education Technical Amendments to remove $25 million limit on federal funds for state administration and no limit on local administration of vocational educational programs. No. Passed.

(90) Resolution protesting the lack of freedom of emigration from the Soviet Union. Yes. Passed.

(92) To consider (adopt rule) on Common Situs Picketing. Yes. Passed.

(93) Common Situs: To limit right to picket a common site to employees of persons "primarily engaged in the construction industry on the site." No. Passed.

(94) Common Situs: To exempt employers using "fast-track" or phased method of construction. No. Failed.

(95) Common Situs: To exempt certain residential builders. No. Passed.

(96) Common Situs: To require strike be approved by a majority of all workers affected, including union and non-union. No. Failed.

(97) Common Situs: Sarasin Substitute. Yes. Passed.

(98) Common Situs: Final passage, to permit picketing of an entire construction site even if the dispute was with one employer on the site. No. Failed.

(99) To approve journal of March 23. Yes. Passed.

(100) To authorize $85 million for Federal Aviation Administration. Yes. Passed.

(101) To authorize $868 million for National Science Foundation. Yes. Passed.

(102) To authorize $89.7 million supplemental funds for State Department activities. Yes. Passed.

(104) To create Select Committee on Congressional Operations. Yes. Passed.

(106) To provide that governmental reorganization plans become effective only if

both House and Senate approve the plan. Yes. Failed.

(107) To renew for three years the President's authority to submit reorganization plans to Congress, to become effective within 60 days unless rejected by either house. Yes. Passed.

(109) To consider (adopt rule) bill to continue the Select Committee on Assassinations. Yes. Passed.

(110) To withdraw authority given Assassinations Committee to bring, defend, or intervene in lawsuits. Yes. Passed.

(111) To go into secret session to continue consideration of Assassinations Committee resolution. No. Failed.

(112) Final passage, to continue Select Committee on Assassinations. Yes. Passed.

(113) To approve section of H. Res. 393 authorizing additional funds for House leadership offices. Yes. Passed.

(114) To authorize additional funds and personnel for House majority and minority leadership offices. Yes. Passed.

(115) Strategic and Critical Materials Stockpiling Act Amendments. Yes. Passed.

(116) To extend for one year authorizations for national cancer program; heart, blood vessel, lung and blood program, etc. Yes. Passed.

(117) To increase authorization for home health services demonstration and training programs. Yes. Passed.

(118) To extend for one year authorizations for grants to states for material and child health and crippled children services, etc. Yes. Passed.

(119) To restore to VA authorization to provide medical services on a fee basis to certain veterans outside VA facilities. Yes. Passed.

(120) To authorize $30 million (two years) for VA grants to states to construct veterans homes and nursing homes. NV. Passed.

(121) To change effective date of sick pay exclusion to Jan. 1, 1977, for taxpayers who wish to claim old sick pay exclusion. Yes. Passed.

(122) To adopt conference report on extending Federal Supplemental Benefits Program through Mar. 31, 1978, and reduce number of FSB weeks from 26 to 13. Yes. Passed.

(123) To consider (adopt rule) on Debt Collection Practices Act. Yes. Passed.

(124) To amend Consumer Credit Protection Act to regulate debt collectors' activities, including a prohibition on harassing and intimidating consumers and making false or misleading representations. No. Passed.

(125) To authorize $20 million for earthquake disaster relief activities in Romania. Yes. Passed.

(126) To authorize grants to states to help local and state educational agencies provide career education programs in elementary and secondary schools. Yes. Passed.

(127) To protect petroleum franchises from cancellation. Yes. Passed.

(128) To consider (adopt rule) on Federal Water Pollution Control Act Amendments. No. Passed.

(129) To authorize $18.2 billion (three years) for municipal wastewater treatment works. Yes. Passed.

(130) To approve journal of April 5 proceedings. Yes. Passed.

(131) To consider (adopt rule) on Increased U.S. Participation in International Banking Agencies. Yes. Passed.

(132) To require U.S. opposition to international banking loans for production of palm oil, citrus and sugar. No. Passed.

(133) To provide withdrawal of U.S. funds from international banking agencies if the agencies provided financial aid to Cuba, Vietnam, Laos or Cambodia. No. Failed.

(134) To increase to $5.2 billion (four years) U.S. participation in several international development lending institutions. Yes. Passed.

(135) To permit tax deductible business use of residence for day care services. Yes. Passed.

(136) To approve journal of April 18 proceedings. Yes. Passed.

(137) To amend Federal Rules of Criminal Procedure, changing language relating to secrecy of grand jury proceedings, cases tried by juries of less than 12 persons, and cases tried without a jury. Yes. Passed.

(138) To authorize $288 million for research, development and demonstration projects of Environmental Protection Agency. Yes. Passed.

(139) To consider (adopt rule) on Export Administration Act Amendments. Yes. Passed.

(140) To extend Export Administration Act through FY 1979. Yes. Passed.

(142) To adopt conference report on FY 1977 supplemental appropriations of $29 billion. Yes. Passed.

(143) Supplemental appropriations: $12.5 million for Uniformed Services University of the Health Sciences (trains doctors for the armed services). No. Passed.

(144) Supplemental appropriations: $20 million to reimburse local governments for snow removal costs in emergency areas. Yes. Failed.

(145) To approve journal of April 21 proceedings. NV. Passed.

(146) Defense: To prohibit procurement of Airborne Warning and Control System aircraft. No. Failed.

(147) To allow Treasury Department to earn interest on its idle tax and loan accounts by investing in interest-bearing securities. Yes. Passed.

(148) Defense: To deactivate 17,000 troops stationed overseas and reduce total force by 50,000. Yes. Failed.

(149) Defense: To place all future enlistees under congressional retirement plan. Yes. Failed.

(150) Defense: To prohibit use of funds to advertise the review program for less-than-honorable discharges. No. Passed.

(151) Defense: To authorize $35.9 billion for military procurement, research and development; to set active duty troop level at 2,090,425. Yes. Passed.

(152) To consider (adopt rule) First FY 1978 Budget Resolution. Yes. Passed.

(153) Budget Resolution: To increase revenue target by $900 million (Third 1977 Budget Resolution), by assuming deletion of business tax credits contained in Tax Reduction Act of 1977. Yes. Failed.

(154) Budget Resolution: To reduce targets for budget authority and outlays by $7 million by assuming deletion of funds for recent pay raise for Members of Congress. (Cancel cost-of-living raise). Yes, Passed.

(155) To resolve into committee of the whole House to consider First Budget Resolution. Yes. Passed.

(156) Budget Resolution: To transfer $7.95 billion from defense spending to reduce the national debt. No. Failed.

(157) Budget Resolution: To increase target for budget authority for defense by $4.15 billion and target for defense outlays by $2.3 billion. No. Passed.

(158) Budget Reolution: To affirm previous vote to increase defense targets. No. Passed.

(159) Budget Resolution: To transfer $6.5 billion from military spending into spending for domestic programs. No. Failed.

(160) Budget Resolution: To increase budget authority by $249 million for Law Enforcement Assistance Administration. No. Passed.

(161) Budget Resolution: To increase budget authority and outlays by $500 million in veterans' benefits and services. Yes. Passed.

(162) Budget Resolution: to reduce authority and outlays in natural resources by $100 with the intention of striking funds for water projects. Yes. Failed.

(163) Budget Resolution: To reduce outlays by $23 billion; deficit by $18 billion; assume permanent 10 percent across-the-board tax cut for individuals. No. Failed.

(164) Budget Resolution: to reduce outlays target by $55 billion; increase revenue targets by $11 billion; install 10 percent tax cut. No. Failed.

(165) Budget Resolution: Final passage, to set new budget at $505.7 billion; outlays at 466.7 billion; revenues at $398.1 billion; deficit at $69.6 billion. No. Failed.

(166) To approve journal of April 27 proceedings. No. Passed.

(167) To approve conference report, $318 supplemental appropriation for Section 8 housing. Yes. Passed.

(168) Funding ($2.5 million) for Assassinations Committee. Yes. Passed.

(169) To consider (adopt rule) on strip mining bill. NV. Passed.

(170) To resolve into committee of the whole. NV. Passed.

(171) To ban strip mining in Western alluvial valleys. NV. Passed.

(172) To require $300 million from Outer Continental Shelf oil leasing be diverted to pay for abandoned strip mine reclamation. NV. Failed.

(173) Motion to recommit Surface Mining Control and Reclamation Act. NV. Failed.

(174) Passage of strip mining bill. NV. Passed.

(175) Appropriations for U.S. territories. NV. Passed.

(176) To authorize $31.1 million for San Luis reclamation project. NV. Passed.

(177) To authorize $1.6 billion for Energy Research and Development Administration. NV. Passed.

(178) Veterans Administration Medical Facilities Acquisition Act, requiring tighter congressional oversight. NV. Passed.

(179) To permit state legislators to deduct away-from-home expenses in connection with legislative duties in 1976–77. NV. Passed.

(180) To extend Defense Production Act for two years. NV. Passed.

(181) To provide $440,000 for expenses of Select Committee on Congressional Operations. NV. Passed.

(182) To extend Export-Import Bank authority to coincide with new fiscal year; require consideration of human rights in authorizing loans; congressional review of nuclear-related loans. Yes. Passed.

(183) To strike language from Public Works Employment Act which would require spending money previously allocated for water resources projects. No. Failed.

(184) Final passage, Public Works Employment Act (jobs bill). Yes. Passed.

(185) To consider (adopt rule) on U.S. Railway Association Authorization for FY 1978. Yes. Passed.

(186) To require feasibility reports on verifying arms control agreements. Yes. Passed.

(187) To authorize $14.6 million for Arms Control and Disarmament Agency. Yes. Passed.

(188) To authorize $13 million for administrative expenses of U.S. Railway Assn. Yes. Passed.

(189) To adopt rule on Foreign Relations Authorizations. Yes. Passed.

(190) To provide $20.1 billion budget authority for economic stimulus package. Yes. Passed.

(191) To reduce authorization for U.N. Ambassador's office. No. Failed.

(192) To reduce U.S. contribution to United Nations. No. Failed.

(193) To change language of Foreign Relations Authorization to require that any new Panama Canal treaty must "protect the vital

interests of the United States," instead of "prohibiting use of funds for negotiations to surrender or relinquish the Panama Canal." No. Passed.

(194) To prohibit use of foreign relations funds to negotiate any aid for Vietnam. Yes. Passed.

(195) $1.68 billion for foreign relations operations. State Department, etc. Yes. Passed.

(197) Budget Resolution: To increase defense spending targets by $8 billion in authorizations, $2 billion in outlays. No. Failed.

(198) Budget Resolution: To increase defense authorization by $2 billion, outlays by $1 billion. No. Failed.

(199) Budget Resolution: To increase defense authorizations by $1 billion, outlays by $1 billion. No. Failed.

(200) Budget Resolution: To reduce defense authorizations $1.15 billion and outlays target by $300 million. No. Failed.

(201) Budget Resolution: To increase authority and outlays for veterans' benefits by $175 million, with intention to provide new pension for World War I veterans. No. Passed.

(202) Budget Resolution: To increase defense spending targets $3 billion and outlays $2 billion; decrease budget authority and outlays targets for interest on national debt by $2.1 billion; and increase revenue target $3.3 billion. No. Failed.

(203) Budget Resolution: To reduce outlays by $24 billion and the deficit by $21 billion and give across-the-board 10% tax reduction for individuals. No. Failed.

(204) Budget Resolution: Final passage, setting spending limit at $464.5 billion. No. Passed.

(205) To consider (adopt rule) on Housing and Community Development Act Amendments. Yes. Passed.

(206) To establish Eleanor Roosevelt National Historical Site at Hyde Park, N.Y. Yes. Passed.

(207) To authorize $1.1 billion through 1982 for programs under Education of the Handicapped Act. Yes. Passed.

(208) To extend deadline for Civil Rights Commission report on age discrimination. Yes. Passed.

(209) Higher Education Technical Amendments. Yes. Passed.

(210) To authorize funds and continue appointment of counsel to represent the House and its Commerce Committee in court case, U.S. versus AT&T. Yes. Passed.

(211) To recommit resolution dismissing the election of Rep. Gammage. No. Failed.

(212) To dismiss the election contest against Rep. Mikva. Yes. Passed.

(213) To dismiss the election contest against Rep. Pursell. Yes. Paseed.

(214) To approve journal of May 9. Yes. Passed.

(215) To prohibit Alaskan pipeline oil from being exported for two years. No. Passed.

(216) To increase authorization and extend Tinicum National Environmental Center. Yes. Passed.

(217) To authorize U.S. contribution to International Commission for Conservation of Atlantic Tunas. Yes. Passed.

(218) To authorize $13.5 million for Commercial Fisheries Development Act for FY 1978–80. Yes. Passed.

(219) To strike dual formula for allocating Community Development Block Grants. No. Failed.

(220) To approve journal of May 10. Yes. Passed.

(221) To require 25% of Urban Development Grant funds go to communities under 50,000 population. No. Passed.

(222) To delete sanctions against communities which refuse to participate in flood insurance programs (Housing and Community Development Act). No. Passed.

(223) Final passage, reauthorizing for three years the Housing and Community Development block grants. Yes. Passed.

(224) To adopt rule (consider) International Development and Food Assistance Act. Yes. Passed.

(225) To reduce U.S. funds by $25.8 million to international development agencies. Passed

(226) To remove tobacco as an agricultural commodity eligible for export financing under P.L. 480 program. Yes. Passed.

(227) To prohibit aid to Vietnam and Cuba under P.L. 480 program. No. Passed.

(228) To authorize $1.68 billion for international development and international disaster assistance. Yes. Passed.

(229) To consider (adopt rule) on Intergovernmental Antirecession Assistance Act. Yes. Passed.

(230) To resolve into Committee of the Whole. Yes. Passed.

(231) To base countercyclical fund on state and local effort, instead of unemployment rates. Yes. Failed.

(232) To extend countercyclical aid program and revise formula. No. Passed.
